

Initially inspired by a Homebrew Idea for a custom Action Economy by The Dungeon Coach, the creator of DC20 Rpg.

Writing and Design: Samuel Gallew

©2025 Dice Golem Productions

Special Thanks to all the wonderful content creators who shared their ideas for others to take inspiration and guidance from (you guys are the bomb)!

And of course, no game would be complete without the GMs, Players and Playtesters who support the game through feedback, or enjoying a wonderful hobby.

A note on Neural Networks (a.k.a. AI): Generative Software can be a powerful tool in the correct hands, but has to be trained on pre-existing work, which often happens without permission. Additionally, present government systems aren't prepared to handle such software in public use.

Our perspective: The use of generative software in Mages & Mansions is acceptable for prototyping, testing, workflow aids and private or Non-commercial use.

However, we believe it is unacceptable to use such software for official, paid, or otherwise replacement for paid professional content, especially as human beings need the money in order to live in this economy.

We cannot promise that we will never use generative software, or let it bleed into any part of the content, and we cannot truly give you the comfort that AI will never be involved in this system. So we make our claim that AI is not involved in this book, and ask you to judge the work for yourself in ALL cases.

This work is permitted for distribution and public use, except for the production and sale of physical copies, which must be approved.

Use of any Original Images and Characters within this work is also permitted, provided clear and proper credit is given to the original authors and/or source material.

Introduction

Quick Start Guide

Game Night? 30 Minutes? All of the schedules magically aligned for one session out of the hundreds you want to play? No problem!

Players will need:

- Lots of Paper (Optional for masochists). Might want a binder.
- Pencils that will probably disappear when you need them most.
- Dice (d4, d6, d8, d10, d12, d20). The more the merrier.
- Chaotic energy worthy of a toddler that will probably make the GM go insane (Highly Recommended).
- A fun voice (Optional).

GM(s) will need:

- Unstable Mountains of Paper, or a computer (Optional for masochists of the highest degree).
- Pencils that you will forget on your ear.
- Voices or sounds that would probably get you into an asylum if taken out of context.
- 0 to 30 Initiative tracker sheet located on pg. 620 (You'll thank me later).
- 1st Grade drawing skills (Optional).
- At least 1 friend who is willing to put up with your antics (Optional for Solo Play).
- A schedule.
- Your right to remain silent.
- A handbook for handling the 5 stages of grief (Optional).
- Stress ball (Optional).

Player Prep Steps:

1. Start with a blank Character Sheet from pg. 621.
2. Put a 10 in each Ability Score, and set your Proficiency Bonus to +2.
3. Select an Ancestry (pg. 15), and record the information provided (Skip Feats for now).
 - 3.1. Alternative: add 2 to separate Ability Scores.
4. Select a Class (pg. 27), and record the information provided (again, Skip Feats for now).
 - 4.1. If playing a Spellcaster, treat all the Spells on your sample Spell List (pg. 56) as if they were Prepared.
5. Select a Background (pg. 21), and add the Sample Equipment from the table (record the Feat Option and Background Equipment for later).
6. Set your AC to 10 + your Dexterity Modifier
7. Add the Hit Points from your Ancestry and Class, plus your Constitution Modifier.

If Hit Points reach 0, you start Dying (pg. 81). But for learning the system, just become unable to act until the End of Combat, or see Incapacitated (pg. 84) while waiting, to see what you can do.

You can skim Feats and Spells (for Spellcasting) while you aren't doing anything, or after the game.

Note: This is only for a 1st level Character. If you want a higher Level, or more complete character, please reference pg. 14 & 119.

GM Prep Steps:

1. Ask your Players what is okay, and what isn't. More importantly: write it down where you can find it.
2. Scribble a quick map by making some lines and call them walls. If it looks like a box, call it a room. If it looks like an amoeba, call it a cave. If it looks like a close up picture of a pimply face, call it a forest.
3. Resist creating a massive world from scratch!
4. Assemble a group of monsters with 1 or 2 hit dice, equal to the number of Players you have, or more if you're confident.
5. Handwave any and all logic for why the party is there, and working together.
6. Prepare a short and quick description for each monster, and at least three parts of the surroundings. Or none at all!
7. Resist creating a massive world from scratch!
8. Practice talking in the shower, car, closet, or other conveniently isolated place, until you're ready to make some noises that probably shouldn't come from a sane person.
9. Think of a handful of random names to give your NPCs (e.g. Tim the Ferocious) in case you need them.
10. Resist making a massive world from... okay, maybe a little bit is okay.

Remember: You don't have to copy other people, and you don't have to avoid what they do. Just be sure to take your own spin on things.

Also, the Players are the ones that really tell the story, while the GM builds circumstances and obstacles around them as the referee. So focus on building situations, rather than a massive story. And if they happen to figure out that some random NPC is actually a villain, roll with it!

Running the Game:

1. The GM describes a scene, and Players declare what they want to do.
2. People in the scene (a.k.a NPCs) are voiced by the GM, or a conveniently placed friend who knows enough to speak for the person.
3. When a Player wants to do something that requires skill, or can go wrong (e.g. climb the Barbarian), the GM asks for a Skill Check, which is equal to a d20, plus whatever bonuses the Player has (such as Proficiency).
 - 3.1. If what the Player is trying isn't possible, don't make them roll. Same if it's incredibly easy. Just remember to describe the efforts involved to keep things interesting.
4. When any Creature takes a hostile/competitive Action towards another Creature, start Combat.
 - 4.1. Everybody rolls a d20, adding Perception*, which is to be recorded immediately. The Creature that took the aggressive action then takes their Turn before all others.
 - 4.2. Creatures go in order of Initiative, highest to lowest. Monsters take actions equal to their Initiative/Round (unless you want to record them like Players), while Players reduce their Initiative by the number of Action Points they use (See below for some basic Actions).
 - 4.3. When the last Creature has taken a Turn, move all Creatures up in initiative by an amount equal to their Class Initiative Modifier + their Constitution Modifier, or Actions per Round. This cannot exceed their Movement Speed, or half their Flying Speed.
 - 4.4. Repeat until hostile/competitive action is no longer needed.

*: This can vary. See pg. 75 for more information

Combat Actions (Simplified):

- **Step (Free, Limit: Once per Round, can be used at any time):** Move 5 feet, (1 square).
- **Move (1 Action, limited by movement Speed):** Move up to 10 feet (2 squares), or Stand Up from the Prone condition.
 - *Note: Costs 2 Actions with Medium Armor, or 3 with Heavy.*
- **Attack (Cost is listed on the Weapon or Spell):** Roll 1d20 + your Dexterity Modifier + Proficiency if you are Proficient in the Weapon. If you meet or exceed the Target's AC, you hit, and deal Damage, which always adds Strength for weapons. Crits double all Damage dice unless something says otherwise.
 - *Note: You can attack twice with each limb, and/or cast two Spells in a single Turn (this is the Multi-Attack Limit).*
 - *Note the Second: Spell Attacks use Intelligence and Wisdom instead of Dexterity and Strength respectively.*
- **Dodge (3 Actions/Reactions if Targeted):** Attacks against you are at Disadvantage, or reduce the Damage by your Dexterity Modifier.
- **Dash (3 Actions, Limit: 1/Round):** Take the Move Action once for free, and double your Speed this Turn. You cannot take Actions without the Move Trait this Turn, and cannot use this if you took any Action without the Move Trait.
- **Prepare (Free):** Choose an Action, and an observable Trigger. Any time that trigger happens in a way you can detect, you may perform that Action, provided you still have Actions (even if it happens multiple times).

That's it!

You can use your own methods from here on out, homebrew anything you like, or reference this book further for maximum gaming powah! Just remember: It's a game, not a competition. And the RPG Police won't kick down your door for ignoring the rules in this book, or any other expansions that may or may not be written in the future.

But of course you'll want to reference this book some more! So here's a collection of material for you to study:

GMs:

- Running a Game (pg. 8)
- Travel (pg. 98)
- Rest (pg. 105)
- Skills & Ability Scores (pg. 113)
- Monsters (pg. 508)
- Homebrew Aids (pg. 604)

Players:

- Backgrounds (pg. 21)
- Feats (pg. 130)
- Available Actions (pg. 77)
- Skills & Ability Scores (pg. 113)
- Items (pg. 339)
- Spells (pg. 422)

What is Mages & Mansions?

Mages & Mansions: a Limitless System (MaM:aLS for short) is a TableTop Role-Playing Game (or TTRPG) that takes inspiration from a system of the 5th(ish) variety, designed by some Wizards of the Line Between Land and Ocean, some homebrew made by The Dungeon Coach that ended up in DC20 RPG, and from Pathfinder 2e. As such, you will see common threads, even if they don't match exactly.

The primary design is intended to be Simple to Learn, Hard to Master with lots of risks to take and subvert.

While it should be easy to pick up for a new group of Players and a Game Master (GM for short), the ultimate interactions between each system makes each choice meaningful beyond the obvious.

As a consequence, you may also find lots of inspiration and rules that can be applied in many other systems including PF2e, DC20 RPG, and the 5th variety thing that was mentioned earlier.

To further aid in this goal, this book contains a decent amount of assistive materials, such as templates for designing game content, trackers, and tips/tricks to streamline and improve a game.

But most importantly, we want to empower GMs to create situations that let Players feel powerful and epic, without the hurdles feeling trivial. However, we understand that you will undoubtedly find situations where your encounters are much easier or harder than they're supposed to be.

It's okay. We had trouble with it, and have embraced it as part of the design (seriously, good CR is practically impossible. We tried.).

But without further ado, it's time to delve deeper into the wonderful world of Mages & Mansions.

Pre-Game Fundamentals

GM Fundamentals

The role of a GM is to act as a facilitator, and a mediator between the Players and the Game. Sometimes it involves redirecting conversations about cheese and politics back towards a game, or watching the insanity with intense interest, while taking a few notes for next session.

While the role of GM is the most important in any TTRPG, it doesn't have to be a role to dread for fear of becoming a Forever GM. It's actually more fun than you might think, assuming your Players are actively engaging with the game.

And as a side note, once you accept Cliché openings, adventures, encounters, and so on, you'll find that it's not actually as difficult as you think to run a campaign.

But to make a long story short, take inspiration from anything and everything you want to. And if you can't adapt or re-use, then create.

GM Basics: Running a Game

To start, you may want to pick a setting such as: Sci-Fi Dystopia, Primitive Wonderland, Modern City, Classic Fantasy, or any other combination you like! This will help you decide what fits, and what doesn't, as well as what kind of adventures you can prepare.

Next, you may want to make an encounter, using Monsters that you think are cool, but doesn't have more Hit Dice than the Party has. Just pick a fun looking Monster, and make sure to mix them up a little by adding something different. Then scatter a few of each around the map, being sure to avoid overwhelming AND overpowering the Players. One or the other is usually okay in moderation.

Finally, prepare some notes for environments such as a ship, a cave, a shop, a dungeon, a house, a mountain, a forest, or... I should stop before you skip half the book.

But preparing some environments in advance for the Players to explore and/or fight in, can make it easier and smoother to run a game.

Other than that, just make sure the Players have what they need to succeed, and have fun! I know it's not a lot, but you don't really need that much of a base to start a One-Shot, or even an entire Campaign. And if you want a justification, feel free to ask your Players for input.

More advanced tips may be located throughout this book depending on what you're looking for, which can prove invaluable to someone who is just starting to learn how to run ANY new System. Just learn at your own pace, and don't burn yourself out.

Solo Play

On the off chance that you don't have a group or a GM to play with, you may be forced to play solo. Of course you can also use it for beta testing homebrew content and concepts, helping you run your own games, or just getting through that catalog of unused characters you have sitting around.

However, as there is an entire community dedicated to this, and many books, we'll keep it simple with an Oracle and Interventions.

An Oracle is a simple table that helps you to figure out what is going on in the game world, and essentially acts as your Game Master, though it won't call for Ability Checks. You have to make that call yourself.

An Intervention is something that keeps the game from getting stale, and is usually from a random prompt or plot thing that gives you something new to interact with.

When you have a Yes/No question about the world such as: "Is everything normal about this room?", "Did the king really sell his kingdom for a bowl of oats," or "Is that spoon a mimic?" you roll the Oracle for an answer.

The Oracle that comes with M&M takes inspiration from Daggerheart's Duality Dice. You roll 2d12, dedicating one for Hope, and one for Fear (If you don't have distinguishable d12s, you can roll one die twice, and treat the first one as Hope).

Total (DC 13)	Hope vs. Fear	Result
Fail	Equal	No, and...
Fail	Fear Greater	No
Fail	Hope Greater	No, but...
Success	Fear Greater	Yes, but...
Success	Hope Greater	Yes
Success	Equal	Yes, and...

If you get an and... or a but... then you work to come up with the result of that modification. You may need some random words to help with that. But after about 3 and... or buts... you may want to ignore Hope and Fear, just taking a straight Yes or No.

As for Interventions, record the number of times you roll with Hope and Fear individually. You can use a d6 that you reset to 1, or a d4 that you remove until you roll with hope or fear again.

Once you hit the maximum of a d6, pass the maximum on a d4, or otherwise accumulate 5 Hope or Fear, you reset and roll a d4:

d4	Result
1	You add something like an item, Creature or organization.
2	Something happens in the world around you, which creates some sort of obstacle or opportunity for you.
3	Something changes for, or about an item, Creature or organization.
4	Some event pushes the plot forward, complicates it, or otherwise influences it.

If you roll this Table based on Hope, the result is probably in your favor, and vice versa with Fear.

Whenever you get your Intervention result, you should start asking the Oracle questions about what it is, perhaps based on a random set of words, or otherwise.

You could also use Hope in place of GM Inspiration, and Fear to decide how many Hit Dice of Monsters you need to include.

Other than that, just have fun with this. You can use this method, a different method, or mix and match! Who knows? Maybe you'll run into a ladder that becomes important to the entire campaign!

Oh, and yes, you can in fact run a module with it.

Handling Complications & Table Problems

As time goes on, you'll inevitably encounter something that will make the game less enjoyable, or even stop it entirely. And while these could be considered a "Advanced" topic, we cannot stress how important it is for ALL GMs, and even Players to learn this stuff.

The best solution to almost every complication and controversy is prevention. And while you can't predict everything, we do have some guidelines to reference.

GMs AND Players

- Understand that not everybody thinks the same. If something upsets you, state as much in a controlled manner. And sometimes what's fun for you isn't fun for everyone, or even anyone else.
- Respect the other people at the table, especially your GM. They are sacrificing precious time and energy in order to play, and matters should be taken with some degree of seriousness. This includes being mindful of boundaries, and not forcing others into uncomfortable scenarios.
- Encourage fun ideas, and talk about how to better implement or replace any rules that aren't working, and ask others how they feel about the rules. Especially the GM!
- Share the spotlight, but don't force others to take it. The best way to do this, is to call somebody by name, and ask a reasonable question based on what's happening in the game.
- Keep electronic device usage to communication, information tracking, and other QoL purposes. If it doesn't pertain to the game, either put it away, step away, or keep it short.
- Refrain from PvP situations including theft, unless everyone agrees in advance. Just remember: Consent is key.
- Try to keep the primary focus on what's happening in the game. It can be fun to bring up details that frustrate an NPC or make everyone laugh, but try not to talk over the GM when they're helping to resolve an action, or over a Player when they've been asked something.

GMS

- Consider player abilities and preferences when preparing an adventure or campaign. It's a good idea to plan for one or more use cases.
- Don't get upset when Players go off the beaten path, or do something unexpected. It's a game, and you aren't omnipotent.
 - *Tip: Side-quests can be turned into the main quest if the Party really isn't latching onto your plot hooks.*
- Seek, accept and apply Player feedback. You'd be surprised what ideas they can come up with. They might even talk about ideas during a session.
- Give Players some silence, and room to talk, particularly the quiet ones. Sometimes they just need a second to voice their opinions. Plus, it might help them if they're feeling anxious.
- Include REASONABLE consequences (preferably with warning). If the Players learn that there are no consequences for their actions, they will lose interest in playing or not care about what they do. But if you punish them unreasonably, they will also lose interest in trying new things. And a consequence doesn't have to linger forever. Just don't make it a slap on the wrist.
- Let Players know when there is an exception to the rules, and especially when you like what they're doing (like when that one person decides to suplex a Dragon, or do something that normally requires a Feat).
- Please refrain from guilt-tripping without discussing it with everyone first.

Players

- Work together to solve problems, even if your character is supposed to be a “Lone Wolf” kind of person. And be sure to communicate and come to an agreement before you EVER walk away from the others, for anything that takes more than a few minutes to resolve.
- Keep an eye on the battle map during Combat, and think of what you want to do when your Turn comes around. And if you have trouble with picking Spells, write a short-hand list of good options.
 - *Tip: Spells on the Character Sheet are divided based on how they’re used.*
- Tell the GM when you really like something they do, even if it is in passing. More importantly, tell them if there’s something you want.
- Be sure to make a “wishlist” of Items, Spells and Feats you want to play around with. Then tell your GM about it so they can include something similar as a reward, or a potential Item you can buy.
- If you have a powerful build, be sure to leave room for your allies to work with. This way, everyone has a chance to be involved in the game.
- When the GM offers you an opportunity to go on an adventure, engage with it unless you and the rest of the Party are already working on something else. In that case, take the time to think about your options.

The Boiling Point

Despite all these preventative measures, no game or table is perfect, and issues will eventually arise. So in order to help keep things going smoothly, here are some steps that can be taken as a GM in resolving these problems.

1. Discuss the issue with all involved Players, but keep the conversation to a safe and private space. And most importantly: stay calm.
2. Listen to the Players, and DO NOT talk over them without a very good reason. If you need to interject, it’s best to start with a silent gesture. But more importantly, discuss ideas to resolve the issue.
3. When you come up with an idea to solve the problem, offer it to all Players that will be affected. But more importantly, be willing to compromise. A less-perfect game is better than a terrible game.
4. Write it down. Even if it’s just a digital note, you want some way to recall your solution when you need it again.
5. **LAST RESORT:** If a SEVERE problem has arisen at least 3 times, you’ve already worked to get it fixed, and it’s causing active hostility, discuss with your Players if it would be best to kick a player from your group. If you all agree, then and only then is it acceptable to kick a Player from your group. I repeat: This is a last resort ONLY.

Examples and Solutions

Murderhoboing

- Regularly declares an Attack before anybody can stop them, or try other options, and following through.
- Rolling Attack/Damage outside of combat without being asked.
- Never trusting others (especially NPCs), even when given every reason to do so.

Solutions

- Reward Problem Players with fewer extra Feats, Loot or XP than Non-Problem Players (XP system on pg. 118 already does this somewhat).
- Discuss why Problem Players doesn't trust said NPCs, and ask what you can do to compromise.
- Add candies or snacks on top of the Monsters the party can freely attack, and allow them to eat and share said candy if they win. But not on NPCs.
- Make important NPCs wary of the party, and offer less of their services, or increase Persuasion and Deception DCs against them.
- **(NOT RECOMMENDED)** Give Problem Players the Wanted Bleed (pg. 153).

Scheduling Spiral of Death

- Players "forgetting" important errands they need to run, time and time again, even after confirming that the time/location would work.
- Requesting to reschedule the game over and over again, even when other Players have previously stated that certain times and dates don't work.
- Simply not showing up to sessions, with no warning, no messages, and no excuse, or better yet: after saying they'd be there.

Solutions

- Sometimes life happens, and circumstances change. If this is the case, talk it out with as much of the group as possible, and see if it would be better to re-schedule or find a fair way to remove the player from the game.
- Play on if you have at least 50% of all Players who were present for the previous session, and either justify the disappearance/absence of the player's character, or have someone else control them in Combat.

Excessive Powergaming

- Utilizing powerful combos that render encounters pointless, or underwhelming for them, but impossible for anyone else to handle, or participate in.
- Getting bored of Combat.
- Needing to use ridiculously strong Monsters to do anything.
- Utilizing Homebrew that acts as an "I win" card.
- "Infinite" Positive Gain cycles such as the Alacrity Loop aren't necessarily Problematic Powergaming, and are only an issue if they cause any of the above issues. Check the rules again if you find one.

Solutions

- Let it happen for a short period, and then talk to the Players to come up with a solution if it is found to be an actual problem (e.g. Players groan or get bored, o enemies get to act in a reasonably Sized combat, etc.). Sometimes though, it just happened to be an awesome moment.
- Ask that the combo be used less, or if there are ways to modify it to make it less of a problem, and more of a super-cool power move (a.k.a: A Blast, or use it on allies).
- **(Use with Moderation)** Utilize Abilities, Resistances, Vulnerabilities and Weaknesses that make alternative solutions much more effective.
- Add more/stronger Encounters and Monsters to the adventures. Do this progressively.
- Give other Non-Powergaming Players extra Feats, or special items (designed for them) to help them keep up, or get their combos going.
- Use the XP system on pg. 118. It's designed to equalize experience gain based on struggle, rather than kills.

Evading the Plot

- Ignoring Plot hooks, in order to do random and unrelated things (such as shopping, or exploring for quests).
- Complaining about a lack of content.
- Complaining about “Railroading” (Sometimes this is an issue on your end).
- Intentionally doing things to avoid the obvious path forward (burn the important note, walking past the place where you can tie everything together, selling the mcguffin for an egregious sum).
- Making plans, and not following through with them.
- Sending NPCs on quests that the Players should be going on.

Solutions

- **(Requires Cooperation)** Roll with it. Sometimes your Players know where the adventure really is... provided they help you provide what they’re looking for.
- Encourage the Party to use certain Utility Feats and Spells such as: Compass of Destiny (pg. 425), Gain Favors (pg. 200), or Grand Scheme (pg. 193), which provide potential hooks.
- Inform your Players about the hooks they’ve already encountered, and suggest following some of them, or ask what you can do to make them appealing. Just don’t force them down a specific one unless they really can’t decide.
- Trim the tedium. If it takes an entire Session or more just to get to the destination, then that should at least come from something fun, like a side quest. Not ration tracking (unless that’s the game your Players all like to play).
- Recycle “Wasted” content for a later Adventure. How would they know?
- Have events that are caused by failing to participate in the story.
- **(LAST RESORT ONLY)** Stand up, and walk away for 10-30 Minutes. If they ask, let them know that they don’t seem interested in having you as a GM, and that the game is theirs to play around in. **SEEK A REAL SOLUTION ASAP.**

“It’s what my character would do!”

- Justifying poor choices and gameplay, or otherwise shirking responsibility for their actions by claiming character motivations.
- Emphasizing negative character traits and habits to the detriment of everyone around them, without clearing it with everyone first.
- Literally saying “It’s what my character would do!” in response to questions about a problematic behavior.

Solutions

- Calmly point out who made their character, and that this is a Team Game that doesn’t revolve around any single person (not even the GM).
- Remind the Players that consequences exist, then follow up if needed, but also remind them that they can change their character.
- Call back to the list of things that you and your Players don’t want in your game, and add onto it, with a chance to change behavior.
- **(NOT RECOMMENDED)** If all of this persists and you’ve already followed the prior steps, explain that this is a bigger issue, and that you might need to remove them from the campaign. Also consider trying a one-shot with just the other Players to get a proof-of-concept.

Unfortunately, there are far too many issues to cover in a single book that isn’t dedicated to them, but these five should cover most issues that could arise. And if you want more help, ask your preferred Search Engine, or even visit Youtubers such as “The DM Lair”, “the Dungeon Dudes”, “the Dungeon Coach”, and many others who have produced guides and a lot of other helpful material that while not geared towards Mages & Mansions, can help with any System.

Player Fundamentals

While it's very important for GMs to know what they're doing, Players have a lot more rules to work by. That said, Player and GM Fundamentals should be understood by both, even if a GM never gets to cast a well-placed Fireball, or a Player never sits behind the GM screen, pretending to be a supervillain with the best monologue ever.

This Section will talk about Character Creation, Ancestries, Backgrounds, and Classes, which will lead to Build Optimization later on, and eventually... world domination!

Wait, did I say that out loud?

Character Creation

While you could certainly improvise everything, it's usually best to play Mages & Mansions with a character. Preferably one that's been written down, and built with some kind of rhyme or reason.

The basic steps are already listed in the Quick Start Guide (pg. 4), but the following list is better suited for proper Campaigns.

1. Start with 10 in all Ability Scores.
2. Select an Ancestry, Class and Background.
3. Apply the listed changes and Abilities.
4. Select any options such as Fighting Style, Spells, or the Background's Utility Feat.
5. Add one Ancestry Feat, and one Class Feat of your choice. If you want it, you can pick one Bleed Feat for free.
6. Discuss additional starting rules and equipment with your GM. Usually, you'll end up purchasing extra equipment with leftover gold.
7. Add any finishing touches, such as Name, Backstory and Personality. No tips for this, other than look at your Feats, and Keep It Simple, Silly.

If you are starting at a higher Level (needs GM approval), such as 3rd or 5th, you will want to reference Character Progression on pg. 119.

If you want a more diverse array of scores, you can (at GM discretion) replace all Ability Scores and corresponding increases with one of the following methods:

- Roll 4d6 and drop the lowest, then assign them to scores of your choice. You must have one score that is 16 or higher, and one score that is 8 or lower (Popular for D&D).
- Allocate one of the following numbers to each score: 16, 14, 13, 12, 10, 8.
- Increase your Ability Scores by a total of 12, up to a maximum value of 16 each.
- Set the scores using another method, then trade values at a 1:1 ratio (max 16 in a score).
- Use the Standard Method, but swap the values around to suit your needs.
- Use your own method.

Ancestries

While some people are happy playing as a Human, sometimes it's more fun to play as a Dwarf, Elf, or *gasp* a Furry! Oh, the audacity!

Each Ancestry comes with a set of innate abilities that changes how your character plays. Some of these Feats are more powerful than others, and can possibly drive your GM insane (e.g. flight). So please use your better judgement when making Trogdor the Destroyer.

One thing that's even more important to note, is that not all Ancestries speak Common. If they don't have it, you can pick it up through a Background, in place of a Skill Proficiency from having a +1 Intelligence Modifier (or higher), or if the GM says so. Otherwise, it could be fun to act out language barriers.

Additionally, each Ancestry also has access to a small handful of Ancestry Feats that are available on pg. 130, though you are free to skip these while learning the game.

Beastfolk

Beastfolk are less of a single race, and more of a collection that resemble various animals. Not much is known about these races, other than their tendency to assemble in corresponding groups, and their comparatively barbaric or seemingly primitive behavior.

Ability Score Increase: 2+ to Wisdom, +2 to one other of your choice.

Base HP: 8

Movement Speed: 30 ft.

Size: Medium

Creature Type: Humanoid, Beast

Languages: See Heritage

Ancestral Abilities

Feral Senses

You gain Proficiency in Perception Checks.

Natural Weapon

Your Heritage includes a Natural Weapon that costs 2 Actions, inflicts 1d4 of the corresponding Damage Type, and is Light. It is also considered a Primal Beast Weapon for Weaknesses.

Unique Heritage

You immediately gain a Beastfolk Heritage Feat for free (pg. 132).

Dragonborn

Once born of true Dragons, Dragonborn often come across as barbaric, similarly to Beastfolk, but in a much more dignified and honorable manner. They enjoy brutal games and tests of strength, which is complimented by a great sense of pride inherited from their old ancestors.

Ability Score Increase: 2+ to Strength, +2 to one other of your choice.

Base HP: 10

Movement Speed: 30 ft.

Size: Medium

Creature Type: Humanoid, Dragon

Languages: Dragon, Common

Ancestral Abilities

Draconic Ancestry

Pick a Color from the Table above and to the right, which doesn't have to match your appearance. If there is another type of dragon that appears in your GM's setting, but not on the included table, you can chose that Dragon's color, determining Damage Type and Breath Shape accordingly.

You gain Resistance to the listed Damage Type based on your Color, equal to your Level, and the Breath Shape is used by some Feats.

Color	Damage Type	Breath Shape
Red	Fire	15 ft. Cone
Yellow	Piercing	15 ft. Cone
Green	Poison	15 ft. Cone
Blue	Lightning	30x5 ft. Line
White	Cold	15 ft. Cone
Black	Acid	30x5 ft. Line
Gold	Fire	15 ft. Cone
Copper	Poison	15 ft. Cone
Bronze	Lightning	30x5 ft. Line
Silver	Cold	15 ft. Cone
Brass	Acid	30x5 ft. Line
Coral	Radiant	30x5 ft. Line
Ruby	Fire	30x5 ft. Line
Sapphire	Lightning	15 ft. Cone
Opal	Cold	30x5 ft. Line
Tourmaline	Acid	15 ft. Cone
Emerald	Poison	30x5 ft. Line
Aquamarine	Force	15 ft. Cone

Natural Weapon

You have Claws that act as Light, Natural Melee Weapons that deal 1d4 Slashing Damage and cost 2 Actions.

Your claws are considered Draconic Weapons for all Weaknesses.

Dwarf

Dwarves are short, but stout and hardy. These stubborn folk are sometimes slow to trust Non-dwarven races, but are warm and welcoming to those that earn their trust. And with years to master the arts, they are well known as crafters and warriors in tight competition with Elves.

Ability Score Increase: +2 to Constitution, +2 to one other of your choice.

Base HP: 12

Movement Speed: 25 ft.

Size: Medium

Creature Type: Humanoid

Languages: Dwarven, Common

Ancestral Abilities

Dwarven Training

You gain Proficiency with Medium Armor, or any Artisan's Tool of your choice. While wearing Medium or Heavy Armor, you add your Constitution Modifier to the Damage Resistance granted.

Elf

Elves embody the Fey traits of Grace and Elegance, often seeming distant from the rest of the world. They are well known for their patience, and very intricate designs. But as semi-immortal beings, they often dream of past lives, and ancient insights.

Ability Score Increase: +2 to Intelligence, +2 to one other of your choice.

Base HP: 6

Movement Speed: 40 ft.

Size: Medium

Creature Type: Humanoid, Fey

Languages: Elvish, Common

Ancestral Abilities

Elven Knowledge

You know a number of Arcane Cantrips equal to your Intelligence Modifier (Minimum of 1), and can cast them as if you had Spellcasting.

If you do have Spellcasting, these Cantrips are in addition to the ones you already know, and can be from any Lists you have access to.

Elven Grace

You ignore all Movement penalties from Difficult Terrain when you take any Action with the Move Trait.

Gnome

Often confused with Halflings, Gnomes are extremely curious and eccentric, which often gives the impression of a short attention span. But with their incredible curiosity, their ideas tend to be about as unpredictable as they are.

Ability Score Increase: +2 to Intelligence, +2 to one other of your choice.

Base HP: 6

Movement Speed: 25 ft.

Size: Small

Creature Type: Humanoid, Fey

Languages: Gnomish, Common

Ancestral Abilities

Excitable

The first Non-Free Action you take on each of your Turns doesn't cost Action Points.

If you are forced to take an Action at the Start of your Turn, you apply the benefit to the next Action as well.

Goblin

Goblins are tricky little things with a knack for banditry.

While some do see the error of scheming against the common traveler, or the appeal of trading instead of stealing, most of them tend to group up into camps, and shun those who are bigger. And that's usually everyone.

Ability Score Increase: +2 to Dexterity, +2 to one other of your choice.

Base HP: 8

Movement Speed: 25 ft.

Size: Small

Creature Type: Humanoid

Languages: Goblin

Ancestral Abilities

Fury of the Small

You have Advantage to Hit any Creature that is Larger than you.

Halfling

Unlike Gnomes, Halflings prefer to stay in one place, where they know each of their neighbors by name. But while they aren't known to be eager to go on adventures, their incredible luck follows them wherever they go, and their tales become very well known in their home community.

Ability Score Increase: +2 to Dexterity, +2 to one other of your choice.

Base HP: 8

Movement Speed: 25 ft.

Size: Small

Creature Type: Humanoid

Languages: Halfling, Common

Ancestral Abilities

Lucky

Whenever you would get a Critical Failure on a d20 Test, re-roll once, and take the new result.

Human

Humans are easily the most versatile of races in terms of sheer potential. As one of the more short-lived races, their tenacious ability to adapt and defy odds often leaves others inspired through their death, or shocked by an impossible victory. And through their adaptive behavior, they tend to set the standard for many races.

Ability Score Increase: +2 to any of your choice, +1 to four others of your choice.

Base HP: 8

Movement Speed: 30 ft.

Size: Medium

Creature Type: Humanoid

Languages: Humish, Common

Ancestral Abilities

Defy Destiny

Restriction: Once per Round

When you attempt a d20 Test, you may instead attempt a Flat Check, nullifying all bonuses and penalties you have, such as those granted by Ability Scores, including any Auto-Success or Auto-Failure effects (or similar).

The DC of any d20 Test you make in this way is increased to 5, or decreased to 15, after all modifiers.

Orc

Orcs are often hot-tempered, or brick-headed, but that's just what people see on their bad days. On their good days, an Orc can be just as cheery as a Halfling at home. But when bad behavior is projected onto an entire race, someone is bound to fall into the stereotype.

Ability Score Increase: 2+ to Constitution, +2 to one other of your choice.

Base HP: 12

Movement Speed: 30 ft.

Size: Medium

Creature Type: Humanoid

Languages: Orcish

Ancestral Abilities

Call of War

When you recover Actions at the Start of the Round, you gain an additional number of Action Points equal to the number of Creatures in your Reach.

Backgrounds

Whether you were part of a traveling circus, an amnesiac who's secretly an automaton, or the mysterious figure in the corner of the room, everybody has a history before their adventuring days. And that history, is what's known as your Background.

Each Background gives you a +2 bonus to one Ability Score, and +1 to another, two Proficiencies, Starting Equipment, and a Utility Feat, which ignores Class or Archetype limitations.

A Background will also give you some ideas about how your character has been shaped by the experience. And if you like how one Background is styled or what it describes, but another one has the statistics you want, feel free to mix and match (talk to your GM about mixing statistics).

Of course you can use this as a guideline to design your own (see pg. 606), but there's nothing wrong with taking the easy, and readily available option.

And as a quick note, some Utility Feats granted by your Background require a Class Resource or an Action you might not possess. In such a case, you can use the resource or Action Once per Short Rest, on the granted Feat until you gain the resource.

If running a session of Mages & Mansions for the first time, the following table will give you a basic idea for starting equipment, which you can prioritize, or use for a barfight!

Improvised Equipment Table

Weapon Dice	Action Cost		Armor	AC Bonus	Damage Resistance
d4	2		Light	+1	+1
d6	3		Medium	+2	+2
d8	4		Heavy	+3	+3
d10	4				
d12	5				

Acolyte

At some point, you were involved in the worship of a deity, whether voluntary or not. Perhaps you look to them in hope for something lost, or hatred for the things you've lost. Maybe you commit everyday acts in their name, or spite them at every opportunity. Whatever the case, you understand the rites and rituals pertaining to that deity, as well as their common allies and enemies.

Ability Score Increase: +2 Wisdom, +1 Intelligence

Proficiencies: Religion, Celestial

Equipment: 5 GP, Holy Symbol, Ceremonial Weapon, or your Deity's Favored Weapon

Feat: Any Cleric Utility Feat

Arcane Student

You once studied the arcane arts. You may have been required to learn, or just picked it up from a friend. Maybe you hunger to learn more, or wish you knew less. Perhaps you discovered forbidden knowledge that might drive you insane, or a prophecy you must strive to disrupt. Or perhaps it was simply more entertaining than all the chores you used it to escape from.

Ability Score Increase: +2 Intelligence, +1 Wisdom

Proficiencies: Arcana, Society

Equipment: 10 GP, a Spell Book or Informative Book, a Knife (Dagger Stats)

Feat: Any Wizard Utility Feat

Criminal

You were once skilled at breaking the law. Perhaps you still do, or maybe you want to clear your name. Town guards may recognize you, and attempt to arrest you on sight, or maybe you have buddies and connections that allow you to access underground and illegal services. But your life of doing less-than-legal acts, may come in handy at some point.

Ability Score Increase: +2 Dexterity, +1 Intelligence

Proficiencies: Thievery, Society

Equipment: 15 GP, Thieves' Tools, Dagger, Hooded Cloak

Feat: Any Rogue Utility Feat

Cultist

Whether or not you care to admit it, you were part of a cult. Whether or not you agree with the teachings, you've acquired a feel for the seductive and occasionally malicious practices that occur in such places, and possibly favor with the entity being served. But maybe you weren't one of the cultists. Maybe you were the sacrifice.

Ability Score Increase: +2 Charisma, +1 Intelligence

Proficiencies: Occultism, Persuasion

Equipment: 5 GP, Ceremonial Dagger (Dagger Stats), one piece of ceremonial jewelry, or other significant item from the Cult

Feat: Any Warlock Utility Feat

Entertainer

You once strived to perfect the art of stagecraft. Whether that was storytelling, singing, stunt work, or some other form of entertaining. Were you the main star, or just a supportive role? Maybe you long for a greater audience, a new story, or something that isn't made up. Perhaps you hate being a performer, or made some bad deals. In any case, some people might recognize a prior performance.

Ability Score Increase: +2 Charisma, +1 Wisdom

Proficiencies: Performance, Society

Equipment: 5 GP, An Instrument, Toy, or other item you used for entertaining, a Costume or Disguise Kit

Feat: Any Bard Utility Feat

Inventor

You have a knack for making strange, yet useful contraptions. Maybe a friend or family member taught you when you were little, or maybe you just picked up the hobby. Maybe you were working on a technological breakthrough. Perhaps you make contraptions for money, or just do it for fun. But who knows what you'll come up with next?

Ability Score Increase: +2 Intelligence, +1 Dexterity

Proficiencies: Arcana, Tinker's Tools

Equipment: 10 GP, a Weaponized Gadget or Tool, such as a Wrench (Club) or Alchemist's Fire, Tinker's Tools.

Feat: Any Artificer Utility Feat

Magically Gifted

At some point, you developed some kind of relationship to a Magical being, such as a Dragon, Fey, Celestial, Fiend, or possibly even a crazy Wizard. Crazy Relationships aside, you found a knack for Magical abilities, even if you didn't quite take the time to master it. What will you make of this power, and what will others make of you for it? And if they hate you, would you want to become normal?

Ability Score Increase: +2 Constitution, +1 Charisma

Proficiencies: Arcana, Survival

Equipment: Any Primitive Weapon, Hide Armor, a parting gift (or stolen item) from the Magical being you've built a relationship with.

Feat: Any Sorcerer Utility Feat

Marauder

Whether a wandering Bodyguard, Mercenary or Bandit, you used your physical characteristics to earn a quick coin. Perhaps you had good intentions, and aimed to never hurt anybody, or maybe the money was more of an added bonus. Perhaps you're a wanted criminal that hasn't been defeated yet. Or perhaps you were just a simple guard with a simple job that merely required efficiency.

Ability Score Increase: +2 Strength, +1 Constitution

Proficiencies: Athletics, Intimidation

Equipment: 10 GP, Hide Armor, a Heavy Weapon

Feat: Any Barbarian Utility Feat

Monastic Student

You've spent a summer (or twenty) training with monks, studying martial arts. Perhaps you wanted to study something they didn't feel you were ready to learn yet, or perhaps you couldn't finish the entire course. Maybe you saw corruption in your teacher, or yourself. Or maybe, none of that matters, and you simply took up martial arts to find peace in an increasingly chaotic world.

Ability Score Increase: +2 Wisdom, +1 Strength

Proficiencies: Athletics, Religion

Equipment: 5 SP, a Simple Weapon, a trinket you use to act as a point of focus and concentration

Feat: Any Monk Utility Feat

Soldier

You have been part of some kind of military force.

Whether you actively fought, or just went through training, the process may have left you spiritually beaten, very strict, or just very... calculating. Maybe you fought in a war, deserted your fellow soldiers, went up against a powerful foe, or are just running errands. Or, you could also be a Healer with combat experience.

Ability Score Increase: +2 Strength, +1 Dexterity

Proficiencies: Athletics, One Weapon or Armor

Equipment: 10 GP, Leather Armor or Ring Mail, up to 2 Weapons of your choice, with 20 pieces of Ammunition in a container if you picked any Ranged Weapon.

Feat: Any Fighter Utility Feat

Wild Child

You were raised in the wild, whether left by accident, or born to a family that roams the forests, deserts or mountains of the world, with no heed to what society might think. As your adventure begins, what would it take to make you join society again? Curiosity? Loss? Danger? Even still, you might never fit in. And for you, that might be perfectly fine.

Ability Score Increase: +2 Wisdom, +1 Dexterity

Proficiencies: Nurture, Survival

Equipment: Hide Armor or Padding, any Primitive Weapon, a Primitive Item you Crafted yourself.

Feat: Any Druid Utility Feat

Classes

While any bloke can pick up a sword and shield and call themselves a knight in shining armor, that doesn't mean they can use it well enough to survive anything more dangerous than a Cat. Let alone kill it.

A Class determines the set of skills and abilities your Character is able to employ, and guides you into a unique play style and design. Just don't be afraid to re-flavor any Feats, Spells and Attacks to better fit the vision you have in mind, or even shuffle things around with your GM's approval (e.g. Attack of Opportunity for all Classes).

The following Classes include a shortened list of 5 Feats for you to start out with, which is solely to help you get started without being overwhelmed. And much like Ancestries, Classes have additional Feats and even Subclasses in the Extra Content Section (pg. 154).

Each Class gives Proficiencies, which are listed appropriately. However, you also gain additional Proficiencies equal to your Intelligence Modifier, which can include Skills, Weapons, Armor, Languages, etc. The only exception is Saving Throws, of which you can only gain the ones listed (one pre-set, and one custom).

Finally, each Class has a dedicated Class Resource (such as Sorcery Points, or Bardic Inspiration), which is equal to your Level, unless otherwise modified. These resources are occasionally referenced by various Feats, Items or miscellaneous content, and can never exceed their maximum value, unless otherwise stated.

Artificer

While the simplest solution is often the best, the overly complicated one is typically far more entertaining. Artificers blend magic and Technology in the form of Magic Items, and potent Brews. And if the bomb doesn't work, what do you think the hammer's for?

Ability Score Increase:

+2 Intelligence (up to 16)

Hit Dice:

d8 or 5
(8 at 1st level)

Skills:

Two of the following (+Int Mod, Min: +0):
Arcana, Nurture, Occultism, Perception, Thievery, Any
Artisan's Tool

Saving Throws:

Intelligence + one of your choice

Weapon Proficiencies (Pick Three from the following lists):

Simple Weapons, Crossbows

Armor Proficiencies:

Light, Medium, Shields

Class Initiative Modifier:

Intelligence

Archetype Requirements:

You must be Proficient in at least one Artisan's Tool

Signature Abilities

Supplier

Traits: Burn, Craft, Item, Long Rest, Manipulate, Resource, Tool

You have a number of Supply Points equal to your Level, and you regain all Supply Points when you finish a Long Rest.

During a Short or Long Rest, you can expend 1 Supply Point to make 3 Common or Non-Magical Consumable items you know how to craft, or have a Crafting DC of 0 or less for you (pick 3 of your choice on Character Creation).

Items you make in batches must be of the same variant (e.g. Potion of Resistance). Items like Healing Potions treat different Tiers as variants. Items like Spell Scrolls that need their effect determined by some means other than Crafting must be completed through the corresponding methods.

You don't roll any checks or spend material when Crafting Items in this way, and these items degrade to an unusable degree after 8 Hours. You can repeat this effect in one Rest.

Quick Craft

Traits: Burn, Craft, Manipulate, Tool

5 Actions: 1 Supply

You Craft a batch of Items from the Supplier Feat, though the batch Size is reduced by 2.

All Items Crafted in this way are placed in an open hand.

Artificer Feats

Big Batch

Traits: Edge, Craft, Improvement

Whenever you Craft a Batch of Consumable Items, you Craft 1 additional Item, even with standard Crafting, or the 1 Action method from Supplier.

You can take this Feat any number of times. Just beware of Item tracking.

Buy in Bulk

Traits: Utility, Downtime, Money

When you barter for Potions, Gadgets, Materials, and other such items, you gain an additional copy for free when you buy in multiples of 3, for each multiple of 3, even if the copies aren't usually available.

You cannot use this when buying Items back from a merchant.

Empowered Craft

Traits: Edge, Craft, Improvement

Consumables you make using Supplies (such as Ammunition) roll an additional Damage or Healing die, and drop the lowest.

If the Consumable doesn't use dice, it adds +1 to all flat values.

Refined Formula

Traits: Edge, Improvement, Item

Any Consumable Items you Craft now use your Intelligence Score for the Save DC, and as a bonus to their Damage/Healing Modifier.

In the case of Ammunition, the resulting Damage Roll uses your Intelligence if it is higher than the Attacking Creature's Weapon Damage Modifier.

This also applies to other value-based effects and Modifiers such as Resistance, but not Ability Scores.

Replicate Magic Item

Traits: Edge, Craft, Enchant, Item, Magical

When you finish a Long Rest, you can spend Supply Points to convert a Non-Magical Item into a Non-Consumable, Common, Magical variant you can Craft, which lasts until you finish a Long Rest.

Higher rarities cost more Supply Points as follows:

- **Common:** 1
- **Uncommon:** 3
- **Rare:** 5
- **Very Rare:** 7
- **Legendary:** 9

You can also use this Feat to Craft rarer versions of a Consumable Magic Item using the Supplier Ability (e.g. Healing Potion), or gain access to Consumable Magical Items that don't have a Common Variant (e.g. Potion of Restoration).

Note: Items Crafted in this way cannot be turned into Essence.

General Note: Artificers can be more Steampunk or Techno than some campaigns may call for. In such a case, try re-flavoring such things as being more Magical, or just clever in general. Maybe mix in another Class to really give it a more unique feel.

Heh, maybe make a Fireball potion if you need to.

Barbarian

Through unbridled fury, passion or DETERMINATION, Barbarians are powerhouses that simply don't give up. Many may think that swinging big axes, little hammers, and the odd rock is a bit barbaric, but that's pretty much the entire point.

Ability Score Increase:

+2 Strength (Up to 16)

Hit Dice:

d12 or 7
(12 at 1st level)

Skills:

Two of the following (+Int Mod, Min: +0):
Athletics, Intimidation, Nurture, Perception, Survival

Saving Throws:

Strength + one of your choice

Weapon Proficiencies (Pick Three from the following lists):

Simple Weapons, Martial Weapons

Armor Proficiencies:

Light, Medium

Class Initiative Modifier:

Strength

Signature Abilities

Rage

Traits: Edge, Bloodied, Emotion, Short Rest, Resource

You have a number of Rage Points equal to your Level.

You regain all Rage Points when you finish a Long or Short Rest, and 1 Rage whenever you take Damage from any source, or are Targeted by any effect with the Emotion Trait that doesn't require Rage, or you Start your Turn while Bloodied.

While you are Bloodied, you double all Rage Points from sources other than being Bloodied.

The Charmed and Frightened Conditions count as having the Emotion Trait.

Reminder: Rage effects that end at the start of your Turn still trigger the Rage Point gain.

...

Brute's Might

Traits: Burn, Emotion, Rage

1 Action: 1 Rage Point

You do one of the following until the start of your next Turn:

- Use your Strength Modifier in place of Dexterity for Melee or Thrown Weapon Attack Rolls.
- Add your Proficiency Bonus to all Strength based Checks and Saving Throws, even if you already add it.

You can take this Action any number of times, provided you don't pick the same choice twice.

Empowered Defense

Traits: Edge, Armor Class, Resistance

You may use your Constitution Modifier instead of Dexterity for AC calculations.

You also have Physical Damage Resistance equal to your Strength Modifier, unless your Armor provides more.

Barbarian Feats

Eternal Combatant

Traits: Burn, Bloodied, Healing, Initiative

Whenever you roll Initiative, you may expend any amount of Rage to roll an equal number of Hit Dice, and heal that amount.

If you have no more Hit Dice, you instead regain Hit Points equal to your Constitution Modifier (Minimum of 1) for each Rage Point Spent.

You may also expend Rage this way when you are Bloodied at the Start of your Turn, though the amount healed is lost if you would exceed half your Hit Point Maximum (rounded down).

Heavy Arsenal

Traits: Edge, Improvement, Ranged, Weapon

All Barbarian Feats that specify Melee Weapons or Attacks can now use any Ranged Weapon or Attack, provided the Weapon is Heavy, Thrown, or has the Recoil Trait.

Professional Brawling

Traits: Utility, Damage, Downtime, Money

You gain a new Activity: Professional Brawling

You spend the day fighting in arenas and cages, hunting dangerous monsters, volunteering as a test subject, or other hazardous careers.

Choose X before rolling. If there's a special challenger, your GM may pre-determine X, which you may take or leave.

You take and gain Xd12 as a single instance of Physical Damage (or other if the GM deems it appropriate), and SP. However, if this Damage reduces you to 0 Hit Points or less, you are instead reduced to 1 Hit Point, and only gain X SP.

While performing this Activity, you may run into a crime lord lobbying for you to succeed or fail, a crippled fighter, someone with a strange condition, or something else that impacts the fight.

Shrug It Off

Traits: Burn, Temporary Healing

1 Action: 1 Rage

Duration: 1 Minute

Gain Temporary Hit Points equal to 1d12 + your Constitution Modifier for the Duration.

Wind Up

Traits: Burn, Damage, Precision, Weapon

2 Actions: 1 Rage

Until the Start of your next Turn, whenever you hit with a Melee Weapon Attack, you deal 1 Precision Damage for each Damage die the Weapon has (e.g. a 2d6, Weapon would deal +2).

This effect stacks on itself with no limit.

Bard

Through inspiring tales and stories, Bards command the powers of creation, allowing them to uncover any Spell they wish. As they perform, they are also capable of drawing out inklings of power to bolster the resolve, and focus of their allies.

Ability Score Increase:

+2 Charisma (up to 16)

Hit Dice:

d8 or 5
(8 at 1st level)

Skills:

Two of the following (+Int Mod, Min: +0):
Arcana, Deception, Occultism, Perception, Performance,
Persuasion, Religion, Society, Any Instrument

Saving Throws:

Charisma + one of your choice

Weapon Proficiencies (Pick Three from the following lists):

Simple Weapons

Armor Proficiencies:

Light

Class Initiative Modifier:

Charisma

Signature Abilities

Spellcasting (Occult)

Traits: Long Rest, Magical

See pg. 55 for Spellcasting rules.

You cannot Prepare any new Spells from the Occult Spell list with the Attack or Damage Traits when Leveling Up, or during Character Creation, but you can still learn them through scrolls.

This restriction is lifted if you have access to the Occult Spell List through another version of Spellcasting, such as Archetype: Warlock.

Bardic Inspiration

Traits: Edge, Audible/Visual, Emotion, Long Rest, Resource*

You have a number of Bardic Inspiration Points equal to your Level, which you regain when you finish a Long Rest.

You also regain Bardic Inspiration if you spend at least 1 Hour immersed in some form of inspiring content, such as a book, story, painting, or song.

**:Features that are Audible/Visual can use one, the other, or both depending on how you perform them. Also, Feats that are Audible in this way can have the Verbal Trait.*

...

Inspiring Performance

Traits: Burn, Buff, Emotion

1 Bardic Inspiration:

You can perform one of the following, provided the Target (which cannot be you) can either see or hear you, as per the Bardic Inspiration Traits:

- **2 Actions:** Grant Bardic Inspiration to a Creature within 60 feet of you for up to 10 Minutes.
- **3 Reactions:** (*Trigger: a Creature within 60 feet of you makes an Ability Check or Saving Throw*)
Grant Bardic Inspiration to the Triggering Creature, which is consumed immediately.
- **1 Short Rest:** Grant Bardic Inspiration to a number of Creatures equal to your Charisma Modifier.

Bardic Inspiration adds 1d4 to one Ability Check, or Attack Roll, which the Target can use at any time before it expires. Alternatively, a Creature can expend it in place of any Class Resource that isn't Bardic Inspiration.

A Creature that would retain more than one Bardic Inspiration must pick which one to keep. However, this doesn't apply to Bardic Inspiration that is consumed immediately.

Bard Feats

Battle Hymn

Traits: Edge, Buff, Concentration

5 Actions: 1 Bardic Inspiration

While Concentrating, All Creatures of your Choice within 30 ft. of you add your Bardic Inspiration to their Attack Rolls.

Dedicated Performance

Traits: Edge, Buff, Concentration, Resources, Special

5 Actions: 1 Bardic Inspiration

While Concentrating, when any Creatures of your Choice within 30 feet of you expend a Class Resource that isn't Bardic Inspiration or replaced by it, they gain your Bardic Inspiration Die.

Special: This benefit doesn't affect you, unless you have the Self-Inspired Feat. Even still, you only gain a d4.

Improved Bardic Inspiration

Traits: Edge, Improvement

Your Bardic Inspiration Die increases to a d6.

You can take this Feat multiple times, further increasing the die by one category, up to a d12.

Jack of All Trades

Traits: Utility, Proficiency

You can treat all Skills and Tools as if you are Proficient (even for Feats), though they don't add your Proficiency Bonus, unless you expend 1 Bardic Inspiration to do so.

Persistent Inspiration

Traits: Edge, Improvement

When a Creature spends one of your Bardic Inspiration Dice on a d20 Test but doesn't Succeed, they retain the Bardic Inspiration Die until either the End of their next Turn if they don't Trigger this effect again, or it is Successfully expended.

Cleric

Whether through active worship, or even the mere belief, Clerics channel divine power that has been earned, gifted, or sometimes even created by them. Clerics primarily smite, heal, or claim in the name of whatever they worship. They mustn't be confused with Warlocks.

Ability Score Increase:

+2 Wisdom (up to 16)

Hit Dice:

d8 or 5
(8 at 1st level)

Skills:

Two of the following (+Int Mod, Min: +0):
Arcana, Medicine, Nurture, Occultism, Perception,
Persuasion, Religion, Society

Saving Throws:

Charisma + one of your choice

Weapon Proficiencies (Pick Three from the following lists):

Simple Weapons

Armor Proficiencies:

Light, Medium, Shields

Class Initiative Modifier:

Wisdom

Archetype Requirement:

You follow a Deity's Edicts

Signature Abilities

Spellcasting (Divine)

Traits: Long Rest, Magical

See pg. 55 about Spellcasting Rules.

Divine Intervention

Traits: Edge, Long Rest, Resource

You have a number of Divine Intervention Points equal to your Level, which you recover when you finish a Long Rest.

You also regain 1 Divine Intervention if you act in accordance to your Deity's Edicts, such as a Life Cleric casting a Healing Spell on a wounded Creature, or Attacking an Anathema to your Deity.

If you perform any act that is Anathemic to your Deity, you lose 1 Divine Intervention. If you lose enough Divine Intervention in this way, you may be forced to follow a new Deity.

Note: Your Deity may ignore certain instances or mistakes, if there is good reason, or allow exceptions to the Anathema rule, if such an Anathemic Creature somehow gains favor with said Deity, or if your Deity decides it is necessary (GM discretion advised).

Also, Creatures that are considered Holy/Unholy are usually considered Anethemic if they are not aligned with the particular Deity, unless the two Deities are at peace with each-other, or have an agreement.

...

Divine Power

*Traits: Burn, Damage, Holy/Unholy, Healing, Radiant/Necrotic**, Magical*

1 Divine Intervention:

You can do one of the following:

- **When you Hit with an Attack:** You deal 1d6 Radiant or Necrotic Damage depending on your Deity.
- **2 Actions:** You restore 1d6 + your Spell Healing Modifier in Hit Points to a Bloodied Creature you Touch. This doesn't work on Undead or Constructs.

**: Feats with the Holy/Unholy Trait are considered Unholy if your Deity is Unholy.*

*** : Feats with Radiant/Necrotic or Radiant/Force depend on whether the Feat is considered Holy or Unholy.*

Note: An Anathema is something that your Deity has a "Forceful Dislike" of. Generic Anathemas are listed in each Subclass, though more specific ones may be listed for a particular Deity, or you may have self-imposed Anathemas that you discuss with your GM before the game starts.

Additionally, Creatures that are an Enemy to your Deity can vary a lot, which you will want to discuss with your GM. An example is a Deity of Light despising all Creatures that are Shadowy or Stealthy in nature, or any Creature that regularly or knowingly performs an Anathema.

Lastly, some Feats or Actions may be considered Holy/Unholy for certain Deities, like music for a Deity of theatre.

Cleric Feats

Aura of Healing

Traits: Edge, Healing, Holy/Unholy

Free Action: 1 Divine Intervention

Duration: 1 Minute

For the Duration, any Creature of your Choice that starts their Turn within 10 feet of you regains Hit Points equal to your Spell Healing Modifier (Minimum of 1).

This doesn't work on Undead or Constructs.

Caretaker's Blessing

Traits: Utility, Advantage, Medicine

When you perform a Medicine Check on a Creature, they gain Advantage on the next Saving Throw they make against an Affliction or Condition, including Death Saving Throws.

Destroy Undead

Traits: Burn, Holy/Unholy, Radiant/Force, Saving Throw

3 Actions: 1 Divine Intervention

Target: One Undead Creature

Range: 30 ft.

The Target Undead must make a Charisma Saving Throw against your Wisdom Score:

- **Critical Failure:** Same as Failure, but Double Damage.
- **Failure:** The Target takes Radiant (or Force if Unholy) Damage equal to your Level.
- **Success:** No effect.

If the Damage taken (after modification) is greater than the Target's Damage Threshold or effective Level (whichever is higher), the Damage is increased to half the Target's Hit Point Maximum if it's higher.

A Creature that dies to this effect, cannot be Targeted by any Magical Action that isn't Holy/Unholy for 1 week.

Pull from Death

Traits: Burn, Healing

2 Actions: 1 Divine Intervention

Range: Touch

Target: A Creature that is Unconscious at 0 Hit Points, but not dead.

You restore the Target to consciousness at 1 hit point.

Purify

Traits: Burn, Nullify, Saving Throw

5 Actions: 1 Divine Intervention

Target: 1 Creature

You remove one Debuff the Target has, provided the DC to Save against it is less than your Wisdom Score.

If no Debuff is cleansed by this, the Target may reattempt one Saving Throw against a Debuff instead, ignoring any penalties of Failure from the roll.

Druid

Druids are people with a deep connection to nature, often sourced from secret or sacred groves. Through this connection, they command and channel the strength of Nature.

Ability Score Increase:

+2 Wisdom (up to 16)

Hit Dice:

d8 or 5
(8 at 1st level)

Skills:

Two of the following (+Int Mod, Min: +0):
Athletics, Medicine, Nurture, Perception, Stealth,
Survival

Saving Throws:

Wisdom + one of your choice

Weapon Proficiencies (Pick Three from the following lists):

Simple Weapons

Armor Proficiencies:

Light, Medium, Shields

Class Initiative Modifier:

Wisdom

Signature Abilities

Spellcasting (Primal)

Traits: Long Rest, Magical

See pg. 55 about Spellcasting Rules.

Druidry

Traits: Edge, Long Rest, Magical, Resource

You have a number of Druidry Points equal to your Level, and regain these Points when you finish a Long Rest.

...

Nature's Gift

Traits: Burn, Magical, Refinement

1 Druidry:

You may do one of the following:

- **2 Actions:** Cause any Herb Item you Touch in 1 Minute to roll any Ability Check or Healing/Damage Dice twice, and drop the lowest value (stacks with Advantage, but is Nullified by Disadvantage).
- **5 Actions:** Make a Wisdom Spellcasting Check against the Athletics or Acrobatics Check of a Creature within 30 feet, and is within 5 feet of any solid terrain. On a Failure, that Creature is Grappled and Restrained by the Terrain until freed. You can spend 2 Action Points to drag a Restrained Creature 5 feet without expending Druidry, or rolling another Ability Check, and begin Concentrating to repeat this effect for free at the Start of your Turn. Overpower contests your Spell Save DC.
- **1 Minute:** Progress the growth cycle of any Plant by up to 1 year, but not to a fatal stage. This causes most Non-Magical Herbs and fruit-bearing plants to be harvestable.

Druid Feats

Animal Messenger

Traits: Utility, Information, Magical, Special

You may give an Item to any Non-hostile Beast, and speak the name of a Creature you know, along with any message you wish to send, or a simple message.

The Beast then travels independently of you until it reaches the recipient, delivers the item and/or message, before returning to wherever it came from (unless it wishes to do other things).

As part of this, the Beast avoids all Encounters, finds shelter along their path, and is able to locate sufficient food for its travels.

Special: If the Beast was Summoned, they last until the delivery is complete. Animal Companions return when you next complete a Long Rest after delivery.

Breath of Life

Traits: Burn, Buff, Persistent Healing

3 Actions: 1 Druidry

The Target gains Persistent Healing equal to your Spell Healing Modifier.

This doesn't work on Constructs or Undead.

Plant Stride

Traits: Burn, Movement

Free Action: 1 Druidry

Trigger: When you take any Action with the Move Trait

Range: 60 ft.

For the Triggering Action, you treat two living plants (must be willing if they're Creatures) within Range of each other as if they were the same space, and can enter freely, ignoring Difficult Terrain if you couldn't do so otherwise.

You cannot end your Turn in either of spaces, unless the Plant doesn't occupy its space.

If there are no Plants within range, you can cause a pair of Non-Magical Plants to sprout within the Range for the Duration.

Primal Rend

Traits: Edge, Actions, Improvement

All Natural Weapon Attacks you make deal additional Damage equal to your Wisdom Modifier, which ignores Resistances and Damage thresholds.

Thorns

Traits: Burn, Damage, Improvement, Piercing, Terrain

3 Actions: 1 Druidry

Range: 15 feet

Duration: 1 Hour

You convert a 5 ft. Space into Difficult Terrain for the Duration. A Creature entering this terrain takes Piercing Damage equal to your Wisdom Modifier.

Additionally, when you make Difficult Terrain through other methods (e.g. Nature's Wrath), you can expend 1 Druidry to apply this effect to all created Terrain.

Fighter

Through careful honing of finesse and strength, Fighters master various techniques that make them as versatile as they are deadly. Whether they use a bow, or sword, a Fighter is a force to be reckoned with, and for mages to hide behind.

Ability Score Increase:

+2 Strength OR Dexterity (up to 16)

Hit Dice:

d10 or 6
(10 at 1st level)

Skills:

Two of the following (+Int Mod, Min: +0):
Athletics, Acrobatics, Perception, Intimidation,
Medicine, Society, Survival

Saving Throws:

Strength OR Dexterity + one of your choice

Weapon Proficiencies (Pick Three from the following lists):

Simple Weapons, Martial Weapons

Armor Proficiencies:

All

Class Initiative Modifier:

Strength OR Dexterity

Signature Abilities

Warrior's Technique

Traits: Edge, Breather, Resource

You have Technique Points equal to your Level. When you take a Long Rest, Short Rest, or Breather, your Technique is set to 1.

If you didn't gain or lose Technique during your Turn, you lose 1 at the End of your Turn, to a minimum of 1.

You gain 1 Technique when you Hit with an Attack Roll, inflict a Condition, or are either missed by an Attack Roll or Succeed on a Saving Throw while benefiting from the Dodge Action, without spending Technique to do so.

Action Surge

Traits: Burn, Actions, Recovery

Free Action: 1 Technique

Restriction: Once per Round.

You gain Action Points equal to your Proficiency Bonus.

Attack of Opportunity

Traits: Burn, Attack, Weapon

Free Action:

Trigger: Whenever a Creature within your Reach takes an Action with the Move or Manipulate Traits.

Make a Melee Weapon or Spell Attack, spending Actions accordingly. This Attack ignores the Multi-Attack Limit. Spells can only be cast at their lowest Tier.

Fighter Feats

Careful Coordination

Traits: Utility, Feat, Long Rest

After you take a Long Rest, Each participating Creature can allow another participating Creature to use any Feat or Spell they have at any time, once, using Resources from either Creature.

This benefit doesn't apply to Blast Feats or Tiered Spells (unless both Creatures have access to that Tier). However, you don't need to pre-determine the Action or Feature.

You can take this Feat multiple times, granting another use per Creature, which doesn't need to use the same Feat.

Combat Specialist

Traits: Edge, Choice, Weapon

Pick one of the following benefits:

- **Giant Slayer:** The first time you Hit a Creature that is at least one Size larger than you on a given Round, your Damage Bonus from Ability Scores is scaled to the Creature's Size.
- **Horde Breaker:** Each time you Attack a Creature for the first time on your Turn, it doesn't count against your Multi-Attack Limit.
- **Perfectionist:** Whenever you Miss with an Attack Roll, your next Attack is one degree better.

Dancing Blow

Traits: Burn, Dodge

Free Action: 1 Technique

Trigger: You take any Action with the Attack Trait.

Immediately take the Dodge Action for Free.

Indomitable

Traits: Burn, Saving Throw, Special

Free Action: 1 Technique

Trigger: When you make a Saving Throw

You re-roll the Triggering Saving Throw, adding a +1 bonus for each time you use this Reaction on the same roll.

Special: you can take this even if you don't qualify for Reactions.

Second Wind

Traits: Burn, Buff, Healing, Persistent Healing

1 Action: 1 Technique

Duration: 1 Minute

You regain 1d10 Hit Points, and 1 Persistent Healing for the Duration, or until you take Damage.

This Persistent Healing doesn't decay, but ends with the Duration.

Monk

Monks are swift and agile masters of both mind and body. They are adept at weaving through crowded battlefields, and locking down a small area. But while they excel at managing crowds, they can struggle to find purchase with resistant enemies.

Ability Score Increase:
+2 Dexterity or Wisdom (up to 16)

Hit Dice:
d8 or 5
(8 at 1st level)

Skills:
Two of the following (+Int Mod, Min: +0):
Athletics, Acrobatics, Medicine, Perception, Religion,
Society, Survival

Saving Throws:
Dexterity or Wisdom + one of your choice

Weapon Proficiencies (Pick Three from the following lists):
Simple Weapons

Armor Proficiencies:
None

Class Initiative Modifier:
Dexterity or Wisdom

Signature Abilities

Ki

Traits: Edge, Breather, Resource

You have a number of Ki Points equal to your Level.

You regain these points when you finish a Long Rest, Short Rest, or a Breather. You can also spend 5 Actions to regain 1 Ki point once per Round.

Note: Some Feats or Actions may reference Monk Weapons. A Monk Weapon is any Simple Weapon with the Light or Versatile Trait. Natural Weapons and Unarmed Strikes don't need to follow that restriction, though they are often referenced for clarity.

Martial Arts

Traits: Burn, Improvement

1 Ki:

You can use Ki to do any of the following:

- **Free Action:** While Concentrating, you use your Wisdom Modifier for either Attack or Damage Rolls, in place of what they usually call for (choose one at a time, per roll).
- **Free Action:** Take the Move Action for free.
- **Free Action:** Take the Dodge Action for free.
- **1 Action:** Make any Natural Weapon Attack (Unarmed Strikes are Natural Weapons) which doesn't count against your Multi-Attack Limit (still applies the Light Property if applicable).
- **2 Actions:** Take the Dash Action, which when used in this way, doesn't restrict Non-Move Actions, and isn't restricted by them either.

Monk Feats

Deflect Missile

Traits: Burn, Nullify

2 Reactions: X Ki

Trigger: A Ranged Weapon Attack Hits you

You reduce the Damage taken from the Triggering Attack by $Xd10 +$ your Wisdom Modifier.

Ki-Strike

Traits: Burn, Weakness

Free Action: 1 Ki

Trigger: When you Hit with an Unarmed Strike or Monk Weapon.

You ignore the Target's Damage Threshold for the Triggering Attack.

Meditation Stance

Traits: Edge, Concentration, Resource

Free Action:

Until you drop Concentration, you regain 1 Ki Point at the start of each of your Turns.

Recenter

Traits: Burn, Final, Nullify, Special

Free Action: 1 Ki

Special: You can use this while Incapacitated, but not while Unconscious.

Reduce one of the Frightened, Stunned, Slowed, Drained or Impaired Conditions by 1. End your Turn.

You can take this Feat any number of times, adding 1 to the reduction when used, which you can distribute freely.

Special: You can use this while Incapacitated, but not while Unconscious.

Shared Teachings

Traits: Utility, Audible, Experience, Long Rest

When you finish a Long Rest, you can give your Experience Points to any other Creature, provided they're of a lower Level than you.

Rogue

Through wit and skill, Rogues are masterful Assassins that are able to dispatch any opponent that can't match their capabilities. Should you be ambushed by one, don't expect to get the first or last strike.

Ability Score Increase:

+2 Dexterity (up to 16)

Hit Dice:

d8 or 5
(8 at 1st level)

Skills:

Four of the following (+Int Mod, Min: +0):
Acrobatics, Athletics, Deception, Perception,
Performance, Society, Stealth, Survival, Thievery

Saving Throws:

Dexterity + one of your choice

Weapon Proficiencies (Pick Three from the following lists):

Simple Weapons

Armor Proficiencies:

Light

Class Initiative Modifier:

Dexterity AND Intelligence

Signature Abilities

Cunning

Traits: Edge, Long Rest, Resource

You have a number of Cunning Points equal to your Level.

You regain one Cunning when you Succeed on any Ability Check (10 or higher if there is no DC), Hit a Flat-Footed Creature, or Succeed on a Saving Throw (including Death Saving Throws), unless the Triggering result was caused by a Feat or Action that expended Cunning.

You regain all Cunning Points at the end of a Long Rest.

Cunning Action

Traits: Burn, Buff

Free Action: 1 Cunning

You may do any of the following, provided the corresponding condition(s) apply:

- **When you roll Ability Check you are Proficient in:** Re-roll the die.
- **When you Hit with any Attack:** You deal an additional 1d6 Precision Damage.

Rogue Feats

Bonus Action

Traits: Burn, Actions

Free Action: 1 Cunning

The next Action you take with the Manipulate Trait has its Action Cost reduced by 5 (Minimum of 0). This effect stacks with itself.

Critical Weakness

Traits: Edge, Auto-Crit, Weakness, Weapon

Whenever you Hit an Attack that benefits from a Creature's Weakness, the Attack is Critical against that Creature.

Grand Scheme

Traits: Utility, Ability Check, Downtime, Money

You gain a new Activity: Grand Scheme

Whether by planning a Heist, starting a risky Business, or somehow employing a quick scheme, you spend X GP to perform a series of ~3-5 Skill Checks depending on the complexity and risk of the task you choose. Each additional day you spend adds your Level to X for free.

If you have more Successes than Failures, you Succeed. If you have twice as many Successes than you have Failures, you Critically Succeed, and vice versa.

- **Critical Success:** You earn $Xd10 * Xd10$ GP and are completely untraceable. You may even gain an extra item depending on the scheme.
- **Success:** You earn $X * 1d10$ GP, though some enemy such as law enforcement might trace the scheme to you and any allies of yours in the future.
- **Failure:** You earn nothing from the scheme, and gain the Wanted Bleed with a bounty equal to the amount of gold spent.
- **Critical Failure:** You lose $X*5$ additional GP, or are arrested and sentenced depending on the amount owed. Certain places may not accept payment to clear the bounty.

Success or Failure, during your preparations, you may discover a powerful Artifact, major secrets around a business, or dealings in criminal spaces.

Riposte

Traits: Burn, Auto-Hit, Damage, Weapon

Free Action: 1 Cunning

Trigger: When a Creature Misses you with a Melee Weapon Attack.

Expend the Action Cost of the Weapon you are Wielding, and roll Damage against the Triggering Creature as if you Hit, though it doesn't count as an Attack.

Steady Aim

Traits: Burn, Advantage, Buff

1 Action: 1 Cunning

Your next Attack Roll is made at Advantage, and re-rolls any 1s on the Damage dice.

Sorcerer

Sorcerers harness the raw unbridled power of magic from within themselves. While Wizards boast a wide array of Spells to choose from, Sorcerers can find new ways to make Fireball the solution to each problem they face.

Ability Score Increase:

+2 Charisma (up to 16)

Hit Dice:

d6 or 4
(6 at 1st level)

Skills:

Two of the following (+Int Mod, Min: +0):
Arcana, Acrobatics, Deception, Perception, Persuasion,
Religion, Society

Saving Throws:

Charisma + one of your choice.

Weapon Proficiencies (Pick Three from the following lists):

Simple Weapons

Armor Proficiencies:

None

Class Initiative Modifier:

Charisma

Signature Abilities

Spellcasting (Arcane)

Traits: Long Rest, Magical

See pg. 55 about Spellcasting Rules.

Sorcery Points

Traits: Edge, Magical, Resource, Short Rest

You have a number of Sorcery Points equal to your Level.

You regain Sorcery at the end of a Short or Long Rest, or when you spend 1 Action Point to turn any number of Spell Slots into an equal number of Sorcery Points.

Metamagic

Traits: Burn, Magical, Metamagic

Sorcery: See Below

You can do one of the following:

- **Free Action:** Cast a Spell you have Prepared of up to 5th Tier, by expending Sorcery Points in place of Spell Slots.
- **Free Action:** Empower a Spell by 1 Tier, by expending one Sorcery Point, and the needed Actions for the Empowerment. This only applies to Empowered: (+X), not Empowered (X), but also ignores the Tier Restriction on how much you can Empower a Spell.

Sorcerer Feats

Infused Blood

Traits: Edge, Choice, Magical

Select any Spell you can cast without expending Spell Slots (such as a Cantrip), that can Target you.

If the Spell has any Healing Trait, it only works while you are Bloodied, and if it inflicts Damage, it only works while you aren't Bloodied. Otherwise, no restrictions.

At the Start of your Turn if you aren't Dying or Dead, you gain the effects of the Spell at its lowest Tier (Targeting you), automatically Hitting any Attack Roll or Failing any Saving Throw included.

If the Spell requires Concentration or has a Duration, the Spell only recasts if the benefits are lost, or if they can change.

You can take this Feat any number of times, picking a different Spell each time.

Quickened Metamagic

Traits: Edge, Improvement, Spellcasting

Metamagic Spells you cast no longer count towards the Multi-Attack Limit, provided you expend at least 1 Spell Slot or Sorcery Point to cast them.

Stubborn Concentration

Traits: Burn, Auto-Success, Concentration

Free Action: 1 Sorcery

Trigger: You Fail a Concentration Saving Throw

You instead Succeed on the Triggering Saving Throw, and ignore the Action Penalty from the Save.

Subtle Spell

Traits: Utility, Metamagic

Free Action: 1 Sorcery

Trigger: You cast a Spell.

You ignore the Verbal and Somatic Components of the Triggering Spell without the Action Cost penalty for Bypassing.

Unnatural Element

Traits: Burn, Damage

Free Action: 1 Sorcery

Trigger: The Damage of a Spell you cast is reduced by any means.

The Spells Damage is reduced by half, but ignores Resistance, Immunity, and Damage Thresholds.

Warlock

Having struck a deal with some higher power, Warlocks recover their magic much faster than Wizards or Sorcerers, but are much more limited in the magic they wield, and must call on their Patron for the strongest effects they can manifest.

Ability Score Increase:

+2 Charisma (up to 16)

Hit Dice:

d8 or 5
(8 at 1st level)

Skills:

Two of the following (+Int Mod, Min: +0):
Deception, Occultism, Perception, Persuasion, Religion,
Society

Saving Throws:

Charisma + one of your choice.

Weapon Proficiencies (Pick Three from the following lists):

Simple Weapons

Armor Proficiencies:

Light

Class Initiative Modifier:

Charisma

Archetype Requirement:

Any entity or qualifying Creature that is willing to act as your Patron.

Signature Abilities

Spellcasting (Occult)

Traits: Magical, Short Rest

See pg. 55 about Spellcasting Rules.

Instead of Spell Slots, you can cast a number of Spells equal to your Charisma Modifier (Minimum of 1). When you do so, it is automatically Empowered to 1st Tier without spending additional Actions, and is considered as if you had expended an equal number of Spell Slots.

You regain all these "Pact Slots" when you finish a Short Rest.

Tip: Just because a Spell is Empowered doesn't mean you have to use all effects for that Tier.

Pact Points

Traits: Edge, Magical, Resource, Short Rest

You have a number of Pact Points equal to your Level. You regain all Pact Points at the end of a Short or Long Rest, provided your Patron isn't displeased with you.

You also regain 1 Pact Point whenever you do something that pleases your Patron, but lose 1 Point when you displease them (talk to your GM).

Higher Power

Traits: Burn, Alternate, Metamagic

Free Action: 1 Pact Point

Trigger: You cast a Spell.

You do one of the following:

- The Triggering Spell uses Charisma instead of Wisdom for Spell Damage and Healing Rolls.
- You divide the Total Damage/Healing between the original Target(s), and one other Valid Target within Range of the Triggering Spell.

Warlock Feats

Agonizing Gifts

Traits: Edge, Choice, Improvement

Your Cantrips add your Proficiency Bonus to Damage Rolls, in addition the the Spell Damage Modifier.

Alternatively, when taking this Feat, you can choose for it to apply to the Spell Healing Modifier.

You can take this Feat a second time, gaining both benefits instead of choosing.

Backlash

Traits: Burn, Damage

Free Action: 1 Pact Point

Trigger: You take Damage from an Attack that reduces your Temporary Hit Points.

Your Attacker takes Force Damage equal to the number of Temporary Hit Points you lost.

Eldritch Step

Traits: Burn, Movement, Special, Teleport

Free Action: 1 Pact Point

Trigger: You take Damage.

You teleport up to 5 feet. If this teleports you out of Range of a Damage source, you take no Damage.

Special: You can take this Free Action on your Turn without a Trigger.

Hex

Traits: Burn, Damage, Curse, Debuff, Disruptible, Necrotic

2 Actions: 1 Pact Point

Range: 30 ft.

Duration: 1 Minute

One Creature you choose within Ranged is Cursed for the Duration.

While Cursed in this way, they take 1d6 Necrotic Damage whenever they're hit by a Spell Attack, or fail any Saving Throw against a Magical effect.

You can expend additional Pact Points to double the duration of this effect.

Mysteries of the Occult

Traits: Utility, Ability Check

Whenever you make an Intelligence Check, you learn one additional detail, even if you Fail.

If there are no details to learn, you may ask the GM for a name, which must connect to the information you wish to learn.

The name could be the name of an ally, item, place, book, file, or possibly even a code, though you must discover any further information about it through other means.

Wizard

By the power of practice and study, Wizards seek out and master the mysteries of magic to preserve knowledge, and gain power over their enemies. Just beware the ones that cackle maniacally at Levels 3-5.

Ability Score Increase:
+2 Intelligence (up to 16)

Hit Dice:
d6 or 4
(6 at 1st level)

Skills:
Two of the following (+Int Mod, Min: +0):
Arcana, Nurture, Occultism, Perception, Religion,
Society

Saving Throws:
Intelligence + one of your choice.

Weapon Proficiencies (Pick Three from the following lists):
Simple Weapons

Armor Proficiencies:
None

Class Initiative Modifier:
Intelligence

Archetype Requirement:
You must have a Spellbook, or a Book that can be turned into a Spellbook.

Signature Abilities

Spellcasting (Arcane)

Traits: Item, Long Rest, Magical

See pg. 55 about Spellcasting Rules.

Add a Spellbook of your own design to your Starting Equipment, or modify a Book that you already have. While you carry it, your Spellbook cannot be Damaged by any means.

Your Spellbook comes with 5 Cantrips and Spells of 1st Tier. When you Level Up, you add 2 new Spells of any Tier from the Arcane Spell List. You may also consume any Spell Scroll over a Long Rest to permanently add the recorded Spell to your book, provided the recorded Spell is part of at least one of your Spell Lists, and not an exclusive Spell like Vicious Mockery or Eldritch Blast.

If any Creature ever needs to replace your Spellbook, or obtain a backup copy, the price for copying a Spell from a Spellbook, Scroll (without consumption) or their Prepared Spells into a Spellbook is 50 GP per Tier of Spell + any required material components. Cantrips cost 5 GP.

Other than these restrictions, a Spellbook uses the Statistics of a Book, and can be made from one by any Spellcaster.

Note: A Spellbook can be used to replace any number of any Creature's Prepared Spells over the course of a Long Rest, if they are part of their Spell List.

Scholar Points

Traits: Edge, Long Rest

You have Scholar Points equal to your Level, which you recover at the end of a Long Rest.

Arcane Scholar

Traits: Burn, Spellbook

1 Scholar Point:

You may do one of the following:

- **Free Action:** You may bypass a Focus Component without the Action penalty, even if you bypassed another Component.
- **2 Actions:** You may cast an Arcane Spell directly from a Spellbook, even if it's not prepared, or replace a Prepared Spell.
- **10 Minutes:** You may cast a Spell at its lowest Tier, directly from a Spellbook, even if it's not prepared, and without expending a Spell Slot.
 - You may spend additional Scholar Points to Empower the Spell once per Tier, as long as you have access to the final Tier.
 - This is also in addition to any other time cost.

Wizard Feats

Counterspell

Traits: Burn, Ability Check, Audible, Magical, Manipulate, Spellcasting

Free Action:

Trigger: When a Creature within Range casts any Spell.
Range: 60 ft.

Expend any number of Spell Slots, Nullify the Triggering Spell, and make an Intelligence Spellcasting Check against the Triggering Caster's Spell Save DC:

- **Critical Success:** Both the Spell Slot and Actions are lost.
- **Success:** The Target must choose to lose either the Actions or Spell Slot used in Casting.
- **Failure:** The Action Points and Spell Slot are refunded.
- **Critical Failure:** The Triggering Spell is not Nullified.

Any Material Components that are Expended as part of the Triggering Spell are always refunded if Nullified, even on a Critical Success, and the lost Spell still counts against the Triggering Caster's Multi-Attack Limit.

If the Triggering Spell didn't require Spell Slots, any resource that was expended in place of the Spell Slots, including Charges or Uses are considered as the Spell Slot, and vice versa for Spells that cost no Actions.

If the Triggering Spell isn't in your Spellbook, the DC is increased by twice the difference between the number of Spell Slots you and your Target expended.

If the Triggering Spell is one that you have currently Prepared, you choose what is lost.

Example: if you use one Spell Slot to counter a 3rd Tier Spell you don't have in your Spellbook (such as Revivify, you monster), the difference is 2, for a +4 to the DC. Though a Spell cast without a Spell Slot would never have this bonus.

Magical Expertise

Traits: Edge, Improvement

Your Spell Save DC now adds your Proficiency Bonus.

Quickened Incantations

Traits: Edge, Actions

All Spells you cast take 1 less Action Point to cast (Minimum of 1), which applies after modifiers such as Empowerment, or bypassing Components.

You can take this Feat multiple times.

Reclaim Magic

Traits: Burn, Recovery, Short Rest, Spellcasting

Whenever you finish a Short Rest, you can expend a Scholar Point to recover Spell Slots an additional time.

Studious Negotiator

Traits: Utility, Ability Check, Money

When attempting to purchase any Magical Item, you can attempt an Arcana Check against the Item's Complexity.

- **Success:** The result is applied as a percentage discount on the Item (rounded to the nearest coin).
- **Failure:** The price increases by 1d100 as a percentage.

This effect can only be used once per purchase, and cannot go below a Merchant's minimum. Furthermore, you cannot attempt the check on the same Item more than once with the same Merchant.

Spellcasting

Contrary to popular belief, the Spellcasting Feature is difficult enough to fit on one page, no matter how many fireballs you add. This section explains Spellcasting in proper depth along with the Limitations that go with it. Just be sure to reference the source Class's Spellcasting as well, in case of extra features.

You start with a number of Spell Slots equal to your Proficiency Bonus, or your Charisma Modifier, and access to 1st Tier Spells. You recover a number of Spell Slots equal to your Charisma Modifier (minimum of 2) when you take a Short Rest, plus your Level when you take a Long Rest, or 1 Spell Slot on a Breather.

As a Free Action, you may become Drained 3 (ignoring Immunity) and regain 1 Spell Slot. A Creature with Spellcasting can spend 1 Action Point to give you any amount of their Spell Slots.

You can Prepare a number of Tiered Spells and Cantrips equal to your Intelligence Score, even if you don't have access to that Tier of Spell. Modifications to your Intelligence Score don't force you to learn or forget any Spells until you finish a Long Rest, or Level Up.

Unless otherwise ruled, you cannot replace your Prepared Spells unless you Retrain with a Spellcaster that knows your desired Spell, or you take a Long Rest to study a Spellbook or Spell Scroll with the desired Spell, or a Spell you copied with Copy Spell.

When you Cast a Spell, you must expend a number of Spell Slots equal to the Tier you wish to cast it at, unless it's a Cantrip. If you're Empowering the Spell (spending more Slots than its Tier), its Action Cost is increased by the original Action Cost, for every additional Tier.

If you don't have access to the desired Tier, you must Succeed on an Intelligence Check with the corresponding Proficiency for the School you're casting it from (e.g. Primal -> Survival). The DC is equal to $10 + 2 * \text{the Tier you're casting at}$:

Success: You cast the Spell.

Failure: You waste the Actions and Spell Slots, and can't try casting the Spell at this Tier or higher, until you finish a Short Rest.

Critical Failure: You cannot cast the Spell again until you finish a Full Rest.

If you don't want to spend the full Action Cost of a Spell, you can Concentrate to hold it, allowing any Creature with Spellcasting (and you!) to spend Actions to reduce the final cost by an equal amount, or Empower it for you if they have access to that Tier (spending Slots to do so).

Once the Action Cost is reduced to 0 or less, you can finish casting the Spell by dropping Concentration.

Note: Starting to cast a Spell in this way, contributing Actions, and finalizing the Spell both count against the Multi-Attack Limit for Spells.

Your Spell Attack Modifier is equal to your Intelligence Modifier + your Proficiency Bonus.

Your Spell Damage/Healing Modifier is equal to your Wisdom Modifier.

Your Spell Save DC is equal to your Charisma Score (Minimum of 5).

Spellcasting Checks always add your Proficiency Bonus, unless you don't have Spellcasting, or it is otherwise stated.

Most Spells involve Components: Verbal (V), Somatic (S), Material (M), Focus (F), and Concentration (C). And all Spells are Magical, unless otherwise stated. Of course, some tables ignore them. Feel free!

Verbal Components add the Audible Trait require you to speak audibly, and cannot be fulfilled if you cannot produce the sound. Somatic Components require you to either have one hand free, or wielding either a Focus Component, or the Material Component (if one is required), and add the Manipulate Trait to the Spell when used.

Material Components must be held in at least one hand during the Spell (can be used for Somatic Components), and is sometimes consumed, based on the Spell. Focus Components always replace a Material Component (if present), but require you to be wielding a Spellcasting Focus in one hand. Both Components add the Item Trait.

Concentration Components require you to Concentrate for the Duration of the Spell, ending it early if you lose Concentration, unless otherwise stated.

Lastly, you can bypass one Verbal, Somatic, or Focus Component of a Spell as if you provided them by doubling the Action Cost for that casting. However, you can only do this for one component at a time.

Spell Lists

Each Class uses one of 4 Spellcasting Lists: Arcane, Divine, Occult and Primal, which determines which Spells are available to said Class. The following lists contain 5 Cantrips, and 5 Spells of 1st Tier to get you started. If you want more Spells, see pg. 422, which will also contain information on which Spells are available to multiple lists.

Also, if you're just starting to learn this system, don't worry if you can Prepare more than 10 Spells. You can just use these lists as your Prepared Spells.

Arcane

Cantrips

Arcane Shove

Traits: Burn, Push, Saving Throw

Evocation Cantrip

Actions: 3

Components: S, M (a Brick or Rock)

Range: 60 ft.

Target: One Creature or Object

The Target must make a Strength Saving Throw, ignoring Size bonuses and penalties:

- **Critical Failure:** Same as Failure, but double the Distance.
- **Failure:** The Target is pushed away from you, a number of feet equal to 5 times your Spell Damage Modifier, regardless of Size (minimum of 5 feet).
- **Success:** Same as Failure, but larger Creatures are pushed half as far for each category (minimum of 0 feet).
- **Critical Success:** No effect.

Empowered: (+1)

The number of Targets increases by 1.

Fire Blast

Traits: Burn, Attack, Fire

Evocation Cantrip

Actions: 3

Components: V, S

Range: 30 ft.

Target: One Creature or Object

Damage: 1d8 Fire

Make a Ranged Spell Attack against the Target, which deals the listed Damage.

Empowered: (+1)

You increase the Damage dealt by 1d8.

Empowered: (+3)

The Range is doubled.

Guard

Traits: Edge, Resistance

Abjuration Cantrip

Actions: 3

Components: V, S

Range: Touch

Target: One Creature or Object

Duration: 1 Minute

The Target gains Resistance to all Damage equal to your Spell Healing Modifier (Minimum of 1). If the Damage Taken from a single effect exceeds this value, the Spell Ends at the Start of the Target's next Turn.

Persistent Damage never breaks Guard when it Triggers.

Reminder: Resistance prevents the application of Persistent Damage, but not an instance of Damage.

Empowered: (+1)

The Resistance adds your Spell Healing Modifier an additional time.

Message

Traits: Utility, Disruptable, Information

Divination Cantrip

Actions: 2

Components: V, M (a piece of wire), F

Range: 120 ft.

Targets: One Creature

You send a message of under 10 words to a Target you know or can see within Range.

The message can be audible or mental and can carry Non-Spell effects with the same Trait, but it must be in a spoken language you know. The Target can immediately reply up to 10 words in the same way (can't carry effects), but they must use a language they know.

If you spend at least 1 Minute establishing this connection, you can eliminate the word limit as long as you Concentrate, which does allow the Target to use Verbal or Mental effects with one Action through this Cantrip.

Empowered: (+1)

The Range doubles.

Empowered: (3rd)

If you have an item with a strong connection to the Target (lock of hair, first sword, precious locket, etc.), they don't need to be within range (but still on the same Plane), but the GM rolls 1d4. On a 1 or 2, the message fails to reach the Target, which you don't notice. Additionally, the Target cannot respond if they're out of Range.

Empowered: (5th)

You can send messages to Creatures in other Planes, though it's considered out of Range.

Empowered: (7th)

You can Target a Creature you know personally, without providing an item with a strong connection.

Empowered: (10th)

The DM no longer rolls for failure if you Target a Creature that's out of range.

True Strike

Traits: Burn, Auto-Hit, Buff

Divination Cantrip

Actions: 3

Components: S, M (a glass lens), F

Duration: 1 Minute

Range: Touch

Target: One Creature

Before the Duration ends, the next Attack made by the Target automatically hits even if it would automatically Miss, but cannot Critically Hit unless an effect causes it to do so.

Empowered: (+1)

You can Target an additional Creature, or benefit an additional Attack.

Empowered: (5th)

This Spell effects all attacks made in the same Turn.

1st Tier

Barrier

Traits: Utility, Cover

Abjuration, 1st Tier

Actions: 4

Components: V, S, C

Range: Touch

Duration: 1 Minute

Select any space within Range. That space is protected from one direction you choose, as if behind Full Cover, while also blocking movement, or even supporting any Creature that isn't bigger than the barrier.

This Barrier has 10 HP, and takes half Damage from Attacks that don't Critically Hit a protected Creature. It blocks movement, but is opaque or transparent at your choice.

Reminder: A Creature benefiting from Cover can attack around it while next to a corner, provided their Target isn't also benefiting from the same cover.

Empowered: (+1)

The Barrier gains an additional 10 HP, and +1 Resistance to All Damage.

Dispel Magic

Traits: Burn, Ability Check, Nullify

Abjuration, 1st Tier

Actions: 4

Components: V, S

Range: 60 ft.

Target: Any Object or Creature under a Spell or Magical effect you are aware of.

Make an Intelligence Spellcasting Check, with a DC equal to the Spell Save DC of the Targeted effect, or the Caster's Charisma Score, if it's not a Spell:

- **Success:** The effect ends.
- **Failure:** No effect.

If the Target is a Magical Item, you can only suppress the effects for up to 24 Hours, though you do so without a Spellcasting Check.

Empowered: (+1)

You gain a +1 Bonus to the corresponding Spellcasting Check.

Identify

Traits: Utility, Information

Divination, 1st Tier

Actions: 10

Components: V, S, M (a pearl worth at least 10 GP), F

Target: One Object or Creature

If the Target is a Creature, you learn their Name, what Ability Score they use for their Class Initiative Modifier, and any Magical effects they are under that aren't hidden from Divination Magic.

If the Target is an Object, you learn what it is, what it does, and how to activate it. This includes any Magical properties that aren't hidden from divination magic.

If the Target is affected by a Curse, you only learn of the presence of the Curse, unless it was cast at an equal or lower Tier than this Spell, in which case you learn about its properties, akin to other Magical effects.

Empowered: (+1)

You can identify Curses that were Empowered to 1 Tier higher.

Magic Missile

Traits: Burn, Auto-Hit, Force

Evocation, 1st Tier

Actions: 4

Components: V, S

Range: 120 ft.

Damage: 1d4 Force

You fire out 2 darts of Magical energy, which automatically hit any combination of Targets you can see within Range, dealing the listed Damage.

Reminder: All Hits include the Spell Damage Modifier individually.

Empowered: (+1)

You fire 2 additional darts.

Summon Elemental

Traits: Blast, Choice, Summon

Lists: Arcane, Primal

Conjuration, 1st Tier

Actions: 10

Components: V, S

Range: 30 ft.

Duration: 1 Hour

You Conjure an Elemental with no more than 2 Hit Dice (increased to 2 if less), and disappears at the End of the Duration or when Killed.

The Elemental treats all Actions and Abilities with limited use as if they were expended (such as Spellcasting).

The Summoned Elemental treats you as an Ally, and will follow your orders, even if they are suicidal. If not given any orders, the Elemental will defend itself.

You cannot summon Variants, though the Elementals you Summon can be converted into variants through other means.

Empowered: (+1)

The number of Hit Dice is increased by 2.

Divine

Cantrips

Death's Toll

Traits: Burn, Debuff, Drained, Necrotic, Saving Throw
Necromancy Cantrip

Actions: 3

Components: V, M (a small Bell or Gong), F

Range: 60 ft.

Targets: One Creature

Damage: 1d8 Necrotic

The Target must make a Charisma Saving Throw:

- **Critical Failure:** Double Damage, and they become Drained equal to your Spell Damage Bonus.
- **Failure:** They take the listed Damage.
- **Success:** No effect.

If the Target is Bloodied, their Degree of Success is reduced by 1.

False Life

Traits: Edge, Buff, Temporary Healing
Necromancy Cantrip

Actions: 3

Components: V, S, M (a bottle of alcohol), F

Range: Touch

Targets: One Creature

Duration: 1 Hour

Healing: 1d6 Temporary

The Target gains the listed Healing for the Duration.

You can also cast this Spell on any Creature that has accompanied you for at least 10 Minutes (including yourself), causing it to use the highest value, and last until either you have been Incapacitated or remain out of Reach, for the Duration.

Empowered: (+1)

The Temporary Healing increases by 1d6.

The 10 Minute Version uses your highest available Tier.

Guidance

Traits: Utility, Buff

Divination Cantrip

Reactions: 2

Components: V, S

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

Trigger: When a Creature you can see makes an Ability Check or Saving Throw, or begins any Activity that involves either.

The Triggering Roll adds 1d4 to the result.

Special: You can use this Reaction as an Action on your Turn, applying the benefits when the Target makes or starts an Ability Check or Saving Throw for the Duration.

Empowered: (+1)

Grant the die to one additional Creature within Range.

Mend Wounds

Traits: Burn, Nullify

Necromancy Cantrip

Actions: 2

Components: S

Range: Touch

Target: One Creature

You reduce one type of Persistent Damage by your Spell Healing Modifier (Minimum of 1).

Empowered: (+1)

The Persistent Damage Reduction is increased by 1.

Sacred Flame

Traits: Burn, Debuff, Radiant, Saving Throw

Evocation Cantrip

Actions: 3

Components: V, S

Range: 30 ft.

Target: 5 ft. Cube

Damage: 1d8 Radiant

All Creatures in the Target area must make a Dexterity Saving Throw:

- **Critical Failure:** Same as Failure, but Double Damage, and they have a 1d4 penalty to their next d20 Test.
- **Failure:** They take the listed Damage.
- **Success:** No Damage.

Empowered: (+1)

The Damage increases by 1d8.

1st Tier

Bless

Traits: Edge, Buff

Enchantment, 1st Tier

Actions: 4

Components: V, S, C

Range: 30 ft.

Target: One Creature

Duration: 1 Minute

The Target adds 1d4 to all d20 Tests for the Duration.

Empowered: (+1)

You can Target an additional Creature.

Cure Wounds

Traits: Edge, Healing

Necromancy, 1st Tier

Actions: 4

Components: V, S, M (a bit of balm or ointment), F

Range: Touch

Target: One Creature

The Target regains 1d10 Hit Points.

This doesn't affect Constructs or Undead.

Empowered: (+1)

The Healing increases by 2d10.

Inflict Wounds

Traits: Burn, Attack, Necrotic

Necromancy, 1st Tier

Actions: 4

Components: S, M (a piece of rotting flesh), F

Range: Touch

Target: One Creature

Damage: 2d10 Necrotic

Make a Melee Spell Attack, which deals the listed Damage.

Empowered (+1):

Damage increases by 2d10.

Respite

Traits: Burn, Nullify

Necromancy, 1st Tier

Actions: 4

Components: V, S, M (a ball of herbs), F

Range: Touch

Targets: One Creature or Plant

The Target can expend and roll a single Hit Die as if they completed a Breather, or end one type of Persistent Damage.

This doesn't restore any Resources, or allow any Action or Activity that requires a Breather, but does trigger and end effects from Buffs or Debuffs that require the Target to finish a Breather, unless they decide otherwise.

Empowered: (+1)

The Target can expend any number of Hit Dice, and the triggered/ended effects can require a Short Rest, then Half Rest, then Quality 1 Full Rest. After that, the quality improves by 1.

The Target can sacrifice a Hit Die without rolling it to immediately end one type of Persistent Damage, regardless of value.

Summon Celestial

Traits: Blast, Choice, Summon

Conjuration, 1st Tier

Actions: 10

Components: V, S

Range: 30 ft.

Duration: 1 Hour

You Summon a Celestial with no more than 2 Hit Dice (increased to 2 if less), which disappears at the End of the Duration or when Killed.

Regardless of what you Summon, the Celestial can End this Spell early on its Turn to grant its remaining Hit Points to any number of Creatures that are Bloodied within 30 feet.

The Celestial treats all Actions and Abilities with limited use as if they were expended (such as Spellcasting).

The Summoned Celestial treats you as if you were an ally, and will follow your orders, provided they aren't Anathemic to its Edicts (or the Edicts of your Deity if you have one).

If not given any orders, the Celestial will protect itself, and any Creature it perceives as Holy.

When Summoning a Celestial in this way, you can either apply one Variant, or combine it with the statistics of one other Celestial or NPC statblock with (Base) in the name. The Celestial is Summoned without any Equipment.

Empowered: (+1)

The number of Hit Dice is increased by 2.

Occult

Cantrips

Alacrity

Traits: Burn, Actions

Enchantment Cantrip

Actions: 3

Components: V, S, M (an Hourglass), F

Range: 30 ft.

Target: One Creature

The Target gains Action Points equal to your Spell Healing Modifier. If this would cause their Turn to happen before you, they take their Turn immediately after you.

Empowered: (+1)

You can Target an additional Creature.

Command Undead

Traits: Edge, Audible, Debuff, Disruptable, Mental, Minion, Saving Throw

Necromancy Cantrip

Actions: 3

Components: V, M (a Skull), F

Range: 60 ft.

Target: One Undead Creature

Duration: 10 Minutes

If the Target is Mindless, they become controlled by you as a Minion you cannot command for the Duration, and instead follows a verbal order given as part of this Spell, though they are limited by their capabilities, such as known languages.

If the Target is already under another Creature's control, you contest the previous Spellcaster's DC with a Charisma Spellcasting Check, looking at Failure effects in place of Success effects.

If you Target an undead Creature that doesn't have the Mindless Trait, they can make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but they cannot contest this effect further.
- **Failure:** They are controlled by you for the Duration, but can repeat the Saving Throw at the end of each Hour.
- **Success:** They become Immune to this effect for the next Hour.

Empowered: (+1)

The duration doubles.

Empowered: (10th)

The duration becomes permanent, or until overridden, and the Target can only repeat the Saving Throw while they have no tasks to complete.

Death Grip

Traits: Burn, Debuff, Grapple, Saving Throw

Necromancy Cantrip

Actions: 3

Components: V, S, C

Range: 60 ft.

Targets: One Creature or Object

Duration: 1 Minute

The Target must make a Dexterity Saving Throw:

- **Critical Failure:** Same as Failure, but the Target cannot regain Hit Points by any means while Grappled in this way.
- **Failure:** The Target is Grappled to their Space for the Duration or until they break free with the Overpower Action.
- **Success:** No effect.

Empowered: (+1)

You can Target one additional Creature.

Minor Illusion

Traits: Utility

Illusion Cantrip

Actions: 2

Components: S, M (a drop of water), F

Range: 30 ft.

Target: 5 ft. Cube

Duration: 1 Minute

You create an illusion within the Targeted space for the Duration, with one of the following effects, gaining the corresponding Trait:

- **Visual:** The illusion appears as a static object, which is revealed as such when touched.
- **Audible:** The illusion produces one sound as you imagine it.
- **Scent:** The illusion produces a single scent of your choice.

The illusion is believable until examined from within 5 feet or with a different Precise sense, at which point the trick is obvious. A Creature can attempt to discern an illusion from any distance with a Perception check against your Spell Save DC.

Once an illusion is discerned, it can be ignored.

Empowered: (3rd)

The illusion can be roughly animated for 1 Action Point on your Turn (spinning coin, reactive conversation, wafting scent, etc.).

Empowered: (6th)

The illusion is no longer obvious when examined from within 5 feet, and can contain harmless stimuli (touch, shock, etc.).

Empowered: (9th)

You no longer need to spend your Actions animating the illusion, and it cannot be detected through Non-Magical means.

Wrack

Traits: Burn, Mental, Psychic, Saving Throw
Enchantment Cantrip

Actions: 3

Components: V, S

Range: 60 ft.

Targets: One Creature

Damage: 1d8 Psychic

The Target must make an Intelligence Saving Throw:

- **Critical Failure:** Same as Failure, but Double Damage.
- **Failure:** They take the listed Damage, and use your Spell Save DC for any Triggered Concentration Saving Throw if it's higher.
- **Success:** No effect.

Empowered: (+1)

The Damage increases by 1d8.

1st Tier

Arcane Disguise

Traits: Utility, Choice, Visual

Illusion, 1st Tier

Minutes: 1

Components: V, S, M (a hat, amulet, or ring), F, C

Range: Touch

Duration: 1 Hour

You change the Target's appearance, such as eye color, clothing, skin tone, and even apparent height or weight.

You cannot cause the Target to appear as anything that is more than one Size category larger or smaller than they are, and physical interaction or a Perception Check against your Spell Save DC reveals the illusion. Otherwise, the appearance seems natural.

Empowered: (+1)

You can Target an additional Creature within Range.

Bane

Traits: Edge, Debuff, Disadvantage

Necromancy, 1st Tier

Actions: 4

Components: V, M (a Drop of Blood), F

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

The Target must make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but they also have Disadvantage on the first d20 Test they make.
- **Failure:** They have a Penalty to all d20 Tests they make for the Duration equal to your Spell Damage Modifier (minimum of 1).
- **Success:** They have a -1 Penalty to their next d20 Test.

Empowered: (+1)

You can Target an additional Creature within Range.

Fear

*Traits: Burn, Emotion, Frightened, Saving Throw
Enchantment, 1st Tier*

Actions: 4

Components: V, S

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

The Target must succeed on a Charisma Saving Throw:

- **Critical Failure:** They become Frightened equal to your Spell Damage Modifier (Minimum of 1), for the Duration.
- **Failure:** They become Frightened 1 for the Duration.
- **Success:** No effect.

They can also reattempt the Saving Throw using Wisdom at the End of their Turn, without the penalties of Failure.

Empowered: (+1)

You can select an additional Target, and the Duration is doubled.

Mage Armor

*Traits: Edge, AC, Improvement
Abjuration, 1st Tier*

Actions: 10

Components: S, M (a shell or carapace), F

Range: Touch

Target: One Creature

Duration: 8 Hours

The Target's Base AC becomes 11, unless their Armor has a greater base value.

If the Target is already wearing Armor with a greater or equal value, they can add their Dexterity Modifier to AC, even if said Armor would normally restrict it.

Empowered: (+1)

Add +1 to the AC granted.

Summon Fiend

*Traits: Blast, Choice, Summon
Conjuration, 1st Tier*

Actions: 10

Components: V, S, M (a Vial of Blood, which is consumed by the Spell)

Range: 30 ft.

Duration: 1 Hour

You mark your current Space, and Summon a Fiend with no more than 2 Hit Dice (increased to 2 if less), which can only disappear if it dies, or is dismissed by you for 10 Actions, while you are in the space you marked when Summoning it.

The Fiend treats all Actions and Abilities with Limited Use as if they were expended (such as Spellcasting).

The Fiend obeys your orders for the Duration, and will follow your orders in a way that furthers its own ends if possible, provided the orders aren't suicidal.

After the Duration Ends, or if not given any orders, the Fiend will either attack the easiest Target (such as you), or flee from Combat, unless it stands to gain from another course of action.

Any Creature that stands in the space you marked when Summoning this Fiend is completely Immune to all Damage and Debuffs from the Summoned Fiend.

You cannot summon Variants, though the Fiends you summon can be converted into variants through other means.

Empowered: (+1)

The number of Hit Dice is increased by 2.

Primal

Cantrips

Acidic Grasp

Traits: Burn, Acid, Attack, Debuff, Vulnerability

Evocation Cantrip

Actions: 3

Components: V, S

Range: Touch

Target: One Creature or Object

Damage: 1d10 Acid

Duration: 1 Minute

Make a Melee Spell Attack against the Target which deals the listed Damage.

On a Hit, the Target becomes Vulnerable 1 to Physical Damage for the Duration.

Empowered: (+1)

The Damage increases by 1d10, and the Vulnerability increases by 1.

Command Fire

Traits: Edge, Debuff, Fire, Saving Throw

Evocation Cantrip

Actions: 2

Components: S, C

Range: 30 ft.

Target: Up to a 5 ft. cube.

Damage: 1d6 Fire

You create an effect using flames, such as harmless flickers, changing the color, or a hovering flame that requires Concentration.

You can cause material within range to ignite, or extinguish, which extends to ending Persistent Fire Damage (automatic success).

A Creature in the space when a flame is ignited, starting their Turn there, or entering its space must make a Dexterity Saving Throw:

- **Critical Failure:** Same as Failure, but the listed Damage is taken as Persistent Damage.
- **Failure:** They take the listed Damage
- **Success:** No Damage, and may immediately spend Reactions to Move out of the Space if it's not their Turn, and they have the Movement.

The flame extinguishes when you lose Concentration, unless it has something to burn.

Empowered: (+1)

The largest area you can Target expands by 5 feet.

Command Water

Traits: Edge, Debuff, Grapple, Prone, Push, Saving Throw, Water

Transmutation Cantrip

Actions: 2

Components: V, S

Range: 30 ft.

Target: 5 ft. Cube

All uncontained water (or similar liquid) within the area is moved along a supported surface to any space within Range. Any Creature submerged within the Area must make a Strength Saving Throw, while submerged Creatures make the Saving Throw at Disadvantage:

- **Critical Failure:** Same as Failure, but they're also knocked Prone.
- **Failure:** They are Pushed to the new position, in accordance to their position in the original area.
- **Success:** No effect.

You can also choose to freeze the water instead, which Grapples Creatures instead of Pushing, and Restrains them instead of knocking them Prone, with an escape DC equal to your Spell Save DC, reduced by Fire Damage inflicted to the space. Thawing a space ends this effect.

Lastly, you can produce a harmless effect using water within the area, such as changing the color and opacity, soaking or drying a Creature or object, or forming shapes.

Empowered (+1)

The area expands by 5 feet.

Control Earth

Traits: Burn, Cover, Earth, Prone, Push, Terrain Transmutation Cantrip

Actions: 3

Components: S

Range: 30 ft.

Target: Up to a 5 ft. cube

You can move any amount of loose earthen material within the Area such as stone, dirt or sand along a supported surface, to any unoccupied space within Range.

A Creature standing on the surface can make a Dexterity Saving Throw, though Prone Creatures roll at Disadvantage instead of Advantage:

- **Critical Failure:** Same as Failure, but they are also knocked Prone
- **Failure:** They are Moved to the new position, in accordance to their position in the original area.
- **Success:** No effect.

You can also choose to make any amount of affected Terrain you move Difficult, or Non-difficult. Also, material moved this way can provide or eliminate Cover.

Lastly, you can produce a harmless effect using earth within the area, such as forming patterns and shapes in the material, or stacking objects.

Empowered: (+1)

The area expands by 5 feet.

Control Wind

Traits: Burn, Prone, Push, Saving Throw, Wind
Evocation Cantrip

Actions: 2

Components: S

Range: 30 ft.

Target: 5 ft. Cube

You conjure a breeze of varying strength within the area. Any Creature that is completely inside the area must make a Strength Saving Throw:

- **Critical Failure:** Same as Failure, but they also fall Prone.
- **Failure:** They are pushed outside the Area.
- **Success:** No effect

You can also produce a harmless effect using air or gas within the area, such as forming colors or odors.

Empowered: (+1)

The area expands by 5 feet.

1st Tier

Feather Fall

Traits: Edge, Movement

Transmutation, 1st Tier

Reactions: 3

Components: S, M (a Feather), F

Range: 60 ft.

Targets: Up to Five Creatures

All Targets slowly descend at a rate of no more than 60 feet at the end of their Turns, and take no Fall Damage by any means, which includes Damage from being thrown 10 feet or more.

This effect Ends if they end two consecutive Turns while on solid ground.

Empowered: (+1)

You can Target two additional Creatures.

Fog Cloud

Traits: Utility, Sense

Conjuration, 1st Tier

Actions: 4

Components: V, S

Range: 30 ft.

Target: 15 ft. sphere

Duration: 1 Minute

You fill the area with thick fog. Creatures using sight have their Precise Radius reduced to 5 feet, while other senses work at half range, except Tremorsense.

The fog spreads around corners, and has its radius reduced by 5 feet at the start of each Round it is subjected to strong wind, or when such an effect is first applied.

Empowered: (+1)

The Size of the sphere is doubled.

Moonlight

*Traits: Edge, Saving Throw, Transformation
Enchantment, 1st Tier*

Actions: 4

Components: V, S

Range: 60 ft.

Target: 15 ft. Radius

Duration: 10 Minutes

For the Duration, any affected Creature under a Transformation effect other than this one must make a Charisma Saving Throw:

- **Failure:** They spend their Actions to End all Transformation effects other than this one, and can't be subjected to any others while affected by this one.
- **Success:** Their true nature is revealed, though they Succeed on subsequent Saving Throws against Moonlight for 1 Hour.

effects that cannot be willingly ended are instead Suppressed within the area on Failure, with their Duration continuing to expire during that time.

Empowered: (+1)

The Radius expands by 5 feet.

Regenerate

*Traits: Burn, Persistent Healing
Necromancy, 1st Tier*

Actions: 4

Components: V, S, M (a ball of moss), F

Range: Touch

Duration: 1 Minute

Healing: 1 Persistent

You apply the listed Healing, which doesn't degrade, and isn't affected by the Spell Healing Modifier unless otherwise stated.

Unlike most healing, this does affect Constructs and Undead.

Empowered: (+1)

The Persistent Healing increases by 2.

Empowered: (5th)

You can choose to instead maintain a lesser effect that provides no healing, but restores Missing limbs over the course of a Long Rest.

Summon Beast

Traits: Blast, Choice, Summon

Conjuration, 1st Tier

Actions: 10

Components: V, S

Range: 30 ft.

Duration: 1 Hour

You Summon any Beast with no more than 2 Hit Dice (increased to 2 if less), which disappears at the End of the Duration or when Killed.

You can reduce the Beast's Hit Dice by half to make the Beast last for 24 Hours instead.

The Beast treats all Actions and Abilities with limited use as if they were just expended (such as Spellcasting).

The summoned Beast treats you as if you were an ally, and will follow your orders provided they aren't suicidal. If not given any orders, the summoned Beast will defend itself, and any Creatures it sees as either ally, or kin.

You cannot summon Variants, though the Beasts you summon can be converted into variants through other means.

Note: If your GM allows you to summon a PC or NPC with this Spell (or similar), their health is unaffected, their loyalty and personality are unaltered, and when they disappear, they return to where they were at the time of casting, as soon as they are dismissed or reduced to 0 Hit Points.

Additionally, you would have to personally know the Creature being Summoned, and they would have to be willing.

Empowered: (+1)

The number of Hit Dice the Beast has is increased by 2.

What Is Avoidance Class?

Avoidance Class (or AC) is a representation of how evasive you are, or how accurate someone must be in order to hit you. It is somewhat influenced by Armor (as some call it Armor Class) and Size, but it is primarily determined by the overly-complicated formula:

$$(10 + \text{Dexterity Modifier})$$

All Attack Rolls contest Avoidance Class as a DC. And while it is possible to get a ridiculous AC value, your GM might not appreciate that. Plus, there are ways to bypass it entirely.

What Are Proficiencies?

A Proficiency is something your Character practices, or otherwise has a knack for. And while you don't need it for everything, it does give you a small bonus to the corresponding modifiers equal to your Proficiency Bonus (Either +2, or listed on pg. 119 based on your Level).

Proficiencies apply to Weapons, Items and Saving Throws, as well as Tools, Armor, Languages. But are mostly used for d20 Tests.

You primarily gain Proficiencies from Backgrounds, Feats, Intelligence, Classes, Subclasses, Ancestries, Completed Quests, or Training.

Sometimes (like with Feats) you may be rewarded Proficiency in something you are already Proficient in. When this happens, you can replace it with any other Proficiency that isn't a Saving Throw, unless the GM rules otherwise.

You don't need to be Proficient with an Item or Skill in order to use it, but they are required for certain synergies (e.g. Item-based Traits like Armor or Weapon), and some Items may have unfavorable behaviors if you don't add your Proficiency Bonus as follows:

Weapons & Tools

You cannot utilize any Feat that utilizes or requires the unproficient Weapon or Tool (e.g. the Weapon or Tool Traits). Weapons with the Loading Trait also require Twice as many Actions to Reload.

You typically gain 3 Weapon Proficiencies by default based on your Class. Note that Unarmed Strikes and Natural Weapons are considered both Simple and Light Weapons, and all Creatures are Proficient in Unarmed Strikes and Natural Weapons.

Weapons in the same Category (e.g. Sword) are still considered separate weapons to reflect preferences, and minor differences. Your GM may either ignore this restriction, or allow you to be Proficient in the first 3 Weapons you use (within the limits).

Improvised Weapons are things like Bottles, Potions, and other Items that either don't fall under the Simple or Martial categories. They use the nearest relevant Proficiency, or Proficiency in Improvised Weapons, such as a table leg being considered a Club.

Armor & Shields

You cannot cast Spells using Somatic, Material, or Focus components, and you have Disadvantage on all Dexterity Checks and Saving Throws.

Also, you cannot utilize any Feat that utilizes the unproficient Armor/Shield.

Languages

You cannot understand Creatures that speak the Language, though you may pick up vague ideas with a successful Insight Check against a Base DC of 15.

Note: If you gain a Proficiency that isn't listed on your character sheet, it should be marked somewhere else. For example, Electronics or Water Vehicles could be marked on the back of your sheet, or in the special field for Extra Proficiencies.

What are Feats?

A Feat is not something you walk on, but a special ability that enables you to do something cool, like chucking enemies at each-other, blowing up books, or throwing 40+ punches on your Turn.

Feats come in different forms, including Ancestry, Class, General, Utility, and Bleed.

While the others are mostly self-explanatory, Bleeds are effectively double-edged Feats. They can grant a nice bonus, but often inflict a penalty that can change the way you think about the game. Some can be removed, some can't, and some are inflicted by monsters or circumstances. But you can always take a Bleed at Level 1 if you choose.

Feats also come with various Traits, with the main ones as follows:

- **Utility:** A Feat that is more beneficial for Non-combat purposes, such as earning money, getting information, or getting from point A to point B.
- **Edge:** A Feat that provides a more persistent benefit, or that doesn't cause a significant drain on resources.
- **Burn:** A Feat that costs a few resources (such as Actions), but often has more powerful benefits.
- **Blast:** The Big One. La Bomba. The Earth-Shattering Kaboom. These Feats come with a steep price, with the power to turn the tide of combat if wielded properly.
- **Boon:** A Feat that is much more powerful than your average General Feat, and requires Level 20 or higher (see pg. 119). Boons aren't available in the Core Rules, but feel free to make your own.

Feats are usually obtained from Leveling Up (pg. 119), or upon completing a quest that gives a Feat as the Reward.

What is a d20 Test?

A d20 Test is any roll that utilizes the d20, and includes Ability Checks, Attack Rolls and Saving Throws.

All d20 Tests require rolling 1d20 (or a twenty-sided die), and are rolled against a Difficulty Class (DC) which can be determined by various factors, and decided by the GM (see pg. 113). You must roll Greater than, or Equal to the DC in order to Succeed (in favor of the Creature taking the corresponding Action for contests).

All d20 Tests can be a Critical Success, or a Critical Failure, which happens when you roll at least 10 above or below the DC respectively. But if a d20 Test doesn't specify a Critical Success or Critical Failure effect, and also isn't tied to a corresponding rule (such as Inspiration from useless Crits), then Critical Success and Critical Failure mean nothing more than just how spectacular it was.

When you roll a 1 or 20 on the d20, it is considered a Natural 1, or Natural 20 respectively. A Nat 1 reduces the final result by 10 (effectively -9), while a Nat 20 increases the final result by 10 (effectively 30).

An Ability Check is used whenever a Creature wishes to do something that is influenced by one of the Six Ability Scores and/or a Proficiency Bonus, but also has a risk AND consequence of failure. A counterpart to Ability Checks is the Flat Check, which doesn't add any Ability Scores or Proficiencies.

An Attack Roll is used whenever a Creature wishes to strike something, and determines the accuracy of an Attack in striking a small, or moving Target.

Rolling a Critical Success on an Attack is considered a Critical Hit, and doubles all Damage Dice. Rolling a Success is considered a Hit, allowing you to roll and calculate Damage depending on the attack. Rolling a Critical Failure does nothing special if unspecified, unless using Critical Fumbles, which aren't included in this book.

Do be aware: all Ranged Attack rolls are at Disadvantage while you are within Reach of a hostile Creature.

A Saving Throw is used whenever a Creature is forced to react without a chance to consider their options, such as when you need to dodge a rolling boulder.

Rolling a Critical Success causes you to take No Damage from a triggering source if unspecified. Rolling a Success causes you to take Half Damage if unspecified. Rolling a Critical Failure causes you to take Double Damage if unspecified.

All Saving Throws included in official rulebooks will usually specify their results, and so this is more useful for reading or designing homebrew (pg. 604).

Some effects reference Degree of Success. This refers to whether it was a Success, Failure, or Critical, with Critical Success being the highest degree, and Critical Failure being the lowest.

Before you move on to the next column of this page and abandon this section for who-knows-how-long, do note that you will sometimes have to make 3-6+ rolls in quick succession (e.g. Monk attacking 10 times in one Turn).

If you call it out BEFORE you roll, you can roll for all required d20 Tests, using the same result for all.

However, you cannot use this with effects that pre-determine or re-roll the d20, such as Portent, unless you have enough uses for all rolls, and use them for all rolls. And yes, this does apply a nat 1 or nat 20 to all affected rolls, if you get it.

And if you're visiting Concentration, hi! I just broke yours!

What is Concentration?

Concentration is applied to any Spell, Feat, Item, or other form of Activity that requires consistent attention to maintain. You can maintain one such Concentration effect without any immediate penalty, and you can drop Concentration at any time as a Free Action, even if you normally wouldn't be able to.

If you are distracted while Concentrating (such as trying to talk back to someone, having a wave crashing over you, or an ally falling Unconscious), you must roll a DC 10 Concentration Saving Throw, or whatever DC the GM decides.

If you take Damage while Concentrating, you must make a Concentration Saving Throw with a DC of 5 + half the total Damage taken (rounded up).

A Concentration Saving Throw is a Special kind of Wisdom Saving Throw, that is used more regularly by different effects.

- **Success:** You maintain all Concentration effects.
- **Failure:** You lose one Concentration effect.
- **Critical Failure:** You lose ALL Concentration effects.

Success or Failure, you lose 1 Action Point when making a Concentration Saving Throw in Combat, and lose all Concentration effects when you have 0 Actions or less, or are Incapacitated.

If you have more than 1 Concentration effect active at any given time, you increase the Action Point Penalty for making a Concentration Saving Throw by 1 for each additional effect. You also take the Action penalty at the Start of each of your Turns.

Finally, you cannot Concentrate during a Long Rest, unless you don't need to sleep.

Core Gameplay

Once you've figured out the basics of Mages & Mansions, it's time to get into more intricate details, such as what a game should look like, an in-depth guide for Combat, Travel rules, Dungeon design, and more.

Pillars of Gameplay

Each TTRPG has various Pillars of gameplay that make it much more fun to play. And while below are the primary pillars for this and many other systems, each table will require a unique balance of them, often preferring one or more over others.

- **Combat:** Scenarios where two or more sides are engaged in a Competitive Activity. Often with fatal stakes.
- **Exploration:** Opportunities to discover more about the world, how it works, what is available, what is possible, and how to best drive the GM crazy (not all the time of course).
- **Puzzles:** A collection of clues that may tie into Exploration, but otherwise test the cognitive capabilities of the Players (not the Characters) in their ability to solve problems, and piece together plots and exploit interactions.
- **Rest:** Time to step back, wind down from adventuring for a bit, plan the next step, and do some activities that can help the Adventurers overcome their next obstacle.
- **Social:** A time to converse with NPCs in various ways from dealing with Fiends, chatting with Dragons, pranking the Fey, and dancing with Celestials.

As with many other things in this book, these Pillars of Gameplay should come in handy for more than just Mages & Mansions, so please feel free to take the ideas and apply them elsewhere.

Combat

Commonly known as the “Bread and Butter” of every TTRPG (and widely misunderstood as such), Combat is the most rules-heavy part of many systems, such as this one.

The important thing to remember about Combat is that it's not always about killing your Opponent. It can be about delaying your Opponent, keeping your Opponent from completing a specific Action, getting to an object first, or some other goal.

Starting Combat

Instead of starting just when the GM says “Roll Initiative” (though it can start then too), Combat starts when one Creature takes an aggressive Action, such as Attacking, casting a harmful Spell (if any Creatures are able to do anything afterward), or otherwise successfully pressuring other Creatures into engaging in a Competitive Activity (like a sport). A Creature that does this is considered to be Initiating.

When it's time to “Roll Initiative,” the GM determines what Skill Check would be appropriate for each Creature to roll, treating a Natural 1 as a 1 instead of -9, so low rollers can still play.

Example: A Barbarian trying to grapple someone, or pull an ally up the rope would use Athletics as their Initiative Bonus, while the Bard trying to negotiate a different option would use Persuasion, and the Wizard figuring out the plot would roll Society, or Intelligence with or without Proficiency. You can even use Tool Proficiencies if it would be appropriate.

Simply put: if the Skill is in use, that's what's used. Otherwise, the Creature rolls Perception.

Next, the GM determines if each Creature is Surprised, Prepared, or Ambushing:

- A Surprised Creature had no warning or was not paying attention, and takes 1 + their corresponding Bonus, as if they rolled a 1.
 - An example of this would be getting attacked in a safe place, or when your ambush gets sprung early.
- A Prepared Creature could detect growing tension or that something was off, and rolls an Ability Check with the corresponding Bonus, or just 10 + their bonus for mass combat.
 - Don't forget that you can also use the results from the last applicable check, such as a Persuasion or Intimidation Check if you were trying to convince the enemy to back down, or Stealth if you were sneakily sneaking.
- An Ambushing Creature gave no hint of their intentions, and takes their Maximum Actions as their Initiative.
 - An example of this would be a Creature that rolled Stealth previously, and beat all opposing Wisdom Scores, or striking mid-conversation.

The Combat Loop

The order of Combat goes as follows:

- Step 1: All Creatures roll Initiative (as above).
- Step 2: The GM lays out the Battle Scene verbally or physically if they haven't already.
- Step 3: The Initiating Creature takes their Turn before all others, even if they have the fewest Actions of the entire Combat.
- Step 4: All other Creatures take their Turns in order from highest to lowest as usual, ending the Round at Initiative Count 0.
- Step 5: Increase the Initiative of all Creatures by their Class Initiative Modifier + their Constitution Modifier, and repeat step 4-5 (for all Creatures) until Combat ends.
 - Monsters have their Initiative Recovery pre-calculated.

If a Creature's Class Initiative Modifier + Constitution Modifier is less than 1, the total is raised to 1. No Creature can have an Action Limit that is less than 1.

On your Turn

During their Turn, a Creature has a number of Actions equal to their Initiative and Vice Versa, which means changes on one reflects on the other. This also helps a lot when asking: "is that your Turn?"

A Creature can take Actions, Reactions and Free Actions until they either end their Turn, or have 0 Action Points or less, which ends it immediately. However, if they take Actions that drop them to -5, -15, -25... etc. Their Exhaustion increases by 1 for every -10 Action Points they have (pg. 82).

Reminder: you can still take Actions that cost more than you have. That's usually how you go negative.

A simple and easy way to track Actions and Turn Order is to have a counter that counts from 30, all the way down to 1 before resetting, with representative tokens for each Creature, which you move up and down as they take and gain Actions.

The maximum number of Actions a Creature can have at any given time is limited by their fastest Movement Speed (half for Flying), or their Action Recovery. Whichever is higher.

A Creature can take up to 2 Actions with the Attack Trait each Round, unless the Action bypasses the Multi-Attack Limit (which is this number). This limit is counted separately for each Limb, and for Spells as a whole.

A Creature that ends their Turn with 1 or more Actions remaining may use them to take Reactions and Free Actions with Triggers (such as Step), once the Initiative drops to equal or less than their remaining Action Points. However, you can only take 1 Reaction for each Trigger, which you must be able to detect with any Sense.

As an optional variant, each Creature takes their Turn until another Creature that hasn't ended their Turn is higher than them in Initiative. Once they end their Turn, they can take Reactions on any other Creature's Turn.

Each Round is considered to be approximately 6 seconds, which is important when you consider various Spells with durations of 1 Minute.

Available Actions

Block: Varies

Traits: Burn, Buff, Reaction, Shield

Restriction: You must be wearing a Shield or similar that you are Proficient with.

Trigger: You or an Ally within your Reach is hit by an Attack.

The Action Cost is listed on the Shield you use.

Pick a corner or side of your space, or a space that is adjacent to an Ally. Any time you or the Triggering Ally would be subjected to an Attack or Saving Throw from this direction before the Start of your next Turn, apply the Shield's Cover Bonus to the Creature's AC, Dexterity and Strength Saving Throws.

Reaction: You instead reduce the Damage taken by your Strength Modifier.

Dash: 3 Actions

Traits: Burn, Buff, Move

Restriction: You haven't taken an Action without the Move Trait this Turn.

Limit: Once per Round

You immediately take the Move Action, and double your Movement Speed for this Turn.

However, you can't take any Actions that don't have the Move Trait, unless they're Free.

Disrupt: 5 Actions

Traits: Burn, Nullify, Saving Throw, Special

Requirement: You are subjected to an effect that requires a Wisdom Saving Throw at the end of each of your Turns.

Special: You can use this Action even if you're Incapacitated, but not if you're Unconscious.

You immediately attempt the Saving Throw using Intelligence instead of Wisdom.

Some effects may be Disruptable, despite not requiring a Wisdom Saving Throw, based on GM rulings, effect descriptions, and the Disruptable Trait.

Dodge: 3 Actions or Reactions

Traits: Burn, Buff, Disadvantage, Move, Nullify, Reaction

Trigger: You are Targeted by an Attack

All Attack Rolls against you have Disadvantage, cannot Critically Hit by any means, and you cannot be Flat-footed until the Start of your Next Turn.

Reaction: You instead reduce the Damage taken by your Dexterity Modifier.

Fall Prone: Free

Traits: Utility, Move

You Fall Prone (pg. 84).

Flop!

Interact: 2 Actions

Traits: Utility, Manipulate

You do one of the following:

- Grab the first item from an open container.
 - Items and Weapons in sheathes and holsters are assumed to be drawn as part of the Action. can be drawn as part of the Action.
- Retrieve an Item from the ground.
- Open/Close a Door.
- Toss an item to a Creature within 60 feet (requires 2 Reactions to catch).
- Interact with an Item, Object, or Creature.

An Item, Object or Creature may require a unique Action Cost to interact with it, and will state such, though the GM may rule for more or less (such as an uncorked potion, a stuck door, or tripping over the lever). Additionally, using an Item that is in a sheathe or dedicated container doesn't require you to draw it as part of the Action cost.

Note: unless it's part of a dedicated Action, talking doesn't cost Actions, but may take multiple Turns to finish a long speech, and it can trigger a Concentration Saving Throw if you are Concentrating on something else. Gotta have some way to stop a monologue.

Move: 1 Action*Traits: Burn, Move*

Restriction: You haven't expended all your movement Speed.

Special: Costs 2 Actions while wearing Medium Armor, or 3 while wearing Heavy Armor.

You move up to 10 feet in any direction (diagonals are 5), or 5 feet onto Difficult Terrain, spending Movement at the same rates. Alternatively, you may stand from Prone for 10 feet. Movement you take in this way is expended equally from all Speeds.

You can also horizontally jump a number of Feet equal to your Strength Score, or vertically jump a number of Feet equal to 3 + your Strength Modifier. However, you only land at the End of your Turn, unless you have enough Movement to follow through.

Overpower: 2 Actions*Traits: Burn, Attack, Debuff, Grappled, Push, Prone, Manipulate*

Make an Athletics Check, contested by Acrobatics or Athletics (Target's Choice, see pg. 92 for Size-based modifiers). This counts as an Unarmed Strike.

If your Target is willing, you instead contest any other effect that restricts Movement, or automatically Succeed if none are present.

When attempting to Overpower a Creature that is at least 2 Sizes larger than you, you must employ the use of something like Rope in order to do so.

- **Success:** Do one of the following: Grapple the Target, Push them 5 ft. in any direction, or Knock them Prone.
- **Failure:** Nothing.
- **Critical Failure:** The Target Steps once for Free.

If you are Grappling a Creature, you must choose at least 1 Limb, which you cannot use to Attack any other Creature without Releasing the Grappled Creature. Larger Creatures may require multiple limbs.

If you are currently Grappled or Restrained, you may re-attempt the Save against the original DC to escape.

Prepare: Free Action*Trait: Edge, Final, Improvement, Reaction*

You select any other Action or Reaction you can perform, and declare an observable Trigger if it doesn't have one. Until the start of your next Turn, you may use that Action if you observe the Trigger, provided any listed Restriction don't apply (like the Multi-Attack Limit). End your Turn.

When you Prepare an Action in this way, you ignore the Initiative Restriction for this Reaction.

Spot: 1 or 3 Actions*Traits: Utility, Concentration, Detection, Skill Check*

Select a Sense and corresponding Target, then roll Perception.

- **Sight:** 100 ft. Cone. Can't detect Invisible Targets, or through Cover that isn't transparent.
- **Smell:** 10 ft. Radius, Can't detect a Masked Target or determine a Target's position (unless precise), but detects around Cover.
- **Sound:** 60 ft. Radius. Can't detect Silent Target, but detects through Cover if the Target has spent at least one Action Point within the last Round.

Any Creature that rolls a Stealth Check lower than your Perception Check is Detected. If using a Precise Sense, you learn their exact Position. Otherwise, you learn their general direction from you. If you aren't using this Action, they roll against your Wisdom Score.

3 Actions: You treat one Imprecise Sense as Precise, for your next Action, unless you lose Concentration.

In certain environments, you might not be able to use various senses effectively, such as hearing in a busy street, or smell in an alchemy lab.

Special Senses:

- **Tremor Sense:** Detects when a Creature Moves.
- **Blindsight:** Detects if any Creature is within 5 feet of a Space, whether or not they're visible.
- **Truesight:** Detects Magic, Illusions, and reveals Invisible Creatures.

Stabilize: 5 Actions

Trait: Burn, Buff, Manipulate

Target: A Dying Creature within Reach

The Target adds your Medicine Bonus to their next Death Saving Throw.

Step: Free Action

Traits: Edge, Free Action, Move

Restriction: You cannot have Stepped earlier this Round, unless it was, or this was free.

Trigger: When a Creature selects a Target or Area.

You move up to 5 feet into Non-Difficult Terrain. If this moves you out of a Triggering Action's Range, you treat any Saving Throw as one Degree of Success better, and any Attack as one Degree worse, even if it would automatically Hit.

Additionally, only Prepared Actions and Reactions can react to this Action as a Trigger.

Unarmed Strike/Natural Weapon: 2 Actions

Traits: Burn, Light, Simple

Make an Attack Roll against a Creature within your Reach, or the applicable Range. The Damage for this Attack is always 1 (2 on Crit), unless otherwise stated or declared.

- **Critical Hit:** Same as a Hit, but you double all Dice.
- **Hit:** You inflict the listed Damage + your Strength Modifier
- **Miss:** You deal no Damage.

This Attack can be made with fists, feet, tails, and so on.

Due to the Light Trait: The Action Cost is reduced by 1 every other Attack with a different Light Weapon.

Reminder: Each limb is counted separately for the Multi-Attack Limit, which starts at 2.

If making multiple Attacks, you can declare the amount before the roll, and use the same dice for ALL of them, assuming any modifications are predictable and consistent, or at least handled properly.

Bosses and Legendary Monsters

Boss Monsters are Monsters that are tougher than usual, as they get at least 1 Legendary Monster Feat (pg. 508), and don't always die at 0 Hit Points. Some of them may have Minions (pg. 91), or particularly creative abilities and tactics.

Instead of dying, they retreat, or trigger something that allows them to go down swinging, such as a self-sacrificial trap, or demolishing their lair.

Alternatively, they become Stunned 10 (or less if that's too much), only dying when the Party works together on a final strike, or allows someone to take the final blow. In other words: the death of a boss should be cinematic, and satisfying.

However, a Monster that is Legendary simply gains a Legendary Monster Feat. It would be recommended to also give them 1-4 Magic Items of some sort to make things more interesting, and the same goes with Boss Monsters.

Combat Alternatives

Combat doesn't necessarily have to be reducing the Enemy to 0 Hit Points. For example: a Race may simply require one Creature to reach the end first, with other Abilities being used to get ahead, or slow others down.

Generally speaking, there are 3 key steps to designing an Alternative Combat Scenario: Determine the Player's Goal, Establish the Environment and Rules, and Determine the Enemy's Goal.

It may seem simple, but you can have Non-lethal Sports, add a Hot Potato, a Shiny Object that everyone wants, an audience that one or both parties are trying to impress, or better yet: trying to save your enemy.

Conditions

While occasionally important to the other Pillars of Gameplay, Conditions are primarily inflicted in Combat, and usually apply Combat-related penalties. Some may be minor, such as a minor penalty, but others can be debilitating.

When two of the same Condition is applied, the one with the highest value or duration takes priority unless they stack. If you wish to track secondary effects, you might wish to do so individually.

Blinded (Deafened/Anosmiated/Numbed)

A Blinded Creature cannot benefit from Sight (Hearing, Smell or Tremorsense respectively).

When a sense has “(... Sensitivity)”, that Sensitivity is treated as Blindness when applied to the specific sense (e.g. Sunlight or Bright Light Sensitivity when looking into or from sunlight, Poisoned Sensitivity when Poisoned, Fire Sensitivity when taking Fire Damage, etc.).

Any trigger that applies Sensitivity, ends at the end of the Creature's next Turn, unless the trigger persists.

Bloodied

A Creature becomes Bloodied once it is lower than Half it's Hit Point Maximum rounded up.

The Bloodied Condition is primarily used in various Features, and doesn't do anything if a Creature chooses not to utilize it.

When a Creature becomes Bloodied for the first time in combat, they may choose to roll on the Desperation Table. If they do, they regain 5 Actions, and 5 Class Resources of their choice, but follow the listed penalty.

Monsters may follow the same rules, or instead make a Charisma Saving Throw to avoid becoming routed.

d8	Desperation Result
1	FREEZE! End your Turn.
2	PANIC! You are forced to Dash at the Start of your Turn.
3	SHOCK! You cannot take any Action with the Attack Trait.
4	OVEREXERT! When you End your Turn, you lose all remaining Actions.
5	BLOODLUST! Your first Action on your Turn must be to Attack. If you can't Attack, you must re-roll on this table.
6	FOCUS! You take your Turn as normal.
7	LIMIT BREAK! Your Turn no longer ends at 0 Action Points. Until your Turn ends, you don't follow the Multi-Attack Limit, or Movement Speeds, but you still take Exhaustion when reaching or exceeding -5 Actions, and your Turn ends when you inflict the Bloodied or Unconscious/Dying Conditions to a Creature.
8	IT'S NOT OVER! Same as 7, but all Class Resources are free, you ignore the Final Trait, and you ignore all Conditions/Debuffs. When your Turn ends, you become Exhausted 5.

Charmed

You are unable to include the Creature that Charmed you with any effect that they are not a willing Target of, and you have Disadvantage on all Intelligence, Wisdom and Charisma Saving Throws.

If not otherwise stated, this effect ends when the Creature that Charmed you, or one Creature you perceive as their ally attacks or attempts to harm you either physically or emotionally.

Drained (X)

Your Hit Point Maximum is reduced by X. This Condition Stacks, though the Bloodied Condition ignores this change.

The Drained Condition is reduced by the Quality of a Full Rest (usually 1).

If your Hit Point Maximum Reaches 0, you fall Unconscious, remaining stable until you take any Damage, at which point you begin Dying. But if your Hit Point Maximum is reduced to less than 0, you die instantly.

Dying

A Creature starts Dying if it is reduced to 0 Hit Points by taking Damage, or takes Damage at 0 Hit Points. If the excess Damage exceeds a Creature's Hit Point Maximum, they instead Die instantly. If the Damage is Non-lethal (e.g. Psychic or Bludgeoning), the Creature is Stable.

A Dying Creature becomes Unconscious. A Dying Creature makes a DC 10 Death Saving Throw (Flat) at the start of each of its Turns:

- **Critical Success:** Add 2 Death Save Successes.
- **Success:** Add 1 Death Save Success.
- **Failure:** Add 1 Death Save Failure.
- **Critical Failure:** Add 2 Death Save Failures.

A Creature Dies if they are Dying and have 3 Death Save Failures. Death Save Failures also remain until you finish a Long Rest.

If a Creature has 3 Death Save Successes or is Stabilized when they Start their Turn (such as by gaining 1 Hit Point), they are no longer Dying (they are Stable).

If they have 0 Failures, they wake up after a Breather, or when they have at least 10 Actions. If they have 1 Failure, they wake up after a Short Rest. But if they have 2 Failures, they don't wake up until they finish a Long Rest.

Taking Damage while Dying inflicts the Drained Condition, equal to the Damage taken.

NPCs or Monsters that succumb to the Dying Condition are assumed to be Dead, unless otherwise necessary for the game. The GM can make Death Saving Throws for certain NPCs or Monsters that they want to bring back (like bosses), unless they were confirmed as such.

Reminder: Death Saving Throws are still impacted by bonuses and penalties, such as those granted by the Exhaustion Condition.

...

Variants for Dying:

Dismemberment

If you become Dying, you can take the Amputee Bleed and drop to 1 Hit Point instead.

Final Breath

When you Succeed or Fail your last Death Saving Throw, you can immediately take a single Action, or Prepare a Reaction that uses no more than 5 Action Points.

Combat Inspection

Death Saving Throws are hidden from all other Creatures until another Creature uses the Interact Action to determine their state, or completes a DC 20 Perception Check or DC 15 Medicine with the Spot Action.

Encumbered (X)

A Creature is Encumbered when they are carrying an amount of weight that exceeds their Carrying Capacity (pg. 113).

Encumbered is equal to the number of lbs over your Carrying Capacity, divided by your Strength Score, including any multipliers or dividers to your Carrying Capacity, such as Size.

The cost of all Actions with the Move Trait is increased by X (even if normally Free). If this effect causes a Move Action to cost more than your Initiative Recovery, you fall Prone at 0 Actions.

You also gain a -X penalty to any Ability Check with the Move Trait such as Climbing with the Move Action, which is inverted as a bonus on your Saving Throws or DCs against the Push Trait.

Finally, while Travelling quickly, you gain additional Exhaustion equal to your Encumbered value.

Ethereal

You cannot affect, nor be affected by anything that isn't also Ethereal, except by effects with the Emotion, Holy/Unholy or Mental Traits. Unless otherwise stated, you can become Invisible, Masked, and/or Silent to Non-Ethereal Creatures as a Free Action on your Turn.

You are also Invisible to Magical Traps that don't state otherwise, and Creatures cannot use Smell to locate or track you.

Psychic Damage ignores this Condition.

Note: an Ethereal Creature cannot innately pass through walls, or fly.

Exhaustion (X)

You have a Penalty of -X to all d20 Tests. This Condition Stacks, and increases by 1 if you don't take a Long Rest in a 24 Hour period (no save).

If you ever have 10 or more Exhaustion, you die at the end of your next Long Rest, unless tended by another Creature, or if you don't need to eat or drink.

Exhaustion decreases by the Quality when you finish a Full Rest (usually 1), or you can spend 1 Hit Die to reduce it by 1 whenever you take any Rest, and when you would otherwise gain Exhaustion.

Flat-Footed

The Creature has a -2 Penalty to AC.

Flanking: A Creature is considered Flanked or Flat-Footed when within the Melee Reach of an Enemy to them (a.k.a. Flanker), that is not on the same side as the Attacker, nor adjacent to the Attacker.

If you have Advantage on Attack Rolls against a Creature, it counts as Flat-Footed for Feats and Abilities that reference it, but doesn't apply the -2 Penalty.

Frightened (X)

You have a -X Penalty to Ability Checks and Attack Rolls.

The first time you take an Action with the Move Trait each Turn, you must make a Charisma Saving Throw against the DC that bestowed the Condition.

- **Critical Success:** Same as Success, but the Frightened Condition is reduced by 1.
- **Success:** You can move normally.
- **Failure:** You can't approach the source of your fear this Turn.
- **Critical Failure:** You can't take any Action with the Move Trait this Turn.

This Condition can be Disrupted with the Disrupt Action (rolled against the original effect) to remove it completely, but Ends your Turn to do so.

If you are Frightened by one Creature while Frightened by another, you take the highest Frightened value, and apply it to both sources.

Grappled

You can't take any Actions with the Move Trait, unless they also have the Teleport Trait, which ends the Condition.

Your Grappler can spend 2 Actions to Push or Drag you 10 feet without making an Athletics Check (unless you're Larger than them). If they're considered one Size larger than you, they can Push or Drag you as part of the Move Action, requiring no roll or additional Actions (barring Encumbrance if you track Creature weight).

Any effects that would Push or Pull you must also successfully Push or Pull your Grappler, and vice versa.

Otherwise, you don't exceed their reach (perfect for saving your friend from a Black Hole!).

Hidden

When you End your Turn while at least Obscured from a Creature (pg. 89) or not seen with any Precise Sense, or you Teleport into such Conditions, you may choose to make a Stealth Check to Hide from them.

While Hidden from a Creature, they do not know your exact location, and cannot Target you directly with any Action, unless their Wisdom Score or a Spot Action exceeds your Stealth Check, or you are within an unblocked Precise Sense they have on their Turn, which ends this Condition.

While Hidden from a Creature, you have Advantage on Ability Checks and Attack Rolls against them (e.g. Initiative, assuming you aren't considered to be Ambushing). However, if you interact with them, you are no longer Hidden from that Creature.

Impaired (Ability, X)

The Corresponding Ability Score is reduced by X. This Condition Stacks.

If this Condition reduces an Ability Score to 0, you suffer one of the corresponding effects:

- **Strength:** Your Movement Speeds are reduced to 0 are Incapacitated, and you die at the end of a Long Rest, unless you are tended to, or don't need to eat.
- **Dexterity:** You fall Prone, and cannot take Actions with the Attack or Manipulate Traits.
- **Constitution:** You Die instantly.
- **Intelligence:** Your memory is wiped, and you lose all Proficiencies and Languages, until your memories are Magically restored (Amnesiac Bleed pg. 148).
- **Wisdom:** You cannot see, hear, feel, smell, or taste. You also die at the end of a Long Rest unless tended to, unless you are tended to, or don't need to eat.
- **Charisma:** You can no longer resist the orders of other Creatures, and perform the most recent one you've been given. You may also manifest some form of Madness.

Each Impaired Condition is reduced by the Quality of a Full Rest (usually 1).

Incapacitated

You cannot take Actions, Reactions, or Free Actions that don't state otherwise.

Attacks against you Critically Hit without an Attack Roll, and you automatically Critically Fail all Saving Throws that aren't flat rolls, or require Constitution.

While Incapacitated, you may use any of the following Actions on your Turn, Targeting any Creature of your choice that can see you:

- **Brace (1 Action):** The Target rolls a Hit Die without expending it, and gains that many Temporary Hit Points. End your Turn.
- **Guard (1 Action):** The Target spends Reactions to take any Action they have that would normally count against the Multi-Attack Limit. The Action ignores the Multi-Attack Limit, and Reaction limitations, including negative Actions. End your Turn.
- **Maneuver (1 Action):** The Target moves 5 ft. into any space of their choice, even if it's Difficult Terrain. End your Turn.

Invisible (Silent/Masked)

You cannot be detected by any Creature using Sight (Sound/Smell) to Spot. Other Actions or senses may still reveal your position.

If not otherwise Specified, Actions you take with the Attack or Magical Traits end this Condition.

Poisoned

You have Disadvantage on all d20 Tests that use Strength, Dexterity or Constitution, and cannot regain Hit Points by any means without the use of Magical Items, Spells, or Magical Feats.

Note: If you are Healed while Dying with this Condition, you are still Stabilized, but cannot wake up until the Condition ends.

Prone

All Spaces are considered Difficult Terrain for you. You have Disadvantage on Melee Attack Rolls, which have Advantage against you, but Ranged Attack Rolls against you have Disadvantage unless made within 10 feet.

If a Creature is Flying when they fall Prone, they fall at the End of their Turn, unless they Dash, or are Hovering.

Quickened (X)

You recover X additional Action Points at the start of each Round.

Restrained

You are considered Grappled, and have Disadvantage on Strength and Dexterity Saving Throws.

When you perform an Action with the Attack or Manipulate Traits, you must succeed on a Thievery Check against the original DC, or they cannot take that Action until their next Turn.

Slowed (X)

You recover X fewer Action Points at the start of each Round, to a minimum of 0.

Slowed reduces by the Quality of a Full Rest.

Stunned (X)

You are Incapacitated until you spend X Actions to end it at the Start of your Turn.

X reduces by 1 at the End of your Turn.

Unconscious

You are Incapacitated and Prone. Additionally, you cannot recover Actions.

Attacks and Damage

As described under the Attack Action, Attacks are the Primary method for dealing Damage to other Creatures, alongside Saving Throws. However, the Bonuses are a bit more complex than other systems, yet more consistent.

Weapon Attack Bonus: Dexterity Modifier + Proficiency Bonus (if applicable. see pg. 72)

Weapon Damage Bonus: Strength Modifier

Spell Attack Bonus: Intelligence Modifier + Proficiency Bonus

Spell Damage/Healing Bonus: Wisdom Modifier

Spell Saving Throw DC: 8 + Proficiency Bonus + Charisma Modifier

Some Feats and Items may follow a different calculation formula than what's listed here. Such exceptions should have the formulas listed in their descriptions.

Each Attack follows the Multi-Attack Limit which starts at 2, but applies to limbs and Spells individually.

Some special rules about Attacks are as follows:

- **Critical Hits:** Critical Hits count as a Weakness, and always double all Damage dice, unless otherwise stated (e.g. Eldritch Blast).
- **Flanking:** If an Enemy is within the Reach of another Creature that is both Hostile to the Enemy, and not adjacent to you, or on the same side as you, it is Flat-footed.
- **Ranged:** Your Attack Roll is rolled at Disadvantage if a hostile Creature is adjacent to you.
- **Self-Attacks:** You can only deal half Damage (round down) with a Non-lethal attack, unless you succeed on a DC 10 Flat Check.

Also, if you end up dealing in fractions for Damage, round down.

Saving Throws

A Saving Throw is a d20 Test that is rolled to resist certain effects, depending on the Ability used.

Strength: Effects that Push, Maneuver, or otherwise test a Creature's ability to remain physically steadfast.

Dexterity: Effects that trip, disorient, or can otherwise be evaded with proper technique.

Constitution: Effects that Target a Creature's physical health, such as Poisons.

Intelligence: Effects that challenge a Creature's logic, knowledge, or reasoning.

Wisdom: Effects that are subtle, or manipulate a Creature's perception of reality.

Charisma: Effects that attempt to overpower, or overwhelm a Creature, or attempts at social manipulation.

Saving Throws obey the following rules if left undefined (such as in Homebrew):

- **Critical Failure:** The Creature takes double Damage.
- **Failure:** The Creature takes the listed Damage.
- **Success:** The Creature takes half Damage.
- **Critical Success:** The Creature takes no Damage.

Damage

There are also certain Creatures that have Immunities, Resistances, and Vulnerabilities, which influence the Damage they can/can't take, as well as a Damage Threshold and Weaknesses that make them unique to encounter. Afterall, what kills a White Dragon might not be good for killing a Blue Dragon (wrong book, sorry).

Also, don't forget to round down, when dividing Damage.

Immunity: The Creature either takes no Damage, or isn't subjected to the Condition.

Resistance (X): The Creature reduces the Damage by X. This also reduces the amount of Persistent Damage applied, but not how much you take afterward.

Vulnerability (X): The Creature takes X additional Damage, which also applies to applied Persistent Damage, but not the actual Damage taken. This doesn't count as a Weakness, but may exceed a Threshold.

Damage Threshold: The Creature only takes non-persistent Damage from attacks that are greater than this amount, or from sources that state otherwise.

Weakness: When involved with the Damage source, the Damage Threshold is ignored until the End of the Creature's next Turn.

Damage from most sources is only dealt once on a Hit, but some forms linger for longer, and is called Persistent Damage (or Persistent Healing). This kind of Damage is applied at the Start of each of your Turns, and is reduced by 1 when you get a 4 on a d4 you roll after taking this Damage (or Healing).

Some forms of Persistent Damage can be countered, such as patting out Flames, scraping off acid, or applying pressure to a bleeding wound, though this isn't listed explicitly. Doing this requires an Interact Action, and reduces the Damage by 1, unless it would sensibly reduce it further, like fire being extinguished entirely by water.

If two sources inflict Persistent Damage of the same Type, take the one with the highest Damage value, unless the GM wants a slaughter fest. In which case, knock yourself out by adding them together.

Environmental sources of Damage are usually considered as Persistent Damage that doesn't degrade.

The Following are Damage and Healing Types that are generally used, as well as a basic idea of what they are or where they come from, and at least one environmental or unique source for most of them:

Acid

Acid is characterized by melting, dissolving, or otherwise corroding a Target, often with chemical burns. Powerful sources may burn flesh in real time, or even disintegrate entire body parts. It is often neutralized chemically, or by dilution.

A pool of acid usually deals 1d10 Persistent Acid Damage to its occupants.

Bleed

Bleed is characterized by the loss of blood, and is often caused by open wounds. Powerful sources of Bleed Damage might make a Creature appear pale, or weak as it gets closer to death. It is often neutralized with a bandage or tourniquet.

A leech often inflicts 1 Bleed Damage every Minute while attached.

Bludgeoning

Bludgeoning is another way of saying "blunt force trauma" and usually leaves bruises. But powerful sources tend to break bones, send Creatures flying, or even leave dents in the terrain.

Falling often deals 1d6 Bludgeoning Damage for every 10 feet fallen, up to 20d6. This of course scales with Creature Size.

Things like falling rocks or hail tend to do about 1d6 Bludgeoning Damage at the start of each Turn they persist in.

Most Melee Weapon Attacks can also inflict Bludgeoning instead of their usual Damage Types, though Finesse Weapons tend to deal less.

This Damage Type can be non-lethal if you choose.

Cold

Cold has the iciest personality, stemming from sudden drops in temperature that tend to form dew, frost, or even ice for the more powerful sources.

A Blizzard tends to deal 1 Cold Damage to unprotected Creatures at the start of each Round.

Fire

Fire is one of the staple forms of Damage, often leaving blistering flesh or black scorch marks on many unwary Adventurers. But powerful sources of Fire Damage tend to leave ashes behind, rather than charcoal.

A Brushfire usually deals 1d6 Fire Damage unless you Dash, while Lava inflicts 5d10. These sources also inflict 1 Persistent Damage per Damage Die.

Force

Not to be confused with Bludgeoning Damage, or a popular sci-fi magic system, Force Damage is characterized by unnatural or otherwise impossible tearing and crumbling. Powerful sources often leave behind piles of dust, or other base components.

Magical Shockwaves from major Magical events tend to inflict 1d10 Force Damage to the unprotected. Holding your Breath in a Vacuum inflicts 1d6 at the Start of your Turn.

Healing

Healing is just the reversal of Damage. Sometimes it's knitting flesh back together, restoring bones, or even entire limbs. It may leave scarring, though that scarring may also go away after enough healing.

Lightning

Much like Fire, Lightning is a force of nature that leaves scars and burns. However, it also causes spasms, and uncontrollable motions that make it hard to act correctly. Powerful sources tend to leave smoking holes, or occasionally unmarked corpses.

A Lightning Bolt usually deals 3d10 Lightning Damage to whatever it hits.

Necrotic

Often called Unholy, Necrotic Damage is characterized by physical withering or blackening, as a Creature's life force is drained from them. Powerful sources tend to leave survivors as unnaturally old, walking skeletons.

Radiation tends to deal 1 Persistent Necrotic Damage that also inflicts the Drained Condition for each point taken.

Physical

Physical Damage is a simplification of Bludgeoning, Piercing and Slashing. This is mostly used by Resistances, Immunities and Vulnerabilities, and stacks accordingly with other types. Any other Physical Damage can be converted to Bludgeoning Damage using a d4 as a Damage Die.

Most Armor tends to grant Physical Resistance.

Piercing

Piercing is what you get when one object uses a fine tip to turn another thing into swiss cheese. Particularly powerful sources tend to pass through Targets, or pin them against a nearby surface.

Thorns usually deal 1d4 whenever you enter their space.

Poison

Poison is usually characterized by illness, sudden weakness, or some other symptom that comes from a Creature's body processing something incorrectly. Particularly powerful sources tend to cause severe illness.

Most naturally poisonous foods inflict 1 Persistent Poison Damage, while inhaling smoke may deal 1d6 Poison Damage with a Constitution Saving Throw.

Precision

Precision Damage is extra Damage from hitting weak spots. It is added to a Weapon or Spell's Damage, rather than inflicted separately.

Psychic

Psychic Damage is what happens when the Party manages to one-shot the villain of the entire campaign, or when a Creature's mind is wracked with intense pain.

Powerful sources tend to leave victims in a vegetative state which may allow certain Feats and Abilities to treat them as if they were still alive.

This is the only Damage Type that innately ignores the Ethereal Condition. It is also innately Non-lethal.

Various methods of forcefully recalling suppressed memories tend to inflict 1d4 Psychic Damage which is scaled to Size.

Radiant

Sometimes called Holy, Radiant Damage is usually inflicted by Divine Influence, manifesting in the form of sunburns and the odd bit of blackened skin, though powerful sources disintegrate Creatures, and leave smoldering holes that are surprisingly cool to the touch.

Swords made out of lasers or plasma do not deal Radiant Damage. That would be Fire Damage. Instead, stepping into a sacred area without completing any of the corresponding rites first, usually inflicts 1d6 Radiant Damage depending on the severity of the offense.

Slashing

Commonly sourced from swords, swung daggers, and sadistic sheets of paper, Slashing leaves long gashes and cuts. Powerful sources of Slashing might pass through objects without even disturbing them, or even cleave them in two.

Claws tend to deal 1d4 Slashing Damage on an Attack, unless they're exceptionally sharp, in which case, they use 1d6.

Temporary Healing

Temporary Healing bestows Temporary Hit Points, which aren't limited by your Hit Point Maximum, but cannot stack. If you gain Temporary Hit Points from multiple sources, you take the Highest Value, and lose the benefits of the lower one unless otherwise stated.

Temporary Hit Points are reduced first (unless otherwise stated), and don't trigger penalties such as Concentration Saving Throws that trigger on taking Damage or losing health.

Temporary Hit Points don't prevent a Creature from Dying if they're at 0 Hit Points, but does prevent them from becoming Drained and having their Successful Death Saves reset from receiving Damage.

Thunder

Thunder Damage (also known as the noisy kids upstairs) often leaves Creatures unsteady, or with bleeding eardrums. Powerful sources tend to result in internal bleeding, which is hard to detect.

Shockwaves from explosions typically deal 1d6 Thunder Damage for each Damage die they inflict.

Variants for Damage:
One Hit Wonders

Creatures and Monsters no longer have Hit Points, or roll for Damage. Instead, standard Damage Bonuses are included in Attack Rolls, while Constitution is also added to AC (stacks with previous bonuses).

Whenever you take Damage with this rule, you can choose to lose 1 Hit Die for every die of Damage (or increment of 5 for flat Damage values), which is doubled for d12s, or break an Item you have Equipped to block all Damage. Broken Items provide no benefit until repaired.

If you are Healed with this rule, you instead regain Hit Dice based on the same rule. Rests now restore 1 Hit Die for Breathers, half your maximum for Short Rests, and your full maximum for Long Rests.

Note: some sources of Damage, Healing, and Damage Reduction may not work well with this rule. Use with care.

Cover

Line of Sight plays a significant role in Combat, as well as the environment. Because of this, Cover plays an important role in many Combat Encounters, and even some Puzzle Encounters.

Cover only applies the bonus from effects that pass through it.

The various types of cover are as follows:

- **Obstructed:** Behind a similarly Sized Creature, a flimsy wall, vines, or other distracting obstruction.
 - **Bonus:** +1 to AC and Dex Saves.
- **Half-Cover:** Behind a low barrier, windowsill, a significantly larger Creature, or being on a ledge (only when Targeted from below).
 - **Bonus:** +3 to AC and Dex Saves.
- **Full Cover:** Behind a wall, Prone on a ledge, or otherwise behind a protective object that completely covers you, including a monster's limb if they're big enough (doesn't hide you from the monster you're using as Cover).
 - **Bonus:** +5 to AC and Dex Saves, and you cannot be Critically Hit, or Critically Fail an applicable Dex Save.

Cover also impacts Stealth (pg. 117).

Minions & Summons

Some Feats and Spells allow you to gain a Minion or Summon that acts as an ally, or the GM may allow the Party to adopt lots of pets and companions, like Boblin.

However, the GM may also give certain Monsters additional Minions to act as minor threats to keep those pesky adventurers busy.

And while you could treat each Minion or Summon as an individual Creature, running the game like that isn't recommended in most situations, as it can make things slow and boring if you have too many Creatures.

The Difference between Minions and Summons is that Minions are present when Combat starts (rolling Initiative as a single Creature), and Summons must be conjured (acting immediately before/after their Summoner), but they otherwise follow similar rules.

Minions and Summons both share their Turns with other Creatures (unless using one of the Variants below).

They both can only take 1 Action, 1 Interaction, and move up to their Movement Speed on their Turn. They also cannot gain, or lose Actions unless an effect says otherwise. If they Attack with two Light Weapons, both Attacks use the same Attack Roll.

If a lot of Minions or Summons are encountered in Combat, they take 1-3 Hits to die, based on how much of a threat they pose and how big the Attack was. If there are 4 or more Minions adjacent to each-other, no Attack Roll is needed.

If there are 2 or more Minions attacking on the same Turn, they use the same roll, same for mass Saving Throws. They also use Average Damage instead of rolling.

Each Player can only bring 1 Minion into combat at a time, but can replace Dead or Unconscious Minions if needed.

Tip: If you have 4+ Creatures or NPCs in an Encounter, consider how many you want to run with 1 Action, 1 Interaction and Free Movement like Minions, or if you'd rather reduce their number, and add a small or interesting bonus to the rest. Maybe even make one Legendary.

Variants for Minions:

Minion Mayhem: (Auto-Hitting is recommended here)

Record the quantity of Minions on the battlefield, but use no tokens (unless they're obstructing an important object/escape route). On the Minion Turn (or as a Lair Action), call out the number of Attacks made, and against which Creatures, then roll one attack, which you apply to each Creature accordingly. Only 1 or 2 Minions may do something else before the end of the Turn.

Feats and Spells that Target an area, hit as many minions as there are affected Spaces, but only up to half the number of Minions, rounded up.

Swarms:

Assemble all Minions into a swarm that acts as a single Creature of a larger Size. However, they cannot be healed by any means, as Damage is treated as death.

Furthermore, their Damage scaling also applies to Resistance.

Summons are simply added to a Swarm, and treated as the same Creature.

Shared Control:

Each Player controls one Minion (or group if there's enough for that), and can command them as if they were the GM. If the Minion is working against the Party, they must use their Action to hinder the Party, or aid the Minion's allies. Consider rewarding Players that either play the Enemies effectively, or as intended.

Each Minion (or group) treats their Initiative as if the controlling Player was the Summoner.

If there are too many Minions or Summons, consider using another Variant in addition to this one.

Minion Accessory:

A number of Minions can be considered Items that are held by a Creature, and provide their Actions as Free Actions instead.

Movement

Movement is important. Afterall, you can't run around like a headless chicken if you can't even move!

All Creatures with a Movement Speed of 5 or greater can take Actions with the Move Trait, which includes the Step Action. Creatures with multiple Movement Speeds treat each Move Action as if it consumes from each type at the same time.

A Creature's highest Movement Speed determines how many Actions they can have at any given time, which is halved for Flying Speed. However, if their Action Point Maximum from Speed is less than their Action Recovery, they use their Action Recovery as the limit instead.

Difficult Terrain is caused by anything that makes it hard to move quickly, such as rubble, high wind, knee-high water, or deep snow.

A Creature cannot Step into Difficult Terrain unless otherwise ruled, and each space is treated as 10 feet when entering for the purpose of consumed Movement.

If there are multiple sources of Difficult Terrain, they don't stack, apart from special behaviors granted by each one, and use the highest penalty if there are multiple values.

The different types of movement are employed in the following situations:

- **Walking:** While being pulled against a surface, such as Gravity pulling you against the Ground.
- **Swimming:** When submerged in a fluid that can support part of your weight.
 - Non-Swimming Creatures treat it as Difficult Terrain, and have Disadvantage on all Attack Rolls.
 - Swimming Creatures still have Disadvantage with Non-Piercing Attacks that aren't Natural Weapons.
 - All Ranged Attacks are considered as if their Short Range is Long Range, unless they're Spell Attacks.
 - If you are Encumbered, you must spend Actions to stay above water, akin to Flying.
- **Climbing:** When pulling yourself against a surface, without the aid of certain Feats, Items, or Spells. You must Concentrate, and cannot use Two-handed Weapons while climbing, except with special features.
 - Non-Climbing Creatures treat it as Difficult Terrain, and may need to make Athletics Checks if holding on would be difficult.
- **Flying:** Submerged in a fluid of a suitable density (such as air), can only be started while airborne, or from a walkable/climbable surface. Must use at least 1 Move Action each Round to stay aloft (can still move freely with said Action). You begin Falling if you're Restrained, knocked Prone, fail to take a Move Action, or your Speed is reduced to 0.
 - **Hover:** You don't need to be airborne or on a surface to start Flying, and you don't need to use a Move Action to stay aloft. You only fall if you choose to, or if you lose the ability to fly.
- **Burrowing:** Submerged in a soft or loose—yet Solid—material, such as Sand, Dirt, Gravel, piles of Coins, or Sprinkles. Other Creatures can't dig fast enough to count as a move Speed.
 - You leave behind a tunnel, unless the substance would collapse behind you, in which case, you may need to hold your breath.

A Creature Falls 300 feet at the end of their Turn, unless supported or caught. A Creature takes 1d6 Bludgeoning Damage for every 10 feet they fall, which is scaled to their Size (pg. 92), and capped at 20d6. They also fall Prone if they don't resist all Damage taken this way.

A Creature that falls 10 feet or more either during or at the end of their Turn makes an Acrobatics Check. If they fall outside of their Turn, they make a Dexterity Saving Throw. For every 5 on this Ability Check or Saving Throw (starting at 10), the number of Damage Dice dealt is reduced by 1.

If a Creature is still falling after the first 300 feet, they double the rate at which they Fall, and take 120 Bludgeoning Damage on impact, rather than rolling. Each die nullified at this point reduces this Damage by 6.

Reminder: Fall Damage scales with Creature Size.

Size

In Mages & Mansions, Creature Size plays a significant role in the power of various Monsters and PCs, beyond how much space they have to maneuver, and how hard they are to push around.

Medium Creatures take up a 5 ft. space, and are the commonly referenced Creature Size, though you may need to adjust values if you decide to play a campaign with PCs of a different Size, which changes distances (and maximum dimensions) as detailed in this section.

A Creature doesn't have to fill its entire space to be that Size, and can even exceed the space slightly (e.g. 10 ft. tall Medium Creature), as long as it can easily reach most of the occupied area without lunging, leaning, or otherwise making a dramatic effort.

Items and Objects that are Larger or Smaller than their base Size have their Value and Weight multiplied by 4 for each Size category up.

A Medium Creature can carry a number of lbs equal to their Strength Modifier * 4. Each Size Category multiplies or divides this value by 4 accordingly. Dragging doubles the capacity, but treats all spaces as Difficult Terrain unless a Vehicle is in use.

A Larger Creature has a -2 penalty to all d20 Tests that use Dexterity, but a +2 bonus to all d20 Tests that use Strength, both against smaller Creatures, and the opposite is true.

Damage and Healing inflicted by a Larger Creature, and their Max and Current Hit Points are effectively doubled for each Category larger, with the opposite being true for Smaller Creatures. If a Larger Creature is completely encompassed by an Area of effect that Damages them, the Damage scales up accordingly (round to nearest if it's only partial).

Side Note: Monster statistics have scaled modifiers to reflect these details, while also retaining the standard values in case you need to make your own calculations.

Size	Space Measurement
Minuscule	<0.5 cubic feet
Tiny	1 cubic foot
Small	2.5 cubic feet
Medium	5 cubic feet
Large	10 cubic feet
Huge	20 cubic feet
Gargantuan	40 cubic feet
Colossal	>80 cubic feet*

**:Colossal Monsters are best used as Battlemaps, rather than something to fight. Even Gargantuan or smaller Monsters can work well for this, depending on the Party, and the nature of the encounter.*

Range, Reach and Movement are also adjusted according to Creature Scale (e.g. a Huge Creature could Reach and Step 20 feet instead of 5 for a Medium Creature, while their 60 ft. throw becomes a 240 ft. throw). However, the Limits for Movement do not change. I mean, the big guys are still slow to you, aren't they?

Spells that Summon a Creature based on their Hit Dice do so in relation to the Caster's Size (e.g. Summoning a Creature one Size Larger requires 2 times the amount of Hit Dice, 4 times for two Sizes, and less instead for Smaller).

To help with inventory management, Containers list a capacity that doesn't involve volumetric calculations, because who is going to spend an Hour to check the effective volume of a troll's arm? You can store larger objects than a container can hold, but their weight may pose an issue, you may not be able to close the Container, and they are likely to fall out when you take the Move Action.

Additionally, a Creature can carry objects that are two Sizes smaller, or add up to that Size with one hand. If an object or handful of objects exceeds this, you may need an off-hand free to interact with it, or suffer disadvantage on any d20 Test involving said item, like Attack Rolls or Thievery Checks.

Also, a Creature that has another Creature that is at least 2 Sizes smaller than it Grappled, can attempt to swallow it with a Bite Attack.

A Swallowed Creature takes 1d6 Acid Damage at the Start of their Turn which scales according to their Attacker's Size, and is Restrained. However, they can break free with the Overpower Action (using Strength), with a DC of 10 if the Attacker is Unconscious.

A Creature that takes Damage exceeding its Damage Threshold from the inside must spend 2 Actions to regurgitate all swallowed Creatures, ending its Turn.

Variants for Size:

Oversized Weapons

A Creature's Weapon inflicts the greater Damage, rather than their Size (Spells are unaffected). Creatures using bigger Weapons multiply the Action Cost just like Damage, unless it's Light.

Small but Mighty

Critical Hits from a Smaller Creature deals quadruple Damage instead of double.

Short Magic, Tall People

Spells ignore Range modifications from Size, based on a Size Category that is agreed on by the entire table.

"Your highness, I shrunk the Party"

Each Creature in the Party either increases or decreases their Size Category by 1 or more, possibly flavoring them as a smaller Creature if starting the campaign this way. For example, an elf might be a squirrel or bird.

Alternatively, instead of changing the size of Party Members, the GM treats all Monsters as if they were 1 or more Size Categories larger/smaller

Not so Gargantuan

Creatures listed as Huge only occupy a 15 ft. space, while Gargantuan Creatures occupy a 20 ft. space, and Colossal Creatures occupy a 25+ ft. space. Not much of a mechanical change, but helps with Creature Management, and doesn't require you to invest in a massive figurine, or a new collection if coming from a system such as D&D or Pathfinder.

But the Kaijuu (monster) idea still sounds fun, doesn't it?

Vehicles and Mounts

Everyone loves a good car chase, particularly when it actually has an impact on the battlefield, rather than just being two vehicle models that were hastily thrown on a map together, and called vehicle combat. Besides: who doesn't want to ride a Dragon into battle with a tank?

Mounts and Vehicles don't always have proper stat blocks, but may instead use summarized values. A Mount or Vehicle with special Actions will list the Action Cost, which is Treated as an Interact Action. Otherwise, just use what you've got.

A Mount is assumed to obey the orders of its Rider unless narratively appropriate (try flipping a coin if you're unsure), while a Vehicle always acts as designed, provided it doesn't have a reason to malfunction.

Some Vehicles have special Manned Actions, which the Driver can choose a number equal to their Multi-Attack Limit each Round, spending 1 Action Point for each.

Manned Actions can only be performed if enough Willing Creatures a.k.a Crew are available to operate it. A Creature that is part of the Crew passes their Turn in Combat, including Action Recovery. However, they can choose to man a different Action if they have the ability to do so, or leave the Crew on their Turn.

If a Driver, Captain or Pilot has Proficiency in the corresponding Vehicle type, the Vehicle adds their Proficiency Bonus to its AC, but always adds the Pilot's Dexterity Modifier.

A Vehicle can have any quantity of Crew at a given time (including the Driver), limited only by capacity. Having extra Crew provides no special benefit other than instantly replacing lost Crew, or applying the highest bonuses, unless other bonuses are listed in a Manned Action.

A Vehicle or Mount that is reduced to 0 Hit Points is Incapacitated, not Destroyed. A DC 10 or 15 Dexterity Saving Throw may be needed for occupants to avoid being knocked Prone or Restrained by debris.

Note: This is very important if you want to use spaceships (foreshadowing). Because you don't want the game to end, just because the Party's ship was shot down in the middle of space.

Designing Combat (GM)

In certain systems, designing combat isn't an exact science, and unfortunately, this is one of those systems. Even more troublesome for some, may be the lack of a Challenge Rating system which would otherwise be helpful, in some situations.

But with a wild system like Mages & Mansions, any form of Challenge Rating cannot account for more than a few situations, and would quickly become more cumbersome than helpful, even if it was updated with every new Feature, Spell or Item in mind (we did try though).

Even still, we have a simple order of operations for making an encounter, that can help you get your feet under you.

Building Encounters

1. Determine the Biome and Plane (pg. 99) that the Combat takes place.
2. Determine a Monster, or narrow it down based on what you're looking for.
 - a. For people who prefer using values for encounter building, try adding the total number of Hit Dice, and make the encounter have an equal number of Hit Dice to the Party. Just be careful about high Level Monsters.
3. Add no more than 10 monsters you think will be appropriate, and/or 1 Legendary or Boss Monster. It's okay to add weak monsters that will be steamrolled. In fact, it can make Combat less boring to have 1-4 extras on the field.
4. Determine if an alternate victory/failure condition applies.

Combat Encounter Complete!

Now you can certainly run an Encounter with simple descriptions or vague positions on a tabletop, but some people do enjoy having something a bit more concrete.

Drawing Battle Maps

- If you are outdoors, draw a big box and be sure to leave extra space (or use a generic biome map).
- If you are indoors, start with a vaguely small or medium box, then cut away or add more boxes, then add or fill spaces until you're happy.
- Determine any environmental hazards, or special terrain that would impact certain Actions, vantage points, or provide other strategic advantages.
- Finish with decorations if desired, and you're done!

Now again, you don't need a map, but it can be helpful when the battlefield is busy, or there's a lot to keep track of. However, it can prevent some people from seeing more creative options.

Also, when working with a physical tabletop and no grids, it usually works to think of 1 inch (or 2.54 cm), as being 5 feet in-game.

Now before you go crazy with bloodthirsty Monsters, remember that Combat is simply a way of resolving contesting interests. This means that a sport (such as basketball) could be a Combat where you're trying to get an object to a goal, rather than trying to kill your enemy, or avoid death.

You could be running from a cloud of gas while trying to avoid falling off a cliff, racing to a finish line, competing to escape with an item, trying to put on a show, or maybe each side has a champion that must be killed/incapacitated. Or maybe the goal is to heal the enemy before they can die to something specific!

Whatever the case, make sure that there is an active objective the Players can influence, rather than just doing pre-determined things every Turn. Otherwise, it can quickly become boring.

One idea we would like to recommend in this book as an example, is a horde combat:

There are no monsters on the map, just a line that moves. When the line takes a significant amount of Damage (depending on the monster used), it moves back one space, and moves forward on a set Initiative (say 20 or 10). The horde is Difficult Terrain for all Creatures and doesn't care about friend or foe (good time to call a truce).

A Creature that is adjacent to the line takes 1 Attack at the start of the enemy Turn, 2 Attacks while on the line (or first space behind it), and 3 Attacks while behind the line. If the Monster has a Ranged Attack, this could apply to Full Cover (0 Attacks), Half Cover (1 Attack), Obscurement (2 Attacks), and being in the Open (3 Attacks), reducing the Attacks by 1 for Long Range.

You can use this for army combat, a turf war, or even just a simple firefight. Again, these are just some ideas for you to try out. And with some tweaks, you can even turn this into rising and falling tides in a water oriented fight!

Exploration

Exploration encompasses any situation where the Party is traveling to a destination, learning about the world, or otherwise opening up and learning new things to do in the Campaign.

Dungeon Crawling

Whether a Cave, Dungeon, or Mansion, Dungeon Crawls are standard fare for most exploration-based situations. However, most Dungeon Generators tend to create vast maps of dense rooms, pointless halls, and generic traps or encounters, which isn't always helpful.

For actually crawling a Dungeon, Actions such as traveling between rooms, disarming a trap, or scanning over a room should take 1 Minute for most situations. Longer tasks such as solving puzzles might take longer.

One thing to note about Resting in Dungeons is that Breathers pose no risk for Wandering Monsters, Short Rests have a chance of a Wandering Monster appearing at the end (1 on a d8), and Long Rests are a guaranteed Wandering Monster (use 1d8 to determine the Hour). If the entrance is barred or well obstructed, they may lose interest, or alert the Dungeon, reducing loot and making Ambushes more difficult.

Creating Dungeons

Creating a Dungeon comes in three main steps:

1. Boundaries
2. Connections
3. Contents

Making Boundaries

For a Cave, draw either a collection of boxes and bubbles, or an amoeba, then erase the overlaps and add big formations that act like walls.

For a Dungeon, draw the outer boundary, then make a collection of floating boxes inside that boundary, or treat it like a Mansion.

For a Mansion, draw one big box, and fill it with walls, or more boxes. You could also reshape the box to better suit your needs.

Making Connections

For Caves, connect the outer walls of each room or chamber to either one other, or the main chamber/hall. Alternatively, you can simply ignore the connections to make a mining venture.

For a Dungeon, draw straight, curved, or other simple halls between each room, and either add doors, or archways to each room. Don't forget that bigger Dungeons need bigger halls and doors.

Oh, and the long hallways could very well be secret or buried.

For a Mansion, simply add doors so that each room can be accessed by Creatures that live there, unless a unique Spell, Item or Feature is required.

Contents

Caves may have some of the following:

- Formations & Water Features
- Stalactites (pointing down) & Stalagmites (pointing up)
- Cliffs & Holes
- Molds & Mosses
- Animals & Monsters
- Bones & Mushrooms

Dungeons may have some of the following:

- Bridges & Balconies
- Stairs & Statues
- Beasts & Wards
- Traps & Triggers
- Puzzles & Secrets
- Gold & Treasure

Mansions may have some of the following:

- Mages (Obviously)
- (Secret) Doors & Illusions
- Beds & Furniture
- Guards & Locks
- Notes & Mysteries
- Maidens & Butlers

Sorry, I couldn't help myself.

But of course, you can mix and match these methods to create the ultimate cave-like dungeon that has been refurbished into a mansion!

City/Hex Crawl

Sometimes you want to explore a Town, City, Room, or even the Wilderness, but you want it to be more than just the Players saying, “I want to investigate the town”, rolling far too many dice and ultimately Missing every single hint and cool landmark you throw their way.

So to start this method, the GM pulls out a Map or Hex Grid that represents the area being traversed or explored (if you don’t have a map, just scribble some general areas, and track what they find and where). An unmarked map also works pretty well.

After that, the GM places or marks at least 3 visible Points of Interest to start, such as a General Store, Library, Bulletin board, Dungeon, Manor, Friendly NPC, Plot Hook, or Encounter on the map, which must be visible. After that, they can add any number of hidden Points of Interest, or just mark down any number of them. It helps to have at least 3 interesting ideas prepped in advance.

Then once the GM has set a “Timer” or “Travel Range”, each Player starting with the Player to the left of the GM and going Clockwise around the Table (or however else you wish to order it), each player places their Token or Marker on the map, as they please, provided they maintain a usable path.

If a Player lands on an empty space, they discover a Point of Interest at that location.

If a Player lands on a Point of Interest, they may perform one Interaction, such as attacking an Encounter, Buying a single Item from a Store (I know it’s unrealistic, it’s to keep things quick), searching a Library, investigating a Crime Scene or for Clues, clearing a path, or negotiating.

If another Player is already on that Point of Interest, +2 is added to one roll that has been made previously on that Point of Interest, which negates the penalty of a nat 1 penalty.

If a Player lands on a Hidden Point of Interest, the GM might decide on a “Complication”, which can range from crumbling terrain, getting attacked, or an immediate roll to Interact with it.

For certain Points of Interest such as attacking an Encounter or engaging a Plot Hook, Combat or Adventuring. They don’t start unless all Players engage, and there are meaningful stakes. Otherwise for Combat, each Interaction is considered to inflict 1 “Hit Point”, with an Attack Roll as an Action against the Attacking Party Member, as if from one Monster in the Encounter. The number of these Hit Points usually ranges from 1 to 5 based on the relative toughness of a monster.

Each Turn only allows for a single d20 Test from the GM or any Players, though they may communicate and exchange equipment during the GM’s Turn.

When the GM takes their Turn, they remove any time-sensitive tasks that have expired, add a new Hidden Point of Interest for each other point that was discovered, and resolve one Event. If there isn’t anything interesting or impactful going on (such as a Siege, Investigation, Natural Disaster, Lycanthropy outbreak or BBEG Plot), then the GM passes at this point.

An Event is something that affects the entire board, such as a Meteor, Earthquake, Disease/Curse Outbreak, Tornado, Spell, Siege Weapons, or some other event that can either deal some amount of Damage to Party Members, Points of Interest, the entire Map, or otherwise causes difficulties.

Players can also be creative in how they Interact with a Point of Interest, which may give them an opportunity to resolve multiple at a time, preserve one other for later, reveal a Hidden Point of Interest, or even delay an Event to name a few examples.

This could also be a fun way to make travel more interesting.

Study

Studying can involve any kind of knowledge seeking related to the game. Whether it's out-of-game, looking at lore for things related to the character you're playing, or in-game trying to discover the BBEG's weakness.

The GM's work here lies in their efforts to shape the Campaign, and steadily gather threads of the story so far into big moments, plot hooks, and other pieces of information that reward Player efforts to explore and engage.

As for a Player, your role here is to actively engage with the world that the GM spends their time to grow and expand. This means talking to NPCs, taking notes, and looking for plot hooks to drive the story forward.

Really, this part should probably be called: The second best way to make your GM really happy. The other way is good snacks. Can't forget the snacks.

Travel

Campaigns rarely take place in just one town, and often involve moving from place to place. Many times, it is passed off as the "boring part" of campaigns, and readily ignored, except for the encounter that gives the GM a chance to present another Plot Hook.

A Group of Creatures can travel a number of Miles every day (assuming 16 Hours with breaks), equal to the Movement Speed of the slowest unmounted Creature or Vehicle. Flight multiplies the Speed by 10, or 5 if it's a Hover Speed.

A Group can double their pace, but takes Exhaustion 1 for each day traveled this way. But if they halve their pace, they can perform any Downtime Activities that are available to them, or avoid Encounters (not both).

Assuming you don't just skip this part, determine if they're paying for supplies, or if they're spending from their inventory. Don't forget to account for a round trip. If they can't afford either, then they must forage, which prevents Full Resting, and inflicts Exhaustion for each day traveled in a hostile or barren environment, such as a desert, tundra, and sometimes even the deep ocean.

Additionally, especially Warm or Cold Environments inflict 1 Level of Exhaustion for each day traveled, unless a Creature has any amount of Fire or Cold Resistance respectively, is appropriately equipped, or is adapted to the environment.

If the weather is bad in those environments (e.g. Sunny Desert Day, Tundra Blizzard), a Creature may take 1d10 Fire or Cold Damage for every Hour they spend out of shelter, which applies the Drained Condition equal to the total amount taken (after reductions).

Once travelling, the Party rolls 3 times for a Wilderness Encounter, 1 less if traveling on the road (or while flying), 1 less when in a company (such as a caravan), and 2 less when travelling at half pace to avoid encounters. Particularly dangerous territory may add 1 or more rolls, invert the conditions for Encounters, add a Skill Challenge to avoid delays, or prompt an extra Adventure.

If the territory is Uncharted (no maps, known landmarks or other navigational aids), One Creature rolls Survival to avoid the Party getting lost. The DC for this can vary, depending on clear/obstructed skies, familiar/unfamiliar surroundings, or even weather.

On a Failure, the Party is unable to arrive at their destination, but can return to where they traveled from at no additional cost, or roll again, losing a day of time, and getting another Wilderness Encounter roll.

After resolving any encounters, and going around the table in case of travel conversations that naturally crop up, the Party arrives at their destination.

The following Table on the next page is a baseline for what Adventurers could expect, and is by no means the solution to all Random Encounters. We encourage you to use this as a starting point when creating your own things, or even change how you define certain Encounters.

In fact, why not combine multiple options together to make for a super cool wild animal encounter with bandits from the Rogue's backstory that happens to involve a cool campaign event in the middle of it?

Sample Table of Random Encounters

2d6	Result
2	Feat Trainer (Quest with Feat Reward, or Retrain opportunity).
3	Unusual Resource (Usually something rare or valuable like gemstones and magical materials, may be guarded, still requires refinement)
4	Character Plot Advancement (Could be a Plot Hook, or even be for an important NPC, could also handle consequences for how an NPC was treated)
5	Merchants (Great for some quick shopping, Resting, or Side Quests that are otherwise minor things)
6	Wild Creature Hunt (Reveals a Creature that can be Hunted for an optional encounter, or Coup de Grace and narrative exploration)
7	Common Resource (Can be harvested, but must usually be refined)
8	Weather Check (Like a cart in a rainstorm, earthquake on a mountain, or aurora borealis)
9	Landmark (Could be used as a Stronghold Site, Memorable location, Point of Interest for a Quest, a mid-journey Full Rest, or even an inter-party Social Break)
10	Campaign Plot Advancement (Such as involving a Campaign Quest, advancing the doom clock, or otherwise reminding the Party of something important they should be doing)
11	Monster/Lair Encounter (Doesn't have to result in Combat)
12	Powerful Creature (Like a Noble, Dragon, Fey, Demon, or similar, that may not view the Party as a threat, and may be desirous to help)

Note: This table is a 2d6, and not 1d12 with a re-roll on 12, which helps with more focused outcomes. You can also have the GM roll one die, while one of the Players rolls another to add to the suspense and interaction.

Planes of Existence

While most games focus on only one Plane of Existence, some may occasionally include two, three, or maybe even all the Planes of Existence.

When multiple Planes are included in your Campaign, it is recommended to think of how you get from one to the other, such as entering a fairy circle, traveling to a point on a map where many ships have gone and never returned, or finding a Creature that can take you there.

While you can make your own Plane of Existence, we'd like to offer some more common examples to save a lot of time.

Astral Sea

The Astral Sea is an endless sea of stars and colors, with one of the best descriptions being like floating in the middle of a field of glittery paint in space.

Inhabitants: Aberrations, Psionic Creatures, Spellcasters

Effects:

- All Creatures and Objects have no weight, and continue moving in the same direction when pushed.
- All Creatures can Fly (Hover), and ignore any Movement Speed limitation. This doesn't affect Actions. Travel only takes 1 day.
- Any Creature can attempt to cast any Spell without expending Spell Slots, by performing an Arcana (Arcane), Occultism (Occult), Religion (Divine), or Survival (Primal) Check with a DC equal to $10 + 2 * \text{the Spell's Tier}$.
 - On a Failure, you can't try again at that Tier for 1 Minute.
- Verbal, Somatic and Focus Components are all fulfilled, regardless of a Creature's ability to fulfill them.
- Anti-Magic fails against Arcane Spells here.

Celestia

Celestia is a place where Fiends cannot tread, and healing enters all. It is best described as a white and luminous realm, where Creatures no longer fight, and the sun shines perpetually.

Inhabitants: Celestials, Holy Creatures

Effects:

- Unholy Creatures take double Damage from all sources.
- All Healing is doubled, and Creatures that take a Long or Short Rest recover all Hit Points, with Holy Creatures regaining all Hit Dice in addition to these benefits.
- Creatures don't need to Eat or Drink.
- Unholy Creatures don't benefit from Resting.
- Creatures that are suffering from any Affliction when benefitting from a Long Rest, cannot Fail or Critically Fail a Saving Throw against one.
- Creatures that are Resurrected here, can simply choose to be resurrected, with no risk of failure.

**: Holy Creatures are those that are associated with a Holy Deity, or otherwise hated by Unholy Creatures (Consult GM and Campaign Lore for Holy vs. Unholy).*

Diablo

Diablo is the home of all Fiends, where souls gather for torment. It is often described as magmatic and ashen, with such a hostile atmosphere, that even best friends might turn on each-other.

Inhabitants: Fiends

Effects:

- Holy Creatures take double Damage from all sources.
- All Healing is Halved (Rounded Down), and Resting doesn't restore Hit Dice.
- Creatures that take a Long Rest must save against Infernal Fever (pg. 337).
- Unholy Creatures benefit from Persistent Healing equal to their Proficiency Bonus.
- Non-Native Creatures that die here cannot be resurrected, unless their soul is retrieved.

**: Unholy Creatures are those that are associated with an Unholy Deity, or are otherwise hated by Holy Creatures.*

Elemental Planes

The Elemental Planes are a collection of Planes that can be traversed without magic, and stem from a Sea of Chaos. Because of this they are heavily divided, but in many ways, united.

The Elemental Planes are as follows: Air Plane, Chaos Sea, Earth Plane, Fire Plane, Water Plane

Inhabitants: Beasts (with the corresponding Movement Speeds), Elementals, Lost Travelers

Effects (Global):

- All Actions with the corresponding Traits (Chaos, Earth, Wind, etc.) last 10 times longer, have double the Range, and don't require Concentration.

(Chaos Sea):

- Non-Magical Items that aren't worn or carried are destroyed at the Start of each Round. Corpses affected in this way cannot be used for Resurrection until restored.
- You can spend 5 Actions to attempt to Craft any Non-Magical Item on the ground without expending Materials. Alternatively, you can stabilize an X ft. Radius, preventing it from changing (requires Concentration), where X is your Intelligence Score.

(Air Plane):

- The entire plane is under the effects of Strong Wind.
- Creatures that are Flying can move up to 20 feet for every 10 they expend.
- Ranged Weapon Attacks are always considered to be made at Long Range.

(Earth Plane):

- Creatures that are Burrowing can move 20 Feet for every 10 they expend.
- All Non-Burrowing Speeds are halved.
- Any Creature can spend 1 to 5 Actions as an Interact Action to improve their Cover to Obscured (1 Act), Half-Cover (3 Act), or Full Cover (5 Act), until they move away from it.
 - This Cover can support Creatures as long as they Concentrate, and doesn't destroy Cover or Terrain. Furthermore, it decays 1 Hour after Concentration is dropped.

(Fire Plane):

- Persistent Fire Damage doesn't reduce, unless extinguished with an Action or other effect.
- All Creatures are Obscured, and Anosmiated.
- Creatures that take Fire Damage gain an equal number of Actions, even if they reduce the amount taken.

(Water Plane):

- All Fire Damage is Halved (Rounded down), and Persistent Fire Damage ends immediately, dealing no Damage.
- Creatures that are Swimming can move up to 20 feet for every 10 they expend.
- Creatures and Vehicles that aren't Flying, or supported by terrain are forced under the surface at the Start of each Round, even if they normally walk or float on the surface.
- Creatures that are caught in an Area of effect that inflicts Cold Damage are Restrained until the End of their next Turn, even if they Succeed any Saving Throw.

Ethereal Veil

Also known as the Ghost Plane, the Ethereal Veil is a strange place where none can touch, or be touched.

Perfect for trying to spy on someone.

Inhabitants: Creatures with the Ethereal/Semi-Ethereal Abilities.

Effects:

- All Creatures are Ethereal, and cannot affect other Ethereal Creatures (including themselves) by any means that don't say otherwise.
- All Creatures in the Ethereal Veil do not age, don't need to eat, drink or sleep, and all Afflictions and Conditions have no effect.
- Creatures that enter the Ethereal Veil, can observe the Plane they traveled from, but cannot pass or peer into areas that are protected from Divination Magic.
- Creatures in the Ethereal Veil cannot be detected from the Plane they traveled from even if they wish to be, except through means that explicitly show Ethereal/Invisible Creatures.
- Creatures that die in the Ethereal Veil are brought back as Undead that are native to this plane.

Fey Lands

The Fey Lands are home to many strange and unusual, yet oddly familiar Creatures. Upon entry, it looks like a brand new world that is untouched by any Creatures, but its appearance belies how trees, caves and even flowers are home to many inhabitants.

Inhabitants: Beasts, Fey, Plants

Effects:

- Whenever you take a Half or Short Rest, you treat it as a Quality 5 Full Rest, even if you would not normally qualify.
- All effects with the Emotion Trait have Advantage against Non-native Creatures, and Non-native Creatures have Disadvantage on them.
- Creatures of the Beast or Plant Types in the Fey Lands have Telepathy out to 60 feet.
- Upon leaving the Fey Lands, Non-Native Creatures must attempt a DC 20 Wisdom Saving Throw, or gain the Amnesiac Bleed.

Material Plane

The Material Plane is the place where many Adventures take place. However, it is the most guarded of the planes, restricting Creatures of other planes from appearing without help.

Inhabitants: Beasts, Dragons, Humanoids

Effects:

- Creatures that are not native to (or born in) the Material Plane cannot travel here with an Action, unless a Creature that is native accompanies them, or brings them there.
 - This restriction doesn't apply to areas that are dedicated to such Creatures, or connected to their Native Plane (such as a Temple, portal, or geographical landmark. Think folklore locations).
- Creatures that are not native to the Material Plane have their Damage Thresholds reduced by half (rounded down).
- Creatures that are not native to the Material Plane return to their Native Plane at 1 Hit Point, if they would die in the Material Plane.
 - This doesn't apply to locations that are dedicated to them, or connected to their native plane.

Shadow Lands

The Shadow Lands are often thought to be a horrible place, void of light and life. But while that may be true, there are some places in the Shadow Lands that are much more tame and tranquil than even the Fey Lands.

Inhabitants: Ethereal/Semi-Ethereal Creatures, Undead

Effects:

- Creatures taking a Long Rest in the Shadow Lands must make a Constitution Saving Throw against Shade Fever (pg. 338).
- Creatures cannot see anything within the Magical Darkness that fills the entire Plane, unless they have Darkvision or Truesight. The ability to see through Magical Darkness allows Creatures to see as if it were constantly day.
 - Non-Magical Light sources only emit 5 feet of Dim Light, while Magical Light is limited to the Bright Light radius.
- Creatures that die in the Shadow Lands rise as an Undead 1d4 Hours later, and cannot be Resurrected until the Undead is Killed.
 - Creatures that are already Undead are simply resurrected as if they had been fully healed and rested, unless Destroyed.

Tiktataka

Tiktataka is the dream vacation spot for any tinkerer, as it is a gigantic place where Constructs naturally form, but also where the things you make and attempt are far more reliable than anywhere else. However, the twisting halls and unpredictable traps makes Tiktataka a great inspiration for all the worst dungeons.

Inhabitants: Constructs

Effects:

- Whenever a Creature makes any d20 Test, they can choose to take 10 on the d20, or a finalized total of 20 instead of rolling.
- Creatures in Combat use their Initiative as the Total for any d20 Test they make, which doesn't use Modifiers.
- All Movement Speeds and Action Limits are set at 30, and Movement is only affected by Dashing.
 - Non-Hover Flight is still doubled to 60 feet.

To finish this section, here are a few ideas to use Planes for:

- You could have several extra planes to separate multiple worlds, such as a "normal" world, and a "magical" one. You could use this to mix different settings and campaigns.
- Each Plane hides a different macguffin, trainer or power for the Players to find and use.
- The Players end up going on a tour of the Planes. Maybe it's like a sailing trip, or they're trying to keep the planes from bleeding into each-other.
- A big bad keeps switching the rules of the battlefield, using the powers of the planes. Perhaps even using them as a kind of Lair Action.

Puzzles

Puzzles are notorious for either being blatantly obvious, or so difficult that the GM needs to Spell it out before anyone gets it. Hence why nursery rhymes are typically used.

But, there's a better way to make satisfying, and meaningful puzzles.

Mysteries

A Mystery is anything that leaves unanswered questions, such as “who stuck their hand in the cookie jar?” or “when did the Rogue get that skull?” or “is the BBEG secretly a duck?”

These will arise naturally within a Campaign, as long as the GM remembers to not tell the Players everything, and are often the most rewarding to solve without aid, particularly since the answer can simply arise from Exploration.

A Mystery generally isn't necessary for any kind of dungeon, and doesn't need special planning in advance.

Riddles

Riddles encompass anything that must be solved in order to succeed at a task, such as an empty room with a single button that opens a door after a delay with lots of noise, or a machine that needs the correct gears replaced to move out of the way.

Every Riddle needs at least one Trigger (like a Spell that responds to an answer), and a Result (like a penalty for giving the wrong answer), but not all of them need Hints, nor Objects.

An Object is something like a Key, Monster, Gear, Riddle asker, Puzzle Piece, Box, or other item that aids in solving the Riddle, including Hints.

A Trigger is anything that activates one or more Results, such as a Button, Keypad, Tripwire, Rune, Pressure Plate, or Magical Item.

A Result is something that happens based on how Creatures react in the puzzle, such as an opening door, unlocking container, or exploding kitten.

A Hint is something that provides direction towards the solution, away from unfavorable results, or otherwise enables Creatures to solve the Puzzle, like a Hint Book.

The problem with Riddles, is that they're often difficult to formulate in a readable way, and to make appropriate for their purpose.

A good way to build a Riddle is to start with the desired Result, such as opening a door, then picking one or more Triggers to cause the effect, such as a dial, or set of dials with gemstones that add new combinations.

After that, determine if there's any additional effects, such as a trap that triggers on a bad input, or extra doors that open, or another puzzle element that becomes available, like a gemstone or battery in a hidden box.

Finally, determine a Hint for the Riddle, such as an actual Riddle, a depiction of a Good or Bad Result, instructions on how to use the device, or maybe even a list of criteria that must be fulfilled for the best results, or to avoid bad ones.

You might also utilize what some people call “NPC Magic,” which is just a fancy way of doing the impossible, without letting the Players access it.

Riddles can also take the form of non-dungeon things such as diplomacy or politics. NPCs you need to get answers from are Objects, schedules and various topics are Triggers, Results are reactions and responses to those topics, and Hints are information you extract from conversations. Try it!

Traps

Traps come in many types and flavors, from that inconveniently placed rune on the floor, to an idol on a pressure plate, or a lightning fence in the path.

These Traps often work like Riddles, requiring a Creature to figure out how they work or trigger before they can be bypassed or even disabled entirely. The major difference is that Traps are intended to either kill or actively hinder intruders long enough for someone to interfere with an upper hand.

A Trap may deal Damage, inflict a Condition, restrict Movement or Actions, alert a Monster, initiate a Riddle to unlock the exit, or open a new path forward.

Other Traps such as the ones on containers are designed to keep people from taking everything without a second thought.

While there are no example traps in this book (sorry, it's already too long), there is a Basic Trap Kit (pg. 344) and the Wizard's Glyph of Warding Feat (pg. 208), that can give a solid foundation to work with.

Weaknesses

Monster Weaknesses are Puzzles in and of themselves.

Some might even be Riddles. While a sufficiently powerful Party can eventually wear down or even defeat a Monster without exploiting a Weakness, it makes the Encounter much more risky and dangerous.

As stated on pg. 86, a Weakness bypasses Damage Thresholds, and sometimes disables certain Abilities or Actions. However, this lasts until the End of the Target's next Turn, unless a Duration is involved.

Every Monster has a Weakness (barring certain exceptions), that is unique enough that having a Magical Weapon doesn't actually allow you to kill anything and everything that stands in your way, unlike a certain system that doesn't understand how to use Resistances and Vulnerabilities without making the Monster annoying to fight or operate.

The goal with Weaknesses is to make Monsters difficult, but beatable, while giving even combat-focused Players something to chase outside of combat.

Rest

No good story is complete without a period to rest and recover, and no good TTRPG is complete without time for PCs to reset, and wind down from the stress of kicking butt, taking names, and giving the GM a triple monster headache.

Rests

Rests are the primary method of restoring Health, and Resources, and come in 4 types: Full Rest, Half Rest, Short Rest, and Breather.

Anything that recovers on a specific one of these Rests will not be listed here. Said Feats or Items recover as they state.

Full Rest

A Full Rest requires that you have protection from any present weather effects such as wind, rain and mud, are sleeping in a calm or quiet space (not an overcrowded ship hold during a storm), have comfortable bedding, and a fully cooked meal (not just rations, or foraging).

A Full Rest grants all the benefits of a Half Rest, in addition to restoring Hit Dice, and reducing the Drained, Exhaustion, Impaired and Slowed Conditions by the Quality of this Rest, which starts at 1.

However, Conditions that are caused or Increased by resting, such as those caused by Afflictions do not decrease this way.

It is also considered a type of Long Rest.

Half Rest

A Half Rest (a.k.a Long Rest) simply requires 8 Hours, and is gained when a Creature doesn't qualify for a Full Rest. A Half Rest can be taken multiple times in a day if needed, but doing so heavily restricts what activities are available to such Creatures.

A Half Rest is considered a Long Rest, and grants all the benefits (and penalties) of a Short Rest, in addition to anything that requires a Long Rest, plus an additional number of Spell Slots equal to your Level.

...

Failure to take a Long Rest within 24 Hours of the last one forces a Creature to pass a DC 10 Constitution Saving Throw every 8 Hours, starting immediately:

- **Success:** Take Exhaustion 1.
- **Failure:** Fall Unconscious until you finish at least a Half Rest, or are awakened after a Short Rest.
- **Critical Failure:** Fall Unconscious until your Exhaustion is reduced to 0. However, you gain the benefits of the Recover Activity twice (pg. 108)

Short Rest

A Short Rest requires 1 Hour.

A Short Rest allows you to expend and roll any number of Hit Dice, and heal that amount. You also regain one of each Class Resource that recovers on a Long Rest, as well as a number of Spell Slots equal to your Charisma Modifier (Minimum of 2).

You can also forgo any benefits to attempt a Skill Check that normally takes 1 Minute or less, and attempt said Skill Check, taking either the d20 result, or a 10, whichever is higher. You must be Proficient in the Skill or Tool in order to do this.

If you are exposed to any Disease or Affliction, you must make a Constitution Saving Throw to avoid contracting it. Otherwise, you save against Infection if you are Bloodied.

Reminder: Diseases and Afflictions usually have their repeated Saves on a Long Rest, not a Short Rest.

You also gain any benefits of taking a Breather.

Breather

A Breather requires 10 Minutes.

A Breather allows you to expend and roll 1 Hit Die, and heal that amount. You also regain 1 of each Class Resource that requires a Short Rest, and 1 Spell Slot if you have any.

You can only take a Breather once per Short Rest, or while you have access to drinkable water, unless you don't need to drink.

Resting in Danger

Sometimes, a group of Adventurers will be forced to rest in a Dungeon, or hostile territory. And what better time for an ambush than while the Party is resting?

When the Party takes a Short or Long Rest while in Danger, they can choose to set a watch if they have 2 or more Creatures, increasing the time taken depending on how long it takes for all Creatures to rest for the total time of the Rest.

Creatures that keep watch typically roll Initiative in case of Combat, using the highest roll as the Stealth DC for any Creature that wishes to enter the campsite unseen, while Creatures that are Resting are always Surprised unless it's a Short Rest, or one of the Ambushers rolls below their Wisdom Score (barring other rules).

The GM determines whether or not the Party is ambushed by one of various means, such as “feeling it out”, always ambushing the Party under certain conditions, rolling the dice, or even a combination of methods.

However, if there is no risk of ambush, the GM shouldn't force the Party to roll at all (except MAYBE once or twice to mess with paranoid Players), instead letting them decide if they want to set up a watch or not.

Now of course, this isn't to say that all ambushes are bad. Sometimes the Party can be ambushed by an ally who is happy to see them, or a friendly old man surrounded by canaries that offers wisdom and a quest before disappearing mysteriously! Wait... was the Fighter's sword always enchanted?

Resting in Town

When Resting in a Town, Stronghold or other such place, you have access to all sorts of amenities that make recovering from injury and tiring activities much faster, most importantly of which, being the protection provided by Guards.

When spending multiple predictable nights in Town, it is recommended to figure the cost of living up front before doing anything, and figure additional costs as needed.

When you Rest in Town, your GM decides what the cost and/or availability of bedding is available for your Rest, which could be simplified to a range in Quality.

Next, you pick a Quality, with 0 being a Half Rest (usually free if not taxed). After that, you pay the corresponding cost, and set the Hit Dice and Condition reduction to the Quality of your Rest.

As long as your Rest is at least Quality 1, you also gain Advantage on any Saving Throws that are Triggered by resting.

Typically, the cost is equal to the Quality of your rest in CP for Quality 1, SP for Quality 2, GP for 3, and PP for 4 or higher.

This cost is reflective of an average living situation, and may be double, triple, quadruple, or greater for rich, or high tax locations. Or, it could be free depending on your standing with certain Creatures such as a noble, relative, friend, stranger, as a recognition of title, or as something like a grant enforced by law.

Downtime Activities

Nobody likes to sit around and twiddle thumbs for Hours or days on end, while waiting for their Conditions and Afflictions to wear off, or for the next villain or job to reveal themselves. In other words: Adventurers need hobbies!

Each Activity should tell you how long it takes to benefit from them, and can be performed as long as you have any required materials. Any Activity with the Money Trait can only be performed in an area where currency is used (unless stated otherwise, as with everything else).

While Downtime is usually spent when Resting in Town, it can sometimes be done during Travel, or even in a Dungeon. However, Downtime is exclusive with Resting, and must be done separately.

Usually, a Party will have 8 to 12 Hours for Downtime every day when waiting around, depending on if they're busy with hunting, cooking, or other chores.

Construct

Restriction: You must remain near the structure for the entire time.

You aid in the Construction of a Structure or Facility, as if you were a number of Hirelings equal to your Level. Creative Feat or Spell use may grant extra Ruler Points (pg. 128), or GM Inspiration (pg. 111).

Craft

Restriction: You must have the required Tools and Materials (by Weight) to Craft a given Item or Construct.

The time taken depends on the Item (or Construct without a listed time requirement) you wish to Craft. A Large Item takes 2 Days, a Medium one takes 1 Day, Small takes 4 Hours, and so on, so forth, including refinement times. Primitive Items take Minutes instead of Hours, or Hours instead of Days.

You can only attempt to Craft an Item or Construct if you have a recipe, or if the Intelligence of at least 1 contributing Creature is higher than the Complexity (or Crafting DC for Constructs) for the Intelligent Creature, who must spend their Downtime to provide the capability.

If you Craft an Item with the Consumable Trait, you can make it in batches equal to your Proficiency Bonus, spending extra materials as needed.

Once you have decided what you are Crafting, one of the contributing Creatures makes an Intelligence Check with the corresponding Tools, with a DC equal to its Complexity, unless your total Modifier is equal to, or greater than the DC:

- **Critical Success (Limit: 1/Day):** Same as Success, but your DC to Craft all versions is permanently reduced by 1 for you.
- **Success:** You Craft the Item, or a batch if it's Consumable.
- **Failure:** You fail to make anything usable, but you can deconstruct the Item.
- **Critical Failure:** You waste all the components, but you cannot continue Crafting other Items until you finish a Full Rest.

If you double the Crafting Time or use pre-refined materials, you can replace the d20 result with 5, or 10 if you do both. However, doing so with either only adds your Proficiency with the Required Tools. Not other bonuses/penalties (useful for preventing Critical Failure).

Repairing an Item doesn't expend materials and decreases all penalties by 1. Deconstructing an Item allows you to recover half of the materials spent over the same amount of time it took to Craft.

Earn Income

Requirement: You must be in a Town or other location that uses some form of Currency.

Over the course of 8 Hours, you gain an amount of CP equal to your Proficiency Bonus. If you are Proficient in a Skill or Tool, you can gain SP equal to your total bonus with that Skill. Some Guilds and Factions may pay GP instead of SP for specific Proficiencies, or PP for a full suite of relevant Proficiencies.

Hunker Down

You spend 1 Hour placing a single 5 x 2.5 ft. wall that provides Half-Cover to a Creature of your Size. If you have a Tool that can use to craft this wall, you can place a number equal to your Proficiency Bonus.

Identify

You spend 1 Hour to study a Magic Item, Object, or Spell, using the required Tool Proficiency (Intelligence) or Arcana for Items, or the corresponding Intelligence-Based Skill for Spells, with a DC equal to 10 + Twice the Spell's Tier, or the Item's Complexity:

- **Critical Success:** Same as a Success, but you also learn if the Item is Cursed or not, or how to End or utilize the Spell.
- **Success:** You discern the vague design of the Item or Spell, such as if the Item/Spell is Offensive, Defensive or Utilitarian, how many Actions it costs to use, whether you can use it or not, and where to learn more about it. Other than that, you don't determine curses, or descriptions.
- **Failure:** You only discern one detail about the Item such as the Action Cost, as well as where you might find more information about it.
- **Critical Failure:** Same as Failure, but you accidentally Attune to, and utilize the Item once if you can (if it is an Item, and you aren't already at the limit).

Special: You can perform this Activity while taking a Short Rest.

Perform Reconnaissance

You spend 1-12 Hours to retrieve information about a location, such as Plot Points, Guard Routes, Local Plant & Wildlife, Layout, Treasure, Goods & Services, General Enemy type, Environmental Hazards, Points of Interest, Raw Materials, or Escape Routes.

The amount of time spent determines how far you can, and choose to search.

You must declare what information you wish to retrieve, and your GM will call for any corresponding Checks, setting DCs accordingly, or even providing results without a check if the information doesn't pose a significant challenge for you.

This Activity may allow or require you to roll an additional Wilderness Encounter (pg. 99), though you have Advantage on any Ability Checks to detect and/or avoid it if you wish.

Recover

Requirement: You qualify for a Full Rest.

You spend 8 Hours resting further, treat the Quality of your Full Rest as if it was increased by 1, and gain Advantage on any Triggered rolls. If you already have Advantage, the quality increases by 2 instead.

Special: You can perform another Activity with this one, provided you can perform the majority of it while bedridden in the place you wish to Rest.

Retrain

Restriction: You must either have a dedicated Facility, a Trainer, or a training plan you can follow.

After spending a number of Days Retraining (8 Hours each day) equal to your Level, you can replace any Non-Ancestry and Non-Boon Feat you have (provided you have none of its Child Feats Feats that list it as a prerequisite), with another Feat of the same kind.

You can replace a General Feat with a General Feat, or a Class Feat with a Class Feat, but you cannot replace a General Feat with a Class Feat. See below for Utility Feats.

You can also change your choice on Feats with the Choice Trait.

If your GM allows you to replace a Utility Feat with a Non-Utility Feat, you must have at least 1 Utility Feat for every 4 Levels you have, rounded up.

Sell Goods

Restriction: You must be in a town with an open market, or with some way to sell items you can access.

Select any number of Items you wish to Sell. Every Hour, you sell a number of Items with a total (and final) GP value equal to your Charisma Modifier at full price, and roll a d100, adding your Persuasion Modifier (considered a d20 Test).

When you roll this d100, you may choose to sell any Item at that price percentage (rounded down). If you sell an Item this way, your next d100 is at Advantage.

If you sell a Magical or exceptionally rare Item, a buyer may make a commission, ask you to deliver the Item to a specific location (as a quest), or request the retrieval of an Item you don't have, with an up-front delivery fee equal to your Persuasion Modifier in the Item's price.

Study

Restriction: You must have access to a Location or Item containing the Information, such as a Library or book on the topic.

In 8 Hours, you delve through a collection in search of a particular subject such as a particular Monster, or Item. You may need to roll Society or Perception to locate or discern the knowledge, or an Intelligence-based Ability Check in order to fill in the blanks of another Creature's notes.

The Check you roll has a DC depending on the Item's Complexity, the Monster's Hit Dice + 10, or the Spell's Tier + 10:

- **Critical Success:** Same as Success, but double the Details, and Crafting DC reduction. Alternatively, you can learn details that aren't on the list, such as Ability Scores.
- **Success:** You learn 1d4 details of your choice about the chosen Creature, or how to reveal them. Or, you reduce the DC to Craft that Item by 1.
- **Failure:** You learn of a location where you can Study, or discover more details as if with a Success, without an Ability Check. However, further checks may not be fully truthful.
- **Critical Failure:** Same as Failure, but you don't learn where to find more information.

Some things you can learn from a Success are as follows:

- AC
- Actions
- Action Point Maximum and Recovery
- Common or Guaranteed Loot
- Damage Threshold
- Features
- Habitat
- Immunities
- Languages
- Lore
- Monster Type
- Resistances
- Skills
- Vulnerabilities
- Weaknesses

Social

Usually disdained as pointless or stupid (or assumed to be the “RP” pillar when they’re all RP), the Social Pillar is anything but. In fact, one of the greatest appeals of TTRPGs is to have fun as a group, in a creative, supportive, and friendly social environment.

Unlike the other Pillars, the Social Pillar is so intuitive, that you can easily run it without even looking at any rules. Because of this, the rules are more for those who need help getting started, or refining their skills.

Negotiations

Negotiating is a way of figuring out the best solution, or getting two groups to agree on something, or disagree as the case may be.

In a perfect world, everyone states their real motivations and intentions behind what they do, rather than doing unfavorable things. But sadly, this isn’t the case. Instead, one must discover intention through guesswork, trial, and error. Or Society Checks.

Most NPCs in Social Encounters can have their emotional state represented by their Friendliness and Trust.

Friendliness shows how much an NPC or group of NPCs trust the Party, or a Creature, with the basic states being Friendly, Neutral and Hostile. Friendliness determines how willing a Creature is willing to defend or harm you.

Trust determines whether or not the NPC expects you to accomplish an important task, or remain Friendly towards them with the basic states being Trusting, Neutral, and Mistrustful. Trust adds +5, 0 or -5 respectively to any Persuasion Checks.

Together, these states allow a GM to better determine how a Creature or group of Creatures may respond to certain Actions, such as proving that a Werewolf isn’t actually dangerous. These States can also change on a whim, depending on behavior and circumstances.

Also, don’t be afraid to let Players talk their way out of situations, bribe monsters with food (or treasure), intimidate guards into looking the other way for something small or scary, or befriending the Villain.

NPCs

An NPC is a Creature that isn’t controlled by a “Player”, hence the full name: Non-Player Character.

The GM treats all NPCs as their own Characters, and operates their behavior in Combat Encounters (e.g. the Enemy), though they are better known for their role in the Social pillar.

Most the time, a GM can just narrate an NPC without using a Statblock, or adding 1d12 to 8, and using that in place of an Ability Score if needed. But if you’re feeling really chaotic, a d20 works just fine.

When designing an NPC for a specific purpose, you might start by determining their social status, such as noble, peasant, outcast, or weird guy that everybody knows, but nobody has the courage to approach. After that, you might try and add on a few abilities, a Role, or build a Stat Block. You may also need a name, but hey! There are free-to-use [Fantasy Name Generators\(.com\)](https://www.fantasynamegenerators.com/) for that on the internet, right?

The hardest part of Creating an NPC is getting the Players to accept them the way you want them to.

One of the important things to remember, is don’t try to sell an NPC’s personality by stating what kind of person they are, as that usually has the opposite effect. Instead, have the NPCs actions speak for them, in how they treat the Party, and those around them.

When making a likable Character, try to give them a little quirk, a funny personality or aspect (such as their voice), cute detail, or other aspects that you personally would like (then account for known Player opinions).

When making a hateable Character, try to make them do irritating things such as slamming doors in the faces of Players, stepping on toes, scamming the Party, causing problems, or otherwise irritating behaviors. Just remember to account for Players wanting justice, and allowing them to pursue it. If not, either let the Players know beforehand that not all bad guys can be taken down, or make the hateable character tolerable/optional.

When making a weird or unsettling Character, make them do weird things, such as maintaining eye contact for an odd amount of time, giving strange gifts, using bizarre inflections, or other creepy behaviors. PLEASE BE CAREFUL WITH PLAYER LIMITS AND PHOBIAS!!!

Now for the important part: Villains.

While we could include Allies, you can just treat them as the Good variant of Villains to have a good baseline.

To start, a Villain needs a goal or a want. Whether they want revenge, world domination, chaos, power, fun, or even just wanting to watch the world burn, a goal will give your Villain direction.

That being said, a good Villain will also need motivation. Without it, they're just evil for the sake of being evil. And while that's all well and good for simple Villains, more complex ones have reasons other than just: "my parents weren't saved in time, so I'm mad at every superhero." More than that, a good Villain's motivation must connect to their goal.

A good Villain can also have some twists to keep them interesting, such as being relatable, funny, tragic, powerful, and genius, among others. Try running a Villain who can't resist the urge to pet cute and fluffy animals, crack jokes, or go all mushy when complimented for something he does. Just be careful with subversions like these. They can turn out poorly.

Speaking of horror Campaigns, try to design their Abilities and personality to mesh well with the themes you're integrating. For example, brutal Campaigns have Villains that aren't afraid to strike Dying Creatures, horror Campaigns have Villains that are capable of testing the resolve of the Players, funny Campaigns have either comical Villains, or Villains that are far too easily confused by jokes, and so on.

Finally, your Villain should always challenge the Party in some way shape or form. If they can't make a PC worry in Combat, or if a PC can kill them the first time they meet, then you have a problem.

As for implementation, try to let the Party know who the Villain is long before they meet said Villain. Preferably not through exposition. And more importantly, make sure they can't touch said Villain on the first meeting, such as putting it on the Villain's terms instead of the Party's terms. I know it's tempting for a face-to-face, but if you don't have any back-up plans, it won't end well.

GM Inspiration

Sometimes your Party does something that is cool, funny, advances the plot, or otherwise makes the game better for everyone. In such an event, the GM can reward a special kind of Inspiration called GM Inspiration.

There is no limit to the amount of Inspiration you can have at a time, but it doesn't transfer between Campaigns (unless your GM says so).

Other than Bragging Rights, GM Inspiration can be used as your personal hand in fate and reality. Whenever you roll any die, you can use GM Inspiration to re-roll it, or nudge it up or down by 1.

You can also use GM Inspiration to gain XP or Class Resources at a 1:1 ratio. However, you can't turn XP into Inspiration.

If you accumulate 5 Inspiration, you can spend it to gain any Proficiency. And if you have 10, you can spend it to gain a General Feat without Leveling Up.

Finally, you can use GM Inspiration on other Players and even the GM, though the price is doubled against the GM.

Other than that, talk to your GM about what is acceptable use, and what isn't. GMs cannot gain GM Inspiration, and neither can their GMPCs (except by Player Approval).

Shopping

Shopping is loved by many, and hated by some, as it can lead to spending Hours looking for the right Items or Materials, and Hours more to negotiate pricing.

While more complicated methods can easily be utilized, the easy method is as follows:

1. Have the Players make a Wish List of things they want, and determine if the stores are available. Smaller towns might not have access to all stores, but passing merchants might have an odd item in stock, and larger cities almost always have a little bit of everything, for a price.
2. When the goods are available and they want to buy, have the Players purchase cheaper Items at whatever is reasonable for the merchant.
3. If the Players want to buy Magic Items, roll 1d4 to determine how many are available in a casual trip, of which, at least 1 is usually Dormant or Cursed (see Bestow Curse on pg. 472), but cheaper, assuming you use those.
4. You're done!

If the Party wants to bargain, most stores do trade for Items they can use, materials they can sell, or favors. Others you'll need to roll Persuasion.

Every time a Party Member tries to Persuade a Shopkeeper or Merchant, the percentage of the price increases by the Shopkeeper's Charisma Score (see Skilled Hireling if unsure), and decreases by some amount determined by the Persuasion Check. Of course you may determine that a different price-shift is in order depending on circumstances, and that's totally acceptable.

However, all Merchants have a minimum Price they're willing to sell something for depending on the item. For most Items, this Price is usually about 50% of the original price, but can vary depending on demand, and material costs.

Other than that, there's not really anything to go over, other than the fact that Shopkeepers tend to call Guards over theft or threat, unless the attempt is critically successful. And most captains are Skilled Guards.

So don't rob a store you wish to visit in the future.

Voice Acting

Voice Acting isn't necessary if you're good at differentiating between talking in and out of character without it. But even still, it's a nice skill to have, as it can make the game much more fun, engaging and seamless at times.

You don't have to be a professional Voice Actor for this.

In fact, you don't really need to do much of anything with your voice. All you really need to do (for beginners) is to sit or stand like the character you're narrating. If they're arrogant, puff out your chest. If they're shy, keep your head tucked in.

It may not seem like much, but you'd be surprised by how much your posture influences your voice. It's not that hard, and a lot of fun too! Just wait till you make your villains that much more awesome, and start realizing how many weird noises you can make!

Coup De Grace

Sometimes it's narratively important that an NPC or PC dies to something they would normally survive mechanically, like a dagger, but to the heart.

When a Creature performs a Coup De Grace, they must not be in combat, and have an opening for a lethal attack, such as a headshot, or an unexpected backstab, or at the very least, be subject to a default kill (e.g. -50 Actions). An Attack Roll is usually unnecessary, except when time is of the essence, and it would be easy to botch.

Player Characters should typically be immune to a Coup De Grace, unless they agree to the possibility in advance, or you gave them a very clear warning such as: "Are you sure you want to teleport onto the sun?"

A Creature that succumbs to a Coup De Grace, dies instantly and might not be willing to return to life if not brought back immediately (like say... Revivify), though they may have time to give some dying words, unless crushed by a giant bell or something.

Skills & Ability Scores

While Skills have been referenced earlier for d20 Tests, it doesn't really help as far as what Skills are available, and what they do.

A Skill Check or Ability Check should only be called when the result of something is uncertain, such as when a Player needs to roll higher than a 5, and when there are consequences for a bad roll, such as getting caught, or losing precious time. They should also only be rolled when called or declared beforehand, or by an Action.

For repeated Checks, a Creature might leave obvious signs of what they're trying to do, increase the chance of failure (by 1 to 5), or adding a penalty with a success (slamming a door open granting Exhaustion, breaking tools on a lock, or getting inaccurate information at the library).

For Checks that you want a Player to be unaware of, you can use 8 + their bonus to that Skill for the result, or treat their corresponding Ability Score as a DC for contests.

You may occasionally find reference to a Skill Challenge. This is just a collection of Skill Checks that average out to determine Success or Failure, or have a number of needed Successes. Usually in Skill Challenges, a Creature rolls Disadvantage on Ability Checks they make after the first, unless all other Creatures involved have made at least one Check, or the Skill is unique (or at least proposed in a unique way).

For choosing a DC, try thinking in terms of 10, 15, 20, 25 and 30, or using Ability Scores. Use whatever fits best, and stick with it. Just remember that some things are simply impossible, even with a Nat 20.

Cheating is Bad

Cheating is widely frowned upon, and was touched on earlier, but it's important to reiterate here. Not only is it not fair to the GM and other Players (who end up suffering), it also robs you of the experience. If you can't accept a risk of failure, then maybe this isn't for you.

If your excuse is that the GM cheats, a GM gets a small pass if they decide to "fudge" rolls occasionally to prevent unfair, or anticlimactic results for the Players.

Ability Scores

Ability Scores are the base for each Skill, as listed in parenthesis for each. Each of these Ability Scores list the main impacts on your character, with a few exceptions.

Strength

Strength is a representation of your capacity to lift heavy things, or the force behind your physical strikes. High Strength usually appears as high muscle mass, while low Strength sometimes leaves you skinny as a stick.

- Increases Weapon Damage.
- Enable usage of certain Items such as Heavy Armor or Weapons.
- Increase Carrying Capacity (4 * your Strength Score, scales with Size).
- Maintain Grapples or similar effects (acts as the DC).
- Stand your Ground, or prevent unwanted Movement.

Dexterity

Dexterity represents your ability to maneuver your body, or avoid Damage. High Dexterity often manifests as flexibility, or hand-eye coordination, while low Dexterity may leave you somewhat clumsy.

- Increase AC (10 + your Dexterity Modifier).
- Increase Weapon Attack Bonus.
- Increase Weapon Damage (Finesse only).
- Evade area attacks.

Constitution

Constitution represents your physical health, which also helps with shrugging off harm. High Constitution may come across as you having more flawless features and general health, while low Constitution can manifest as being short of breath, or regular sickness.

- Increase Action Points per Round (Added alongside Class Initiative Modifier), unless your Modifier is Negative.
- Increase Hit Points (Level * Constitution Modifier), unless your Modifier is Negative.
- Hold your Breath for a number of Rounds equal to your Constitution Score. Each Action you take removes 1 Round if it costs more than 1 Action Point, and you can't perform Verbal Components while Holding your Breath.
 - If you run out of breath, you become Unconscious in a number of Rounds equal to your Constitution Modifier (Minimum of 1), and then roll Death Saves, though you cannot become Stabilized while you can't breathe.
 - You take 1d6 Force Damage at the Start of your Turn if you hold your Breath in a Vacuum.
 - If you don't hold your breath or expel it (eg. to perform a Verbal Component), you treat it as running out of breath.
- Resist toxins, illness, and other physical ailments.

Intelligence

Intelligence represents your understanding of the rules and mechanisms of the world around you. High Intelligence may result in someone who is curious, or quickly picks up on minor details, while low Intelligence manifests as a lack of general knowledge. This is usually ignored during puzzles, beyond roleplay.

- Extra Proficiencies (Minimum of 0 extra, based on Modifier).
- Increase Spell Attack Modifier.
- Increase Max Prepared Spells and Cantrips.
- Defend against logical and mental attacks.
- Break down, and outsmart certain Spells and effects.

Wisdom

Wisdom is your ability to Focus and maintain awareness, as well as your reasoning processes. High Wisdom manifests as having a strong sense of insight, the ability to come up with effective solutions on the fly, or remain patient in adversity. Low Wisdom tends to manifest as something akin to ADHD, lack of awareness, or even refusing to accept common reality.

- Increase Spell Damage/Healing Bonus (Minimum of 0).
- Concentration Saving Throws.
- Noticing the effects of Magic, or Abilities, and passively breaking out of them.

Charisma

Charisma is best described as "force of presence," or a "sense of style". The better your Charisma, the better you can dominate a room through social manipulation.

High Charisma tends to manifest as confidence, authority, rebellion, or some other degree of taking control, while Low Charisma appears as difficulty standing up to others, or making themselves heard without causing trouble.

- Spell Save DC (Equal to Score).
- Resist Charisma Checks (acts as DC).
- Resist magical, social, or eldritch influence.
- More Spell Slots (Total and Recovery).

Skills

Acrobatics (Dexterity)

Your ability to maneuver your body in unusual ways, or in the middle of the air.

- Break a Grapple (Contested by your Grappler's Athletics Check, or Strength Score if they're distracted).
- Dodge through a Creature's space: The DC is the Opposing Creature's Dexterity Score.
- Reduce Fall Damage: Removes 1d6 from the fall Damage for every 5 you roll, starting at a Total of 10 (10 removes 1d6, 15 removes 2d6... etc.).
- Do a Flip: The DC is 15 (Fall Prone on Failure). This makes some people think you're really cool if you do it.

Arcana (Intelligence)

Your knowledge of Arcane subjects is helpful in recognizing Arcane Spells, and Creatures of Arcane Nature.

- Recognizing Arcane Spells, Curses and Items: The DC is 10 + 2 times the Spell's Tier (DC 10 for Cantrips). Non-spell effects either list this DC, or use the Rarity in place of Tier, only 3x not 2x.
- Recalling Information about Arcane Monsters such as Immunities, Vulnerabilities or Weaknesses (The DC for this is the Monster's Intelligence Score, if not otherwise specified. This applies to Aberrations, Constructs, Dragons and Elementals).

Athletics (Strength)

Your physical prowess and technique can enable you to push things that are much heavier than usual.

- Pushing or Dragging up to 2 times your Carrying Capacity to an adjacent space (the DC starts at 10, and increases by 5 to increase the multiplier by 1, also part of the Interact Action).
- Grappling or Pushing a Creature (See Overpower pg. 78).
- Flex Impressively (The DC is the Target's Charisma or Strength Score).

Deception (Charisma)

Your demeanor and ability to cover up any tells can aid in trying to convince someone about something that you know isn't true, unlike Persuasion where you believe it's true. Unfortunately, Deception often leads to enemies.

- Lie (The DC is your Target's Charisma Score).
- Counter Insight (Your roll becomes the DC for a Society Check to see if you are Lying).

Intimidation (Charisma)

Your ability to give convincing and icy threats goes beyond Deception or Persuasion, but rather your ability to make people believe you'll fulfill them in a particularly horrifying fashion. Of course, a well armed Creature has an easier time threatening people than an unarmed Creature.

- Frighten a Creature (the DC is your Target's Charisma Score, and inflicts Frightened 1 until the end of their next Turn if you Succeed).

Medicine (Wisdom)

As the body is very difficult to understand as a whole, the ability to observe and understand the cause of an illness or injury allows one to effectively treat otherwise fatal wounds, or diagnose deadly diseases.

- Diagnose a known disease (Uses the DC of the Disease).
- Deduce the cause of a Creature's death (The DC is 10 or 20 if Psychic or Force, plus the Killer's Thievery Bonus).
- Deduce the approximate time of a Creature's death (every 5 points increases the degree of accuracy as follows: 5 = months, 10 = weeks, 15 = days, 20 = Hours, etc).
- Reduce Persistent Damage (The DC is 15 without proper supplies, and reduces by 1 for every 5 you roll over the DC).
- Stabilize a Creature (pg. 79).

Nurture (Wisdom)

This represents a Creature's ability to understand and care for others such as Beasts & Plants, as well as the ability to calm or tame them.

- Comfort a Frightened Creature that doesn't need to share a Language with you (the DC is 10 + their Frightened Condition, and Reduces Frightened by 1 for every 5 over).
- Prevent or delay a wild Monster from Attacking (The DC is the Target's Charisma Score).
- Tend to an unfamiliar Plant or Garden (The DC is 10-30 depending on what plants are present).
- Keeping children under control (the DC is 15-30 depending on just how wild said children are, or how well you know them).

Occultism (Intelligence)

Commonly known as eldritch or mysterious, or sometimes forbidden knowledge, this refers to knowledge that not everyone wants to know... or is even meant to know.

- See the Arcana Skill, except with Occult-Based magic, Aberrations, Fiends, Undead, etc. Think lovecraftian eldritch horror stuff.

Perception (Wisdom)

Commonly known as the skill of looking really closely at things to figure out if that spoon is actually a Mimic, Perception encompasses the five common senses: Touch, Taste, Sound, Scent, and of course, Sight.

- Sense things. Most Creatures (and all Characters) are assumed to have Precise Sight: 600 ft., Imprecise Scent: 15 ft., Imprecise Tremorsense: 10 ft. and Imprecise Hearing: 60 ft., unless otherwise specified.
 - All senses count as "seeing". The Range on each sense tells you how much clarity you can detect something with. So with Darkvision, you can still see an entire cave. It's just that the detail from that far away is somewhat impractical.
 - Also, some environmental factors such as dim light, an echoey room, or a squishy floor make some senses harder to utilize, treating Precise as Imprecise, and Imprecise as if it didn't exist.
 - If a sense is Precise, everything beyond that range is considered Imprecise.
- Spot (See Spot Action on pg. 78).
- Detect a Hidden Creature/Object (the DC is Based on the Creature's Dexterity Score (or current Stealth Check), or the Thievery check of whoever hid the Object (or Trap)).

Performance (Charisma)

Your ability to pull off an act, such as pretending to be something else, or showing a sense of theatrics. This doesn't influence your ability to juggle objects, or lift things, it just gives you a sense of what people really like.

- Mimic a Creature, Sound, or Object: (the DC is the Target's Wisdom Score, or Perception Check).
- Promote interest in an Item or Creature (The DC is the Target's Charisma Score, plus their Proficiency in Society if any).
- Capture an Audience's (or Creature's) Attention (the DC is 10, increasing with varying levels of interest in the Action you're performing or other distractions such as conversation, or panic).

Persuasion (Charisma)

Your ability to convince a Creature of something they aren't inclined to believe, or agree with, may help you to get a Creature to open up, or hear you out. More Hostile or Mistrusting Creatures are always harder to convince, while Friendly or Trusting ones might not even need a Check.

- Change Someone's Point of View (the DC is the Target's Charisma Score + 5).
- Remove an Emotion effect (the DC is based on whatever DC the Target had to Save against, or their Charisma Score for Buffs).
- Convince a Creature of a fact or promise (the DC is Target's Charisma Score, plus relevant modifiers depending on how resistant they are to the fact or promise).

Religion (Intelligence)

Your knowledge of holy or unholy topics usually, covers Fiends, Celestials, and Undead. However, anything of a Religious nature (such as worship involving Dragons) could fall under this category as well.

- See Arcana Skill, except with Divine Spells, and Celestials, Fiends, Undead, etc.

Society (Wisdom)

Your ability to understand/read the behaviors or motivations of other Creatures, or comprehend the rules/norms of society. This also extends to understanding intentions and behaviors. Also known as Insight.

- Determine a Lie (the DC is equal to the Target's Deception Check, or Charisma Score).
- Extrapolate Mannerisms and Tastes (The DC is the Target's Charisma Score).
- Read Intentions (the DC is Target's Charisma Score or Deception Check. This gives you a clue as to what their goals are).
- Investigate Details (the DC Varies widely based on your other relevant skills, and the intricacy of the details in question. Otherwise part of the Spot Action).

Stealth (Dexterity)

Your ability to move quietly, and remain unseen.

- Hide (if you are Unseen, you can become Hidden from any Creature that doesn't beat your roll at the end of your Turn, as long as no Creature detects you with a Precise Sense on their Turn).

Survival (Intelligence)

Your knowledge about the natural world, and how to navigate and manipulate it.

- Forage (the DC is equal to the resulting Item's Complexity, and increased or decreased according to abundance).
- Navigate (during Travel, the DC is usually 10 in fair weather, and increases in a Biome without known landmarks, or Line of Sight to the Sky).
- Track (this is Contested by the Tracked Creature's Stealth Check).
- See Arcana Skill, except with Primal Magic, Beasts, Fey, Humanoids, Plants, etc.

Thievery (Dexterity)

Your ability to manipulate objects with such precision and care as to let an Object hide in plain sight, avoid alerting Creatures to your presence, or setting off traps.

- Disarm Trap (the DC is equal to the Save DC, but needs Thieves' Tools).
- Pickpocket (the DC is contested by the Target's Wisdom Score, with a bonus or penalty depending if the item is Accessibly Stowed, or Worn).
- Juggle (the DC increases by 5 for each object being juggled, to a minimum of 5).
- Disguise a Spell (your roll becomes the DC to notice a Verbal or Somatic Component).
- Hide an Object (your roll becomes the DC to spot the Object).

You may find that some Skills aren't covered here, such as History, Investigation, or Computers. Feel free to add such as skills if it fits your campaign, or even remove any skills that you see as unimportant.

Progression

“When do we Level Up?” is a common phrase in many games, as Leveling Up is one of the greatest moments that can happen... unless it’s a JRPG with over 9,000 Levels. Then it’s kinda meh.

Overinflated progression aside, the main methods of Progression are Levels, Loot, and Strongholds.

Levels

While the Experience and Milestone methods are widely loved and hated by many, there are countless ways of establishing your ability to learn and grow from using Gold as XP, to Leveling after a certain number of Quests or Boss Fights.

Feel free to use your own method, borrow from another system, or use the included method as the standard. Just beware that Experience from other systems may require some adjustment to function properly.

M&M XP

You Level Up upon accumulating 10 XP.

If you are rolling a new Character to replace another of a higher Level, your new Character’s Level is reduced by 1d4 (or your choice) to give you a chance to learn the new build.

At the End of an Encounter, a Character gets 1 XP if they were Bloodied, reduced to a quarter of their health or less, expended at least Half of their Class Resources (Spell Slots count), Removed a Condition from another Creature, spent 30 Action Points or more, or for every Condition they had that had a notable impact during Combat.

You can also gain XP from completing quests, doing super cool stuff outside Combat (or during Combat is fine too), or treat the clearing of a Dungeon as the end of Combat.

As a rule of thumb, XP is rewarded most to Characters that have the greatest difficulty, but make a worthy effort to contribute. If there is butt clenching, heavy breathing, or sighs of relief, that is a good time to reward XP.

Of course, the GM is completely free to reward XP for other reasons such as when they feel a Character has grown in a significant way, after a big boss fight, for achieving a certain outcome during a Non-Combat Encounter, or even if they just want the Party to Level Up before an adventure.

Variants for M&M XP:

Critical Assessment

You gain 1 XP when you roll a Nat 1 to Attack, or on an Ability Check, and don’t re-roll.

Unlimited Power

You gain 1 XP whenever you finish any Combat, regardless of difficulty, or Succeed on a DC 10 flat d20 Test for 1 XP afterward.

Altered Threshold

The amount of XP needed to Level Up is doubled, halved, or otherwise adjusted by an amount as decided by the GM.

How to Level Up

1. Either roll your Hit Die (which always adds Constitution), or take the listed Average, and add it to your Hit Point Maximum, rerolling any 1s (or take a 1 at your own risk, if you choose).
2. Reference the Table below to determine your Proficiency Bonus and increase the Class Resource from your starting Class by 1.
3. Pick any Feats you gain at this new Level. You must qualify for a Feat in order to take it.

Every Level, you may take any Class Feat.

Every Even Level (2, 4, 6... etc.), you may take any Feat with the Utility Trait.

Every Odd Level excluding 1st (3, 5, 7... etc.), you may take any General Feat (when taking General Feats from ANY source, you can instead take Class, or Ancestry Feats as if they were General Feats).

Every 4 Levels starting at 1st (1, 5, 9... etc.), you may take any Ancestry Feat (this is also when your Proficiency Bonus increases).

You can also reference the Table on the other side of this page, if you need something more visual.

Beyond Level 20

Mages & Mansions is designed to go to Level 20 at the highest. Beyond 20th Level, any Combat the game has becomes a bit of a long slog. However, some people may actually enjoy this kind of thing.

If you're at Level 20 and would Level Up, you can take a General Feat, Extend the normal progression with the pre-established patterns, take a Boon*, or any combination of these benefits, as decided by your group.

All the other bonuses are easy enough, but Boons are particularly powerful Feats that are restricted to 20th Level for a reason. They might give you an immunity, grant a Permanent effect or unfathomable power.

**:Boons are not included in the Core Rulebook. Please search your other rulebooks, or make your own Boons. But they do make for good quest rewards.*

Loot

Some say: “a Warrior is only as good as his Weapon”, and that is partially true. Because while you usually have to rely on Items to enable certain Actions, Feats and Spells (particularly with the Weapon, Tool, Armor, or Item Traits), there are many play styles that can easily hold their own without any equipment. Even still, Rewards or Loot are very important for getting Players to do what you want.

Defeated Monsters can open the way to gain XP as stated previously, as well as any Items they were carrying as loot. So be careful when giving Monsters Magic Items that you don’t want your Players to have. Monsters can also be looted for certain body parts like blood and horns or teeth, which can be incredibly useful in Crafting. However, that’s a bit beyond scope of this book.

Lairs tend to have useful Items, Money, or Materials that can be collected. Some Lairs like Caves may have the Items on the ground, or require you to harvest the raw materials, while Dungeons and Mansions usually have them on monsters, in special containers such as Chests, Closets, or even a secret cubby. Just beware, as Traps often abound where plunder is ripe (again, traps are not in this book).

Quests also tend to provide Loot as a reward for completion, with greater rewards if you also complete any optional objectives. The Loot for quests can include anything from Items, Money and Services, to Allies, XP, or even Feats! If it’s worth receiving, it’s worthy of being a Quest reward.

However, Beware. Some Loot is Cursed or comes with a twist. And while many Cursed Items are powerful and worth taking for the benefits they provide, caution is strongly advised.

Speaking of which, just because an Item is Cursed doesn’t mean it should be purely a detriment to take, and should never be used as a mere “Gotcha!” mechanic. So, some better ideas are as follows:

- The Item simply won’t allow you unattune without Remove Curse. Otherwise, it works as expected.
- The Item tends to go off on its own, if not used correctly, or as intended.
- You are subjected to an effect that can be problematic, but helpful if utilized properly (Such as screaming when touching blood).
- The Item gives something to other Creatures like Buffs, or information.
- The Item has a significant detriment, but shows room for growth that may make the penalty worth the benefit over time.

On the note of Curses leading into Magic Items, you can only Attune to 3 Magic Items at a time, which you can do to any number of Items over the course of a Short or Long Rest. Should you be forced to attune to a 4th (assuming no increases to this limit), one of the previous Attunements is lost as long as it can be. If you cannot unattune to any Item, the forced attunement is blocked.

Back to the main topic, some Loot can even be a Magic Item in disguise. The most common form of this is the Dormant Magic Item (next page), which can serve as a placeholder when the GM is still working on it, or wants the Players to take a break first.

Dormant Magic Item

“Yes, some Magic Items can do that when they’re bored, particularly if you take them from those fickle Fey. But I assure you, mine are trustworthy enough to remain as they are.” - Borukan, the Smith

Rarity: Any

Base* Weight: 1 lbs

Cost:** Varies

Common: 50 GP

Uncommon: 500 GP

Rare: 5,000 GP

Very Rare: 50,000 GP

Legendary: 250,000 GP

Artifact: 5,000,000 GP

A Dormant Magic Item is detectible, but fleeting. Any meaning that can be grasped from examination is rendered useless as the details change after being determined.

A Dormant Magic Item may convert into any Non-consumable Magic Item of the same Rarity, at any point in time. Some examples are when it’s being held by a particular Creature, Identified, utilized, or given power.

A Dormant Magic Item will never convert if the GM isn’t ready to resolve the Item.

**: Base Weight refers to the Weight of the Item, if the Base Item hasn’t been decided.*

***: Cost for Magic Items is added to the base value of the Item they’re based on. If no such basis is listed, the value is considered to already add said value.*

To guide you along your journey, the following pages contain some Tables for Random or Improvised Loot. If the Loot isn’t from a Quest, a Feat may be replaced with a valuable Consumable Item, or instruction scroll to replace a Trainer. And in low-magic settings, try subtracting the Result from 14 before comparing, or if it lands on a forbidden result (e.g. 3 on 2d6 would be 11).

For Containers, you may want to roll 3 times or more.

And if it doesn’t make sense to add money to a randomly looted corpse, try replacing it with an equivalent value in other materials like herbs, food or gemstones.

Also as a reminder: don’t be afraid to roll on a higher Level Table for loot, as each table is mostly for determining what an equally Leveled Monster may provide or keep in their lair. Besides, it could be fun to give your Party a surprise Artifact.

And finally, don’t be afraid to use other methods, such as a treasure point system to allow Players to choose what loot they get. In fact, that could even make things easier on you. But these tables are here to help you come up with ideas on a whim.

Levels 1-4

Strongholds

Because who doesn't want to rule over their castle while they scheme against the BBEG... or become the new BBEG?

Sometimes the Party will obtain a deed to land, or a home, or just decide to build a secret lair in the middle of nowhere. Or even the sky! In this situation, it may be a good idea to reference Stronghold Rules.

If the Party only wants/needs a house or a hovel, treat a Long Rest there as Quality 2 (pg. 106), or Quality 1 if it's still in progress. Also, don't worry too much about Stronghold Events, or Stronghold Management if it's not important to the campaign.

Construction

When starting a Stronghold, the location will determine a few special properties that may benefit or hinder you.

Desert

- Approaching Enemies start Combat with 1d4-1 Levels of Exhaustion, unless adapted for warm environments.
- All Terrain is treated as Difficult.
- Facilities have a 2x multiplier to Cost.

Forest

- Structures take half Damage from Ranged Attacks.
- Approaching and Defending Creatures have Full Cover from Ranged Attacks.

Jungle

- Same as Forest.
- Approaching Enemies have their numbers reduced by 1d4 Groups.
- Structures have a 2x Multiplier to Construction Time.

Mountain

- Facilities have a 0.5x multiplier to Cost.
- Approaching Creatures without a Climbing or Flying Speed approach at Half Speed.
- effects that Push Creatures away from the Stronghold cause them to fall 10 feet for every 5 feet pushed, unless they have a Flying Speed.
- Hirelings have a 2x multiplier to cost.

Ocean

- Creatures that aren't aboard a Vessel, or can't breathe water are rendered helpless, and of no threat in combat.
- Structures have an additional 5,000 GP penalty to Cost, assuming you wish to allow Creatures that can't breathe water to live and build.
- At least one Party Member must be able to breathe water to build the first building, unless it's floating.

...

Plains

- Approaching Enemies cannot be Hidden.
- Buildings have a 0.5x Multiplier to Construction Time.
- Structures have a 2x Multiplier to Cost.

Sky

- Approaching Creatures must have a Fly Speed, or ride a Creature or Vehicle with a Fly Speed. Otherwise, they fall over 2,000 feet if not otherwise specified.
- Siege Weapons cannot reach this Stronghold.
- Creatures that don't have an innate Fly Speed suffer 1 point of Exhaustion.
- All Structures and Facilities have a 50x Multiplier to Cost and Construction Time.
- Requires access to 5th Tier Spells, and at least 1 Party Member must have a Flying Speed to construct anything.
- Hirelings have a 5x multiplier to cost.

Swamp

- All Terrain is Difficult Terrain.
- Structures have a 2x multiplier to either Cost, or Construction Time.

Tundra

- Approaching Enemies start Combat with 1d4-1 Levels of Exhaustion, unless adapted for cold environments.
- All Terrain is Difficult Terrain.
- Structures have a 2x multiplier to Construction Time.

Underground

- Approaching Enemies must use pre-existing tunnels, or dig their own.
- Structures are Free, but always require time.
- Structures have a 2x multiplier to Construction Time.
- Hirelings have a 5x multiplier to cost.

...

Space (Fun for Sci-Fi)

- Approaching Creatures must have access to space flight (either Magical Flight, or expending some kind of fuel), and are under the effects of Zero-Gravity (Astral Sea on pg. 99 is close, but not the exact same).
 - This might not apply when on a Moon or Asteroid, depending on Monsters and the mass of the foundation.
- Creatures that are outside of a Vehicle or Structure, as well as rooms with Bloodied or Destroyed walls are exposed to a Vacuum (pg. 87).
- All Structures must be made of Metal, and gain a 2x Multiplier to material cost and construction time, with a 10 GP penalty per room for life support and room pressurization.

Each Structure Size has a different Cost and Building Time, which is listed in a Table on the next page.

For each Day that passes, each available Hireling reduces the remaining Construction Time by a number of days equal to their Level. Or if using the Simplified Construction Time Variant, reduces the total GP cost by the same amount when Construction is initiated.

The Cost is expended in the form of the corresponding construction material. However, if it's not available, the Construction Time is extended by 1 day for every GP that is left unspent.

If the exact Size doesn't match perfectly, round up to the nearest category. Treat tall buildings as if each floor is either laid out adjacently, or stacked structures. Structures that exceed the largest Size are considered to be made up of multiple Structures that add up to the final Size.

And lastly, you can use the Rooms within an Unfinished Structure while it is under construction, provided it has reached the milestone for a lower Structure Size, using those statistics.

Structure Sizes

Floor Space	Cost	Construction Time	Capacity	Rooms
10' x 10'	10 GP	5 days	4	0
20' x 20'	50 GP	20 days	8	1
40' x 40'	150 GP	80 days	12	2
80' x 80'	650 GP	240 days	16	3
160' x 160'	2,500 GP	640 days	20	4
320' x 320'	10,000 GP	1,600 days	24	5
640' x 640'	41,000 GP	3,840 days	28	6
1,280' x 1280'	160,000 GP	8,960 days	32	7
2,560' x 2,560'	660,000 + GP	20,480 days	36	8

Variants for Strongholds:

Simplified Construction Time

A single Structure or Facility is completed after each Quest, provided they are funded.

Structure Damage

Sometimes whether through invasion or the passage of Time, Structures decay and degrade.

Each 10 ft. Wall, Roof or Floor segment is assumed to have about 50 Hit Points, and a Damage Threshold of 5.

A segment takes 1 day and 1 GP of materials to repair.

Capacity and Hirelings

A Structure's Capacity tells you how many Hirelings it can house, which is also required for Facilities.

An Unskilled Hireling costs about 50 GP to hire (which is assumed to handle everything you pay them), and is able to attend a Facility of your choosing. All Hirelings use the Stat Block for their Race as listed on pg. 562, combined with the corresponding Hireling Stat Block, such as the one on pg. 586.

A Skilled Hireling can be promoted from Unskilled for 500 GP. They can use any Facility as if they are Proficient in the required Skill or Tool, counting as two Unskilled Hirelings if there are no Skill or Tool Requirements.

A Master Hireling can be promoted from a Skilled Hireling for 5,000 GP. They can use any Facility as if they have Expertise in the required Skill or Tool, counting as two Proficient Creatures if there are no benefits for Expertise, or four Unskilled if there are no benefits for Proficiency.

Guards are Special Hirelings that defend your Stronghold, and keep the peace. A Guard can be hired for 50 GP (includes all expenses), and can either be posted at a Structure or left to protect the Stronghold (See Defense). The Stat Blocks for Guards and the other NPCs are located on pg. 575.

Skilled Guards can be promoted from Guards for 500 GP.

Elite Guards can be promoted from Skilled Guards for 5,000 GP.

Master Guards can be promoted from Elite Guards for 50,000 GP.

Legendary Guards can be promoted from Master Guards for 500,000 GP.

A Mage, Thief, Druid, Priest, or other similar Creature can be hired to be a Guard, using the same rates, and mechanics. Spellcasting Classes can utilize various Facilities or Spells corresponding to their Spell List.

Some Hirelings might not need to be hired, such as when you rescue someone who willingly works for you, or collect them as “unpaid interns”. Just beware of potential revolt.

When adding a facility, you must have 1 Room to spare, according to the Size of structure you’ve built. Facilities must be part of a Structure to benefit from Hirelings, which cannot exceed its Capacity. Assigned Hirelings also cannot contribute to Construction Time.

And while the room count seems to be low for larger Structures, the extras are reserved for other purposes, like housing Creatures, or storing supplies.

Any Ruler effect that states Guard applies to any NPC that is dedicated to protecting the Stronghold, unless the effect states otherwise.

Benefits

A Stronghold can provide various Benefits, such as a place to Earn Gold, Craft Items, Rest, or Prepare for your next Adventure.

Resting at a Stronghold is considered to have a base Quality of 2, unless incomplete, or otherwise stated.

You can use City Crawling Rules to help with management, but it is recommended to set the duration of each Round to last an Hour, Day, Week, Month, or even Year, depending on what the Party is doing in the meantime.

Every Day the Party spends in their Stronghold adds 1 Ruler Point as a Party-wide resource. They also gain Ruler Points equal to the highest PC Level whenever they defeat a Legendary Monster, or the total number of Levels when defeating a Boss Monster.

While in their Stronghold, the Party can do any of the following:

- **1 Ruler Point:** Gain SP equal to your Level.
- **1 Ruler Point:** Add one of your Guards to Combat with 10 Actions.
- **1 Ruler Point:** Speed up the Construction of a Structure or Facility by 1 Day.
- **5 Ruler Points:** Up to 5 Guards make Ranged Attacks as a group roll using one Weapon or Cantrip they know against an equal number of enemies.
- **10 Ruler Points:** Re-roll one d20 while conversing with a noble (can be used outside your Stronghold), or any citizen from your Stronghold.
- **20 Ruler Points:** Prevent the immediate penalties of not completing a particular Quest or Event. You don’t gain any rewards when finishing a Quest in this way.
- **100 Ruler Points:** Resurrect one Dead Character with Exhaustion 10, 1 Hit Point, and 0 Hit Dice, provided their body is retrievable by a Creature in the Stronghold.

Facilities may also grant other things you may use Ruler Points on, or grant you additional Ruler Points for specific Activities or under specific Conditions.

Defense

Now what good is a Stronghold if you can sit in it all day and night, without worrying about the Dragon you bugged last week?

Occasionally, your Stronghold may be put under siege, or raided. In this circumstance, you are notified, and usually have 30 days to interfere, though the hint may be less obvious, depending on how covert the raiders are in their efforts. So pay attention to the GM.

If you don't manage to stop it, your Stronghold becomes a Dungeon that is occupied by the attackers. Up to half of your Hirelings, Guards and NPCs might have been captured, with more or less depending on whether the Attackers were merciful, or taking no prisoners.

If your Stronghold is particularly undefended, you order them to surrender, or it gets taken down from the inside (e.g. a rebellion), you might not get a chance to protect it. However, this possibility should be established by the GM in advance to avoid it feeling unfair.

Otherwise, the GM rolls on the Random Invasion Table once after a Quest (maybe with a chance to occur). And much like the Random Encounter Table on pg. 99, this is just a Sample, and should be customized to fit your game.

Random Invasion Table

2d6	Result
2	Undead
3	Druids & Plants
4	Dragons
5	Beasts
6	Goblins/Orcs
7	Bandits
8	Spellcasters
9	Nearby Army/BBEG
10	Fiends
11	Stray Constructs
12	Elementals

Each Invasion comes with a number of Groups depending on what the GM feels would be threatening to your Stronghold. Though a particularly weak invasion may be deterred by hired Guards.

Each Group carries a number of Monsters depending on circumstances around the invasion such as the Monsters, how well they work together (or are forced to), and what the GM feels would be appropriate, typically rounded to the nearest 5.

Example: a Low-Level Invasion might consist of 4 Groups with 10 Goblins Each, and 1 Group of 2 Trolls, while a Mid-Level Invasion might have a single Adult Dragon, and a High-Level Invasion might have 10 Groups of 10,000 Orcs (good luck with that Combat though).

An Invasion shouldn't just be a great big combat, unless there's fewer than 10 Monsters (or you're handling swarms accordingly), and your Party is reasonably equipped to handle them. Otherwise, it's recommended to break it up into a collection of "tasks" that demoralize the enemy, or otherwise ruin the Invasion's chance of Success.

Extra Content

Now that the Gameplay is established, we can finally add Extra Content. This Extra Content is available in most games, though you should communicate with your GM in case of Campaign-specific restrictions.

Feats

These Feats are made for walking, and that's just what they'll do. One of these days, these Feats are gonna walk you through that tomb.

Feats that don't have any requirements or Feats that can be taken by anyone (Generic) are listed first, then subsequent ones are listed in groups, depending on where you get them from.

Be Warned: Some Feats can stack infinitely, but may be countered very easily (e.g. High AC).

A Word on Traits

Most Traits in Mages & Mansions are used as a reference by other Actions or Feats, or as a guide to help Players and GMs alike to find the most fitting Actions and abilities.

Any Actions that apply the benefits of another Feat, share the Traits of that Feat, except for excluded Traits.

This extends to Weapons, Class Resources, Items, Lair Actions, and any other interaction. Though you may forego the benefits of a Feat at your discretion.

Ancestry

Ancestry Feats are dependant on your Ancestry, and can be quite powerful in the right situation. But best of all: they can be part of what makes your Character unique!

Adapted

Traits: Edge, Advantage, Choice, Resistance, Rest, Travel, Tremorsense

Pick an environment and gain the corresponding bonuses:

- **Tundra/Mountain/Arctic:** You gain Cold Resistance equal to your Proficiency Bonus.
- **Desert/Volcano:** You gain Fire Resistance equal to your Proficiency Bonus.
- **Swamp/Jungle:** You gain Poison Resistance equal to your Proficiency Bonus.
- **Forest/Plains:** You have Advantage on all Stealth or Survival Checks.
- **Cave/Underdark:** You gain Tremorsense (Imprecise) up to 30 feet.

In addition to these bonuses, you cannot become Lost in this environment, you ignore Terrain and environmental penalties caused by this environment, and improve the Quality of all Long Rests in this environment by 1, even if you don't qualify.

Hasty

Traits: Edge, Improvement, Movement

Whenever you take the Move Action, you can move up to 5 additional feet in the same Action.

You can take this Feat any number of times, increasing the maximum distance. However, you cannot move further than your Movement Speed in one Move Action.

Reminder: Difficult Terrain costs 10 feet to enter, instead of 5.

Magically Gifted

Traits: Edge, Magical, Recharge, Spellcasting

Choose one Cantrip from any Spell List. It is always Prepared for you, and you can cast it once at its lowest Tier without any Spell Slots, using Intelligence, Wisdom or Charisma (your choice) for the Saving Throw and Attack Bonus.

After casting any Spell in this way, you must get a 6 on a d6 at the Start of your Turn before you can cast any of them again, or finish Combat.

You can take this Feat any number of Times. Picking a new Spell from the same list. When gaining additional Spells, you can take another Spell of a Tier you've already taken, or a Spell of the next Tier up. If any such Spell is of a Tier that is higher than your Level, you must make the Ability Check as if you had Spellcasting.

You can also take a Cantrip from a different Spell List, tracking progression separately. However, the Recharge remains the same for all Spells gained in this way.

Natural Climber

Traits: Edge, Climbing, Movement

You gain a Climbing Speed equal to your Walking Speed, or increase it by the same amount.

Natural Swimmer

Traits: Edge, Movement, Swimming

You gain a Swim Speed equal to your walking Speed, or increase it by the same amount.

Powerful Build

Traits: Utility, Encumbrance

You treat your Carrying Capacity as if you were one Size larger.

This counts for Weapon Sizes, and Grappling other Creatures, except for the penalties for being Larger or Smaller in this way.

Recharging

Traits: Edge, Improvement

Whenever you roll a d6 (or other die) to regain the use of a Recharge Feature or Action, the range expands by one (e.g. 6 -> 5-6 -> 4-6, etc.).

You can take this Feat any number of times, expanding the range further, until it becomes a 1/Round. Taking this Feat additional times after that increases the amount of times you can use Recharge Actions each Round.

Strange Upbringing

Traits: Edge, Feats

Restriction: You can only take this during Character Creation.

You gain the Ancestral Abilities from one other Ancestry.

You also gain access to the corresponding Ancestry Feats, provided they aren't restricted to any Level higher than 1st.

If you manage to take this Feat multiple times, you pick an additional Ancestry.

Beastfolk

Heritage: Avian

Traits: Edge, Flight

Prerequisite: Beastfolk

Restriction: can only be taken during Character Creation

Your Base HP from your Ancestry is reduced by 2, your Walking Speed is reduced by 5 feet, and you gain a Flying Speed equal to double your walking Speed.

Your Beastfolk Language is Avian.

Your Natural Weapon is a Beak (Piercing) or Claw (Slashing).

GM Note: Flying Speed can be irritating, but it isn't always problematic.

If you really need to balance flight, use canopies, roofs, water, and other spaces that force flying Creatures to engage from within Range or through Cover (assuming they want to fight).

Also, don't forget that maintained Flight requires 1 Move Action each Turn.

Avian: Gusty Flap

Traits: Burn, Push, Saving Throw, Wind

5 Actions:

All Creatures within a 15 ft. Cone must make a Strength Saving Throw against your Strength Score:

- **Critical Failure:** Same as Failure, but they also take 1d6 Bludgeoning as Fall Damage if they encounter an Object or Creature.
- **Failure:** They are Pushed to the end of the Cone and knocked Prone. Colliding Creatures are pushed out of the way.
- **Success:** They are only pushed 5 feet, and don't push Creatures out of the way.
- **Critical Success:** No effect.

The area is immediately subjected to Strong Wind.

Avian: Mimicry

Traits: Utility, Audible

Whenever you attempt to replicate any sound or voice, you may do so without a Check.

A Creature that wishes to discern the sound may attempt a Society check (or another Skill if applicable) against your Charisma Score.

Avian: Storm Coat

Traits: Edge, Resistance

You gain Resistance to Lightning Damage equal to your Level.

Additionally, you can treat Water as Wind and vice versa for Flying, and Actions with the Water and Wind Traits.

Heritage: Bovarian

Traits: Edge, Size

Prerequisite: Beastfolk

Restriction: Can only be taken during Character Creation.

Your Size is increased by 1 category. Your Base Health is also increased by 4.

Your Natural Weapon is a Horn (Piercing) or Kick (Bludgeoning).

Your Beastfolk Language is Bovarian.

Bovarian: Beast of Burden

Traits: Utility, Exhaustion, Nullify

Any Exhaustion you gain from Encumbrance is reduced by your Proficiency Bonus.

Bovarian: Charge and Gore

Traits: Burn, Move, Push

Free Action:

Trigger: You take an Action with the Move Trait, or you are Pushed into or through another Creature.

Make an Attack with your Horn, expending Actions to do so.

If this Attack Hits, you can Push all Targets an equal distance to the Triggering Move or Push Action. And on a Crit, the target takes Fall Damage based on the Distance Pushed (this Damage isn't doubled).

Bovarian: Imposing Stature

Traits: Utility, Advantage

You have Advantage on Intimidation or Persuasion checks against Creatures that are Smaller than you.

Heritage: Feline

Traits: Edge, Climbing, Darkvision

Prerequisite: Beastfolk

Restriction: Can only be taken during Character Creation.

You gain 30 feet of Darkvision, and a Climbing Speed equal to half your Walking Speed.

Your Beastfolk Language is Feline.

Your Natural Weapon is a Bite (Piercing) or Claw (Slashing) Attack.

You gain access to the Feline Feats.

Feline: Graceful Landing

Traits: Utility, Falling, Nullify

You take half Damage from falling.

Feline: Pad Along

Traits: Utility, Sense

Creatures with Tremorsense treat it as an Imprecise sense against you if it was Precise, or as if it didn't exist if it's already Imprecise.

Feline: Pounce

Traits: Edge, Jump, Move

Free Action:

Trigger: You take the Dash Action

You immediately Move a distance equal to your Movement Speed for free. This Movement can be any combination of horizontal or vertical.

Heritage: Leporine

Traits: Edge, Hearing, Jump

Prerequisite: Beastfolk

Restriction: Can only be taken during Character Creation.

You gain Precise Hearing up to 30 feet, and your jump distance is doubled.

Your Beastfolk Language is Leoprine.

Your Natural Weapon is a Kick (Bludgeoning).

Leporine: Burrower

Traits: Edge, Burrow

You gain a Burrowing Speed of 10 feet.

Leporine: Disjoint

Traits: Burn, Ability Check, Deception, Disadvantage, Move

2 Actions:

Trigger: You take the Dash Action.

Make a Deception Check. Until the start of your next Turn, any Creature with a lower Wisdom Score than this Check has Disadvantage on Attack Rolls against you, and you have Advantage on Saving Throws against them.

Leporine: Fleet Footed

Traits: Burn, Move, Reaction, Special

3 Reactions:

Trigger: You are subjected to a Dexterity Saving Throw.

You immediately take any Action with the Move Trait. If you end this Action outside of the Range or Area of the Triggering Saving Throw, you Critically Succeed the Triggering Save.

Special: If you have Evasion, you lose this Action, but Evasion no longer costs Cunning, and it treats Critical Failures as Failures.

Heritage: Lizradine

Traits: Edge, Advantage, Constitution

Prerequisite: Beastfolk

Restriction: Can only be taken during Character Creation.

You have Advantage on Constitution Saving Throws, and your Movement Speed is reduced by 5 feet.

You speak Lizard (or Draconic if appropriate).

Your Natural Weapon is a Claw (Slashing), Bite (Piercing) or Tail (Bludgeoning).

Lizradine: Crushing Jaws

Traits: Edge, Grapple, Improvement

Free Action:

Trigger: You Hit with a Bite Attack

You attempt to Overpower the Target for free.

If you Grapple a Creature this way, the escape DC is increased by 5.

Lizradine: Drop Tail

Traits: Burn, Limb, Move, Nullify, Step

Free Action:

Trigger: You are Hit by an Attack, or at any time while you're Grappled or Restrained.

Requirement: You must have a Tail.

You Step once for free, ending the Grappled and Restrained Conditions, or forcing the Triggering Attack to Miss.

Once you lose your Tail, it takes 1 month to grow back, and you cannot Attack with it during this time. Magical Healing that restores limbs, also restores the Tail.

Lizradine: Tough Hide

Traits: Edge, Resistance

You gain Physical Resistance equal to your Proficiency Bonus.

Heritage: Lupine

Traits: Edge, Scent

Prerequisite: Beastfolk

Restriction: Can only be taken during Character Creation.

You gain Precise Scent up to 30 feet.

You speak Lupine.

Your Natural Weapon is a Claw (Slashing) or Bite (Piercing) attack.

Lupine: Howl

Traits: Burn, Audible, Frightened, Saving Throw

5 Actions:

All Hostile Creatures that can hear you must make a Charisma Saving Throw against your Charisma Score:

- **Critical Failure:** Same as Failure, but the Frightened Condition equals your Proficiency Bonus.
- **Failure:** They become Frightened 1.
- **Success:** They become Immune to this effect for the next Hour.

Lupine: Natural Tracker

Traits: Utility, Advantage, Perception, Tracking

When you track a Creature, you can always use Perception instead of Survival. Additionally, you have Advantage on Stealth Checks against a Creature you are Tracking in this way.

Lupine: Pack Tactics

Traits: Edge, Advantage

When you Attack a Creature that is within an Ally's Reach, you make the Attack at Advantage.

Heritage: Pescarian

Traits: Edge, Breathing, Swim

Prerequisite: Beastfolk

Restriction: Can only be taken during Character Creation.

You gain a Swim Speed equal to your Walking Speed.

You can also breathe water, which you must do at least once every Hour, or begin suffocating.

You speak Pescarian.

Your Natural Weapon is a Bite (Piercing), or Tail (Bludgeoning) attack.

Pescarian: Amphibian

Traits: Utility, Breathing

You can breathe both Water and Air, provided you remain in a humid environment (such as a Swamp or Rainforest), or you cover yourself with water once every 12 Hours (or 6 in a dry environment).

Pescarian: Slippery

Traits: Edge, Advantage

You have Advantage on Saving Throws to avoid or break free of a Grapple, or the Restrained condition.

Pescarian: Streamlined

Traits: Edge, Grappling, Movement, Swim

You suffer no Movement Penalties while moving Underwater, including dragging other Creatures (Via Grappling).

Heritage: Serpentine

Traits: Edge, Blindsight, Immunity

Prerequisite: Beastfolk, can only be taken during Character Creation.

You are Immune to the Prone Condition, and you gain Blindsight up to 10 feet.

You speak Serpentine (or Draconic if appropriate).

Your Natural Weapon is a Bite (Piercing) or Tail (Bludgeoning) attack.

Serpentine: Constrict

Traits: Edge, Concentration, Grapple, Restrained

3 Actions:

Restriction: The Target must be Grappled by you.

As long as you are Concentrating and Grappling, the Grappled Target is Restrained, and all Tail Attacks you make automatically Hit the Target, though they cannot Crit, or Target any other Creature.

The Target also has Full Cover from all Creatures other than you, and Attacks that Miss them by 5 or less Hit you instead.

Serpentine: Rattle

Traits: Utility, Instrument, Intimidation

You can use your tail as an Instrument you are Proficient in.

If you use your Rattle as part of any Action that inflicts the Frightened Condition, you inflict 1 more.

Serpentine: Venomous Bite

Traits: Burn, Breather, Damage, Improvement, Persistent Poison

When you hit with a Bite attack, you can also choose to inflict Persistent Poison Damage equal to your Proficiency Bonus.

Once you do so, you must finish a Breather before doing this again.

Bestial Connection

Traits: Utility, Communication

You can communicate with any Beast that corresponds with your Heritage, as if you shared a Language (e.g. a Feline Beastfolk could speak with a Cat, Panther, Lion, or any other Creature that is considered a feline).

Improved Natural Weapon

Traits: Edge, Improvement

The Category of Damage Dice for your Natural Weapons are increased by 1.

Instinct of Predator and Prey

Traits: Blast, Frightened, Initiative

When Combat starts, you can choose to become Frightened 2 of the nearest Hostile Creature, and reroll Initiative, even if you were Surprised.

The Frightened Condition lasts until the End of your next Turn, and cannot prevent you from Moving away from the Creature you are Frightened of.

Feed

Traits: Edge, Improvement, Temporary Healing, Special

Prerequisite: Bite Weapon

Your Bite Attack can now also be used as a 1d6 Weapon that costs 3 Actions without the Light Trait.

When you Hit a Creature with your Bite Attack, you also gain Temporary Hit Points equal to your Level.

If the Target wasn't a Construct or Elemental, this fulfills the Food requirement for a Full Rest with a base Quality equal to the Target's Proficiency Bonus.

Special: If you are a Vampire, the Bite Attacks are merged into one.

Firm Loyalty

Traits: Edge

Prerequisite: 5th Level

Restriction: Exclusive with other 5th Level Ancestry Feats.

When you are forced to Attack a Creature, you may choose to become Stunned 1 instead.

Assuring Presence

Traits: Edge, Improvement

Prerequisite: Firm Loyalty

As long as your Allies can detect you, they cannot be forced to Attack you.

Eternal Loyalty

Traits: Edge, Advantage

Prerequisite: Firm Loyalty

You and your Allies can always recognize each-other, even when disguised.

Additionally, you have Advantage on all Saving Throws while an ally you can detect is Dying, or within 5 feet of you.

Dragonborn

Heritage: Kobold

Traits: Edge, Darkvision, Resistance, Size, Special

Prerequisite: Dragonborn

Restriction: Can only be taken during Character Creation

Your Size is reduced by 1 Category.

Your Base HP is reduced by 2, and the Resistance gained from Draconic Ancestry is replaced with Acid, Cold, Fire, Lightning and Poison Resistance equal to your Proficiency Bonus.

You also gain 60 feet of Darkvision, but are considered Blinded in Bright Light (Bright Light Sensitivity).

Special: If you take Prismatic Scales, you must choose a color that doesn't provide one of the aforementioned Damage Types.

Immediately take an additional Ancestry Feat.

Note: Draconic Ancestry still determines your Breath Weapon.

Kobold: Cave Dweller

Traits: Edge, Climbing, Movement

You have a Climbing Speed equal to your Walking Speed.

You can also squeeze through spaces that are up to two Sizes smaller than you without treating it as Difficult Terrain, or requiring an Acrobatics check.

Kobold: Pack Tactics

Traits: Edge, Advantage

When you Attack a Creature that is within an Ally's Reach, you make the attack at Advantage.

Kobold: Trap Master

Traits: Edge, Advantage, Disadvantage

You have Advantage on Saving Throws against Traps, and they have Disadvantage to hit you. You also take half Damage from all traps, rounded down.

Finally, you can set a Trap as if you had a Basic Trap Kit, even if you don't have one.

Kobold: Venomous Stinger

Traits: Edge, Natural Weapon, Piercing, Persistent Poison

You gain a Light Natural Weapon (Stinger) that deals 1d4 Piercing, and Persistent Poison equal to your Constitution Modifier (Minimum of 1) on a Hit.

Dragon Wings

Traits: Edge, Flight, Movement

You have a Flying Speed equal to twice your Walking Speed

Dragon's Breath

Traits: Burn, Damage, Recharge, Saving Throw

5 Actions:

Special: Recharges on a 6 (d6) at the start of your Turn.

Exhale a breath Weapon using the Breath Shape and Damage Type of your Ancestry. Targets must make a Constitution (Cold, Force, Poison, Radiant) or Dexterity (Acid, Fire, Lightning, Piercing) Saving Throw against your Constitution Score.

- **Critical Failure:** Double Damage.
- **Failure:** 2d6 of the corresponding type.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

Elemental Claws

Traits: Edge, Damage, Improvement

Your Claw Attacks inflict 1 Persistent Damage corresponding to your Draconic Ancestry.

You can take this Feat multiple times, increasing the Persistent Damage by 1.

Prismatic Scales

Traits: Edge, Improvement, Resistance

Pick another option from the Draconic Ancestry List. You gain the Resistance for that Heritage in addition to your current Resistance.

Improved Dragon's Breath

Traits: Edge, Damage, Improvement

Prerequisite: 5th Level, Dragon's Breath

Restriction: Exclusive with other 5th Level Ancestry Feats.

Your Dragon's Breath deals an additional die of Damage.

You can take this Feat any number of times.

Expanded Breath

Traits: Edge, Area of effect, Improvement

Prerequisite: Dragon's Breath

The Area of Dragon's Breath is doubled, including modifiers.

Dwarf

Armored Stoutness

Traits: Utility, Advantage, Armor, Encumbrance

While wearing Medium or Heavy Armor, you double your Carrying Capacity (applies to the Encumbered Condition), and you have Advantage on Strength Checks and Saving Throws.

Clan Crafter

Traits: Utility, Choice, Crafting, Enchantment, Proficiency

You gain Proficiency in one set of Artisan's Tools of your choice, and when you Craft an Item, you can apply one Common Enchantment you know at no extra cost.

Learn a Common Enchantment of your choice as part of this.

Miner's Sight

Traits: Utility, Darkvision, Perception

You gain Darkvision out to 60 feet. You also recognize any minerals you see without an Ability Check, even if they would ordinarily be camouflaged or subtle (such as Iron in Sandstone).

Mountain's Compass

Traits: Utility, Navigation

While you are underground, you always know which path leads you towards an exit, or notable destination without an Ability Check, and never become lost if you weren't already, except by Magical means.

Stoic Demeanor

Traits: Edge, Nullify

If you are Frightened at the End of your Turn, reduce the Frightened condition by 1.

Juggernaut

Traits: Edge, Armor, Nullify

Prerequisite: 5th Level

Restriction: Exclusive with other 5th Level Ancestry Feats.

You gain Proficiency with Heavy Armor, and ignore all Strength Requirements for Armor. Additionally, Heavy Armor cannot impose Disadvantage on your Acrobatics checks.

Immobile

Traits: Edge, Armor, Immunity

Prerequisite: Juggernaut

You are Immune to all effects with the Push Trait while wearing Medium or Heavy Armor, unless you choose otherwise.

This doesn't prevent you from being picked up, Grappled, or Teleported.

Unstoppable

Traits: Edge, Armor, Bludgeoning, Damage

Prerequisite: 5th Level

Restriction: Exclusive with other 5th Level Ancestry Feats.

Whenever you take Damage that is reduced by your Armor, your Attacker takes Bludgeoning Damage equal to the amount Resisted.

Dwarven Resilience

Traits: Edge, Improvement, Resistance

Prerequisite: Unstoppable

You also add your Proficiency Bonus to your armor's Damage Resistance.

Elf

Elven Agility

Traits: Edge, Move

Whenever you take the Move Action, you can Move 20 feet instead of 10, spending extra Movement as needed.

This stacks with the Hasty Feat.

Eternal Perfection

Traits: Utility, Ability Check

When you attempt an Ability Check while taking a Short Rest, you can take a 20 instead of a 10. However, this doesn't add the +10 bonus from rolling a Natural 20.

Immortal Perspective

Traits: Edge, Advantage, Charisma

You have Advantage on Charisma Saving Throws against Emotion effects, and all Charisma Checks have Disadvantage against you.

Timeless

Traits: Utility, Age, Immunity

You are Immune to all effects that affect your age unless you are willing, and cannot die of old age unless you decide otherwise.

Recursive Memories

Traits: Edge, Feat

Prerequisite: 5th Level

Restriction: Exclusive with other 5th Level Feats.

You gain any Class or Subclass Feat regardless of your chosen Class or Subclasses, provided the Feat has no Prerequisites that you do not meet.

If a Feat requires a Signature Ability or Class Resource you do not have (e.g. Cleric's Improved Smite), you can use the needed Ability or Resource once per Short Rest as part of the Feat.

Ancient Heritage

Traits: Edge, Feat, Resource

Prerequisite: Recursive Memories

You can use Class Resources from your starting Class for Feats gained from Recursive Memories, as if they were the same Resource (e.g. if your starting Class was Fighter and you had Bardic Inspiration from Recursive Memories, you could use Technique as Bardic Inspiration).

Note: You can't use Bardic Inspiration to replace your Class Resources from your starting Class in this way. Trust us, it's for your own good.

You also gain the ability to use all Signature Feats and Abilities granted by the Class for Recursive Memories.

Trance

Traits: Edge, Rest

Prerequisite: Recursive Memories

When you take a Long Rest, you can meditate to recall a new memory, replacing the Feat granted by Recursive Memories, provided it is within the same Class or Subclass.

Additionally, you don't suffer Exhaustion from failing to take a Long Rest, as long as you take a Short Rest to meditate.

Gnome

Fey Awareness

Traits: Edge, Advantage, Intelligence, Wisdom

You have Advantage on Intelligence and Wisdom Saving Throws against Magical effects.

Magical Intuition

Traits: Utility, Detection, Magical

When you ask, the GM tells you if there is a Magical Item or effect within 120 feet of you, as well as a vague direction. This sense is obstructed by walls, but spreads around corners.

If you can see Magic, you can use this Feat as if you were at a point you can see.

Overcomplicate

Traits: Edge, Intelligence

When you make an Intelligence Check or Saving Throw, you can reroll the d20 once, but must take the new result.

If you do so, the degree of Success is 1 higher, but the effect is delayed until the start of your next Turn.

Poof

Traits: Edge, Final, Teleport

1 Action:

You disappear until the Start of your next Turn, and don't occupy the space until then. End your Turn.

At the Start of your next Turn, you reappear up to 5 feet away from your initial location.

Unpredictable

Traits: Edge, Advantage

You have Advantage on all Saving Throws from Reactions, and all Attack Rolls from Reactions have Disadvantage against you.

Vanish

Traits: Edge, Invisibility, Surprised

When you are Surprised (either on Rolling Initiative, or if narratively appropriate), you become Invisible until you take any Action other than the Move or Interact Actions.

Chaotic Control

Traits: Edge, Improvement

Prerequisite: 5th Level

Restriction: Exclusive with other 5th level Ancestry Feats

When you roll to pick a random result, such as with the Wild Magic, Random Loot, or Random Encounter Tables, you can roll twice instead of once, and pick between both results.

Unshackled

Traits: Burn, Actions, Multi-Attack

Prerequisite: 5th Level

Restriction: Exclusive with other 5th Level Ancestry Feats

You can take any Action that would exceed the Multi-Attack Limit. When you do so, the Action Cost is increased by 1 + the number of times Unshackled was used by you this Turn.

Goblin

Malicious

Traits: Edge, Damage

Whenever you Hit a Creature with an Attack Roll, you gain a +1 bonus to all Damage Rolls for Weapon and Spell Attacks until the end of your Turn.

This Bonus stacks with itself.

Iron Stomach

Traits: Edge

Being Poisoned no longer prevents you from regaining Hit Points.

Smelly

Traits: Edge, Poisoned, Saving Throw, Scent

Creatures that Start their Turn within 5 feet of you must make a Constitution Saving Throw against your Constitution Score:

- **Failure:** They become Poisoned until they leave the area.
- **Success:** They are Immune to this ability from all sources for the next Hour.

Note: This doesn't affect Anosmiated Creatures, nor can you use it if you are Masked.

Trickery

Traits: Edge, Step

When a Creature loses Line Of Sight to you, you may Step once for free.

Diminutive Wrath

Traits: Edge, Damage, Size

Prerequisite: 5th Level

Restriction: Exclusive with other 5th Level Ancestry Feats

Damage from the first Attack you make each Turn is doubled against Creatures that are at least one Size Category larger than you.

Skuttler

Traits: Edge, Disadvantage, Size

Prerequisite: 5th Level

Restriction: Exclusive with other 5th Level Ancestry Feats

All Creatures that are at least 1 Size Larger than you have Disadvantage on Attack Rolls against you.

Halfling

Cheerful Outlook

Traits: Edge, Advantage, Charmed, Frightened

You have Advantage on Saving Throws against being Charmed or Frightened.

Easy to Miss

Traits: Utility, Stealth

You can attempt to Hide even if you aren't Obscured. If you do, you take a -5 penalty to the result.

You still cannot Hide while being observed, unless the observing Creatures are distracted (e.g. if they're more concerned about your allies).

Also, ending your Turn in Line of Sight no longer ends the Hidden Condition automatically. Instead, it applies the penalty.

Just Like Home

Traits: Utility, Resting

When you and your Party gains the benefits of a Full Rest, the Quality is increased by 1.

This Benefit only stacks when you rest in a fully furnished and stocked Structure.

Nimble Footing

Traits: Edge, Advantage, Dexterity, Grappled, Prone

You have Advantage on Dexterity Checks and Saving Throws to avoid being Grappled, Pushed, or knocked Prone.

Social Butterfly

Traits: Utility, Downtime

Whenever you engage in a Downtime Activity, you can perform two unique activities at the same time.

Contagious Luck

Traits: Edge, Improvement

Prerequisite: 5th Level

Restriction: Exclusive with other 5th Level Ancestry Feats.

Creatures of your choice within 30 feet of you also benefit from your Lucky Ability, but only once per Turn.

By a Hair

Traits: Blast, Auto Crit, Improvement

Prerequisite: Contagious Luck

When you, or a Creature within Range of your Contagious Luck fails a Saving Throw, you can force them to Critically Succeed instead.

Once you use this, the Target cannot benefit from Contagious Luck, or Lucky until they finish a Short or Long Rest.

"I Meant to do That"

Traits: Edge

Prerequisite: Contagious Luck

When you Miss with an Attack Roll, you can re-attempt it against another Creature within Range once.

You cannot use this if you cannot benefit from Lucky.

Human

Inspiring Resolve

Traits: Edge, Advantage, Buff, Visual

Whenever you Critically Succeed on a Saving Throw, all Creatures of your Choice that can see you gain Advantage on the Triggering Saving Throw, or the next one they make, if they weren't included in the Triggering Saving Throw.

Man of Many Talents

Traits: Edge, Feat

You immediately gain the Archetype Feat, which can grant an Archetype you don't qualify for.

Prodigy

Traits: Utility, Proficiency

You gain proficiency with up to 3 Weapons, Skills, Tools, or Languages of your choice.

What Doesn't Kill You...

Traits: Edge, Ability Score, Improvement

Whenever you Roll a Death Saving Throw, and gain a 3rd Success, the next time you take a Long Rest, you gain a permanent +1 to any Ability Score of your choice.

This Doesn't work if you are restored to 1 Hit Point, or the Triggering Success was automatic.

Evasive Defiance

Traits: Burn, Debuff, Improvement

Prerequisite: 5th Level, Exclusive with other 5th Level Ancestry Feats

Free Action:

Trigger: When you are Targeted by an Attack Roll or Ability Check.

You apply Defy Destiny to the Triggering Roll.

"I'm a Professional"

Traits: Edge, Improvement

Prerequisite: 5th Level, Exclusive with other 5th Level Ancestry Feats.

When you use Defy Destiny, you can add the relevant Ability Score Modifier to the roll, provided it's positive.

Calculated Risk

Traits: Edge, Improvement

Prerequisite: "I'm a Professional"

When you use Defy Destiny on a d20 Test you are Proficient in, you can use your Proficiency Bonus instead of the relevant Ability Score Modifier. Whichever is higher.

Defy Death

Traits: Burn, Healing, Improvement

Prerequisite: Evasive Defiance

When you, or a Creature that can see you is reduced to 0 Hit Points, you can expend Defy Destiny to bring them back at 1 HP.

Inspiring Defiance

Traits: Burn, Buff, Improvement, Visual

Prerequisite: Evasive Defiance

When Defy Destiny causes you to Succeed or an Enemy to Fail a d20 Test, all friendly Creatures that can see you may take one Action they have that costs 5 Action Points or less as a Free Action.

"Never Tell me the Odds"

Traits: Burn, Advantage, Breather, Improvement

Prerequisite: "I'm a Professional"

When you use Defy Destiny, you can roll at Advantage. If you do, you cannot do so again until you take a Long Rest, Short Rest, or Breather.

Orc

Brute

Traits: Edge, Advantage, Grapple

You have Advantage on Athletics Checks to start or maintain a Grapple. This has no effect on the DC to escape your Grapple.

Enduring Resolve

Traits: Edge

The first time you take Damage each Turn, you only take half (Rounded down, before Resistance).

Heat of Battle

Traits: Edge, Actions, Bloodied

While Bloodied, your Action Recovery increases by your Proficiency Bonus.

Pain Tolerance

Traits: Edge, Persistent Damage

When you take Damage from Persistent Damage, you reduce the amount taken by your Proficiency Bonus.

Battle Till Death

Traits: Edge, Dying, Exhaustion

Prerequisite: 5th Level

Restriction: Exclusive with other 5th Level Ancestry Feats.

You don't fall Unconscious upon reaching 0 Hit Points. Instead, you may choose remain Conscious while Dying, and roll Death Saving Throws at the End of each of your Turns. However, you also gain Exhausted 1 with each Death Saving Throw.

Additionally, you don't roll Constitution to stay awake until after Combat ends.

Impervious

Traits: Edge, Improvement

Prerequisite: Battle Till Death

You ignore All Conditions of your choice during Battle Till Death, except for the Drained, Dying, and Ethereal Conditions.

The following Conditions still apply certain effects while ignored:

- Impaired applies the corresponding effect when it reduces an Ability Score to 0.
- Restrained and Grappled reduce your Movement to 0.
- Poisoned still prevents you from regaining Hit Points through non-Magical means.

Effects that are applied while you are affected by an ignored Condition, require you to be subjected to an ignored Condition, or are Triggered by the ignored Condition still apply.

Vendetta

Traits: Edge, Damage, Debuff, Emotion

Prerequisite: 5th Level

Restriction: This Feat is Exclusive with other 5th Level Ancestry Feats

When you take Damage from a Creature, Mark them.
This Mark doesn't expire.

When you inflict Damage to a Marked Creature with an Action, you can remove your Mark from all Creatures to reroll any number of Damage Dice up to your Proficiency Bonus.

You can re-roll the same die multiple times.

Beatdown

Traits: Edge, Improvement

Prerequisite: Vendetta

When you use Vendetta to re-roll Damage, choose one Creature.

Until you inflict Damage to a different Creature or End your Turn, you reapply the Mark to that Creature whenever it would be removed, including the Triggering instance.

Bleed

Bleeds are Feats that have both a Benefit and Detriment.

You can take one Bleed for free during Character Creation, and can gain more depending on the Monsters you face, situations you come across, and what your GM allows.

Challenge: With help from your GM, try playing a Campaign with as many Bleeds as you can stand.

A Bleed may also be acquired based on Actions in-game.

For example: If you break the law, you may gain the Hunted Bleed. But if your character falls from a great height and survives, they may gain the Crippled Bleed.

Bleeds can also stack, though not all of them have stacking effects.

If you gain a Bleed from Character Creation, you automatically gain any Benefits, but no Counters. Otherwise, a Benefit must be acquired by performing the Retrain Activity (no Trainer required).

The Benefits from all Bleeds linger when the Bleed ends, unless the Bleed comes with the Fleeting Trait. If a Benefit would be granted again, you can only have one instance of the benefits unless otherwise stated.

If you wish to retain any Benefits from a Fleeting Bleed, ask your GM.

Amnesiac

Traits: Bleed, Mental, Proficiency

Drawback: All Intelligence Checks to recall knowledge (such as Survival to remember if a berry is poisonous) have their Degree of Success treated as 1 degree worse if you aren't Proficient in the Skill or Tool. Additionally, you lose all Skill, Weapon and Tool Proficiencies.

Benefit: When you make an Ability Check or Attack Roll with a Skill, Tool or Weapon for the first time, check your Degree of Success. If you Critically Succeeded, you gain Proficiency and Expertise in it (pg. 331). If you Succeed, you gain Proficiency. Otherwise, you don't become Proficient in it.

Counter: Restoration (DC ~20) or Modify Memory* both end the Bleed. Re-learning lost knowledge prevents the drawback against that knowledge.

**:A Creature casting Modify Memory or some other Mind Altering effect can attempt to re-create the memories, which are only as accurate as what the Creature can conjure.*

Amputee/Crippled

Traits: Bleed, Improvement, Movement

Drawback: You can only wield One-Handed Weapons, OR your Walking Speed is reduced by half the base value (Minimum of 5), and you can't take the Step Action.

If a lost limb grants a Flying, Climbing or Swimming Speed, that value is reduced by half, to a minimum of 0, which doesn't prevent the Step Action. If you have no Hands, you cannot carry or wield items properly unless they are attached to, or worn by you.

Benefit: You don't suffer penalties from being Prone, unless you lose more than one limb. Also, if you have no Hands, all Magical Actions ignore the Manipulate Trait, and you ignore Somatic Components on Spells.

You also gain 1 Ancestry or Utility Feat.

Counter: Prosthetics. Magical Healing that restores Missing limbs removes this Bleed.

Can't Swim

Traits: Bleed, Emotion, Feat, Movement

Drawback: You cannot have a Swimming Speed, and cannot remain above water if nothing supports you.

Benefit: You gain a General Feat. If your only Movement Speed would be reduced to 0, you instead have a 5 ft. Walking Speed.

Counter: effects like Calm Emotions suppress the Drawback temporarily, and Therapy or learning to swim may end it permanently.

Cursed

Traits: Bleed, Fleeting, Magical

Drawback: You and the GM agree on the effects of a Curse that has been applied to you, while the GM decides what DC the Curse has, and what Tier it was placed at.

Benefit: You understand the specifics of the Curse, such as the DC, and the conditions under which it applies. Furthermore, you gain an unusual benefit based on the Curse bestowed, which you and your GM are to agree on.

Counter: Remove Curse can suppress the Benefit and Drawback, or end it if cast at a high enough Tier, or with a high enough DC.

Death's Door

Traits: Bleed, Buff, Fatal, Feat, Fleeting, Saving Throw

Drawback: If you fall to 0 Hit Points, you die instantly. Additionally, your GM secretly decides how long you are guaranteed to live (or you work together to decide). After that period, you must make a DC 15 Constitution Saving Throw every Hour.

- **Failure:** The GM picks a time for you to die, with at least a 10 Minute warning. During that time, you must make a Death Saving Throw once per Minute, gaining no Successes.

When you die, you cannot be Resurrected by any means short of Divine Intervention, Power Word: Resurrect, or the Wish Spell.

Benefit: When you die, all allies that witness your death don't expend Class Resources until the end of Combat. You also gain the Fond Farewell Feat.

Counter: You and your GM decide the nature of your affliction, and if it requires powerful healing, a specific cure, a Remove Curse Spell, or other treatment. Lesser treatments may buy you extra time or allow you to roll Death Saves when reduced to 0 Hit Points.

Debilitated

Traits: Bleed, Ability Score, Exhaustion

This Bleed is inflicted when you have been unnaturally Aged by 10 Years or more, or if you are in the elder years of your lifespan.

Drawback: During Combat, you can take no more than 2 unique Actions each Turn, which follows your Multi-Attack Limit. However, you may exceed this limit, taking Exhaustion 1 for each Action that exceeds this limit. You also become Drained 1 every time you lose Hit Points.

Benefit: Gain a +2 to Intelligence, Wisdom and Charisma.

Counter: Restoration (DC 15) allows for a full day of Adventuring. This Bleed only ends when the source of your debilitating condition (such as Old Age) no longer afflicts you.

Fight or Freeze

Traits: Bleed, Emotion, Final, Reactions

Drawback: On your first Turn in Combat, you can only take 1 Action before you end your Turn.

Benefit: After your first Turn in Combat, you can take Reactions at any time for the rest of Combat, as long as you have Actions.

Counter: Calm Emotions suspends this effect.

Hallucinations

Traits: Bleed, Disadvantage, Fleeting, Mental, Psychic

Drawback: You have Disadvantage on all d20 Tests.

Benefit: At the Start of your Turn, you may take the Disrupt Action against all effects with the Emotion or Mental Traits for free without ending your Turn early.

You also gain 1 Class or Utility Feat (ignores Fleeting).

Counter: Calm Emotions suspends this effect.

Heavily Scarred

Traits: Bleed, Advantage, Fleeting, Healing

Drawback: You only regain Half the amount of Hit Points from Non-Magical sources, Rounded Up.

Benefit: You have Advantage on Intimidation Checks against Creatures that can see your Scars, and on Saving Throws against Emotion effects.

You also gain 1 Utility Feat (ignores Fleeting).

Counter: Magical Healing that restores Lost Limbs can end this effect.

Hunted

Traits: Bleed, Creature, Dodge, Fleeting

Drawback: Whenever you experience a Random Encounter, the GM decides if it would be appropriate for your Hunter to interrupt, such as while you're stuck in a landslide. In Combat, they only Target you unless another Creature interferes, or would further their goals, and tries to take you alive.

Your Hunter Levels Up when you do, adjusting their Statblock as needed. Your Hunter bypasses all Resistances and Immunities you have, whether through Class Features, Damage Types, or Magical Weapons.

Benefit: When your Hunter is present, you immediately gain the benefits of the Dodge Action against all Creatures except your Hunter.

Furthermore, any XP you gain from Combat or an Encounter (not from Inspiration or Feats) is doubled while your Hunter is present.

Counter: A Contested Survival Check allows you to evade your Hunter on the next Encounter. Additionally, spending additional GP at a tavern allows you to take a Full Rest without risk of discovery, or assassination.

Late Bloomer

Traits: Bleed, Ability Score, Feat

Prerequisite: You must be starting at 5th Level or lower.

Drawback: You gain no Ability Scores from your Ancestry, Background, or Class (or reset to 10 in all Ability Scores for other methods).

Benefit: Every time you Level Up, you gain a +1 to any two Ability Scores of your choice for free. If for some reason you cannot gain a +1 to any more Ability Scores, gain a Class Feat instead (even if only one +1 was lost).

These +1s cannot be applied to the same Ability Score on the same Level.

Lichdom

Traits: Bleed, Fatal, Fleeting, Immunity, Resource, Rest, Undead

Drawback: You become Undead, and Rests only restore your Class Resources and Spell Slots. You also cannot roll Death Saving Throws, cannot be healed by any means that doesn't specify Undead and Die instantly at 0 Hit Points.

You have a Phylactery that has 10 Hit Points for each of your Levels, and must be Targeted explicitly with a base AC of 10. If it is destroyed, you cannot replace it without the Lichdom Spell.

When you would Level Up, you must expend a number of Souls equal to your current Level in order to Level Up.

Benefit: You become Immune to all Non-Magical Afflictions and the following Damage, and Conditions: Bleed, Exhaustion, Necrotic, Poison and Poisoned. You also no longer need to eat, drink, breathe or sleep.

You have a new Resource called Souls:

You can have any number of Souls at any Given Time. Whenever a Creature that isn't a Construct, Minion, Summon or Undead dies within 15 feet of you or your Phylactery, you gain 1 Soul if their effective Hit Point Maximum exceeds your Level. You can use this effect to hold a Creature's Soul regardless, allowing you to Resurrect them without material Components, or risk of failure.

1 Action: 1 Soul

You gain the benefits of a Short Rest, ignoring the Drawback. Or restore Hit Dice during a Full Rest.

5 Actions: 10 Souls

You gain the benefits of a Quality 1 Full Rest, ignoring the Drawback.

When you die, you reform within 5 feet of your Phylactery in 8 Hours with 1 Hit Point, 0 Hit Dice and no equipment, unless you spend a number of Souls equal to your Level to make this Instant. If your Phylactery is destroyed, you remain dead unless resurrected.

Counter: Reincarnation or another form of Resurrection that provides a new body, ends this Bleed if your Phylactery has been destroyed.

Lycanthrope

Traits: Bleed, Ability Score, Disadvantage, Feat, Fleeting, Resistance, Transformation

Drawback: During a Full Moon, or when you choose to gain the benefits of the Desperation Table (pg. 80), you transform into a Hybrid form, which imparts various bonuses and penalties as listed below. This Transformation lasts for 1 Hour or until you fall Unconscious.

While Transformed, you are considered a Beast, have Disadvantage on Intelligence and Charisma Saving Throws and cannot use any Spells, Items, or Actions granted by Feats, unless said Feat was granted by this Bleed, or it is an Ancestry Feat.

Your Unarmed Strikes and Natural Weapons also spread this Bleed with a DC equal to your Constitution Score.

At the End of your Turn (if Transformed), if you are aware of any non-Lycanthrope or Hostile Creature, you Move towards the nearest one up to three times for free (within your remaining Movement Speed), then Attack once (also free) if you end this Movement with any Creature other than you in your Reach, unless it exceeds your Multi-Attack Limit, or you are Charmed.

Benefit: While Transformed, you gain the following:

- +2 Bonus to your Strength, Dexterity and Constitution Scores.
- Resistance to Non-Silvered Physical equal to your Proficiency Bonus.
- A 2 Action, Light Natural Melee Weapon that deals 1d6 Piercing or Slashing Damage.
- One Beastfolk Ancestry Feat that is specific to the Heritage linked to your type of Lycanthropy, which you choose upon taking this Feat.

If the Heritage related to your Lycanthropy grants any Senses, you gain those Senses at all times.

Counter: The Remove Curse Spell merely ends any current Transformation. But if it is Empowered to 7th Tier or Higher, the Bleed may be permanently removed (DC 20).

Also, Creatures may still attempt to tame you while Transformed, allowing you to treat them as if you can't Target them.

Missing Sense

Traits: Bleed, Sense

Drawback: You cannot benefit from a chosen Sense, which also prevents any interactions or benefits that typically come from having that sense. Example: If you're deaf, other Creatures can't verbally communicate with you.

Benefit: If you lost a Precise Sense, an Imprecise Sense becomes Precise up to 30 feet, and Traits for the lost Sense also use the new one. If you lost an Imprecise Sense, another Imprecise Sense has twice the usual Range.

You also gain a Utility Feat.

Counter: Restoration temporarily grants the ability to use an Imprecise version of the lost sense for up to 10 Minutes.

Other effects that restore Missing limbs may also restore the sense permanently. Various Treatments may also negate the penalty.

Narcoleptic

Traits: Bleed, Disadvantage, Fleeting, Saving Throw, Unconscious

Drawback: At the End of your Turn in Combat (or as you please outside of Combat), you must make a DC 10 Flat Saving Throw, or Fall Unconscious until you take Damage, a Creature shakes you awake, or 1 Minute passes. Once you fall asleep in this way, you don't repeat this Saving Throw for at least 1 Hour.

Benefit: If you fall asleep within Line of Sight to a Hostile Creature, that Creature must make an Intelligence Saving Throw against your Strength or Charisma Score (whichever is higher):

- **Critical Failure:** They skip their next Turn.
- **Failure:** They cannot Target you directly with any Attack until the End of their next Turn.
- **Success:** No effect.

Counter: Anything that isn't a Feat and prevents you from falling Unconscious also prevents you from making this Saving Throw.

Sacrificial Training

Traits: Bleed, Ability Score, Feat, Proficiency

Drawback: Reduce your Ability scores and remove Proficiencies as you see fit.

Benefit: For every 3 points of reduction and/or removed Proficiencies, you gain a General Feat.

Reminder: Any Feat can be taken as a General Feat.

Sleepless

Traits: Bleed, Exhaustion, Fleeting, Nullify, Rest

Drawback: When taking a Long Rest, you gain Exhaustion 1, and cannot remove it by Resting unless you spend Hit Dice to do so. When reaching Exhaustion 10 in this way, you are forced to spend Hit Dice.

Benefit: While Resting, you cannot be Surprised.

For every 2 Levels of Exhaustion you have, the Quality of your Long Rests increases by 1 (treating Half-Rests as Quality 0).

Also when you take a Long Rest, you can choose to remove all of your Exhaustion regardless of Quality, gaining no other benefits in the process.

Counter: Calm Emotions, or any effect that forces you to fall Unconscious nullifies the Drawback temporarily.

Traumatized

Traits: Bleed, Advantage, Fleeting, Frightened, Incapacitated

Drawback: Determine a Trigger with your GM. When you witness this Trigger, you are Frightened 5 while within Line of Sight, and Incapacitated until the End of your Next Turn. The DC is 15.

Benefit: You add your Frightened Condition to your Action Recovery.

Counter: If the Frightened Condition is ended early, so does the Drawback for this instance. Can be permanently removed through Therapy.

Vampire

Traits: Ability Score, Acid, Fatal, Fleeting, Radiant, Rest, Vulnerability

Drawback: You have Sunlight Sensitivity, and take Radiant Damage when you End your Turn in Sunlight, or Acid Damage equal to your Level when you End your Turn in Rain or flowing water, neither of which are affected by Vulnerability.

If you are wearing Armor or a Cloak, you only take Half Damage from either of these sources, rounded up. You also die instantly when reduced to 0 Hit Points if a wooden spike, spear, or other pointed wooden Object Critically Hits you.

You are Undead, and have Vulnerability to Radiant equal to your Level.

Finally, you cannot benefit from a Short or Long Rest unless you drink a flask worth of Blood from a Creature that isn't a Construct or Undead. A Bloodletting Tool can be used to collect Blood for later.

Benefit: You no longer need to eat, drink or sleep, other than your need for blood, and you have a +2 Bonus to all Ability Scores.

When you are Reduced to 0 Hit Points, you turn into a flying cloud of mist that returns to the last place you have rested at a rate of 60 feet each Round, and regain 1 Hit Point over the course of an Hour while there, unless you are exposed to Sunlight.

You also gain a Bite Attack (3 Actions) that deals 1d6 Piercing, fulfills your need for blood for a day, automatically Hits a Grappled Creature, but raises a Killed Creature 24 Hours later with the Vampire Bleed, unless they were a Construct or Undead.

Counter: The Bleed can be Ended through a special Ritual as decided by the GM. If not decided or available, the Bleed can be removed by Resurrecting the Creature as they Rest. In the case of Reincarnation, they are Resurrected as a different Creature (potentially younger), but with all their memories intact.

Wanted

Traits: Bleed, Encounter, Proficiency

Drawback: The GM sets a Bounty in a location of your choice based on the severity of your crime.

If the Bounty is 100 GP or higher, roll a d8 at the end of each Long Rest, even if you choose not to. If your GM either guesses or rolls the same number, Bounty Hunters come to claim you. If the Bounty is 1,000 GP or higher, you also roll when entering a town-like location.

Benefit: You gain Proficiency in one Skill related to your crime or escape.

If you take this during Character Creation, you can gain any Magical Item from Common to Rare, gaining the appropriate bounty for such Item.

Counter: Paying the Bounty or serving the Sentence ends the Bleed.

Class

Class Feats are gained every single Level. They can give benefits that range from extremely powerful foundations, to minor enhancements and optimizations.

This first set of Feats is available to all Classes as if they were from that Class.

Battle Ready

Traits: Edge, Initiative, Recovery

When you roll Initiative, you recover Class Resources until you have a combined total equal to your Proficiency Bonus.

If this would exceed your maximum in any Resource, the excess remains until used, or the end of Combat.

Note: If you have Multiple types of Class Resources, you can divide the Total as you see fit.

First Strike

Traits: Edge, Initiative

When you roll Initiative (even if Surprised), you gain a bonus to the roll equal to your Class Initiative Modifier (ignoring Constitution).

You can take this Feat any number of times, applying the bonus an additional time.

Proficient

Traits: Utility, Proficiency

Pick any 2 Proficiencies that aren't Saving Throw Proficiencies. You gain those Proficiencies.

You can take this Feat any number of times.

Recover

Traits: Burn, Recovery

Free Action: 1 Hit Die

Regain 1 Class Resource of your choice, 1 Spell Slot, or Action Points equal to your Proficiency Bonus.

Wild Magic

Traits: Blast, Chaos, Magical, Recovery

Free Action:

Regain 1d4 Class Resources of your Choice, and roll on the Wild Magic Surge Table (See Next Page).

All Durations are for 1 Hour if not specified, or the effects aren't expended first.

You can take this Feat additional times, increasing the category of die used to recover Class Resources, up to a d12.

...

Wild Magic Surge Table:

d20 (1-10)	Result (1-10)	d20 (11-20)	Result (11-20)
1	One detrimental Spell of 5th Tier or lower, is randomly cast from your Space.	11	The GM grants you one Spell of 5th Tier or lower, which you can cast once for free for the Duration.
2	You Summon a Creature with a number of Hit Dice that is less than, or equal to your Level. The Creature either flees or attacks you.	12	You Summon a Creature with a number of Hit Dice that is less than, or equal to your Level. The Creature fights alongside you, or supports however it can.
3	You contract with a single Affliction or Condition of the GM's choice.	13	Any Creature of your choice within 30 feet of you is afflicted with a single Condition or Affliction of your choice.
4	You Transform into a Beast of the GM's choice with a number of Hit Dice equal to, or less than your Level until you finish a Long Rest.	14	You Transform into a Beast of your choice with a number of Hit Dice equal to or increased to your Level until you finish a Long Rest, or reach 0 Hit Points.
5	You Gain Vulnerability 5 to all Damage for 1 Hour.	15	Gain Resistance 5 to all Damage for 1 Hour.
6	Your Turn ends.	16	Immediately regain 10 Action Points.

d20 (1-10)	Result (1-10)	d20 (11-20)	Result (11-20)
7	Until the End of your next Turn, all Damage and Healing dice you roll are replaced with 1s, even if you would reroll them.	17	Until the end of your next Turn, all Damage and Healing dice you roll are replaced with their maximum values.
8	Your GM picks a Creature type. Creatures of that Type have Advantage on Attack Rolls against you.	18	You (or your GM) pick a Creature Type. You have Advantage on Attack Rolls against Creatures of that Type.
9	You start taking 1d4 Persistent Force Damage until it expires naturally, you reach 0 Hit Points, or you receive Magical Healing.	19	You gain 1d6 Persistent Healing until it expires, you're restored to full health, or you take Damage.
10	You're subjected to a 10th Tier Anti-Magic Field with a 10 ft. Radius for 1 Hour.	20	Roll three more times on this table, and pick two of the three results (rerolling additional 20s).

Suggestion: Work with your DM to assemble a simplified list for you to choose from when a random option is needed, such as results 1, 2, 3, 4, 11, 12, 13 and 14.

Basic Training

Traits: Edge, Improvement

Prerequisite: 3rd Level

You may pick one of the following:

- Increase any Ability Score of your choice by 1.
- Increase your Action Recovery by 1.
- Gain a +1 Bonus to Melee Weapon Attack Rolls.
- Gain a +1 Bonus to Ranged Weapon Attack Rolls.
- Gain a +1 Bonus to Spell Attack Rolls.
- Gain a +1 Bonus to Non-Finesse Damage Rolls.
- Gain a +1 Bonus to Finesse Damage Rolls.
- Gain a +1 Bonus to Spell Damage Rolls.
- Gain a +1 Bonus to Spell Healing Rolls.
- Gain a +1 Bonus to AC.
- Gain a +1 Bonus to all Saving Throws.
- Gain a +1 Bonus to all Ability Checks.
- Increase all your Saving Throw DCs by 1.
- Gain a +1 Bonus to your Hit Points for every Level.
- Gain +1 Resistance to any Damage Type, except for Bleed or Physical (Bludgeoning, Piercing and Slashing are okay on their own).

You can take this Feat any number of times.

GM Tip: This is an incredible Feat to give to Players that maintain an in-character training routine, or as a Quest Reward for helping an Expert or Trainer. Just be sure to scale the downtime cost if they're not replacing it.

Conversion

Traits: Burn, Recovery

Prerequisite: Improved Archetype

2 Actions: Any 2 Class Resources (includes Bardic Inspiration Dice)

Regain 1 Class Resource of your Choice.

Extra Subclass

Traits: Edge, Feat

Prerequisite: Level 10, Any Subclass

Pick and gain another Subclass.

You can take this Feat again at every 10th Level (e.g. 20, 30, 40, etc.), gaining an additional Subclass each time.

Spellcasting Repertoire

Traits: Utility, Spellcasting

Prerequisite: Spellcasting

You can immediately Prepare 3 new Spells.

These Spells aren't added to any Spellbook you may have, unless you record said Spells. However, you can Retrain into new Spells if you've seen a similar effect to the Spell(s) you wish to learn.

You can take this Feat any number of times.

Spellcasting Reservoir

Traits: Edge, Resources, Special, Spellcasting

Prerequisite: Spellcasting

You gain a number of Spell Slots equal to your Proficiency Bonus or Charisma Modifier (whichever is higher) and gain access to an additional Tier.

Special (Warlock): The Tier at which your Warlock Spells are Empowered to is increased by 1, but you get no additional Pact Slots or Spell Slots.

You cannot gain Spell Slots for a Tier that is higher than 10th, or your Level (barring GM approval). If you would gain access to a Tier that is higher than 10th, Prepare an additional Spell instead. Otherwise, you gain access when your Level is high enough.

Special: If you take this Feat as a General Feat, you gain it twice.

You can take this Feat any number of times.

Artificer

Big Batch

Traits: Edge, Craft, Improvement

Whenever you Craft a Batch of Consumable Items, you Craft 1 additional Item, even with standard Crafting, or the 1 Action method from Supplier.

You can take this Feat any number of times. Just beware of Item tracking.

Buy in Bulk

Traits: Utility, Downtime, Money

When you barter for Potions, Gadgets, Materials, and other such items, you gain an additional copy for free when you buy in multiples of 3, for each multiple of 3, even if the copies aren't usually available.

You cannot use this when buying Items back from a merchant.

Construct-ion

Traits: Edge, Crafting, Improvement, Minion

You can use Supply Points to Create any Construct with an equal or lesser number of Hit Dice (improved to what you spent). This Construct obeys your commands, and lasts until it is destroyed, or you create a new one.

When you take any kind of Rest with a Construct, you can allow them to use your Supply Points to heal in place of their Hit Dice, following the corresponding restrictions.

You can take this Feat any number of times, allowing you to have an additional Construct. However, you can only have one active in Combat at any given time, unless the GM permits otherwise.

Countermeasures

Traits: Burn, Resistance

2 Reactions: 1 Supply

Trigger: When you take Damage

You and all other Targets gain Resistance to all the Triggering Damage Types until the Start of your Next Turn, equal to your Proficiency Bonus + your Intelligence Modifier.

Crafter's Insight

Traits: Utility, Advantage, Intelligence

You have Advantage on Intelligence Checks related to understand, use, or otherwise learn information about an Item. This also applies to Crafting Checks.

Dead Man's Switch

Traits: Burn, Item, Manipulate

Actions: 5

Target: Any Item

The Target Item activates whenever it is no longer carried, held or worn, or the Creature carrying it is Incapacitated.

Empowered Craft

Traits: Edge, Craft, Improvement

Consumables you make using Supplies (such as Ammunition) roll an additional Damage or Healing die, and drop the lowest.

If the Consumable doesn't use dice, it adds a +1 to all flat values.

Extra Attunement

Traits: Utility, Attunement

You can Attune to an additional Item (pg. 388).

You can take this Feat multiple times.

Instant Decoy

Traits: Burn, Item, Manipulate, Tool

3 Actions or Reactions: 1 Supply

Trigger: An Item is stolen from you.

The Triggering Item is replaced with an identical copy, and you retain the original. If you use Actions to do so, the Item doesn't need to be stolen.

The copy is indistinguishable from the original unless examined with a successful Perception Check against your Intelligence Score, the weight is more than 2 times heavier or lighter, or when the Item used.

The decoy has the statistics of any Item you can make, and behaves accordingly.

Inventive Patents

Traits: Utility, Downtime, Money, Tool

You gain a new Activity: Inventive Work

You spend your time designing various contraptions, brewing concoctions, or otherwise involving your craft to solve known issues.

For each day you spend performing this Activity, you earn 1 CP at the end of each Long Rest, which is either Magically delivered to either you (or another Creature you designate), or deposited with a bank.

While performing this Activity, you may discover that a problem is being caused by something bigger, a business is forcing out all competition, or a shady organization that takes interest in your work.

Even when you leave your work behind, you may be informed of something like sabotaged production lines, malfunctioning products, shady business deals or a sudden shortage in labor or materials.

Modify Object

Traits: Edge, Craft, Enchant, Improvement, Item, Tool

When you perform the Craft Activity, you may also apply one of the following modifications (that aren't already applied) to any applicable Item you have, or replace any modification that has already been added to it:

- **Retrofit Enchantments:** The Target Item loses any number of Enchantments, and can be re-enchanted at half the new cost as if it never had the lost Enchantments. No Essence can be recovered this way, but you can repeat this any number of times on the same Item.
- **Sharpen:** The Target Item has its Damage Die increased by 1 category (up to d12).
- **Redesign:** You add or remove one Trait of your choice.
 - Some Traits are connected, and mustn't be present when removing the tied trait (i.e. you can't remove Two-Handed from a Heavy Weapon). Others such as Piercing are removed for free if they no longer apply.
 - You cannot change Traits bestowed by material.
 - You also cannot remove the Reload Property, though you can reduce the Action Cost to a minimum of 1.
 - If you add a Property with a value that isn't tied to Action Cost or modify a Property's value, its value or change is based on your Intelligence Modifier. If the value is tied to Action Cost, its value is equal to the base Action Cost of the Item.
- **Balance:** You add the Balanced Trait to a Weapon, or remove it entirely.

Note: it is possible to Redesign Traits that don't currently have a definition, doing what makes sense. Like Concentration allowing you to make one Attack for free each round you Concentrate, or Fire causing all Damage Dice to inflict Fire Damage. Fatal and Special require GM Discretion (and Player explanation).

New Recipes

Traits: Utility, Craft, Enchant

You learn how to Craft 3 additional Items with Supply Points, or 1 new Enchantment for Temporary Enchantment.

These can still be used in normal Crafting.

You can take this Feat any number of Times.

Precise Deployment

Traits: Edge, Advantage, Item, Saving Throw

When you use any Item that requires Creatures to make a Saving Throw, you and any Creatures of your Choice have Advantage on the Saving Throw.

Protective Agents

Traits: Edge, Buff, Immunity, Long Rest, Tool

At the End of a Long Rest, you can expend 1 Supply Point to grant any Creature you can touch Immunity to all Damage dealt by Items you create, or effects you cause that consume Supply Points.

Quick Deployment

Traits: Edge, Actions, Item

You only spend half the Actions when using Items that aren't Weapons (Rounded up).

Quick Fix

Traits: Burn, Ability Check, Craft, Item, Manipulate, Tool

5 Actions: 1 Supply

You perform a DC 10 Intelligence Check using the corresponding Tools on an Item or Construct:

- **Critical Success:** Same as Success, but the Penalty reduction is increased by 1 for every 10 over.
- **Success:** All penalties on the Item are reduced by 1, or the Target regains a number of Hit Points equal to the amount you rolled on the d20 Test.
- **Failure:** The Item cannot be used until repaired over the course of a Long Rest, and is Immune to all other forms of repair until then.

You can use this on an Item that isn't broken to add your Intelligence Modifier to its Attack, Damage and Resistance Modifiers for the next Hour (No Check needed).

Refined Formula

Traits: Edge, Improvement, Item

Any Consumable Items you Craft now use your Intelligence Score for the Save DC, and as a bonus to their Damage/Healing Modifier.

In the case of Ammunition, the resulting Damage Roll uses your Intelligence if it is higher than the Attacking Creature's Weapon Damage Modifier.

This also applies to other value-based effects and Modifiers such as Resistance, but not Ability Scores.

Replicate Magic Item

Traits: Edge, Craft, Enchant, Item, Magical

When you finish a Long Rest, you can spend Supply Points to convert a Non-Magical Item into a Non-Consumable, Common, Magical variant you can Craft, which lasts until you finish a Long Rest.

Higher rarities cost more Supply Points as follows:

- **Common:** 1
- **Uncommon:** 3
- **Rare:** 5
- **Very Rare:** 7
- **Legendary:** 9

You can also use this Feat to Craft rarer versions of a Consumable Magic Item using the Supplier Ability (e.g. Healing Potion), or gain access to Consumable Magical Items that don't have a Common Variant (e.g. Potion of Restoration).

Note: Items Crafted in this way cannot be turned into Essence.

Scraper

Traits: Utility, Craft, Item

When you destroy any Non-Magical Item, you recover all materials used in Crafting it.

When you destroy any Magical Item, you can choose instead recover an amount of Essence equal to 1/10th the Value of the Item, in addition to any that you would recover normally unless it would exceed the Item's total value. This also applies to removing Enchantments, such as with Modify Object.

You can take this Feat multiple times, increasing the amount of Essence recovered.

Tactical Adjustments

Traits: Burn, Improvement, Item, Manipulate, Tool

5 Actions: 1 Supply

Target: Any Number of Consumable Items you're actively holding, or that you made as a Batch.

You make one of the following Permanent adjustments to the Targeted item:

- **Explosive:** The Target deals 1 less Damage die, but Targets Creatures within 5 ft. of the original Target, and converts any Attack Rolls into Dexterity Saving Throws if no other Saves are required.
 - Items that require Ingestion or Injury such as Simple Poison are treated as Inhaled.
- **Lingering:** The Target deals 1 less Damage die, but applies 1 Persistent Damage of the corresponding Type per Damage Die.
- **Volatile:** The Target deals 1 additional Damage Die, but explodes at the Start of the next Round, inflicting its effects on any Creature that occupies the same space, leaving nothing behind.
- **Aerodynamic:** The Target's Throw Range is doubled, or applies its effects when thrown up to 20/60 feet.
- **Mixture:** Combine two Targets into one Consumable Item that applies all effects. Potion Sickness counts the final Item as a unique Potion.

For Items that use multiple individual dice sizes such as Healing Potions, the highest die is affected.

Items that have a Duration, but no Damage Dice such as a Potion of Invisibility increment or decrement the Duration to the nearest 1 Round, 1 Minute, 10 Minute, 1 Hour, or similar simple intervals.

Items that use Dice for Healing or similar instead of Damage are treated as Damage for the purposes of this.

Note: if this effect would remove the last die, it reduces the type by 1 (d6 > d4 > d1).

Temporary Enchantment

Traits: Edge, Enchant, Item, Magical, Manipulate, Tool

1 Minute: 1 Supply

Duration: 1 Hour

You apply a single Enchantment you know to an Item you have the Tools to Craft. This Enchantment lasts for the Duration or until dispelled, and each Enchantment you apply this way can only be applied once at any given time.

You also learn how to apply one Enchantment of your choice.

Experimental Enchantment

Traits: Edge, Improvement, Special

Prerequisite: Temporary Enchantment

You can use Temporary Enchantment to Enchant a Creature, allowing them to utilize the benefits of applicable Enchantments regardless of what Items they use.

This follows the same restrictions as Temporary Enchantment.

Special: If you have Replicate Magic Item, you can do the same thing with Non-Consumable Item effects. Actions can be taken as usual.

Hidden Contingency

Traits: Edge, Improvement, Item

Prerequisite: Countermeasures

When you use Countermeasures, you can also use any Consumable Item with the Attack or Saving Throw Traits as part of the same Action, provided the Item is in a Container you are Wearing, Targeting both you and your attacker.

The Item Targets both you and your Attacker, or the nearest Creature of your choice if your Attacker isn't within Range.

If the Item has the Saving Throw Trait, your Degree of Success is increased by 1, while an Item with the Attack Trait deals half Damage to you on a Hit.

Lengthy Enchantment

Traits: Edge, Duration, Improvement

Prerequisite: Temporary Enchantment

When you use Temporary Enchantment on an Item, the Duration is doubled.

You can take this Feat any number of times, doubling the Duration each time.

Permanent Item

Traits: Edge, Craft, Improvement

Prerequisite: Replicate Magic Item OR Temporary Enchantment

When you apply an Enchantment to a Target with any of the Prerequisite Feats, you can make the effect Permanent until you apply this benefit to a different Target.

Any benefit applied by a Target Enchanted this way is lost if the enchantment is removed (e.g. the Dexterity Bonus from reading a Tome of Improvement).

You can take this Feat any number of times, allowing you to apply this to an additional Item without removing the Enchantment. You can pick which Enchantments you remove, if you must do so.

Recursive Enchantment

Traits: Edge, Improvement

Prerequisite: Temporary Enchantment

When you apply a Temporary Enchantment, you may apply it as if it had been added an additional time.

You can take this Feat any number of times, though the benefit cannot exceed any limits on the Enchantment itself.

Replicate Spell

Traits: Blast, Craft, Manipulate, Special, Spellcasting, Tool

Prerequisite: 5th Level

Free Action: X Supplies

You replicate the effects of any Spell of up to 5th Tier using all Components, expending Supplies as Spell Slots, and Action Points as if you were casting it.

Cantrips cost 1 Supply Point at all Tiers (up to 5th).

Special: The resulting effect isn't considered Magical, though it can still Trigger effects like Counterspell.

Scrappy Solution

Traits: Blast, Advantage, Craft, Manipulate, Final, Tool

Prerequisite: 5th Level

10 Actions: X Supplies

You attempt to Craft any Item that you have seen before, with a Complexity that is equal to, or less than $X + 10$, even if you can't normally Craft the Item:

- **Critical Success:** Same as Success, but you have Advantage on any Attack Roll or Ability Check required by the Item, and Targets have Disadvantage on Saving Throws required by the Item.
- **Success:** You Craft and immediately Interact with the Item X times for free (as if you had a copy for each use, condensed into one effect). Any lingering effects can last no more than 1 Minute, and the Item falls apart after 1 Hour. However
- **Failure:** You fail to Craft the Item, but recover any expended Supply Points.
- **Critical Failure:** Same as Failure, but you don't recover any Supply Points.

Success or Failure, you End your Turn.

You cannot Craft an Item in this way if it requires a Spell or Feature that you don't have the means to use, such as a Spell Scroll without the Replicate Spell Feature.

Barbarian

Endless Stamina

Traits: Burn, Actions, Special

Free Action: 1 Rage

Gain 1 Action Point.

Special: Whenever you gain Rage that exceeds your limit for Rage, you gain Action Points equal to the excess that was lost.

Eternal Combatant

Traits: Burn, Bloodied, Healing, Initiative

Whenever you roll Initiative, you may expend any amount of Rage to roll an equal number of Hit Dice, and heal that amount.

If you have no more Hit Dice, you instead regain Hit Points equal to your Constitution Modifier (Minimum of 1) for each Rage Point Spent.

You may also expend Rage this way when you are Bloodied at the Start of your Turn, though the amount healed is lost if it would exceed half your Hit Point Maximum (rounded down).

Greater Defense

Traits: Edge, Resistance, Improvement

You add your Proficiency Bonus to your Damage Resistance from Empowered Defense.

Hardy

Traits: Utility, Rest, Travel, Weather

You don't suffer the penalties of weather, can take a Full Rest without meeting any of the requirements, as long as you don't Travel faster than the standard pace.

Have No Fear

Traits: Burn, Frightened, Nullify

Free Action: 1 Rage

Reduce the Frightened Condition by 1.

Special: Whenever you gain Rage that exceeds your limit for Rage, you reduce the Frightened Condition equal to the excess that was lost.

Heavy Arsenal

Traits: Edge, Improvement, Weapon

All Barbarian Feats that specify Melee Weapons or Attacks can now use any Ranged Weapon or Attack, provided the Weapon is Heavy, Thrown, or has the Recoil Trait.

Heavy Handed

Traits: Edge, Damage, Weapon

Heavy Weapons double the Weapon Damage Bonuses from your Strength Modifier, and Barbarian Feats like Wind-Up.

You also ignore Damage Penalties from a negative Strength Modifier.

Improved Critical

Traits: Edge, Critical, Damage, Weapon

When you Critically Hit with a Heavy Weapon, you add an additional Damage Die to the Critical Damage rolled.

You can take this Feat any number of Times, increasing the number of Damage Dice rolled.

Improved Grapple

Traits: Edge, Auto-Hit, Grappled

While a Creature is Grappled by you, your first Natural Weapon Attack that Misses the Grappled Creature automatically Hits instead.

Reminder: Unarmed Strikes are Natural Weapons.

Improved Resistance

Traits: Edge, Resistance, Improvement

Your Empowered Defence provides Resistance to an Additional Damage Type, which applies as long as your Armor provides less or no Resistance of that Type.

3 Actions: 1 Rage

You change the Damage Type of the provided Resistance.

You can take this Feat Multiple times, picking a unique Damage Type each time.

Interpose

Traits: Burn, Movement

Free Action:

Trigger: When an Ally you are aware of is Targeted by an Attack or effect with the Damage Trait.

You immediately take Actions with the Move or Teleport Traits as if they were part of this Reaction (expending Actions for each), but only if you can End this Reaction adjacent to the Targeted Creature, and within Range of the Triggering Attack.

If you are already Adjacent to the Target, and within Range, you don't need to use Reactions, and can apply this effect even if you can't React or take Actions.

Once you end this Reaction, the Triggering Attack must Target you instead.

Mindless Rage

Traits: Edge, Special

Free Action: 1 Rage

Trigger: You fail against Saving Throw with the Mental Trait.

Re-roll the Triggering Saving Throw and take the new result.

Special: You can use this Free Action, even if you wouldn't normally be able to, even while Unconscious.

Monkey Grip

Traits: Edge, Advantage, Improvement, Weapon

You can Wield a Two-Handed Weapon in one Hand without Disadvantage, provided it isn't Heavy. If it is Heavy, you still Attack with Disadvantage.

Additionally, all d20 Tests you make to hold an Object, Climb, or Maintain a Grapple are always made at Advantage.

Any attempts to break your grip always contest an Athletics Check made by you instead of using your Strength as a DC, unless you decide otherwise.

Overkill

Traits: Edge, Damage, Weapon

When you inflict Damage with a Melee Attack that reduces a Creature's health to 0, you can deal the rest to another Creature within 5 ft. of that Creature, and within your Reach.

This effect can trigger any number of times on the same Attack, provided there is still Damage leftover.

Professional Brawling

Traits: Utility, Damage, Downtime, Money

You gain a new Activity: Professional Brawling

You spend the day fighting in arenas and cages, hunting dangerous monsters, volunteering as a test subject, or other hazardous careers.

Choose X before rolling. If there's a special challenger, your GM may pre-determine X, which you may take or leave.

You take and gain Xd12 as a single instance of Physical Damage (or other if the GM deems it appropriate), and SP. However, if this Damage reduces you to 0 Hit Points or less, you are instead reduced to 1 Hit Point, and only gain X SP.

While performing this Activity, you may run into a crime lord lobbying for you to succeed or Fail, a crippled fighter, someone with a strange condition, or some event that impacts the fight.

Shrug It Off

Traits: Burn, Temporary Healing

1 Action: 1 Rage

Duration: 1 Minute

Gain Temporary Hit Points equal to 1d12 + your Constitution Modifier for the Duration.

Threat Assessment

Traits: Utility, Information

When you Roll Initiative, you can ask the GM to tell you the Combat Role of all Enemies that you can see (Bruiser, Tank, Spellcaster, etc.).

Unceasing March

Traits: Utility, Travel

When you double your Travel Speed (pg. 98), you and one other ally of your choice don't take a level of Exhaustion.

Wind Up

Traits: Burn, Damage, Precision, Weapon

2 Actions: 1 Rage

Until the Start of your next Turn, whenever you Hit with a Melee Weapon Attack, you deal 1 Precision Damage for each Damage Die the Weapon has (e.g. a 2d6, Weapon would deal +2).

This effect stacks on itself, with no limit.

Battlecry

Traits: Blast, Advantage, Audible, Buff, Improvement, Intimidation

Prerequisite: Shrug it Off

3 Actions: X Rage

You can apply the effect of Shrug It Off to X Creatures of your Choice, including yourself.

Additionally, the next Intimidation Check made by each Target within 1 Minute is rolled at Advantage. This also applies to your personal uses of Shrug it Off.

Challenge

Traits: Burn, Ability Check, Audible, Damage, Emotion, Intimidation, Psychic

Prerequisite: Proficiency in Intimidation

3 Actions: 1 Rage

Make an Intimidation Check against the Wisdom Score of a Creature that can Hear you:

- **Critical Success:** Same as Success, but the effect persists for 1 Minute, or until either you or the Target falls Unconscious
- **Success:** Until the End of their next Turn, the Target must include you as a Target for any Damaging or Debuff Actions they take. If they fail to Target you at least once, or they Target a different Creature, they take Psychic Damage equal to 1d12 + your Charisma Modifier for each violation.
- **Failure:** No effect.

Improved Wind Up

Traits: Edge, Improvement

Prerequisite: Wind Up

Wind Up becomes a Free Action.

Additionally, whenever you gain Rage that exceeds your limit for Rage, your next Attack that Hits before Combat Ends deals an additional 1 Precision Damage.

Greater Wind Up

Traits: Edge, Improvement

Prerequisite: Improved Wind Up

When you Miss an Attack, you immediately use Wind Up once without expending Rage.

Additionally, if you End your Turn after Missing all of your Attacks, Wind Up carries over to your next Turn.

Monster Toss

Traits: Edge, Ability Check, Athletics, Grappled

Prerequisite: Proficiency in Athletics

3 Actions:

You Throw any Creature you have Grappled up to 60 feet.

You can optionally spend 1 Rage to deal 1d6 Bludgeoning Damage for every 10 feet they were thrown, as if it were Fall Damage (pg. 91).

Otherwise, they only take Fall Damage if they fall 10 feet or more, and aren't caught.

Rampage

Traits: Blast, Buff, Debuff, Precision

Prerequisite: 5th Level

2 Actions: X Rage

Duration: 1 Minute

Mark X Creatures for the Duration. You can Mark the same Creature multiple times.

Marked Creatures you Hit take 1d6 Precision Damage for each Mark they have, and don't benefit from Damage Thresholds or Damage Resistances against this Damage.

Once you hit a Marked Creature it loses all Marks. The Mark is also removed if the Duration expires, or you End your Turn without Attacking a Marked Creature.

If you kill a Creature that is Marked, or you take Damage while any Creature is still Marked, you may immediately Step once for Free.

Reckless Attack

Traits: Edge, Advantage

Prerequisite: Wind Up

Whenever you use Wind Up, you can choose to gain Advantage on all Attack Rolls until the start of your next Turn. If you do, Attack Rolls against you also have Advantage.

Reckless Rage

Traits: Edge, AC, Resources

Prerequisite: Reckless Attack

Free Action:

Restriction: Once per Turn.

Your AC is reduced to its base value, but you gain Rage Points equal to your Proficiency Bonus.

Relentless Endurance

Traits: Blast, Exhaustion, Dying, Special

Prerequisite: 5th Level

Free Action: 5 Rage

Trigger: You fall to 0 Hit Points.

You instead drop to 1 Hit Point. If you don't have enough Rage, you may take Exhaustion 1 for each Missing Rage.

Special: You can take this Free Action at any time, even if you wouldn't normally be able to do so.

Bard

Battle Hymn

Traits: Edge, Buff, Concentration

5 Actions: 1 Bardic Inspiration

While Concentrating, All Creatures of your Choice within 30 ft. of you add your Bardic Inspiration Die to their Attack Rolls.

Blended Harmony

Traits: Edge, Improvement, Nullify

You don't lose Actions at the Start of each Turn from Concentrating on multiple Actions from Bard Feats, and the Action penalty for Concentration Saves is reduced to 1 Action.

This benefit doesn't apply if you are Concentrating on any Action that isn't from a Bard Feat.

Dedicated Performance

Traits: Edge, Buff, Concentration, Resources, Special

5 Actions: 1 Bardic Inspiration

While Concentrating, when any Creatures of your Choice within 30 feet of you expend a Class Resource that isn't Bardic Inspiration or replaced by it, they gain your Bardic Inspiration Die.

Special: This benefit doesn't affect you, unless you have the Self-Inspired Feat. Even still, you only gain a d4.

Echoing Song

Traits: Burn, Buff, Nullify

Free Action: 1 Bardic Inspiration

Trigger: You lose Concentration on any Bard Feat.

You immediately regain Concentration on the Triggering Feat at no further cost, and cannot lose Concentration or suffer penalties for any other Bard Feat until the End of your next Turn.

Improved Bardic Inspiration

Traits: Edge, Improvement

Your Bardic Inspiration Die increases to a d6.

You can take this Feat multiple times, further increasing the die by one category, up to a d12.

Interpretive Performance

Traits: Utility, Communication, Visual

By utilizing Non-Verbal methods (painting, singing, dancing, etc.), you can convey a general message to a Creature you don't share a language with (such as your intentions, a story or an overall plan), without requiring a Society Check from the Target.

This doesn't work with Beasts, or other Creatures that don't understand any Languages, nor does this count as sharing a Language.

Jack of All Trades

Traits: Utility, Proficiency

You can treat all Skills and Tools as if you are Proficient (even for Feats), though they don't add your Proficiency Bonus, unless you expend 1 Bardic Inspiration to do so.

Loud Performance

Traits: Edge, Improvement

Free Action: 1 Bardic Inspiration

Trigger: You use a Bard Feat with the Concentration Trait.

You double the Range of the Triggering Feat.

Persistent Inspiration

Traits: Edge, Improvement

When a Creature spends one of your Bardic Inspiration Dice on a d20 Test but doesn't Succeed, they retain the Bardic Inspiration Die until either the End of their next Turn if they don't Trigger this effect again, or it is Successfully expended.

Powerful Beat

Traits: Edge, Actions, Buff, Concentration

5 Actions: 1 Bardic Inspiration

As long as you are Concentrating, all Creatures of your Choice within 30 feet of you recover a minimum number of Action Points each Round, equal to your Proficiency Bonus + your Charisma Modifier, even after the Slowed Condition.

Reliable Inspiration

Traits: Edge, Improvement

When a Creature rolls your Bardic Inspiration Die, they take either the result, or your Charisma Modifier. Whichever is higher.

Secrets of Arcana

Traits: Edge, Spell

You immediately learn any three Spells that are on the Occult, Primal, Arcane, or Divine Spell lists. These Spells don't count against the number of Spells you can have Prepared, and can have the Attack or Damage Traits.

Song of Flight

Traits: Edge, Concentration, Movement, Travel

5 Actions: 1 Bardic Inspiration

All Creatures of your choice within 30 feet of you increase their Movement Speed by 10 feet and ignore Encumbrance.

This doesn't affect a Creature's Action Limit, but does apply to Travel Distance.

Song of Meditation

Traits: Edge, Buff, Concentration

5 Actions: 1 Bardic Inspiration

All Creatures of your choice within 30 feet of you add your Bardic Inspiration Die to their Ability Checks.

Song of Power

Traits: Edge, Buff, Concentration

5 Actions: 1 Bardic Inspiration

As long as you are Concentrating, all Creatures of your choice within 30 feet of you add your Bardic Inspiration Die to their Damage and Healing rolls once per Turn.

Song of Protection

Traits: Edge, Buff, Concentration

5 Actions: 1 Bardic Inspiration

As long as you are Concentrating, all Creatures of your choice within 30 ft. of you add your Bardic Inspiration Die to their Saving Throws.

Song of Rest

Traits: Edge, Healing, Improvement, Resources

When you use Bardic inspiration to restore Class Resources to other Creatures over the course of a Short Rest, you also apply an amount of Healing to all participating Creatures equal to a roll of your Bardic Inspiration Die for each one.

Sour Note

Traits: Burn, Debuff

3 Reactions: 1 Bardic Inspiration

Trigger: A Creature you can see within 30 feet of you would Succeed on an Attack Roll or Saving Throw.

You inflict a penalty to the Triggering roll, equal to your Bardic Inspiration Die.

Special: If you have Persistent Inspiration, and this effect doesn't result in a Failure, the Target retains the Bardic Inspiration Die as a Debuff.

Storyteller

Traits: Utility, Downtime, Money

You gain the following Activity: Storytelling

You spend the day narrating, singing, performing, dancing, or performing similar uplifting tasks.

You earn 1d10 SP, and gain free lodging and food for the night for a number of other Creatures equal to your Charisma Modifier (+1 Rest Quality). Additionally, you gain a cumulative 1% discount at each store in the local area, up to 15%, which cannot exceed the Merchant's Limit.

Above the table, you can choose keep track of any Legendary and Boss Monster your party defeats, as well as any risky or intriguing quests that are completed. If you do, multiply the amount of SP gained by the number of achievements you have recorded.

During your Performance, you might find a mysterious note, a cursed trinket, a mugging or kidnapping, or receive an offer from an important person to perform for them. Although somebody may not like the stories you tell, or someone may seem oddly familiar.

Tip: 10% of a coin is just one category lower. If a fraction leaves a remainder of a CP or other significant currency, round up.

Strong Performance

Traits: Edge, Improvement

Free Action: 1 Bardic Inspiration

Trigger: You use a Bard Feat with the Concentration Trait.

You can double the Result of all Modifiers applied by the Triggering Feat.

Supportive Role

Traits: Utility, Buff

When a Creature that can hear you performs an Ability Check you are Proficient in over the course of 1 Minute or more, they add your Bardic Inspiration Die to the roll, without expending your Bardic Inspiration.

Vicious Mockery

Traits: Burn, Damage, Debuff, Psychic, Saving Throw, Spell

Enchantment Cantrip

Actions: 3

Range: 60 ft.

Components: V

Target: One Creature

This Spell is only available through this Feat, and doesn't count against the Cantrips you can Prepare.

The Target must make a Wisdom Saving Throw:

- **Critical Failure:** The Bardic Inspiration Die is doubled, and the Stunned Condition increases to your Spell Damage/Healing Modifier.
- **Failure:** The Target takes Damage equal to a roll of your Bardic Inspiration Die (which isn't expended), and is Stunned 1. You don't add your Spell Damage/Healing Modifier to this Damage.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Empowered: (+1)

You add an additional Inspiration Die to the Spell's Damage.

Note: Any effects that apply to Bardic Inspiration also apply to this die, such as Reliable Inspiration.

Elemental Ode

Traits: Edge, Buff, Concentration, Damage

Prerequisite: Song of Power

5 Actions: 1 Bardic Inspiration

Select one of the following Damage Types: Acid, Cold, Fire, Lightning, Poison, Thunder.

As long as you are Concentration, any Creature of your choice within 30 feet of you adds your Bardic Inspiration Die to the amount of Damage they take, whenever they take Damage of the same Type.

Ritual Song

Traits: Blast, Concentration, Metamagic, Spellcasting

Prerequisite: 5th Level

5 Actions: X Inspiration

Cast any Spell that doesn't have the Attack, or any Damage Traits (spending Actions and Spell Slots to do so), and expend Bardic Inspiration equal to the Tier at which you cast it.

Until you drop Concentration, the Spell's Duration doesn't reduce over time. If the Spell doesn't have a Duration, you can trigger the effects as a Free Action once each of your Turns while Concentrating.

Each time you trigger a Spell without a Duration, you must make a DC 10 Concentration Saving Throw, which adds 1 to the DC every time you trigger the Spell.

Self Inspired

Traits: Edge, Improvement

Prerequisite: Improved Bardic Inspiration

When you grant Bardic Inspiration Dice by expending your Bardic Inspiration Resource, you can inspire yourself with a d4 for the same Duration.

This doesn't expend Bardic Inspiration, but the Size of this die is not increased by Improved Bardic Inspiration.

Silly Slide

Traits: Burn, Resistance

Prerequisite: Sour Note

3 Reactions: 1 Bardic Inspiration

Trigger: When a Creature you can see within 30 ft. takes Damage

You reduce the Triggering Damage by your Bardic Inspiration Die.

Cleric

Aura of Healing

Traits: Edge, Healing, Holy/Unholy

Free Action: 1 Divine Intervention

Duration: 1 Minute

For the Duration, any Creature of your Choice that starts their Turn within 10 feet of you regains Hit Points equal to your Spell Healing Modifier (Minimum of 1).

This doesn't work on Constructs or Undead.

Aura of Smiting

Traits: Edge, Damage, Holy/Unholy, Radiant/Necrotic

Free Action: 1 Divine Intervention

Duration: 1 Minute

For the Duration, any Creature of your Choice within 10 feet of you that makes an Attack Roll inflicts additional Radiant (or Necrotic if Unholy) Damage on a Hit, equal to your Spell Damage Modifier (Minimum of 1).

Caretaker's Blessing

Traits: Utility, Advantage, Medicine

When you perform a Medicine Check on a Creature, they gain Advantage on the next Saving Throw they make against an Affliction or Condition, including Death Saving Throws.

Celestial Ward

Traits: Edge, Advantage, Damage, Holy/Unholy

You have Advantage on Saving Throws against all Afflictions, and Creatures that deal Damage to you take Radiant Damage equal to your Spell Damage Modifier, or Necrotic if your Deity is Unholy.

As with any of these Feats, your GM may approve a different Damage Type for a different Deity, such as Lightning for a Deity of Storms.

Charitable Work

Traits: Utility, Downtime, Money

You gain the following Activity: Charitable Work

By spending the day giving blessings, healing the sick and injured, or any other appropriate activities, you earn GP equal to your Level, and one small Item of your choice worth 50 GP or less, in whatever state the DM decides, provided it can still be of use.

While performing Charitable Work, you become aware of things such as any curses, oppression, plagues, and corruption in the local area.

Destroy Undead

Traits: Burn, Holy/Unholy, Radiant/Force, Saving Throw

3 Actions: 1 Divine Intervention

Target: One Undead Creature

Range: 30 ft.

The Target Undead must make a Charisma Saving Throw against your Wisdom Score:

- **Critical Failure:** Same as Failure, but Double Damage.
- **Failure:** The Target takes Radiant (or Force if Unholy) Damage equal to your Level.
- **Success:** No effect.

If the Damage taken (after modification) is greater than twice the Target's Damage Threshold or effective Level (whichever is higher), the Damage for Failure is increased to half the Target's Hit Point Maximum.

A Creature that dies to this effect, cannot be Targeted by any Magical Action that isn't Holy/Unholy for 1 Week.

Devoted Training

Traits: Utility, Choice, Proficiency

You gain any two Proficiencies that must be related to your Deity, and cannot be Saving Throw Proficiencies.

Additionally, you can spend 1 Divine Intervention to treat any Ability Check or Attack Roll as if you were Proficient.

Example: A Cleric of a Tech Deity could potentially gain Proficiency in Electronics (if available) and an Artisan's Tool, or a Cleric of Death may become Proficient in Medicine and Scythes (sorry, not available in this book).

These are generic examples, and specific Deities may grant different Proficiencies.

Divine Bargain

Traits: Utility, Downtime, Holy/Unholy

When you purchase Consumable Items that are religious or beneficial in nature (according to your Deity) such as Holy Water or Healing Potions, you can purchase additional copies by spending Divine Intervention instead of Money, even if the vendor wouldn't normally have them in stock.

You must purchase at least one Item for every copy gained in this way.

Divine Guidance

Traits: Utility, Information

1 Minute: 1 Divine Intervention

Ask your GM about a particular course of activity which you must disclose. In response, your GM gives one of the following answers (or similar) based on your desired course of action:

- **Triumph:** The activity is nearly guaranteed to succeed with minimal issue.
- **Pyrrhic:** The activity can be expected to succeed, but significant loss is likely.
- **Surprise:** Something unplanned or unexpected is likely to occur.
- **Uncertain:** The result is too complicated for the GM to decide.
- **Misguided:** The method is more difficult than it needs to be.
- **Setback:** The result will probably be failure, but will still be fruitful.
- **Stop:** The activity will likely cause more trouble than its worth.
- **Woe:** The activity is nearly guaranteed to fail with heavy losses.
- **Answered:** You already asked a similar question, and the answer hasn't changed.

This prophecy only involves information the GM knows at the time of asking, and cannot account for dice rolls, deviations from the provided plan, withheld information, or miscommunications.

Divine Sense

Traits: Utility, Divination, Holy/Unholy, Magical

You can detect the presence of any Anathema or Ally to your Deity within 120 feet. This doesn't give you the identity of such a Creature, but does give you the direction, and rough count.

Divine Tongue

Traits: Utility, Magical, Social

Whenever you reveal information to a Creature, you can choose to forcibly assure them of the truth of it (or lack thereof) based on your knowledge. Said Creature cannot attempt to disbelieve this without becoming an Anathema to your Deity.

If you knowingly or repeatedly misuse or abuse this Feat to convince someone that a truth is false, or that a falsehood is true, you cannot regain any Class Resources until 24 Hours have passed after such abuse has been discovered by the GM and/or other Players.

This punishment may be extended, shortened, or even changed depending on how your Deity would handle hypocrites, and having their authority/image tarnished.

Gathered Healing

Traits: Edge, Healing, Improvement

When you use Divine Power to restore Hit Points to a Creature, you can do so from a Range of 30 feet.

Additionally, when you Heal a Creature with any Holy/Unholy Action or Divine Spell you can choose an additional Creature within that Range (including you) to regain a number of Hit Points equal to 1d4 + your Spell Healing Modifier, ignoring limitations.

You can take this Feat any number of times, increasing the number of extra Targets by 1. However, you cannot Target the same Creature multiple times, and at least one Creature must be Bloodied.

Hallow/Defile

Traits: Edge, Buff, Damage, Holy/Unholy, Object, Radiant

Weeks: 1

Target: One Object or a 1 Mile Radius.

You either Hallow or Defile the Target. A Hallowed area can be expanded further.

Until Defiled, a Hallowed area cannot be entered by Undead, or any Enemy or Anathema to your Deity, which also cannot detect anything inside the area except through means that function across Planes of Existence.

Any such Creature that is already present is not forced to leave, but cannot Target anything outside the area either.

If a Hallowed Object is held by an Undead, Enemy or Anathema, they take Radiant Damage equal to your Wisdom Score at the Start of each of their Turns.

This Damage cannot be reduced by any means, and applies through Magical means of holding the Object (e.g. Mage Hand, Telekinesis).

Hallowing a Defiled area only removes the Defiled penalty, and must be Hallowed again to apply the benefits. Finally, a Defiling is the Unholy version, and inflicts Necrotic instead of Radiant.

An area can allow Undead provided it is specified upon Hallowing/Defiling, and the Undead isn't an Enemy to your Deity.

Improved Healing

Traits: Edge, Healing, Improvement

When you use any Holy/Unholy Action or Divine Spell to Heal a Creature, you roll an additional Die and add it to the Healing granted.

Flat Values are instead doubled.

Improved Smite

Traits: Edge, Damage, Holy/Unholy, Improvement, Radiant/Necrotic

When you use any Holy/Unholy Action or Divine Spell to inflict Radiant (or Necrotic if your Deity is Unholy) Damage to a Creature, you roll an additional Die and add it to the Radiant Damage dealt.

Flat Values are instead doubled.

If the Target is an Anathema or otherwise considered an Enemy to your Deity, all Damage Dice of that Type are also increased by 1 Category.

Protect from Evil/Good

Traits: Burn, Bludgeoning, Damage, Holy/Unholy, Push

5 Actions: 1 Divine Intervention

Range: Touch

Target: 15 ft. Sphere

Duration: 1 Minute

All Creatures that are considered an Anathema to your Deity must make a Charisma Saving Throw against your Wisdom Score:

- **Critical Failure:** Same as Failure, but they also take 1d6 Force Damage for every 10 feet pushed as Fall Damage, provided they impact any Object or sufficiently immovable Creature.
- **Failure:** They are pushed outside of the Target area, and cannot Attack into or through it.
- **Success:** They treat the area as Difficult Terrain, but aren't pushed.
- **Critical Success:** No effect.

Any such Creature that hasn't been, or would have been prevented from entry or attacking through the area, can attempt to do so by making the same Saving Throw.

Pull from Death

Traits: Burn, Healing

2 Actions: 1 Divine Intervention

Range: Touch

Target: A Creature that is Unconscious at 0 Hit Points, but not dead.

You restore the Target to consciousness at 1 Hit Point.

Purify

Traits: Burn, Nullify, Saving Throw

3 Actions: 1 Divine Intervention

Target: 1 Creature

You remove one Debuff effect the Target has, provided the DC to Save against it is less than your Wisdom Score.

If no Debuff is cleansed by this, the Target may reattempt one Saving Throw against a Debuff instead, ignoring any penalties of Failure from the roll.

Baneful Smite

Traits: Edge, Improvement, Persistent Damage, Radiant, Special

Prerequisite: Improved Smite

When you deal Radiant Damage using any Action or Feature with the Holy/Unholy Trait, you also inflict Persistent Radiant (or Necrotic if your Deity is Unholy) Damage equal to your Wisdom Modifier.

Special: This Persistent Damage is triggered an additional time every time the Target takes Damage from a Creature that is allied to you and/or your Deity.

Destroy Greater Undead

Traits: Edge, Improvement, Holy/Unholy, Weakness

Prerequisite: 5th Level, Destroy Undead

Destroy Undead is now considered a Weakness for all Undead, and bypasses Damage Thresholds for up to 1 Minute after a Creature Fails the Saving Throw.

Additionally, you can spend additional Divine Intervention to Target another Creature within Range for each Divine Intervention expended.

Divine Call

Traits: Blast, Improvement

Prerequisite: 5th Level

10 Actions: X Divine Intervention

Range: 60 ft.

Select any Action you have with the Holy/Unholy Trait, or any Divine Spell.

You apply the effects of the selected Action up to X times to any valid Targets within Range.

If the effect has a Duration or requires Concentration, it is applied X times, which does stack, even if it normally wouldn't.

Greater Purify

Traits: Edge, Improvement

Prerequisite: Purify

Purify also provides Advantage on any Saving Throws caused by it.

Improved Aura

Traits: Edge, Improvement

Prerequisite: Any Feat with Aura in its name.

The Radius of any Prerequisite Feat is increased by 5 feet.

This also extends to other Free Actions that effect an entire Range or Radius, such as various Bard Feats.

Purge

Traits: Burn, Ability Check, Nullify

Prerequisite: Purify

5 Actions: 1 Divine Intervention

Range: Touch

Target: One Creature

Make a Wisdom Spellcasting Check against the Spell Save DC of any Buffs on the Target, or the Target's Charisma Score (whichever is higher):

- **Critical Success:** You can choose to end any number of Buff effects on the Target.
- **Success:** You end one Buff effect on the Target.
- **Failure:** No effect.

Rebuke Anathema

Traits: Edge, Improvement

Prerequisite: Destroy Greater Undead

You can use Destroy Undead against any Creature that is considered an Anathema to your deity.

Resurrect

Traits: Blast, Ability Check, Exhaustion, Resurrection, Special

Prerequisite: 5th Level

Hours: 1

Target: The mostly complete body of a willing Creature that has been Dead for no more than 1 Week.

You must provide any sacrifice worth at least 10 * the Target's Level in GP. If either the sacrifice or thought behind it appeals to the Target's soul, all Ability Checks to this have Advantage.

During this process, you and all participating Creatures must appeal to the Target's soul, or your Deity through whatever means you have, tallying all totals together.

The DC of this Challenge is equal to 10 + the number of times the Target has died, even if they were Resurrected by other means that weren't Reincarnation.

- **Success:** The Target returns to life at 1 Hit Point with Exhaustion 10 and 0 Hit Dice.
- **Failure:** The Target can't be Resurrected, unless a good reason is provided to your Deity. In that case, a catch is added to the Resurrection.
- **Critical Failure:** The Creature can't be Resurrected by this Feat.

A catch for a Resurrected Creature may include things such as being unable to perform certain tasks, Resurrecting at a lower Level, or Dying when a task is completed.

Special: Auto-Success effects don't work with this. Any Feature that would improve or reduce the Degree of Success instead increases or reduces the total by 10.

Druid

Animal Companion

Traits: Edge, Minion

You are accompanied by a Beast as if it were from the Summon Beast (pg. 450) Spell at its lowest Tier with the following differences:

- The Duration is effectively infinite.
- They use your Proficiency Bonus in place of theirs, and can take an equal number of Actions as a Minion/Summon.
- They understand the Languages you know, but cannot speak. However, you can understand what they wish to communicate as a Sign Language.
- They spend your Hit Dice to heal when resting.
- They can use Actions from, and gain the benefits of your Druid Feats, spending your Druidry when needed.
- If you take a Long Rest in a Druidic Grove, you can resummon them if they died, and/or change their form, as long as the new form doesn't break any other rules.

You can take this Feat any number of times, but the total effective Hit Dice of all Summoned Beasts cannot exceed your Level, and you can only have one directly in Combat at a time, (unless your GM is okay with it).

Animal Messenger

Traits: Utility, Information, Magical

You may give an Item or message to any Non-hostile Beast, and speak the name of a Creature you know, along with any message you wish to send.

The Beast then travels independently of you until it reaches the recipient, delivers the item and/or message, before returning to wherever it came from (unless it wishes to do other things).

As part of this, the Beast avoids all Encounters, finds shelter along their path, and is able to locate sufficient food for its travels.

Special: If the Beast was Summoned, they last until the delivery is complete. Animal Companions return when you next complete a Long Rest after delivery.

Bestial Fury

Traits: Edge, Actions, Improvement

All of your Natural Weapon Attacks cost 1 less Action (minimum of 1).

If the Natural Weapon has the Reload Property (e.g. Bow from Shillelagh), this benefit applies to the Action Cost to Reload instead.

You can take this Feat any number of times.

Reminder: Unarmed Strikes are considered Natural Weapons.

Breath of Life

Traits: Burn, Buff, Persistent Healing

3 Actions: 1 Druidry

The Target gains Persistent Healing equal to your Spell Healing Modifier.

This doesn't work on Constructs or Undead.

Druidic

Traits: Utility, Language

You understand the Druidic Language and can use it to speak with Plants, Beasts, or other Creatures that have the Druid Class or Archetype (even if they don't know Druidic).

This Language cannot be taught to other Creatures.

Flesh Shaper

Traits: Edge, Improvement, Impaired, Nullify

Whenever you apply any effect with the Transformation Trait, you can choose to either Reduce any Impaired Condition by 1, or apply the Impaired Condition to any Ability Score of your choice, with a value equal to your Spell Damage Modifier.

The Impaired Condition lasts until the Transformation effect ends.

Follow the Trail

Traits: Utility, Travel

When traveling, you and your allies may choose to treat Encounter rolls as if you were on a Road (even if blazing a Trail), and cannot be Surprised in such Encounters.

Healing Spores

Traits: Edge, Healing, Improvement

When a Creature Starts their Turn with Persistent Healing granted by you, all other Creatures of your choice within their Reach also regain Hit Points equal to the Persistent Healing of the Triggering Creature, provided the Persistent Healing can Heal them.

This secondary Healing is still considered Persistent Healing, but effects like Nature's Embrace treat it as ongoing healing, rather than applied or provided.

You can take this Feat multiple times. If you do, you can extend the area by the Triggering Creature's Reach, or the Reach of all currently affected Creatures (which you still choose), once per copy of this Feat. Each Creature can only benefit from this effect once every Turn.

Lingering Essence

Traits: Edge, Improvement

When you grant Persistent Healing with a Duration, it doesn't Expire when the Duration Ends. Instead, it begins to degrade at the Start of your Turn, the same way all other forms of Persistent Damage degrade.

Lungs of the Forest

Traits: Utility, Immunity

When you Hold your Breath, you can do so for a number of Minutes equal to your Constitution Score (minimum of 1), and take an equal amount of time to die from suffocation.

Additionally, you are Immune to Inhaled effects and Poisons that aren't Magical, such as smoke.

Monstrous Shapes

Traits: Edge, Choice, Improvement

When you take this Feat, choose One Creature type, that isn't Celestial, Construct, Fey, Fiend, or Humanoid.

Whenever an effect specifies a Beast, it also applies to the Creature Type you have chosen.

Example: If you chose Plant, and have the Animal Companion Feat, you can change your Animal Companion to be a Plant.

You can take this Feat any number of times, picking a different Creature type each time.

Nature's Bounty

Traits: Utility, Downtime, Money

You gain a new Activity: Nature's Bounty

Through tending the land, you acquire unrefined materials with a total value that is less than or equal to your Level over the course of a day.

If the area you are in is particularly abundant, such as a grove, river, or jungle, this value is represented in PP, instead of GP.

You can perform this Activity outside of any town.

While performing this Activity, you may encounter unnatural decay, an absence of fauna, or possibly even a nefarious group hanging out around the area.

Nature's Embrace

Traits: Edge, Healing

Whenever you provide Persistent Healing, the Target gains a number of Temporary Hit Points equal to your Wisdom Score for up to 1 Hour.

Plant Stride

Traits: Burn, Movement

Free Action: 1 Druidry

Range: 60 feet

Trigger: When you take any Action with the Move Trait

For the Triggering Action, you treat two living Plants (must be willing if they're Creatures) within Range of each other as if they were the same space, and can enter freely, ignoring Difficult Terrain if you couldn't do so otherwise.

You cannot end your Turn in either of these spaces, unless the Plant doesn't occupy its space.

If there are no Plants within Range, you can cause a pair of Non-Magical Plants to sprout within the Range for the Duration.

Primal Rend

Traits: Edge, Actions, Improvement

All Natural Weapon Attacks you make deal additional Damage equal to your Wisdom Modifier, which ignores Resistances and Damage Thresholds.

Primal Resistance

Traits: Edge, Choice, Improvement, Resistance, Special, Temporary Healing

You gain Resistance to any Damage Type of your choice that isn't Physical, equal to your Level.

Whenever you Resist Damage in this way, you instead gain Temporary Hit Points equal to your Level, which applies to the next source of Damage you take.

Special: These Temporary Hit Points are added to the ones granted by Wildshape as if it was Healing.

You can take this Feat any number of times, picking a different Damage Type each time.

Rough Cover

Traits: Edge, Cover, Improvement

Difficult Terrain created by you also provides Half-Cover, unless it was from a Non-Magical Item.

Shillelagh

Traits: Edge, Improvement

3 Actions:

Range: 30 ft.

Duration: 10 Minutes

You conjure any Stone or Wooden Weapon, or up to 5 pieces of Ammunition (with the same restrictions) which are retrieved as part of this Action.

The Weapon uses your Wisdom Modifier for any Attack Roll, unless the Creature Wielding it has a higher Dexterity Modifier, and it is considered a Natural Weapon benefitting from only the Feats of the wielder.

Ammunition doesn't use your Wisdom, but is still considered to be a Natural Weapon.

Skilled Summoner

Traits: Edge, Improvement

Whenever you cast a Summon Spell, the Summoned Creature can be one Size Larger at no penalty.

This also applies to Transformation Spells and Animal Companion.

Step of the Wild

Traits: Utility, Movement, Nullify, Terrain

You no longer suffer the Non-Movement penalties of entering or standing on Difficult Terrain, such as the Damage dealt by entering Thorns, and you cannot be tracked by Non-Magical means.

Thorns

Traits: Burn, Damage, Improvement, Piercing, Terrain

3 Actions: 1 Druidry

Range: 15 feet

Duration: 1 Hour

You convert a 5 ft. Space into Difficult Terrain for the Duration. A Creature entering this terrain takes Piercing Damage equal to your Wisdom Modifier.

Additionally, when you make Difficult Terrain through other methods (e.g. Nature's Wrath), you can expend 1 Druidry to apply this effect to all created Terrain.

Touch of Decay

Traits: Burn, Debuff, Improvement

Free Action: 1 Druidry

Trigger: You inflict Damage with a Natural Weapon or Druid Feat.

You inflict a -1 Penalty to either the Damage Roll of a Weapon, or the Damage Reduction of any Armor they are wearing, which lasts until the Item is repaired.

This effect ends at the End of the Target's next Turn for Natural Weapons and Armor.

Toxic Healing

Traits: Burn, Debuff, Improvement, Persistent Poison, Poison

Free Action: 1 Druidry

Trigger: You grant Persistent Healing to a Creature.

The Target must make a Constitution Saving Throw against your Wisdom Score:

- **Failure:** You instead inflict Persistent Poison, which still benefits from any effects you have that apply to Persistent Healing, with the exception that they deal Poison Damage instead of Healing, or Temporary Healing.
- **Success:** The Healing is lost.
- **Critical Success:** The Healing is retained.

Any other Buffs are replaced with a corresponding Debuff instead, if available.

If the Target is Immune to Poison Damage, they are still subjected to this effect, but simply take no Damage from it.

Unsteady Ground

Traits: Edge, Flat-Footed, Improvement, Terrain

All Creatures of your choice within Difficult Terrain you make, are Flat-Footed.

Wildshape

Traits: Blast, Transformation

10 Actions: X Druidry

You Transform into any Creature you know of with the Beast Trait, provided it is not a Player Character, and isn't combined with another statblock (barring exceptions by the GM). The Beast's total number of Hit Dice also cannot exceed X.

You gain Temporary Hit Points equal to the Beast's Average Hit Points (assuming X Hit Dice) which last until Wildshape ends, as well as any Actions (that aren't Magical), Abilities, Speeds and Senses. Limited use abilities must recharge before you can use them.

During this time, you may use your Wisdom Score in place of one Ability Score of your choice, though this doesn't affect Hit Points if you use it for Constitution.

This Transformation lasts until you drop it as a Free Action, are Transformed by another effect, or you run out of Temporary Hit Points (replacement of Temporary Hit Points doesn't end this effect).

Lost Temporary Hit Points can be restored through Healing effects unless replaced, but cannot exceed your form's original effective Hit Point Average.

Finally, you can choose to merge equipment into your new form, keep it equipped, or let it drop to the ground.

World Shift

Traits: Burn, Terrain

1 Action: 1 Druidry

Range: 30 ft.

Pick any number of 5 ft. Spaces of Difficult Terrain within Range, up to your Wisdom Modifier

You arrange the Targeted Spaces around a point within range, as long as they are adjacent to each-other.

Note: Terrain you move this way doesn't benefit from Terrain Feats such as Unsteady Ground, unless it was already benefiting from them.

Fluid Form

Traits: Burn, Improvement

Prerequisite: Wildshape

Requirements: You are currently benefiting from Wildshape

5 Actions:

You change your current form into the form of a different Creature without spending Druidry, provided the new form has a lower effective Hit Point Average than your current Temporary Hit Points.

Alternatively, you may change which Ability Score Wildshape is currently affecting.

This effect doesn't restore or remove Temporary Hit Points.

Nature's Wrath

Traits: Edge, Terrain

Prerequisite: 5th Level

10 Actions: X Druidry

Duration: 1 Hour

You choose X Spaces to become Difficult Terrain for the Duration, which must be adjacent to you, or another piece of Difficult Terrain created by this Action. This Terrain is ignored by Creatures of your Choice.

On your Turn, you may Target All Creatures within any of this Terrain with the Overpower Action for Free, which uses your Wisdom instead of Strength where applicable. Any Grappled Creature is also Restrained.

Additionally, you may take any Action as if you were in any Space created by this Action.

Reincarnate

Traits: Burn, Resurrection

Prerequisite: 5th Level

Hours: 1

Restriction: You must be within a Druidic Grove, and in possession of any amount of the Dead Creature's remains (even if they are ashes) in order to perform this.

The Target may choose an Ancestry, which then replaces their own, though pre-existing Ancestry Feats are lost until they are Retrained. Your GM may allow the Target to pick a different Creature such as a Beast, though they might not allow you to continue playing as such a Creature if they aren't prepared for that.

The Target is reborn in a new body (often brand new) at Level 1 with no memories, other than recognizing old Friends and Family, while gradually recovering more exact memories as they reach maturity.

The Target gains 1 Level every time they complete an Encounter with any former Party Members until they catch up to where they were before they died. At that point, they continue to Level Up as normal.

Finally, if two Creatures are tied together by fate, both are Reincarnated at the same time (even if you only Target one of them, but not if the other is still alive) into circumstances that would likely cause them both to find their way back together.

This resets any Death counters for effects like Resurrection.

Shaped Claws

Traits: Edge, Damage, Improvement

Prerequisite: Wildshape

Your Attacks with Natural Weapons deal an additional Damage Die while benefitting from Wildshape.

Fighter

Careful Coordination

Traits: Utility, Feat, Long Rest

After you take a Long Rest, Each participating Creature can allow another participating Creature to use any Feat or Spell they have at any time, once, using Resources from either Creature.

This benefit doesn't apply to Blast Feats or Tiered Spells (unless both Creatures have access to that Tier). However, you don't need to pre-determine the Action or Feature.

You can take this Feat multiple times, granting another use per Creature, which doesn't need to use the same Feat.

Charge

Traits: Burn, Attack, Move, Weapon

Free Action: 1 Technique

Restriction: You must not be within 5 feet of a Hostile Creature, or any Target.

Take any Action with the Move Trait (spending Actions to do so), then take the Attack Action with a Melee Weapon you are Wielding (also spending Actions to do so).

The Target is considered Flat-Footed against this Attack, and is knocked Prone on a Hit.

If you take Damage during this Action, you stop Moving, and can't Attack.

Combat Specialist

Traits: Edge, Choice, Weapon

Pick one of the following benefits:

- **Giant Slayer:** The first time you Hit a Creature that is at least one Size larger than you on a given Round, your Damage Bonus from Ability Scores is scaled to the Creature's Size.
- **Horde Breaker:** Each time you Attack a Creature for the first time on your Turn, it doesn't count against your Multi-Attack Limit.
- **Perfectionist:** Whenever you Miss with an Attack Roll, the result of your next Attack is one degree better.

Commanding Strike

Traits: Burn, Audible, Verbal, Weapon

1 Action: 1 Technique

Target: Any friendly and willing Creature that can Hear you, and has at least 1 Action.

You and the Target take any Action with the Attack, Damage or Saving Throw Traits, which must Target the same Creature or Object.

As part of this, they may gain the benefits of any Action you have that costs Technique, spending additional Reactions, and expending your Technique if it costs more than 1 (for any excess). They also count limits on these Actions separately from you (e.g. Action Surge).

If the Action has the Final Trait (e.g. Adrenaline Rush), the Target skips their next Turn. And if it requires any modifiers or bonuses, it uses the Targets modifiers and bonuses.

Counter

Traits: Edge, Improvement, Weapon

Free Action: 1 Technique

Trigger: A Creature within Range of your Attack of Opportunity Hits you with an Attack.

You use Attack of Opportunity against the Triggering Creature as if they had Triggered it.

If you Hit, the Triggering Creature must re-roll the Triggering Attack.

Dancing Blow

Traits: Burn, Dodge

Free Action: 1 Technique

Trigger: You take any Action with the Attack Trait.

Immediately take the Dodge Action for Free.

Disarming Strike

Traits: Burn, Attack, Weapon

3 Actions: 1 Technique

Make any Melee Weapon Attack against a Creature within reach.

- **Critical Hit:** The Item is guaranteed to drop, and you can Interact with it as part of this Action.
- **Hit:** The Target must spend Reactions to retrieve an Item they're holding. Otherwise, they drop it.
- **Miss:** No effect.

Extra Surge

Traits: Edge, Improvement

You can use Action Surge an additional time on your Turn.

You can take this Feat any number of times, adding an additional Action Surge.

Feint

Traits: Burn, Ability Check, Deception

3 Actions: 1 Technique

Make a Deception Check against your Target's Wisdom Score:

- **Critical Success:** Same as Success, but you have Advantage on the next d20 Test you make against the Target before the Start of your next Turn.
- **Success:** The Target takes a Reaction of your Choice, but is forced to Miss.
- **Failure:** No effect.

This counts as a Missed Attack.

Fighting Style

Traits: Edge, Choice, Weapon

Chose one of the following Fighting Styles:

- **Cleaving:** When you Hit with an Attack that deals Slashing Damage, you also Target an additional Creature within Range, using the same Attack and Damage Roll. This extra Target doesn't count as an Attack (e.g. Technique, Multi-Attack Limit or Horde Breaker).
- **Crushing:** When you Hit with an Attack that deals Bludgeoning Damage, the Target becomes Flat-Footed until the Start of your next Turn.
- **Dual Wielding:** When you Attack with one Light Weapon while wielding at least one other, you can use two of them as part of the same Action or Attack, using the higher Action Cost if they're different. They count as separate Attacks.
- **Evasive:** You gain a bonus to your Avoidance Class equal to your Proficiency Bonus.
- **Fencing:** When you Miss an Attack with a one-handed Finesse Weapon, you still deal Damage equal to your Dexterity Modifier as if it were a Hit.
- **Heavy Blow:** When you Hit with an Attack using a Heavy Weapon, you roll 1 additional Damage Die, and drop the lowest.
- **Momentum:** When you Miss an Attack with a Two-Handed Melee Weapon, your next Attack with the same Weapon before the End of your next Turn has its Action Cost reduced by 2.
- **Piercing:** When you Hit with an Attack that deals Piercing Damage, you also apply 1 Persistent Bleed for every Damage Die the Attack inflicted.
- **Sharpshooting:** You don't suffer penalties from making Ranged Attacks while within Reach of a Hostile Creature, or at Long Range.
- **Throwing:** You can treat any Weapon as if it has the Thrown 20/60 ft. Property.

You can take this Feat multiple times, picking a new Fighting Style each time.

Heroic Finisher

Traits: Burn, Auto-Crit, Final, Weapon

Free Action: 1 Technique

Trigger: You Hit with an Attack Roll.

The Triggering Hit becomes a Critical Hit that treats all Damage Dice from the Weapon as if they were the highest possible values. End Your Turn.

If you are wielding two Weapons, you can apply this to both Attacks before Ending your Turn.

Indomitable

Traits: Burn, Saving Throw, Special

Free Action: 1 Technique

Trigger: When you make a Saving Throw

You re-roll the Triggering Saving Throw, adding a +1 bonus for each time you use this Reaction on the same roll.

Special: You can take this even if you don't qualify for Reactions.

Judge of Strength

Traits: Utility, Ability Check, Information

After you have spent 1 Minute observing or interacting with a Creature, you can make a Society Check against their Charisma Score:

- **Critical Success:** Same as Success, but you can choose to immediately attempt this Ability Check again.
- **Success:** You learn one of its Ability Scores, its Proficiency Bonus, one Proficiency it has, and one Ability or Feat it has, that isn't an Action.
- **Failure:** No effect.

You can only attempt this once on a given Creature every Hour (barring Critical Success).

Maneuvering Strike

Traits: Edge, Move, Weapon

Free Action: 1 Technique

Trigger: You Hit with a Weapon Attack

Take the Step Action for free.

Martial Discipline

Traits: Edge, Damage, Improvement, Weapon

When you Hit with a Weapon you are Proficient in, the Damage dealt cannot be less than your Proficiency Bonus + any flat Damage bonuses.

This minimum ignores Resistance, but not Damage Thresholds.

Mercenary Work

Traits: Utility, Downtime, Money

You gain a new Activity: Mercenary Work

By offering your services as a Guard, Soldier, or other Blade for Hire for a day, you can roll on the Table, or take 2:

d4	Result
1	You earn 1d4 SP, but lose a number of Hit Dice equal to your Proficiency Bonus, or an equal amount of health that cannot be reduced.
2	You earn Xd6 GP, where X is your Proficiency Bonus, but lose 1 Hit Die, or an equal amount of health that cannot be reduced.
3	You earn Xd6 GP, where X is your Proficiency Bonus, and you can expend any number of Hit Dice to gain an extra 1d6 GP for each.
4	You earn Xd6 GP, where X is your Proficiency Bonus + your Level. You can also expend any number of Hit Dice to gain 1d6 GP for each.

While performing Mercenary work, you may encounter a wounded civilian, an assassination attempt, or corrupted politicians or guards.

Military Supplier

Traits: Utility, Money

When purchasing Items that are Non-Magical or Consumable, any merchant has twice as many in stock.

Tip: It's best to allow shopping-based features like these to apply across PCs, as long as the Character is present.

Power Strike

Traits: Burn, Special, Weapon

Free Action: 1 Technique

Trigger: You make a Weapon Attack Roll.

You take a -4 Penalty to the Triggering Attack Roll, but gain a +5 Bonus to the Damage Roll.

Special: You can use this Action multiple times on the same Trigger.

Precise Strike

Traits: Burn, Special, Weapon

Free Action: 1 Technique

Trigger: You make a Weapon Attack Roll.

You take a -4 penalty to the Damage Roll, but gain a +5 Bonus to the Triggering Attack Roll.

Special: You can use this Action multiple times on the same Trigger.

Quick Load

Traits: Edge, Actions, Improvement, Weapon

Weapons with the Loading Trait cost 1 less Action to load (Minimum of 1).

You can take this Feat any number of Times.

Second Wind

Traits: Burn, Buff, Healing, Persistent Healing

1 Action: 1 Technique

Duration: 1 Minute

You regain 1d10 Hit Points, and 1 Persistent Healing for the Duration, or until you take Damage.

This Persistent Healing doesn't decay, but ends with the Duration.

Spell Breaker

Traits: Edge, Improvement

Free Action: 1 Technique

Trigger: You use Attack of Opportunity against an Action with the Magical Trait (even if you Miss).

The Target must make a Concentration Saving Throw against your Dexterity Score:

- **Critical Failure:** Same as Failure, but it cannot be used again this Turn.
- **Failure:** The Triggering Action fails to take effect, and the Action Points and Spell Slots are still spent.
- **Success:** No effect.

Spotter

Traits: Burn, Improvement, Sight

Free Action: 1 Technique

Trigger: Attack of Opportunity would be Triggered by a Creature within the Range of a Ranged Attack you have.

You use Attack of Opportunity against the Triggering Creature.

Reminder: Since this expends Technique, you don't regain any, even if you Hit with this Attack.

Warrior's Speech

Traits: Utility, Ability Check, Advantage, Bloodied

You have Advantage on all Charisma Checks you make while you are Bloodied, or when you spend at least 1 Minute giving a speech.

Weapon Master

Traits: Edge, Choice, Weapon

Pick a type of Weapon and gain the following benefits when using the chosen Weapon or similar Weapons:

- **Axe:** When you Hit a Creature that has Physical Resistance, you treat that Resistance as if it were reduced by your Proficiency Bonus.
- **Bow/Crossbow:** When you Hit with an Attack, you can choose to deal no Damage, and Grapple the Target to their space (This Grapple can be applied multiple times, increasing the total DC by 1 for each).
- **Dart/Bow:** When you Attack with this Weapon, you can Target additional Creatures up to your Proficiency Bonus ignoring the Multi-Attack Limit, provided you spend Ammunition for each Target, and don't Target the same Creature twice.
- **Firearm/Crossbow:** The first time you Attack with this Weapon each Turn, you have Advantage on the Attack Roll (or ignore Recoil after if it applies).
- **Hammer/Club:** Creatures you Hit are Stunned 1.
- **Natural Weapon:** Creatures you Critically Hit are Slowed equal to your Strength Modifier until the start of your next Turn.
- **Polearm/Staff:** You ignore the penalties of the Reach Trait.
- **Shield:** You always gain the benefits of the Block Action from all directions, as long as you are Wielding a Shield.
- **Sword/Dagger:** When you Critically Hit, the Target cannot Step, and the Move Action moves them half as far until the End of their next Turn.

Well Practiced

Traits: Edge, Proficiency

You treat all Weapons as if you are Proficient in them. Additionally, you may spend 1 Technique to treat an Attack as if it either does or doesn't have a particular Trait for the purpose of Feats and Actions (e.g. Fighting Style: Fencing and Fire Blast).

Spell Attacks that benefit from this are treated as Weapons with no Weapon Traits.

Weapons you are Proficient in don't spend this cost.

Adrenaline Rush

Traits: Blast, Final, Weapon

Prerequisite: 5th Level

20 Actions: X Technique

Make a number of Weapon Attacks equal to 5 + the amount of Technique spent, ignoring the Multi-Attack Limit, then End your Turn.

Tip: You can treat multiple Attack Rolls as one roll, instead of rolling them individually. Also, don't be afraid to use average values on Damage for this effect.

Bursting Wind

Traits: Edge, Improvement

Prerequisite: Second Wind

When you use Second Wind, you can choose to trigger the Persistent Healing a number of times equal to your Constitution Modifier (Minimum of 1), then remove the Persistent Healing.

If you already have Persistent Healing, you trigger the higher value, with any effects of both.

Greater Second Wind

Traits: Edge, Improvement, Saving Throw

Prerequisite: Second Wind

Second Wind grants Persistent Healing equal to your Constitution Modifier instead of 1, if it's greater.

When you take Damage that reduces your Hit Points while benefiting from Second Wind, you can make a Constitution Saving Throw with a DC equal to 10, or half the Damage taken, Whichever is greater:

- **Success:** The Persistent Healing remains.
- **Failure:** You lose the Persistent Healing.

This Saving Throw is considered a Concentration Saving Throw for the purpose of any effects that would apply, but doesn't apply the penalties.

Refined Strike

Traits: Edge, Improvement, Nullify

Prerequisite: Power Strike OR Precise Strike

The penalties applied by Power Strike and Precise Strike are reduced by 1.

You can take this feat multiple times, but cannot reduce the penalty to less than -1 for each stack.

Refined Style

Traits: Edge, Improvement

Prerequisite: Fighting Style

You gain the corresponding benefits depending on your chosen Fighting Style(s):

- **Cleaving:** Instead of Targeting one additional Creature on a Hit, you can Target two Creatures. Both additional Targets must be within Range of your Weapon, and all Targets must be within 5 feet of each-other.
- **Crushing:** When you hit a Creature with an Attack that deals Bludgeoning Damage, you can also knock the Target prone, or push them 5 feet without an Ability Check.
- **Dual Wielding:** All Weapons wielded by you are considered Light for the purpose of Dual Wielding, provided you are wielding them in one hand each.
- **Evasive:** You gain Technique from Attacks that Miss you, even when you don't Dodge. You also gain 1 Technique when you Succeed on Strength or Dexterity Saving Throws.
- **Fencing:** If you are wielding a Finesse Weapon and are Hit by a Weapon Attack, you can spend 1 Technique to reduce the Damage taken by your Dexterity Modifier (any number of times) unless you are Incapacitated.
- **Heavy Blow:** When you Hit with a Heavy Weapon, you take the highest value for one Damage Die of your choice.
- **Momentum:** When you Miss an Attack with a Two-Handed Melee Weapon, the next Attack you make also deals an additional Damage die for each Miss.
- **Piercing:** You treat Piercing Resistance as a Damage Threshold that cannot be bypassed, and ignores Weaknesses.
- **Sharpshooting:** All Ranged Attacks you make ignore Cover, as long as you can see any part of the Target's space.
- **Throwing:** Thrown Weapons are considered Finesse, and add both Strength and Dexterity to Damage Rolls.

Monk

Blinding Flurry

Traits: Edge, Improvement

Any Creature that is ever within your Reach at the Start of, or during your Turn is considered to be within your Reach until the End of your Turn.

Effects that require a Creature to Enter or leave your Reach (e.g. Brace, Knight: Impale) still apply.

Breaker Stance

Traits: Edge, Buff, Concentration, Weapon

5 Actions: 1 Ki

While Concentrating, your Unarmed Strikes and Monk Weapon Attacks ignore Cover.

Also, Physical Damage you deal this way is reduced to any amount that is less than your Proficiency Bonus, the Target still takes Damage up to your Proficiency Bonus, or the original Damage dealt (whichever is lower).

Deflect Missile

Traits: Blast, Nullify

2 Reactions: X Ki

Trigger: A Ranged Weapon Attack Hits you.

You reduce the Damage taken from the Triggering Attack by $Xd10 +$ your Wisdom Modifier.

Diverse Training

Traits: Edge, Weapon

Pick any Weapon you are Proficient in. That Weapon is now a Monk Weapon for you.

Enlightenment

Traits: Utility, Nullify, Travel

You treat all Planes of Existence as if you originated from them, unless you decide otherwise.

Note: In the event of random effects from a plane of existence, you cannot ignore the effect after rolling.

Fists of Iron

Traits: Edge, Damage, Improvement

The Damage Die of your Monk Weapons and Unarmed Strikes is increased by 1 Category (maximum d12).

You can take this Feat multiple times, increasing the category each times, up to a d12.

Forceful Blow

Traits: Burn, Push, Weapon

Free Action: 1 Ki

Trigger: You Hit a Creature with an Unarmed Strike or Monk Weapon.

You Push the Target 10 feet away from you without an Ability Check. This distance increases with the Target's Size.

Gentle Fall

Traits: Utility, Nullify

When you would take Damage from Falling or being thrown, you reduce the number of Damage Dice by your Level, which applies after limiting the Damage to $20d6$. If the Damage is maxed out from falling an exceptionally long distance, you reduce the total by 6.

If you take no Damage, you don't fall Prone.

Ki-Strike

Traits: Burn, Weakness

Free Action: 1 Ki

Trigger: When you Hit with an Unarmed Strike or Monk Weapon.

You ignore the Target's Damage Threshold for the Triggering Attack.

Leaf on the Wind

Traits: Burn, Movement, Nullify

1 Reaction: 1 Ki

Trigger: An Attack would hit you.

You immediately Step once for Free, and reduce the Triggering Attack Roll by your Wisdom Modifier if you're still within Range.

Meditation Stance

Traits: Edge, Concentration, Resource

Free Action:

Until you drop Concentration, you regain 1 Ki Point at the Start of each of your Turns.

Part-Time Guru

Traits: Utility, Downtime, Experience, Money

You gain a new Activity: Part-Time Guru

By spending your time teaching others of wisdom and meditation while performing other forms of labor such as creating art or building, you earn an amount of GP each day equal to your Wisdom Score.

Additionally, any Creature of your choice that is at a Level lower than yours may gain 1 Experience Point, provided this doesn't cause their unspent Experience to exceed your Proficiency Bonus, or cause them to Level Up.

While performing your work, you may come across a person seeking wisdom or guidance. They might be trying to get away from a dangerous relationship, gain better control of chaotic tendencies or Magical mishaps, or possibly even seek strength to conquer a powerful Foe.

Patient Defense

Traits: Edge, AC

You can use Wisdom instead of Dexterity for calculating AC, assuming you can use Dexterity.

Perfected Body

Traits: Utility, Nullify

You no longer suffer any penalties of aging, even if it's from Magical sources.

Additionally, if you have a Bleed with a Counter that doesn't remove it, you may choose to treat the Bleed as if you were under the effects of the Counter.

This doesn't prevent you from aging, though it does prevent you from dying of old age, and Afflictions.

You can only apply this benefit to one Bleed at a time, and Afflictions that would kill you instead treat any fatal Condition or effect as if it didn't take place.

Pressure Point

Traits: Edge, Manipulate

Free Action: 1 Ki

Trigger: You Hit a Creature with an Unarmed Strike or Monk Weapon.

The Target takes one Action of your Choice for free, provided it doesn't have the Manipulate Trait.

Any d20 Test for the Triggered effect is made at Disadvantage (or Advantage for Saving Throws), and the Target expends any uses and Resources that are required.

Recenter

Traits: Burn, Final, Nullify, Special

Free Action: 1 Ki

Reduce one of the Frightened, Stunned, Slowed, Drained or Impaired Conditions by 1. End your Turn.

You can take this Feat any number of times, adding 1 to the reduction when used, which you can distribute freely.

Special: You can use this while Incapacitated, but not while Unconscious.

Rushing Stance

Traits: Burn, Buff, Concentration, Multi-Attack, Nullify

5 Actions: 1 Ki

Until you drop Concentration, your Unarmed Strikes and Monk Weapons don't count against the Multi-Attack Limit when they Hit.

Shared Teachings

Traits: Utility, Audible, Experience, Long Rest

When you finish a Long Rest, you can give your Experience Points to any other Creature, provided they're of a lower Level than you.

Solid Stance

Traits: Burn, Buff, Concentration, Nullify

5 Actions: 1 Ki

Until you drop Concentration, you reduce all Damage you take by your Wisdom Modifier. Additionally, you cannot be moved against your will, including Teleportation, and being picked up.

Step of the Wind

Traits: Edge, Movement

When Moving, you treat walls and liquids as if they were solid ground, even if your Movement causes them to break.

You still fall or sink if you don't take at least 1 Move action on your Turn, and flowing liquids still Push you as if you were submerged.

Additionally, when you Jump you can Jump any distance up to your Movement Speed (whichever you used before Jumping).

Stunning Strike

Traits: Burn, Debuff, Saving Throw, Stunned

Free Action: 1 Ki

Trigger: Immediately after hitting with an Unarmed Strike or Monk Weapon.

The Target must make a Constitution Saving Throw against your Wisdom Score:

- **Critical Failure:** Same as Failure, but the Stunned Condition equals your Wisdom Modifier.
- **Failure:** They're Stunned 1.
- **Success:** No effect.

Fluid Stance

Traits: Edge, AC, Buff, Concentration

Prerequisite: Patient Defense

5 Actions: 1 Ki

Until you drop Concentration, you add both Dexterity and Wisdom to your AC.

Additionally, you add your Wisdom Modifier to Strength and Dexterity Saving Throws.

Improved Ki-Strike

Traits: Edge, Improvement, Special

Prerequisite: Ki-Strike

All Damage dealt by you cannot be reduced to less than 1 or the amount dealt, except by Immunities.

You can take this Feat multiple times, increasing the Minimum Damage.

Special: While using Breaker Stance, you add your Proficiency Bonus to this value.

Meditative Purge

Traits: Edge, Improvement

Prerequisite: Recenter

When you use Recenter, you can also treat any Condition or Affliction of your choice as if you had passed the Saving Throw.

Perfected Defense

Traits: Edge, Resistance

Prerequisite: Deflect Missile OR Patient Defense OR Solid Stance

You have Resistance to all Damage equal to your Wisdom Modifier.

Return Missile

Traits: Burn, Attack

Prerequisite: Deflect Missile

Free Action: 1 Ki

Trigger: You use Deflect Missile to reduce the Damage of a Ranged Attack to 0.

Range: 60 ft.

Make a Ranged Weapon Attack against a Creature within Range, using the Triggering Attack as if it were a Monk Weapon with the Finesse Property.

Special: If you also have Spell Deflection, you still treat it as a Weapon Attack, applying the effects of the original Spell at the Target location, using your Weapon Attack Bonuses in place of Spell Attack Bonuses, and your Constitution Score in place of Spell Save DC.

Spell Deflection

Traits: Edge, Improvement

Prerequisite: Deflect Missile

You can use Deflect Missile against Ranged Spell Attacks.

Whirlwind Strike

Traits: Blast, Attack

Prerequisite: 5th Level

20 Actions: X Ki

You Step, then Attack with your Monk Weapon, or an Unarmed Strike X times, both for free.

If you are dual wielding Light Monk Weapons (e.g. Unarmed Strikes) you can strike with both Weapons simultaneously for each Attack.

You can Step into any unoccupied space, even if it wouldn't support you (e.g. air), and skip either Action if you don't want to Step or Attack. If you aren't on a solid surface at the End of your Turn, you fall if you can't stop yourself.

Reminder: You can roll multiple Attacks at once, if you call it out before rolling.

Rogue

Accuracy

Traits: Edge, Improvement

You gain a bonus to all Attack Rolls and Ability Checks that you make against Creatures with a lower Initiative than yours, equal to your Proficiency Bonus.

Bonus Action

Traits: Burn, Actions

Free Action: 1 Cunning

The next Action you take with the Manipulate Trait has its Action Cost reduced by 5 (Minimum of 0). This effect stacks with itself.

Cripple

Traits: Burn, Debuff, Weapon

Free Action: 1 Cunning

Trigger: You Critically Hit a Creature

Pick any Trait that isn't Edge, Burn, Blast, Utility or Bleed. Until the Target finishes any Rest, all Actions they take with the chosen Trait cost twice as many Actions as usual.

This penalty doesn't stack on the same Action, even if multiple affected Traits apply to it.

Critical Weakness

Traits: Edge, Auto-Crit, Weakness, Weapon

Whenever you Hit with an Attack that benefits from a Creature's Weakness, the Attack is Critical against that Creature.

Disengage

Traits: Burn, Move

2 Actions: 1 Cunning

Until the End of your Turn, you cannot Trigger Reactions or Free Actions, unless you decide otherwise.

Evasion

Traits: Burn, Nullify

Free Action: 1 Cunning

Trigger: You make a Dexterity Saving Throw.

Take one Action with the Move Trait as a Reaction, and treat the Triggering Saving Throw result as one degree better (e.g. Success to Critical Success), or two degrees better if you end this Movement outside of the Range.

Fence

Traits: Utility, Downtime, Money

You gain the following Activity: Search the Black Market

Spending at least one day in a city, you locate the presence of any Black Market where you can purchase or sell illegal items without being tracked.

However, the Black Market of many towns can be much more dangerous than standard dungeons, as most of these merchants are capable of either killing common folk, or escaping with their merchandise if given reason to do so.

Items in the Black Market are worth 10x their standard price if they're illegal, dangerous or stolen.

Grand Scheme

Traits: Utility, Ability Check, Downtime, Money

You gain a new Activity: Grand Scheme

Whether by planning a Heist, starting a risky Business, or somehow employing a quick scheme, you spend X GP to perform a series of ~3-5 Skill Checks depending on the complexity and risk of the task you choose. Each additional day you spend adds your Level to X for free.

If you have more Successes than Failures, you Succeed. If you have twice as many Successes than you have Failures, you Critically Succeed, and vice versa.

- **Critical Success:** You earn $Xd10 * Xd10$ GP and are completely untraceable. You may even gain an extra item depending on the scheme.
- **Success:** You earn $X * 1d10$ GP, though some enemy such as law enforcement might trace the scheme to you and any allies of yours in the future.
- **Failure:** You earn nothing from the scheme, and gain the Wanted Bleed with a bounty equal to the amount of gold spent.
- **Critical Failure:** You lose $X*5$ additional GP, or are arrested and sentenced depending on the amount owed. Certain places may not accept payment to clear the bounty.

Success or Failure, during your preparations, you may discover a powerful Artifact, major secrets around a business, or dealings in criminal spaces.

Looter

Traits: Utility, Loot

When you make any Ability Check to obtain Monster or Lair Loot, you roll at Advantage.

If there is no Check, the Loot is rolled twice (using the highest result), even if you're not the one looting it.

If there is no loot to be rolled, you gain an additional copy of one looted Consumable item for each member of your Party, or double any monetary reward (doesn't apply to Artifacts).

This always applies, even if a Party Member collects the loot or reward elsewhere, provided you are alive, and helping with the Quest or Adventure (or at least doing your best).

Note: You may need to remind the GM about this Feat on occasion, but only if your Character is alive and helping.

Planner

Traits: Blast, Initiative, Special, Terrain

Free Action: X Cunning

Trigger: When you Ambush a Creature in Combat.

Mark X Spaces that you can see until the End of Combat.

Whenever a Hostile Creature enters a Marked Space within your Line of Sight, you may immediately take any Action you have as a Free Action, provided it doesn't have the Final Trait.

Once a marked space has been used in this way, it cannot be used again this Combat.

Special: You can take this Free Action before the Initiating Creature acts, even if your Initiative is lower.

Reliable Talent

Traits: Utility, Ability Check, Special

Free Action: 1 Cunning

Trigger: You make a d20 Test with a chosen Proficiency.

You take 10 on the d20 instead of rolling.

If you fail a d20 Test you make this way, you can attempt it again on your next Turn without suffering the consequences of a repeated check (Further d20 Tests are still considered repeated).

Upon taking this Feat, pick up to three Skills or Tools you are Proficient with, which become Triggers.

You can take this Feat any number of times, adding one additional Proficiency to the available Triggers.

Special: If you have Expertise in any of the Triggers, you take 20 instead of 10 for those Triggers only.

Riposte

Traits: Burn, Auto-Hit, Damage, Weapon

Free Action: 1 Cunning

Trigger: When a Creature Misses you with a Melee Weapon Attack.

Expend the Action Cost of the Weapon you are Wielding, and roll Damage against the Triggering Creature as if you Hit, though it doesn't count as an Attack.

Slippery

Traits: Edge, Immunity, Improvement

You cannot be Flat-Footed, unless you are Surprised, and can Step once for free the first time you would be considered Flat-Footed each Round.

Sneak Attack

Traits: Blast, Damage, Precision, Weapon

Free Action: X Cunning

Trigger: You deal Precision Damage.

Add X Extra Damage Dice to the Precision Damage dealt (minimum category of d6).

If the Target is within the Reach of an ally to you, or you have Advantage on the Attack Roll, X is increased by 1, even if you don't spend Cunning on this Feature.

Steady Aim

Traits: Burn, Advantage, Buff

1 Action: 1 Cunning

Your next Attack Roll is made at Advantage, and re-rolls any 1s on the Damage dice.

Thieves' Cant

Traits: Utility, Language

When you communicate to any Creature you share a Language with (even if they don't have Thieves' Cant), you can use Thieves' Cant to make your communication sound like nonsense, or meaningless jargon to anyone other than the receiving Creature, that doesn't also have Thieves' Cant.

You also gain a smaller set of codes to share with your allies, that act as a full language and can be spoken by them. When you do so, you can use exotic or natural sounds that aren't recognizable as speech.

Unbalance

Traits: Burn, Flat-Footed

Free Action: 1 Cunning

Trigger: You Succeed on a d20 Test caused by a Reaction against another Creature.

The Target becomes Flat-Footed until the End of your next Turn, and can't add their Proficiency Bonus to any d20 Test while Flat-Footed in this way.

Uncanny Dodge

Traits: Burn, Dodge

Free Action: 1 Cunning

Trigger: A Creature Misses you while you are benefitting from the Dodge Action.

The Triggering Attack instead Hits any Creature other than you that is within Reach of you, or the Triggering Attack.

Assassinate

Traits: Blast, Damage, Nullify, Weapon

Prerequisite: 5th Level

Free Action: 5 Cunning

Until the End of your next Turn, your next Attack Roll that Hits becomes Critical and ignores both Damage Resistances and Thresholds.

Additionally, whenever you roll the maximum value on any Damage Die for the corresponding Damage Roll, you roll an additional die, and add it to the result.

This effect cannot cause you to roll more additional dice than your Level, but does trigger with any additional dice granted by this effect, or another.

Improved Accuracy

Traits: Edge, Improvement

Prerequisite: Accuracy

The Bonus to Hit is increased to equal the difference in Initiative, unless the original Bonus would be higher.

Additionally, the base Bonus always applies if you have Advantage.

Improved Evasion

Traits: Edge, Improvement

Prerequisite: Evasion

You can use Evasion even if the Saving Throw uses Strength or Constitution.

Perfected Evasion

Traits: Edge, Improvement

Prerequisite: Improved Evasion

Evasion now applies to all Saving Throws.

Repurpose

Traits: Utility, Thieves' Tools

Prerequisite: Proficiency in Thievery

After you successfully disarm a Non-Magical Trap with Thieves' Tools or pick a Lock, you may spend 10 Minutes to reclaim any usable components, including the lock, or any Ammunition that was used in the Crafting process.

Some Traps such as Pit Traps, Boulder Traps, or Log Traps may not have any components worth reclaiming, for what should be obvious reasons.

Tumble

Traits: Burn, Acrobatics, Improvement

Prerequisite: Proficiency in Acrobatics

Free Action: 1 Cunning

Trigger: You take the Dodge Action or Reaction

Until the Start of your next Turn, you add your Proficiency Bonus to your AC.

Sorcerer

Bloodline Resilience

Traits: Edge, Choice, Resistance

Select a single Damage Type that isn't Physical. You have Resistance to that Damage Type equal to your Constitution Score.

You can pick this Feat multiple times, choosing a different Damage Type each time.

Charming Negotiator

Traits: Utility, Advantage, Downtime, Money

You gain a new Activity: Charming Negotiator

Whether by offering your services to aid in debates, councils, or even just moonlighting at the local tavern, you use your innate power to ensure negotiations go well, and even secure a bit of authority.

You earn an amount of GP each day equal to half your Charisma Score (rounded up). Additionally, you have Advantage on all Ability Checks using Intelligence, Wisdom or Charisma while in the city for one week after performing this Activity for a day.

While working in this way, there's a significant chance that somebody will notice your innate magic, or that you will run into another Creature trying to get their way from some negotiations. Or, you could gain favor in a town that might not normally accept you.

Dooming Spell

Traits: Burn, Debuff, Disruptible, Metamagic

Free Action: 1 Sorcery

Trigger: You inflict Damage with a Spell

You immediately inflict one of the following Debuffs to all Creatures that took Damage from the Triggering Spell: Drained X, Frightened 1, Slowed 1.

X equals the Damage dealt by the Triggering Spell.

Fueled by Sorcery

Traits: Burn, Resources, Special

Free Action: 1 Sorcery

You gain one of another Class Resource you have access to, even if it would go beyond your maximum.

Alternatively, you add 1 Charge to any Common Magical Item that has Charges (e.g. Ring of True Strike).

Excess Resources and Charges are lost at the End of your Turn.

Special: Any effects that would replace or reduce the Sorcery cost for this Action (e.g. Bardic Inspiration) do not apply to this Feat. You must spend Sorcery.

Improvised Spell

Traits: Blast, Spellcasting

You can cast Spells you have access to but aren't Prepared, by expending Sorcery Points equal to the Spell's Tier in addition to the Actions and Spell Slot requirements (unless replaced by other means).

Infused Blood

Traits: Edge, Choice, Magical

Select any Spell you can cast without expending Spell Slots (such as a Cantrip), that can Target you.

If the Spell has any Healing Trait, it only works while you are Bloodied, and if it inflicts Damage, it only works while you aren't Bloodied. Otherwise, no restrictions.

At the Start of your Turn if you aren't Dying or Dead, you gain the effects of the Spell at its lowest Tier (Targeting you), automatically Hitting any Attack Roll or Failing any Saving Throw included.

If the Spell requires Concentration or has a Duration, the effects only reapply if they are lost, or can change with a subsequent cast.

You can take this Feat any number of times, picking a different Spell each time.

Magical Resilience

Traits: Burn, Advantage, Nullify

Free Action: 1 Sorcery

Trigger: You take Damage from, or make a Saving Throw against a Magical effect.

You either reduce the Damage taken by half (Rounded down, before Resistance), or make the Triggering Saving Throw at Advantage.

Potent Metamagic

Traits: Edge, Improvement

All Spells you cast with the Metamagic Trait are Empowered once for free.

You can take this Feat any number of times, Empowering applicable Spells an additional time.

Quickened Metamagic

Traits: Edge, Improvement, Spellcasting

Metamagic Spells you cast no longer count towards the Multi-Attack Limit, provided you expend at least 1 Spell Slot or Sorcery Point to cast them.

Reliable Magic

Traits: Burn, Failure, Metamagic, Saving Throw

Free Action: 1 Sorcery

Trigger: A Creature Succeeds on a Saving Throw against a Magical effect by you.

The Triggering Creature treats the Saving Throw as if their Success was one degree worse, though any Conditions that would apply, end at the End of the Target's next Turn (if they wouldn't end sooner) as if Disrupted, and all Damage Dice take the minimum value.

Special rules about any such Conditions, such as additional restrictions or limits (e.g. While Stunned/Poisoned in this way...) do not apply if they are negative.

Sculpt Spell

Traits: Burn, Metamagic, Range

Free Action: 1 Sorcery

Trigger: You cast any Spell with any of the listed Ranges, or Areas.

You change either the Range or the Targeted Area of the Triggering Spell to another based on the following values as if they were ratios:

- 30 ft. Range (One Target).
- 10 ft. Cone.
- 15x5 ft. Line.
- 5 ft. Radius Sphere.

If this change causes the Triggering Spell to have no Range, the Area originates from your space (doesn't affect your space).

Shared Bloodline

Traits: Edge, Improvement, Magical

Whenever any Reaction or Free Action you have would be Triggered for a Creature that shares your Blood, you can expend any required Resources (if any) for them to spend Reactions to take it, using their corresponding statistics and Reactions, as long as you are alive and willing (Undeath does count as being alive).

Over the course of a Long Rest, you can sacrifice 1 Hit Die to Magically share your blood with another Creature until they finish their next Long Rest (no Bloodletting Tool required).

Ancestors and Descendants automatically benefit from this without needing it to be shared, but only for one generation.

Show of Power

Traits: Utility, Ability Check, Magical

Free Action: 1 Sorcery

Trigger: You make a Charisma Check

Instead of rolling, you use your Spell Save DC as the d20 result (20+ doesn't apply the +10 bonus from a Natural 20).

Spell Conversion

Traits: Burn, Metamagic, Spellcasting

Free Action: 1 Sorcery

Requirement: You must be Concentrating on at least one Spell.

You lose the effects of the Required Spell, and immediately cast a new Spell without spending Actions, Targeting any Creatures that are under the ongoing effects of the original Spell, automatically Hitting any Attack, or having them automatically Fail any Saving Throw.

If the new Spell is cast at a lower Tier than the original Spell or a 1st Tier Cantrip, you don't expend a Spell Slot. Otherwise, you must expend the corresponding Spell Slot.

Note: Hazards like Command Fire don't allow the new Spell to Target enveloped Creatures, as the Damage and effects are applied each Turn and not ongoing. However, other area effects like Zone of Truth would, since it has an ongoing effect on affected Creatures.

Stored Spell

Traits: Blast, Metamagic, Item

1 Minute: X Sorcery

X equals the Tier at which you cast the corresponding Spell.

As part of this Action, cast a Spell with a Casting Time of 1 Minute or less, providing all Components. The resulting Spell is stored for up to 8 Hours in any Object you touch.

Any Creature can use the Interact Action to cast the Spell instantly, including any Metamagic effects that have been applied to it at the time of casting, though it cannot be modified further once cast.

You can only store a number of Spells in a single Object equal to your Intelligence Modifier (Minimum of 1).

Stubborn Concentration

Traits: Burn, Auto-Success, Concentration

Free Action: 1 Sorcery

Trigger: You Fail a Concentration Saving Throw.

You instead Succeed on the Triggering Saving Throw, and ignore the Action Penalty from the Save.

Subtle Spell

Traits: Utility, Metamagic

Free Action: 1 Sorcery

Trigger: You cast a Spell.

You ignore the Verbal and Somatic Components of the Triggering Spell without the Action Cost penalty for Bypassing.

Swift Empowerment

Traits: Burn, Actions, Metamagic, Spellcasting

Free Action: 1 Sorcery

Trigger: You Empower a Spell to any higher Tier.

You remove the Action Cost penalty to Empower the Triggering Spell, regardless of Tier.

Cantrips instead have the penalty reduced to 1.

Unnatural Element

Traits: Burn, Damage

Free Action: 1 Sorcery

Trigger: The Damage of a Spell you cast is reduced by any means.

The Spell's Damage is reduced by half, but ignores Resistance, Immunity, and Damage Thresholds.

Bloodline Casting

Traits: Edge, Improvement, Metamagic, Range

Prerequisite: Shared Bloodline

Any Spell you cast that can Target you, can instead Target any Creature who benefits from Shared Bloodline, regardless of Distance, or Targeting restrictions.

Extended Bloodline

Traits: Utility, Improvement

Prerequisite: Shared Bloodline

Shared Bloodline extends to an additional generation.

You can take this Feat any number of times, adding another generation to this value.

Heightened Resilience

Traits: Edge, Improvement

Prerequisite: Bloodline Resilience

Your Damage Resistance is doubled for all choices from Bloodline Resilience.

“I Am the Battery”

Traits: Utility, Creature, Improvement, Item

Prerequisite: Fueled by Sorcery

Fueled by Sorcery also applies to Uncommon Magical Items as well as Constructs that require Charges, and the Charges last 1 additional Minute.

You can take this Feat multiple times, increasing the maximum Rarity you can charge by 1 category, up to Legendary.

Note: Your GM may allow some Items, Objects or Creatures to be charged, even if you shouldn't be able to do so (such as Gadgeteer's Clockwork Creations).

Power Surge

Traits: Blast, Empower, Metamagic

Prerequisite: 5th Level

5 Actions: X Sorcery

Until the End of your Turn, you increase all Empowered (+X) effects by X without expending additional Actions, or Empowering the Spell.

Note: this doesn't require additional Actions, but doesn't trigger other Empowered effects, or increase its Tier. Also, if desired, you can freely forgo any Empowered effects.

Warlock

Agonizing Gifts

Traits: Edge, Choice, Improvement

Your Cantrips add your Proficiency Bonus to Damage Rolls, in addition the the Spell Damage Modifier.

Alternatively, when taking this Feat, you can choose for it to apply to the Spell Healing Modifier.

You can take this Feat a second time, gaining both benefits instead of choosing.

Backlash

Traits: Burn, Damage

Free Action: 1 Pact Point

Trigger: You take Damage from an Attack that reduces your Temporary Hit Points.

Your Attacker takes Force Damage equal to the number of Temporary Hit Points you lost.

Beguiling Influence

Traits: Utility, Ability Check, Advantage, Buff

Free Action: 1 Pact Point

Trigger: You Succeed on a Charisma Check.

You have Advantage on your next Charisma Check against all Targets.

Blood Sacrifice

Traits: Burn, Resources, Self Damage, Weapon

2 Actions:

Roll your Hit Die (excluding Constitution) and lose that many Hit Points, which cannot include Temporary Hit Points, nor can this loss be reduced by any means.

Regain 1 Pact Point, and Trigger any effects or Reactions that require you to take Damage, as if a Creature of your Choice within 30 feet of you dealt it.

This sacrifice counts against your Multi-Attack Limit using one limb of your choice.

Devil's Sight

Traits: Utility, Metamagic, Nullify, Sense

Free Action: 1 Pact Point

Duration: 1 Minute

For the Duration, you can see through Magical Darkness as if it were normal Darkness.

Alternatively, one Light source you Touch causes its Bright Light Radius to illuminate Magical Darkness.

Any area illuminated by this effect is excluded from any effect caused by Darkness.

Eldritch Blast

Traits: Burn, Attack, Force, Resources, Spell

Evocation Cantrip

Actions: 3

Range: 60 ft.

Components: V, S

Target: One Creature

Damage: 1d8 Force

Make a Ranged Spell Attack against all Targets, dealing the listed Damage, and restoring one Pact Point if you Hit at least one Attack.

This Spell is only available through the Eldritch Blast Feat.

Empowered (+1):

You Target one additional Creature. You can Target the same Creature multiple times.

Note: You only roll one Attack Roll for the entire Spell.

Eldritch Step

Traits: Burn, Movement, Special, Teleport

Free Action: 1 Pact Point

Trigger: You take Damage.

You Teleport up to 5 feet. If this teleports you out of Range of a Damage source, you take no Damage.

Special: You can take this Free Action on your Turn without a Trigger.

Gain Favors

Traits: Utility, Downtime, Money, Resources

You gain a new Activity: Gain Favors

You spend your time seeking out hauntings, establishing quiet connections, sowing rumors, or anything else that might establish your presence and authority without raising too many questions.

For each day, you gain 1 Favor, which you can use in place of Pact Points outside of Combat, to gain the benefits of a Simple Lifestyle for free (2 for Comfortable and 4 for Luxurious), to automatically Succeed on a Charisma Check to get a Creature to help you in some way, or acquire any Item worth less GP than your Charisma Score, or get an equivalent discount on an Item, even if it wouldn't normally be for sale.

Favors are linked to the location at which you gained them, and cannot be used elsewhere, except in relation to the location in question.

You may come across a Quest you can complete to gain several Favors at once, or your Patron may push you to fulfill a number of tasks on their behalf. But beware, sometimes when you purchase something that wasn't for sale, someone will seek to claim what they requested.

Hex

Traits: Burn, Damage, Curse, Debuff, Disruptible, Necrotic

2 Actions: 1 Pact Point

Range: 30 ft.

Duration: 1 Minute

One Creature you choose within Range is Cursed for the Duration.

While Cursed in this way, they take 1d6 Necrotic Damage whenever they're Hit by a Spell Attack, or fail any Saving Throw against a Magical effect.

You can expend additional Pact Points to double the Duration of this effect.

Hungry Souls

Traits: Burn, Damage, Drained, Magical, Necrotic

2 Actions: 1 Pact Point

Range: 30 ft.

Requirement: You must be within 30 feet of a Dead Creature that isn't a Construct.

A Target within Range takes 1d6 Necrotic Damage as if from a Spell Attack, which applies the Drained Condition with an equal value to the total amount taken. This also doesn't count towards the multi-Attack Limit.

Each corpse can only contribute to this Action once per Day.

Lifedrinker

Traits: Edge, Temporary Healing

When you deal Necrotic Damage to a Creature, you gain Temporary Hit Points the total amount taken.

Mysteries of the Occult

Traits: Utility, Ability Check

When you make an Intelligence Check, you learn one additional detail, even if you Fail.

If there are no details to learn, you may ask the GM for a name, which must connect to the information you wish to learn.

The name could be the name of an ally, item, place, book, file, or possibly even a code, though you must discover any further information about it through other means.

Pact Boon

Traits: Edge, Choice, Item, Short Rest

You gain a powerful item depending on your choice of the following: Blade, Tome, Chain, Talisman, Shackle.

You can Summon and dismiss the Item as a Free Action, and it counts as a Spellcasting Focus for you While you hold it. You can only dismiss it if it's within 60 ft. of you, and you can only Summon it if it's been dismissed.

When dismissed, an object is temporarily returned to a container of your Patron's choosing, which must reside within their domain, or be approved by the GM.

If you already possess an applicable Item with the same form, you can spend a Short Rest to convert that object into your Pact Boon, which gains the benefits of that item (if any) alongside those of the Pact Boon, taking the better of the two if there's any overlap.

If ever you lose or change your choice with this Feat, your patron may choose to either take the old item, or leave it with you.

Pact of the Blade:

The Item takes the form of a Melee Weapon that you are Proficient with.

Attacks with this Weapon cost 1 less Action Point (to a minimum of 1), and restores 1 Pact Point on a Hit.

Pact of the Tome:

The Item takes the form of a Spellbook, that costs nothing to record any Spell that you have Prepared.

This Spellbook allows you to prepare Arcane Spells from Scrolls, and cast stored Spells for 1 Pact Point if you don't have them Prepared.

Each time you cast a Spell using Spell Slots, you regain 1 Pact Point.

...

Pact of the Chain:

You gain the Wizard's Familiar Feat with additional benefits:

- Your Familiar can see through Magical Darkness as if it were regular Darkness.
- Your Familiar has a number of effective Hit Points equal to 6 times your Level, unless its base health is higher.
- When your Familiar succeeds on a d20 Test, you regain 1 Pact Point.

Note: If you already have the Wizard's Familiar Feat, or take it later, you instead gain 1 additional Familiar, which are considered individually.

Pact of the Talisman:

The Item takes the form of a small trinket you can hold.

Free Action: 1 Pact Point

Trigger: A Creature wearing the Talisman makes a d20 Test.

The Triggering Creature adds 1d4 to the Triggering d20 Test.

Whenever you apply a Buff or Healing effect to a Creature without expending Pact Points, you gain 1 Pact Point once the Benefit is used (e.g. Target takes Damage with Damage Resistance, or gains at least 1 Hit Point from Healing).

Pact of the Shackle:

The Item takes the form of some kind of binding such as chains or fetters.

Free Action: 1 Pact Point

Trigger: A Creature within 30 feet of you makes a d20 Test.

The Triggering Creature has their d20 Test reduced by 1d4.

You regain 1 Pact Point whenever you apply a Debuff to a Hostile Creature without expending Pact Points.

Read Curse

Traits: Utility, Information

When you use the Identify Activity, you learn about any Curse that has been applied to the Target, as well as what Tier it was cast at, and what its End Condition is.

Whispers of the Eldritch Rune

Traits: Utility, Information, Language

When you read any writing that isn't in a Language you know, you learn what language it's in, as well as a surface-level interpretation (e.g. it's a love letter, it's a formal document, it's a fantasy book, etc.).

If your Patron understands the Language explicitly, they may give you a more complete interpretation, or warn you of any loopholes, lies, or other important details present in such writing.

Beseech Power

Traits: Blast, Spellcasting

Prerequisite: 5th Level

10 Actions: X Pact Points

Duration: 1 Minute

Pick any Spell from one of your Spell Lists. X equals twice that Spell's Tier.

For the Duration, you can cast this Spell once at its lowest Tier without expending a Pact Slot.

Bonded Talisman

Traits: Burn, Item, Teleportation

Prerequisite: Pact of the Talisman

3 Actions: 1 Pact Point

Your Talisman Teleports up to 30 feet closer to you, along with the Creature wearing it, if they are willing.

If the Talisman ends this Movement within 5 feet of you, you can choose for it to appear on you after this Movement.

Bind Escape

Traits: Burn, Debuff, Item, Restrained, Saving Throw

Prerequisite: Pact of the Shackle

3 Reactions: 1 Pact Point

Trigger: A Creature within 30 feet takes any Action with the Move Trait.

The Triggering Creature must make a Dexterity Saving Throw against your Spell Save DC:

- **Failure:** They become Restrained for 1 Minute.
- **Success:** No effect.

A Creature that is Restrained in this way can escape using either the Overpower Action as normal, or Interact with Thieves Tools (Thievery), against your Spell Save DC.

You can only have one Creature Restrained this way at any time.

Dimensional Chains

Traits: Burn, Debuff, Item

Prerequisite: Pact of the Shackle

5 Actions: 1 Pact Point

Duration: 1 Hour

One Creature you can see within 30 feet must make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but the effect lasts for 24 Hours.
- **Failure:** The Target cannot Teleport, and treats extra dimensional openings (a.k.a. portals) as solid surfaces for the Duration.
- **Success:** Same as Success, but only until the End of their next Turn.
- **Critical Success:** No effect.

Extra Boon

Traits: Edge, Improvement

Prerequisite: 5th Level, Pact Boon

Choose an additional Pact Boon to gain. You can gain the same Boon twice, allowing you to use multiple Copies interchangeably, or at the same time.

You can take this Feat additional Times as a General Feat.

Guardian's Tomb

Traits: Blast, Magical, Temporary Hit Points

Prerequisite: 5th Level

20 Reactions: X Pact Points

Trigger: You are reduced to 0 Hit Points.

You immediately become Stable, gain Xd6 Temporary Hit Points, and don't suffer any effects of the Dying Condition, aside from being Unconscious.

While these Temporary Hit Points remain, you can still take Free Actions that are Triggered by other Creatures.

If you ever regain at least 1 Hit Point, you can use a Free Action to return to Consciousness, ending the effect.

Improved Lifedrinker

Traits: Edge, Temporary Healing

Prerequisite: Lifedrinker

Lifedrinker applies to all Damage Types you inflict with Magical Actions, though the Temporary Healing granted cannot exceed your Level.

Improved Pact Familiar

Traits: Edge, Improvement, Magical

Prerequisite: Pact of the Chain

You can now see through the eyes of your Familiar, and they can telepathically communicate to any Creature that shares a Language with you.

Your Familiar also gains the Eldritch Claw Action as listed below, which uses your Spell Attack Bonus.

Eldritch Claw (2 Act): Melee Spell, 6 (1d10) Force Damage (inflicted as if Medium).

Improved Pact Weapon

Traits: Edge, Improvement, Item, Magical

Prerequisite: Pact of the Blade

Your Weapon can take the form of a Ranged Weapon, and gains a +1 to Attack and Damage rolls if it didn't have one already, which ignores Damage Resistances and Thresholds.

Greater Pact Weapon

Traits: Burn, Damage, Force, Improvement, Item

Prerequisite: Improved Pact Weapon

The Attack and Damage Bonus on your Pact Weapon increases to +2 if it wasn't already higher.

Additionally, when you Attack with your Pact Weapon, you can double your Reach or Range for 1 Pact Point, which deals Force Damage instead, and is considered a Spell Attack, using Spell Attack and Damage Modifiers if they're higher.

Mutual Binding

Traits: Blast, Teleport

Prerequisite: 5th Level

10 Actions: 5 Pact Points

One Creature within 30 feet of you must make a Charisma Saving Throw against your Spell Save DC:

- **Failure:** Both you and the Target are transported to your Patron's realm for the Duration.
- **Success:** Only you are transported.

When transported in this way, neither you or the Target can act, or be acted upon by any Creature, and all effects act as if no time passes. You also leave behind a token with your Patron's symbol on it.

Any Creature may use the Interact Action on the Token to release both Creatures, who cannot be Surprised if this starts Combat.

Perfected Pact Weapon

Traits: Burn, Actions, Improvement, Weapon

Prerequisite: Greater Pact Weapon

The Attack and Damage bonus on your Pact Weapon increases to +3 if it wasn't already.

If you're wielding any Weapon you are Proficient in that has the Loading Property, you can expend 1 Pact Point to load a single piece of Magical Ammunition without expending Actions, or Ammunition.

This Ammunition deals Force Damage instead of any Physical Damage Type.

Additionally, you can spend 1 Pact Point to take the Attack Action once as a free Action on your Turn (doesn't grant Pact Points on a Hit).

Reactive Tome

Traits: Burn, Spellcasting

Prerequisite: Pact of the Tome

Free Action: 1 Pact Point

Trigger: You take Damage from a Creature that isn't Hidden from you.

You spend Reactions and a Spell Slot (if needed) to cast any Spell that Targets your attacker, ignoring the Multi-Attack limit.

Repelling Blast

Traits: Edge, Improvement, Push

Prerequisite: Eldritch Blast

When you Hit a Creature with Eldritch Blast, you can push them up to 5 feet for each Attack that hits.

Restless Pages

Traits: Utility, Immunity, Rest

Prerequisite: Pact of the Tome

You no longer need to sleep, and are Immune to the Unconscious Condition, unless you have 0 Hit Points.

Additionally, you cannot die from Exhaustion, and don't gain Exhaustion from the Dying Condition.

Inverted Blast

Traits: Edge, Improvement

Prerequisite: Repelling Blast

You can Pull a Creature instead of pushing them, though you can only Push or Pull a Creature with a single casting, not both.

Superior Pact Familiar

Traits: Edge, Healing, Improvement, Rest

Prerequisite: Improved Pact Familiar

Your Familiar's Attacks add your Charisma Modifier to Damage Rolls instead of its Strength.

When you receive Healing, your Familiar regains an equal amount of Hit Points. If your Familiar receives Healing, you gain an equal amount of Temporary Hit Points, which convert into Hit Points when you finish a Long Rest, Short Rest, or Breather.

Talisman of Health

Traits: Burn, Healing, Improvement, Magical

Prerequisite: Pact of the Talisman

Free Action: 1 Pact Point

Trigger: The Creature wearing your Pact Talisman receives any form of Healing.

You may distribute the Triggering Healing as if you used Higher Power to do so.

Tome of Secrets

Traits: Edge, Improvement

Prerequisite: Pact of the Tome

Your Pact Tome can contain Spells that aren't on your Spell List. However, you can only cast such a Spell once before you must take a Long Rest to do so again (per Spell).

If you cast any Spell in this way that is anathemic to your Patron (e.g. Divine Spell with a Fiend Patron), the Spell is removed from your Pact Tome until added again.

Warded Talisman

Traits: Edge, AC, Improvement

Prerequisite: Pact of the Talisman

Any Creature that's wearing your Talisman can use your Charisma Modifier in place of Dexterity for AC and Saving Throws. Whichever is Higher.

Weary Fetters

Traits: Burn, Debuff, Disruptible, Exhaustion, Saving Throw

Prerequisite: Pact of the Shackle

5 Actions: 1 Pact Point

One Creature within 30 feet of you must make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but they also gain Exhaustion 1.
- **Failure:** The Target's Movement Speed is halved (affects the Action Limit).
- **Success:** No effect.

While under this effect, a Creature can re-attempt this Saving Throw at the End of its Turn.

Wizard

Arcane Shatter

Traits: Burn, Metamagic, Weakness

Free Action: 1 Scholar Point

Trigger: You Critically Hit at least one Creature, or they Critically Fail a Saving Throw from a Spell you cast.

Until the End of your next Turn, all Damage of one Type of your choice that was dealt by the Triggering Spell is treated as a Weakness.

If the Triggering Spell doesn't expend Spell Slots, it only applies to the next instance of that Damage Type that isn't reduced to 0.

Bookworm

Traits: Utility, Success

Free Action: 1 Scholar Point

Trigger: You make any Intelligence Check.

Your Degree of Success is increased by 1 for the Triggering Roll.

Counterspell

Traits: Burn, Ability Check, Audible, Magical, Manipulate, Spellcasting

Free Action:

Trigger: When a Creature within Range casts any Spell.

Range: 60 ft.

Expend any number of Spell Slots, Nullify the Triggering Spell, and make an Intelligence Spellcasting Check against the Triggering Caster's Spell Save DC:

- **Critical Success:** Both the Spell Slots and Actions are lost.
- **Success:** The Target must choose to lose either the Actions or Spell Slots used in Casting.
- **Failure:** The Action Points and Spell Slots are both refunded.
- **Critical Failure:** The Triggering Spell is not Nullified.

Any Material Components that are Expended as part of the Triggering Spell are always refunded if Nullified, even on a Critical Success, and the lost Spell still counts against the Triggering Caster's Multi-Attack Limit.

If the Triggering Spell didn't require Spell Slots, any resource that was expended in place of the Spell Slots, including Charges or Uses are considered as the Spell Slot, and vice versa for Spells that cost no Actions.

If the Triggering Spell isn't in your Spellbook, the DC is increased by twice the difference between the number of Spell Slots you and your Target expended.

If the Triggering Spell is one that you have currently Prepared, you choose what is lost.

Example: if you use one Spell Slot to counter a 3rd Tier Spell you don't have in your Spellbook (such as Revivify or an Empowered Cure Wounds, you monster), the difference is 2, for a +4 to the DC. Though a Spell cast without a Spell Slot would never have this bonus.

Familiar

Traits: Edge, Choice, Long Rest, Minion

You gain an Arcane Familiar that follows your commands.

The Familiar has the Proficiencies, Speeds and Abilities of any Tiny Creature of your choice (plus any extras your GM approves) which must have a number of Hit Dice equal to or less than your Level, which is increased if it's less.

Your GM may permit you to bind any other Creature of an equal or lesser Level at their discretion, like a Red Dragon Wyrmling you raised since birth. Beware, some GMs like to prevent these familiars from coming back.

Your Familiar has a 10 in all Ability Scores, uses your Proficiency Bonus in place of its own, understands one language you know (but cannot speak), and acts as a Minion during Combat.

If your Familiar dies, they leave behind everything they were carrying, and you can re-summon them at the end of a Long Rest. If they aren't dead when you do this, they are Teleported to you, dropping all equipment as if they had died.

Your Familiar will obey all orders you give it to the best of its ability, and can prepare a number of Arcane Cantrips and Tiered Spells from your Spellbook (or your Prepared Spells if you don't have one) equal to its Intelligence Modifier (Minimum of 0), which uses its Modifiers (based on its Size), and your Spell Slots.

You can choose up to 2 of the following additional abilities for your familiar to gain whenever you summon them:

...

- **Extra-Dimensional Home:** As part of any Movement, your Familiar can move into an Extra-Dimensional space with up to 5 cubic feet of Non-living material (living material is left behind). It can leave this space the same way, appearing in an unoccupied space within 5 feet of you, along with everything it brought along.
 - If you have the Demiplane Spell, it can use any Demiplane you have control over.
- **Helpful:** While within 5 feet of a Creature, your Familiar grants Advantage on Ability Checks it is Proficient in.
- **Power Channel:** When you Cast a Spell, you can cast it through your Familiar's Space (or on your Familiar instead of you).
- **Powerful:** Your Familiar has a +2 to all Ability Scores, up to 20. This Ability can be gained multiple times.
- **Shared Vision:** You can see through your Familiar's space.
- **Study Companion:** Your Familiar can Prepare twice as many Spells and Cantrips.
- **Telekinetic:** Your Familiar can Magically Manipulate and carry Objects within 5 feet of them as long as its weight in lbs is less than their Intelligence Score (includes Size modifiers).
- **Telepathic:** Your Familiar can communicate to any Creature within 30 feet of it, provided they share a Language with it.
- **Trained:** Your Familiar can use any Action you have access to that isn't a Blast, using your Class Resources. Additionally, you can choose one Class Feat you have (excluding feats that can grant a Minion or Summon), or any Ancestry Feat without a Prerequisite, which it gains the benefits of (if it can). If it gains this Ability additional times, it only gains one additional Feat, or repeats the benefits of a repeatable Feat.

Focused Spell

Traits: Burn, Improvement, Metamagic

Free Action: 1 Scholar Point

Trigger: You cast a Spell.

You can choose any number of Creatures to be excluded from the Triggering Spell, up to your Intelligence Modifier.

Glyph of Warding

Traits: Blast, Item, Magical

1 Hour: X Scholar Points

X is equal to the Tier at which the affected Spell is to be cast.

For 100 GP worth of gem infused chalks for each Tier of Spell (or 10 GP for Cantrips), you place any Spell in your Spellbook as a Glyph of Warding, provided the Spell doesn't take more than 1 Hour to cast before Empowerment.

Cast the Triggering Spell at its corresponding Tier without applying the effects, then Specify a simple Trigger that it must be able to observe (Sight, Sound or Touch). You can also trigger the Glyph instantly through any Divination Spell that can reach the Glyph, if you are actively detecting the Glyph.

When the Trigger occurs, the Spell is cast, Targeting the Triggering Creature. The Duration is always extended to the maximum Duration, and the Glyph maintains Concentration for any Duration you set or until dispelled.

The Glyph cannot be Triggered if the Trigger or the Glyph is Protected from Divination Magic.

Imbue Weapon

Traits: Burn, Item, Spellcasting

Free Action: 1 Scholar Point

Range: 30 ft.

Trigger: Any Weapon Attack Hits a Creature you can see within Range.

You immediately spend Actions and Spell Slots to cast any Spell with the Attack or Saving Throw Trait, which only Targets the Creature that was Hit by the Triggering Attack.

If the Spell has the Attack Trait, it automatically Hits according to the Triggering Attack. If it has the Saving Throw Trait, the Target makes the Saving Throw at Disadvantage.

The Spell is also considered to be part of the Triggering Attack, which counts towards Weaknesses and Damage Thresholds.

Improved Concentration

Traits: Edge, Advantage, Concentration

You have Advantage on Concentration Saving Throws.

Magical Expertise

Traits: Edge, Improvement

Your Spell Save DC now adds your Proficiency Bonus.

Magician's Labor

Traits: Utility, Downtime, Money

You gain a new Activity: Magician's Labor.

Whether through performing, tending Magical facilities, or other arcane services (e.g. Subclass stuff), you gain an amount of GP each day equal to your maximum Spell Slots.

During your labors, you may come into contact with an Important Person in need of a specific Spell, Lost/Forbidden Knowledge, or uncover a major celestial event.

Modify Spell

Traits: Burn, Metamagic, Spellcasting

5 Actions: 1 Scholar Point

Duration: 1 Minute

For the Duration, one Spell you cast applies one of the following changes of your choice:

- **Evocation:** Creatures within 5 feet of the original Target must make a Dexterity Saving Throw, or be affected by the Spell's effects (+1 Spell Tier).
- **Divination:** The Spell ignores Cover and Line of Sight (+5 Actions).
- **Illusion:** All Targets have Disadvantage against the Triggering Spell unless they have Truesight (+3 Actions).
- **Abjuration:** You may choose one effect that the Target is currently subjected to, and suspend it until the Start of your next Turn (+2 Actions).
- **Enchantment:** When the Spell ends on the Target, they must repeat the Save, or have the Spell repeat its effects (+1 Spell Tier).
- **Conjuration:** The Spell instead Summons a Tiny Spell Wasp (Elemental) for the Duration (minimum of 1 Round) as a Minion with 10 in all Ability Scores, 5 effective Hit Points per Tier, a 60 ft. Fly (Hover) Speed, and applies the effects of the Spell at the lowest Tier, centered on its position as its Action (+1 Spell Tier). The Wasp isn't affected by its own Spells.
- **Necromancy:** You or the Target gain Temporary Hit Points equal to 2 * the Spell's Tier (+3 Actions).
- **Transmutation:** The Spell gains the effects of a different Spell of an equal or lesser Tier, taking the Average Action Cost of both (+1 Spell Tier).

A Spell can only benefit from one of these effects, but counts as being part of its original School, and the new School.

If you spend 10 Minutes, you can record the modified Spell in your Spellbook as if it was a new Spell.

A Creature without this Feat struggles to understand Spells modified in this way, and must succeed on an Intelligence Check against your Intelligence Score, or fail to learn the Spell. Modified Spells also cannot be modified further.

Quickened Incantations

Traits: Edge, Actions

All Spells you cast take 1 less Action Point to cast (Minimum of 1), which applies after modifiers such as Empowerment, or bypassing Components.

You can take this Feat multiple times.

Reclaim Magic

Traits: Burn, Recovery, Short Rest, Spellcasting

Whenever you finish a Short Rest, you can expend a Scholar Point to recover Spell Slots an additional time.

Scroll Book

Traits: Utility, Improvement, Spellcasting

You treat all Spells in your Spellbook as Spell Scrolls of the Spell at its lowest Tier. Any Spell cast this way ignores the Intelligence Check for casting a Spell of a Tier you don't have access to, and is removed from your Spellbook until replaced.

Creatures that have the Spell on their Spell List can spend Spell Slots to avoid removing a Spell from your Spellbook, without needing it to be Prepared.

If you couldn't already (say, because your Spellbook is actually a tattoo, or stored entirely in your memory), you can also use your Spellbook to store any number of Spell Scrolls, which counts as being recorded in your Spell Book, and can be done as an Interact Action without expending gold or ink.

Finally, if a Spell would be removed from your Spellbook, you can choose to prevent the caster from casting it unless they preserve it.

Signature Spell

Traits: Edge, Spellcasting

Pick a 1st Tier Arcane Spell from your Spellbook that isn't a Metamagic.

That Spell is always Prepared, and doesn't count against your Prepared Spells for the day. If the Spell is already considered always Prepared, you pick another Spell from your Spellbook to become always Prepared.

Additionally, the Spell requires 1 less Spell Slot for you to cast (Minimum of 0), or can be empowered by one more Tier if you cast it without Spell Slots, and requires only half the value for any required materials (if any).

You can take this Feat multiple times, picking a different Spell of a Tier you have access to, or further reducing the number of Spell Slots needed.

Studious Negotiator

Traits: Utility, Ability Check, Money

When attempting to purchase any Magical Item, you can attempt an Arcana Check against the Item's Complexity.

- **Success:** The result is applied as a percentage discount on the Item (rounded to the nearest coin).
- **Failure:** The price increases by 1d100 as a percentage.

This effect can only be used once per purchase, and cannot go below a Merchant's minimum. Furthermore, you cannot attempt the check on the same Item more than once with the same Merchant.

Undeniable Logic

Traits: Utility, Ability Check

Free Action: 1 Scholar Point

Trigger: You make any d20 Test using Charisma.

You can use Intelligence instead of Charisma for the Triggering d20 Test.

Watch and Learn

Traits: Utility, Ability Check, Information, Visual

5 Actions: 1 Scholar Point

You use the Identify Activity on any Object or Creature you can see in the time of this Action. If you fail, you still learn the vague potential of any Magical effect, if present (e.g. "This Ring makes attacks more reliable" - Ring of True Strike, or Ring of Accuracy).

Once you use this Action, you cannot use it again on the same Object or Creature until you finish a Long Rest.

Counter Cast

Traits: Burn, Improvement

Prerequisite: Counterspell

You can use Counterspell against any Non-Magical Action, provided the point of origin for such an Action is within Range.

As with Spells, limited resources that aren't materials are counted in place of Spell Slots for any such rules.

Improved Familiar

Traits: Edge, Improvement

Prerequisite: Familiar Feat

Your Familiar gains the Elemental Strike Action as listed below, which uses your Spell Attack Bonus, and also gains 2 more abilities.

Elemental Strike (3 Act): Melee Spell, 1d8 Acid, Cold, Fire, Force, Lightning or Poison Damage (Choose when taking this Feat, inflicted as if Medium).

Refined Power

Traits: Edge, Actions, Improvement

Prerequisite: Quickened Incantations

The additional Action Cost for Empowering Spells is reduced by 1 per Tier (Minimum of 1 extra Action per Tier).

You can take this Feat any number of times.

Reflect Spell

Traits: Edge, Improvement

Prerequisite: Counterspell

When you Critically Succeed on the Ability Check for Counterspell, you can choose a new Target for the Spell (or effect from Counter Cast) as if from the Caster's space, instead of Nullifying the Triggering Spell.

Reusable Glyph

Traits: Blast, Improvement

Prerequisite: Glyph of Warding, 5th Level

You can multiply the gold cost for creating the Glyph of Warding by 10 for each Tier including and above 1st in order to make it reusable. Cantrips and Signature Spells ignore this penalty.

A reusable Glyph of Warding can Trigger a Spell when given a Spell Slot of the appropriate Tier by a Creature within Reach, or after a certain amount of time, depending on the contained Spell's Tier as follows:

- **Cantrip:** Once per Round.
- **1st:** Once per Minute.
- **2nd:** Once per Hour.
- **3rd:** Once per Day.
- **4th:** Once per Week.
- **5th:** Once per Month.
- **6th:** Once per Year.
- **7th:** Once per Decade.
- **8th:** Once per Century.
- **9th:** Once per Millennium.
- **10th:** Once per Decamillennium.

Runes of Power

Traits: Blast, Choice, Final, Metamagic, Improvement

Prerequisite: 5th Level

10 Actions: 5 Scholar Points

Duration: 1 Hour

You place a Rune filling your Space on the surface you are standing on for the Duration, or until the surface is broken. This Rune cannot be hidden by Magical means, and shines through debris. End your Turn.

When you place this Rune, you may choose one of the following, which affects any Creature that stands on it using their Ability scores and bonuses, but only while they stand on it:

- Pick a Spell School, and a Metamagic Spell from your Spellbook. Apply the Metamagic Spell to all Spells of that School at its lowest Tier.
- The Action Cost of all Spells is reduced by 1, after modifiers such as Empowerment.
- Pick an Ability Score. All Spells use that Ability Score for Attack Rolls, Damage Rolls and Spell Save DCs.
 - If there are multiple of these Runes, you may choose which one to use.
- Pick a Spell School. All Spells of that School require one less Spell Slot. Spells that require 1 Spell Slot or less are instead Empowered for free, up to your highest available Tier.
- Pick a Spell School. All Spells of that School don't require Concentration while on the Rune, and the Duration of such Spells (including Concentration Spells) don't decay while their Caster is on the Rune.
 - If the Caster leaves the Rune, they must resume Concentration immediately.
 - Durations in time are measured when the Caster Starts or Ends their Turn.

Runes that are stacked together have their effects combined and stacked (as possible), and the Duration is refreshed when a new one is added to the stack.

Scroll Caster

Traits: Utility, Improvement, Item

Prerequisite: Scroll Book

You treat any Spell in a Scroll you are holding as if it were in your Spellbook instead. Additionally, when you cast a Spell from a Scroll, you can spend Spell Slots, and half of any Material Components to preserve the Scroll.

If the Spell you cast this way is a Signature Spell, it no longer requires a Material Component, or Focus Component, if any.

Superior Familiar

Traits: Edge, Improvement

Prerequisite: Improved Familiar

The first time you take this Feat, your Familiar's Elemental Strike deals 2d8, and gains a Range of 30 feet.

Your Familiar gains 2 more Abilities.

You can take this feat any number of times, adding 2 more Abilities.

Subclasses

Subclasses are Class Feats. However, you can only take 1 Subclass Feat, unless you gain the corresponding Feat, or your GM says otherwise.

Each Subclass has Innate Feats that you gain automatically, as well as Subclass specific Feats, which start with the corresponding Subclass name. You must have the Subclass to pick its corresponding Feats (Obviously).

Artificer Specializations

Alchemist

Alchemists are known to create the most potent and curious Potions and Poisons. But in order to make some of the strongest of these Potions, they often travel with Adventurers or caravans, trying to secure the rarest of ingredients.

Bonus Proficiencies: Alchemist's Supplies, Medicine

Innate Feats:

Ingredient Collector

Traits: Utility, Advantage, Item

You have Advantage on all d20 Tests you make when attempting to harvest materials such as teeth, eyes, blood, venom, fruit, bark, minerals, and so on.

Toil and Trouble

Traits: Edge, Alchemist's Supplies, Craft, Improvement

When you Craft a Consumable Item that is either a Potion or Poison (or Ingested), their effects are applied twice on use, considered as only one effect for Debuffs like Potion Sickness.

Alternatively, you can combine Two Potions and/or Poisons into one at no extra cost, such as combining two Potions of Resistance for Resistance to two Damage Types (only counts as one Potion for Potion Sickness).

Alchemist: Alchemical Stomach

Traits: Edge, Advantage

You can benefit from the lasting effects of two Potions at once without triggering Potion Sickness.

Additionally, you have Advantage on Saving Throws against Arcanist's Blight, including any effects that Inflict it.

You can take this Feat any number of times, increasing the number of Potions you can benefit from at the same time by 1.

Alchemist: Gaseous Application

Traits: Burn, Alchemist's Supplies, Item, Manipulate, Special

5 Actions:

Duration: 1 Hour

For the Duration, one Potion or Poison you Touch can be Thrown up to 60 feet, applying its effects to All Creatures within a 5 ft. Radius as if it was an Inhaled effect.

Special: If you also apply Explosive from Tactical Adjustments, the Radius is increased by 5 feet, and doesn't reduce the Damage Dice.

Alchemist: Lingering Brew

Traits: Burn, Alchemist's Supplies, Item, Manipulate

5 Actions:

Duration: 1 Hour

For the Duration, the Duration of One Potion or Poison you Touch is doubled.

Alchemist: Potent Brew

Traits: Burn, Alchemist's Supplies, Item, Manipulate

5 Actions: 1 Supply

Duration: 1 Hour

One Potion or Poison you Touch rerolls all 1s when determining dice based effects.

This effect can be applied multiple times, increasing the minimum value you can re-roll by 1, to a maximum of the die type.

Alchemist: Experimental Concoction

Traits: Blast, Alchemist's Supplies, Item, Manipulate

Prerequisite: 5th Level

10 Actions: 5 Supplies

Duration: 1 Minute

For the Duration, when One Potion or Poison you Touch utilizes dice for Damage, Healing, or Bonuses, all dice that roll their maximum Value add another die of the same type to the result, up to your Level in extra dice.

If the Potion or Poison already does this, it needs 1 less on the die to do so (Minimum of 2).

Example: You roll 2d4, and get a 3 and 4. Since one of the numbers was a 4, you roll an additional 1d4 and add it to the total. Same thing happens if the new die rolls a 4.

Armorer

As the name suggests, Armorers have a knack for more protective Creations, from suits of armor, to exoskeletons, to just about anything that keeps harm at bay. In fact, they tend to get along well with Bombers.

Bonus Proficiencies: One Armor Type, Smith's Tools

Innate Feats:

Extra Precautions

Traits: Edge, Armor, Manipulate, Resistance, Smith's Tools

1 Minute: 1 Supply

Duration: 8 Hours

One set of Armor you Touch applies its Physical Resistance to one Damage Type of your Choice for the Duration.

This effect can be applied multiple times, choosing a unique Damage Type each time.

Unhindered

Traits: Edge, Actions, Armor

You don't suffer the increased Action Cost for the Move Action while wearing Medium or Heavy Armor.

Improvised Propulsion

Traits: Edge, Armor, Manipulate, Movement, Smith's Tools

1 Minute: 1 Supply

Duration: 1 Hour

Range: Touch

The Target Armor adds a 10 ft. bonus to the wearer's Walking, Flying (hover), Swimming, or Climbing Speed, even if they don't have that Speed already. This doesn't apply to the Action Limit.

Flying Speed from this Armor cannot be used to gain height, unless the wearer already has a Flying Speed that doesn't follow this restriction.

Perfect Fit

Traits: Edge, Armor, Manipulate, Smith's Tools

1 Minute: 1 Supply

Duration: 8 Hours

Range: Touch

You remove any Stealth, Movement, and Acrobatics Penalty from the Target Armor for the Duration.

Additionally, the Armor can be removed by the wearer as an Interact Action.

Reinforced Plating

Traits: Edge, Armor, Resistance, Smith's Tools

1 Minute: 1 Supply

Duration: 8 Hours

One set of Armor you Touch adds your Intelligence Modifier to its Damage Resistance for the Duration.

This effect doesn't stack, but can be applied to Clothing, which can instead gain Physical Resistance with an equal value, without requiring Proficiency in any kind of Armor.

Special Underlay

Traits: Edge, Armor, Manipulate, Smith's Tools

1 Minute: 1 Supply

Duration: 8 Hour

For the Duration, You swap the Magical properties of two sets of Armor you Touch.

Reflective Armor

Traits: Blast, Armor, Damage, Manipulate, Smith's Tools

Prerequisite: 5th Level

1 Minute: 5 Supplies

Duration: 1 Hour

For the Duration, one set of Armor you Touch inflicts Damage to any Creature that deals Damage the wearer, equal to the amount, and of the same type(s) reduced by this Armor.

This also applies to Persistent Damage, but only when first applied.

Bomber

When you ask for an explosion, Bombers ask "how big?" with explosives already in hand. However, that's not to say a Bomber is reckless. Because if they were, they wouldn't be a Bomber for long.

Bonus Proficiencies: Acrobatics, Alchemist's Supplies

Innate Feats:

Blast Padding

Traits: Edge

When you make a Strength or Dexterity Saving Throw against any effect that Targets an area, your Degree of Success is one degree better.

Demolitions Expert

Traits: Burn, Alchemist's Supplies, Improvement, Item

You learn how to make Bombs with Supply Points (or another Item if you already know how to Craft Bombs).

When you use Supply Points to Craft any Consumable Item that applies an effect in an area, it only costs 2 Actions for Quick Craft, it has a 10 ft. Radius (unless its original Radius was larger), it explodes at a time that you choose (provided it doesn't expire first), and it uses your Intelligence Score for the Saving Throw.

Note: if Bombs don't fit in your campaign, work with your GM to find an alternative, like unstable runes.

Bigger Explosions

Traits: Edge, Improvement, Item

All effects caused by you that affect or Target an area have said area increased by 5 feet in all dimensions.

You can take this Feat any number of times.

"Fire in the Hole!"

Traits: Burn, Advantage, Audible

1 Reaction:

Trigger: When you force at least one Creature to make a Saving Throw against an Item that affects an area.

Range: 60 ft.

Any number of Creatures you choose within Range have Advantage on the Triggering Saving Throw.

Shell Shock

Traits: Edge, Damage, Debuff, Resistance, Thunder

Duration: 1 Minute

When you deal Thunder Damage to a Creature, their Physical Resistance is temporarily reduced by the Damage taken (to a Minimum of 0) for the Duration.

This effect stacks, and resets the Duration when reapplied.

Structural Failure

Traits: Edge, Damage

You deal Double Damage to Constructs and Structures.

Bombardment

Traits: Blast, Item, Manipulate

Prerequisite: 5th Level

20 Actions: X Supplies

Range: 60 ft.

You apply the effects of any Consumable Item you can Craft that Targets an Area, up to X times within Range.

On subsequent Turns, you repeat this effect, and reduce X by 1 until X reaches 0, even if you can't act.

Engineer

While the Gadgeteer specializes in small and fragile contraptions to accomplish minor tasks with great efficiency, the Engineer focuses on more substantial solutions for bigger problems. Like cars.

Bonus Proficiencies: Smith's Tools, Tinker's Tools

Innate Feats:

Crafter's Intuition

Traits: Utility, Information, Spot

When you use the Spot Action to successfully detect a Construct, or examine a Trap or other Object/Creature of mechanical nature, you automatically learn one of its capabilities that you haven't discovered yet. This capability can be an Action, Feature, or Trigger.

Turret Construction

Traits: Burn, Craft, Manipulate, Summon, Tools

10 Actions: 1 Supply

You place a Medium Construct referred to as a Turret with a number of Hit Points equal to 8 times your Level, 10s in all Ability Scores, and is automatically Hit by all Attacks.

The Turret is anchored to the surface it is on, provides Half Cover to adjacent Creatures, and is destroyed if it isn't attached to a solid surface, or if all surfaces it is attached to is destroyed, unless it has a Movement Speed.

Turrets don't take Actions unless a Creature uses an Interact Action on one, a Driver uses it as a Manned Action (One Crew per Turret, except Transport), or you activate one Turret within 60 feet of you as a Free Action at the End of your Turn.

...

The Turret can take one form which you choose upon its creation. Any Attack Roll uses the Spell Attack Modifier of the Creature activating it.

- **Artillery:** The Turret's Action allows it to make a 20/60 ft. Ranged Weapon Attack that deals 1d6 Bludgeoning or Piercing Damage (choose on creation). Alternatively, a Creature can load a Tiny Object or piece of Ammunition to be fired instead.
- **Barrier:** The Turret's Action grants it Resistance to All Damage equal to your Level until the End of your next Turn. It also provides Full Cover instead of Half Cover at all times.
- **Flamethrower:** The Turret's Action forces all Creatures within a 15 ft. Cone to make a Dexterity Saving Throw against the Creature's Intelligence Score:
 - **Critical Failure:** Double Damage.
 - **Failure:** They take 1d8 Fire Damage.
 - **Success:** Half Damage.
 - **Critical Success:** No Damage.
- **Taser:** The Turret's Action allows it to make a Melee Weapon Attack that deals 1d10 Lightning Damage. However, you can choose to apply Stunned X instead, where X is the total Lightning Damage after Resistance and Immunity.
- **Transport:** The Turret gains a Walking Speed of 30 feet, and can carry up to 1,000 lbs, with its Action moving the full distance. Alternatively, you can give it a Climbing or Swimming Speed of 15 feet, or a Hover Speed of 0 feet (not destroyed when moved). This counts as a Vehicle, and treats attached Turrets as Manned Actions.
 - During Travel, the distance traveled in miles is equal to twice the Movement Speed of the fastest applicable Speed.

Engineer: Barrel Tweaking

Traits: Burn, Improvement, Manipulate, Range, Reach, Speed, Tools

5 Actions: 1 Supply

Range: Touch

Duration: 10 Minutes

One Construct you Touch has its Range or Reach for one Weapon Attack doubled for the Duration. Vehicles have their Movement Speed doubled instead.

Engineer: Booster

Traits: Burn, Manipulate, Movement, Tools, Vehicle

5 Actions: 1 Supply

Range: Touch

Duration: 1 Hour

The Target Vehicle has one Movement Speed increased by 10 feet for the Duration.

This increases Travel Distance by 20 miles for each use.

Engineer: Packed Rounds

Traits: Burn, Damage, Improvement, Manipulate, Tools

5 Actions: 1 Supply

Duration: 1 Minute

For the Duration or until they Reload, one Construct you Touch treats all Damage from Ranged Weapon Attacks as if they rolled their highest values.

This effect also applies to Firearms and Crossbows, but doesn't stack on itself.

Engineer: Reinforce

Traits: Burn, Manipulate, Resistance, Tools

5 Actions: 1 Supply

Range: Touch

Duration: 8 Hours

For the Duration, the Target Construct gains Resistance to one Damage Type of your choice, equal to your Intelligence Score.

This effect stacks, but only for unique Damage Types.

Engineer: Overclock

Traits: Blast, Actions, Manipulate, Tools

Prerequisite: 5th Level

10 Actions: X Supplies

Range: 30 ft.

Any number of Constructs within Range immediately take a total of X Actions, without spending Action Points, or requiring activation.

Gadgeteer

When it comes to making gizmos and gadgets galore, none can compare to the Gadgeteer. They prioritize making small objects that go off on their own, activate certain other objects, or perform some other quick and simple task. But some are rumored to lead armies of gadgets into battle, or even create their own friends.

Bonus Proficiencies: Thievery, Tinker's Tools

Innate Feats:

Clockwork Creation

Traits: Burn, Craft, Manipulate, Summon, Tinker's Tools

1 Hour: 1 Supplies

Duration: 24 Hours

You Create a Tiny Construct with a number of Hit Points equal to its Constitution Score, and a Walking Speed of 10 feet, which it moves fully when taking the Move Action, regardless of Size.

When you Create this Construct, you can increase its Strength, Dexterity and Constitution by a total amount equal to your Intelligence Score. All other scores are 10.

The Clockwork Creation is created with the maximum number of Actions it can have, only regains Action Points when a Creature uses the Interact Action to grant it 2 Action Points, and cannot lose Actions through other means.

The Clockwork Creation can use Weapons that are designed for Creatures that are one Size larger than it without penalty. It has a Multi-Attack Limit of 1, which is doubled for Light Weapons.

When the Duration ends, the Clockwork Creation falls apart until repaired by another Gadgeteer using this feature, who can either control it, or restore its purpose (controlled by the original creator).

Note: Your GM might rule that certain materials may change how the Clockwork Creation regains Actions, such as when in a Magical area or hit by Magic for Magic Crystals.

Gadgeteer: Extended Coils

Traits: Edge, Improvement, Manipulate, Speed, Tinker's Tools

1 Minute: 1 Supply

One Clockwork Creation you Touch gains an additional 5 feet to its movement Speed, and Action Limit until the end of your next Long Rest.

Alternatively, you add 5 feet to a different Movement Speed of your choice, including Burrowing, Swimming, Climbing and Flying (Hover), but not the Action Limit unless it exceeds the Creation's Movement Speed.

Gadgeteer: Lasting Creations

Traits: Utility, Improvement

Your Clockwork Creations last for 24 Hours after the first Action they take, instead of 24 Hours after their Creation.

Gadgeteer: Oversized

Traits: Edge, Improvement, Size, Tinker's Tools

When you Craft any Object or Construct with Supply Points, you can double the total cost to make it one Size larger.

Gadgeteer: Striking Mechanism

Traits: Edge, Improvement, Manipulate, Multi-Attack, Tinker's Tools

1 Minute: 1 Supply

One Clockwork Creation you Touch has its Multi-Attack Limit increased by 1 (up to 4) until the end of your next Long Rest.

Gadgeteer: March of the Machines

Traits: Blast, Actions, Movement

Prerequisite: 5th Level

5 Actions: X Supplies

Range: 30 feet

Up to X Clockwork Creations within Range regain all Action Points, and immediately take the Move Action once for free.

Gunner

Gunners are the first ones to push the limits of Gunpowder, Magic or Explosives, creating Weapons that can make even the weakest Commoner incredibly dangerous. But more than that, Gunners take great pride in refining and honing their Weapons to perfection.

Bonus Proficiencies: Any Firearm, Tinker's Tools

Innate Feats:

Gun Crafting

Traits: Utility, Craft

You learn how to Craft a single Firearm that is appropriate to your Campaign's setting.

If your GM outlaws Firearms for your game, this and all other Gunner Feats applies to Ranged Weapons with the Loading Property, or a flavored variation with the Magical Property if allowed.

Proper Handling

Traits: Edge, Improvement

You may ignore the Recoil Trait on Firearms, and Weapons with the Misfire Trait only Trigger when you roll a Natural 1 to Attack with them.

Gunner: Armor Piercer

Traits: Edge, Improvement

Critical Hits with a Firearm ignore Physical Resistance, and Damage Thresholds.

Gunner: Calculated Trajectory

Traits: Edge, Improvement

You can use Intelligence instead of Dexterity for Attack Rolls with Ranged Weapons.

Gunner: Quick Loader

Traits: Edge, Weapon

The first time you expend the last shot that a Firearm has on your Turn, you Reload without expending Action Points.

Gunner: Trickshot

Traits: Edge, Blinded, Debuff, Frightened, Prone, Stunned

When you Hit with a Ranged Weapon Attack, you can inflict one of the following Conditions until either the Start of your next Turn, or the Condition Ends (whichever happens first): Blinded, Flat-Footed, Frightened 1, Prone, Stunned 1.

Gunner: Sharpshooter

Traits: Blast, Attack, Damage, Weapon

Prerequisite: 5th Level

10 Actions: X Supplies

Requirement: The Weapon must have the Loaded Property.

Make an Attack Roll with a -5 Penalty to Hit against up to X Targets without expending Ammunition. This Attack ignores Cover, Automatically Crits on a Hit, and deals an extra 10 Precision Damage.

Barbarian Paths

Path of the Ancestors

Those that walk the Path of the Ancestors often seek to channel the fury or passion of their ancestors before them, which tends to come off as inspiring or influential to their allies in combat. In addition, the warrior spirits that follow them (related or not) tend to lend a helping hand in tight situations.

Bonus Proficiencies: Perception, Society

Innate Feats:

Ancestor's Strike

Traits: Burn, Attack, Flat-Footed, Magical, Weapon

3 Actions: 1 Rage

Range: 30 ft.

Make a Weapon Attack as if you were in any space within Range. This Attack ignores the Multi-Attack Limit, and treats the Target as if they were Flat-Footed.

This Action can use Any Weapon you are carrying and Proficient in, even it's stored in a backpack.

Guardian's Fervor

Traits: Edge, Resources

You gain Rage points when you see any Non-hostile Creature take Damage, as if you took it.

Ancestors: Ancestral Guardians

Traits: Burn, Shield/Item

When you use Ancestor's Strike, you can instead grant Cover to a Creature, as if they were Blocking with a Shield in your Inventory.

Alternatively, you can take the Interact Action with one Item you are Carrying that has either the Non-Magical or Consumable Traits. Consumables are still Consumed.

Ancestors: Enduring Spirit

Traits: Edge, Actions, Unconscious

While Unconscious, you still recover Actions as normal, and can take any Action with the Magical Trait, as long as they don't have the Verbal or Manipulate Traits (or you bypass them).

Ancestors: Hero's Legacy

Traits: Edge, Feat

Pick an Ancestry. You gain the Innate Abilities of that Ancestry, and can take Ancestry Feats for that Ancestry.

Ancestors: Inspired Resilience

Traits: Burn, Buff, Magical, Resistance

Free Action: 1 Rage

One Creature within 30 feet of you gains Physical Damage Resistance equal to your Strength Modifier until the Start of your Next Turn.

Ancestors: Guardian's Aura

Traits: Blast, Advantage, Buff, Debuff, Disadvantage, Magical

Prerequisite: 5th Level

10 Actions: 5 Rage

Range: 30 ft.

Duration: 1 Minute

For the Duration, all Attack Rolls against Creatures of your Choice within Range are made at Disadvantage.

Additionally, Creatures of your choice within Range have Advantage on all Saving Throws.

Path of the Beast

Those that walk the Path of the Beast often act like they were raised by wolves. In some cases, that is the exact situation. They are exceptional survivors with little to no need for actual Weapons, and a very good instinct.

Bonus Proficiencies: Nurture, Survival

Innate Feats:

Natural Weapons

Traits: Burn, Attack

You gain a Light, 2 Action Natural Weapon that deals 1d6 Bludgeoning, Piercing or Slashing Damage, depending on its form, which you choose upon taking this Feat.

This counts as a Beast Weapon.

Primal Understanding

Traits: Utility, Information

While you are observing any Beast, you can determine its attitude towards you, and recognize any immediate reason for them to do what they are doing, or if there's more to them than meets the eye, as with a Shapeshifter, Minion, or Summon.

Beast: Aspect of Endurance

Traits: Edge, Actions, Advantage, Buff, Temporary Healing

Free Action: 1 Rage

Duration: 1 Hour

You gain one of the following benefits for the Duration:

- All forms of Healing you receive are increased by your Constitution Modifier.
- You gain twice as many Actions from all sources.
- You have Advantage on all Saving Throws.

Using this Feature again before it expires allows you to change which effect you are benefitting from.

Beast: Aspect of the Hunter

Traits: Edge, Blindsight, Buff, Damage, Debuff

Free Action: 1 Rage

Duration: 1 Minute

You gain one of the following benefits for the Duration:

- When you Hit a Creature with a Natural Weapon Attack, the next Action they take with the Move Trait has its Action Cost doubled.
- You gain Blindsight 15 ft.
- Your Natural Weapon Attacks deal an additional 1d6 Precision Damage.

Using this Feature again before it expires allows you to change which effect you are benefitting from.

Beast: Aspect of Nature

Traits: Edge, Improvement, Initiative, Travel

Free Action: 1 Rage

Duration: 8 Hours

You gain one of the following benefits for the Duration:

- When you start a Long Rest, you can distribute a number of Hit Dice equal to your Constitution Modifier between any number of Creatures you rest with.
- You gain a 60 ft. Ranged Natural Weapon that costs 3 Action Points, and deals 1d6 Acid, Piercing or Poison Damage, which you choose upon gaining this Weapon (considered a Spell for Multi-Attack).
 - This Weapon is considered Thrown for the purpose of Feats, with unlimited Ammunition.
- When you are Surprised, you roll Initiative as if you were Prepared.

Using this Feature again before it expires allows you to change which effect you are benefitting from.

Beast: Aspect of Swiftiness

Traits: Edge, Buff, Movement, Speed

Free Action: 1 Rage

Duration: 10 Minutes

You gain one of the following benefits for the Duration:

- Your Movement Speeds are doubled, including your Action Limit. Additionally, you ignore Difficult Terrain.
- You gain a Climbing or Swimming Speed equal to your Walking Speed.
- When you move through a Creature's Space after you Dash, you can attempt to Overpower them without expending Actions, and Attack them with a Natural Weapon if you Succeed (also free).

Using this Feature again before it expires allows you to change which benefit you are benefitting from.

Beast: Aspect of the Pack

Traits: Blast, Buff, Improvement

Prerequisite: 5th Level

5 Actions: X Rage

Duration: 1 Minute

For the Duration, up to X Creatures of your Choice within Range gain the effects of one Aspect Feat of your choice.

Path of the Berserker

Where many Barbarians may harbor a desire for revenge, Berserkers harbor a deep seated bloodthirst that only grows stronger as they approach death. Few desire to fight a Berserker on even ground, and even fewer live to tell the tale.

Bonus Proficiencies: Athletics, Intimidation

Innate Feats:

Berserker's Rage

Traits: Edge, Drained, Improvement, Resources

You gain 1 Rage Point whenever you reduce a Creature to 0 Hit Points, or inflict the Bloodied Condition.

Additionally, whenever the Drained Condition prevents you from regaining Hit Points, you gain an equal number of Temporary Hit Points until you finish a Breather.

Unstoppable Fury

Traits: Burn, Damage, Improvement, Weapon

Free Action: 1 Rage

Trigger: You Hit with a Melee Weapon Attack

The Triggering Attack has its Damage doubled against Creatures that are at least one Size larger than you.

Berserker: Blood Lust

Traits: Edge, Attack

When you reduce a Creature to 0 Hit Points, you immediately Attack once for free, ignoring the Multi-Attack Limit.

Berserker: Inescapable

Traits: Edge, Bloodied, Movement

While you are Bloodied, any time a Creature in your Reach takes an Action with the Move Trait, you may choose to Move with them for free as if they were dragging you, even if that Movement is a form of Teleportation that normally wouldn't bring you.

Berserker: Juggernaut

Traits: Edge, Bloodied, Improvement

While you are Bloodied, an Attack benefitting from Unstoppable Fury also cannot have its Damage reduced by any means other than Immunity.

Berserker: Strike of Terror

Traits: Edge, Auto-Crit, Frightened

When you Hit a Creature that is Frightened by you, you Critically Hit instead.

Berserker: Frenzy

Traits: Blast, Attack, Drained, Final

Prerequisite: 5th Level

10 Actions: X Rage

You make up to X Weapon Attacks for free, ignoring the Multi-Attack Limit. All of these Attacks must Target the same Creature, and don't grant Rage if they normally would.

Become Drained X and End your Turn.

Path of the Storm

Those that walk the Path of the Storm are often followed by howling winds, pounding rain, and flashes of lightning. Their mere presence is enough to empower or calm a storm, but they often find joy in the midst of even the most troubling of weather.

Bonus Proficiencies: Athletics, Survival

Innate Feats:

Wind Chaser

Traits: Utility, Travel, Wind

Wind effects have no effect on you (including Speed reduction, Damage, and so on), and can't hinder your Party during Travel.

Additionally, when you take a Long Rest, you don't require shelter from weather for a Full Rest. If another effect would grant this benefit, this instead increases the Quality by 1.

Storm Call

Traits: Burn, Concentration, Disadvantage, Magical, Wind

3 Actions: 1 Rage

Range: 15 ft.

As long as you are Concentrating, Ranged Weapon Attacks that pass within Range of you have Disadvantage. Additionally, all spaces within Range are subjected to Strong Winds which are considered Difficult Terrain.

Alternatively, you may temporarily halt any other Wind or Weather effects within Range.

Storm: Swirling Debris

Traits: Burn, Blinded, Saving Throw

Free Action: 1 Rage

Restriction: Storm Call must be active.

All Creatures within the Range of Storm Call must make a Dexterity Saving Throw against your Constitution Score:

- **Failure:** They are Blinded for 1 Minute.
- **Success:** No effect.

Additionally, until Storm Call ends, all Precise Senses cannot perceive more than 5 feet through it.

A Creature can end this Condition with an Interact Action, or having about a pint water (or similar) splashed over their eyes.

Storm: Storm Fury

Traits: Burn, Damage, Chaos

Free Action: 1 Rage

Restriction: Storm Call must be active.

All Creatures within Range of Storm Call (except you) immediately take Damage equal to your Constitution Modifier (Minimum of 1), of one type which you roll on the following Table:

d4	Result
1	Cold
2	Fire
3	Lightning
4	Slashing

Storm: Focused Tempest

Traits: Burn, Attack

Free Action: 1 Rage

Trigger: When a Ranged Weapon Attack is made through the Range of Storm Call.

You make a Ranged Spell Attack Roll against a Creature within the Radius of Storm Call. On a Hit, the Triggering Attack Hits the Target. Otherwise, the Attacker makes an Attack Roll against the original Target.

This happens before the Triggering Attacker rolls to Hit.

Storm: Forceful Winds

Traits: Burn, Prone, Push

5 Actions: 1 Rage

Restriction: Storm Call must be active.

All Creatures within Range of Storm Call must make a Strength Saving Throw against your Constitution Score:

- **Critical Failure:** Same as Failure, but you may also move them to any Space within your Storm Call.
- **Failure:** They are pushed 5 feet in any direction, or knocked Prone.
- **Success:** No effect.
- **Critical Success:** They can move up to 20 feet to a space within the Range of Storm Call, without expending Movement.

Storm: Relentless Storm

Traits: Blast, Concentration, Improvement, Terrain

Prerequisite: 5th Level

10 Actions: 5 Rage

Restriction: Storm Call must be active.

Duration: 1 Minute

Storm Call no longer requires Concentration for the next Minute. Additionally, it's Range is doubled, and doesn't affect Creatures of your Choice.

Bard Colleges

College of Creation

Creation Bards spend their time mastering the artistic craft of creation, using such power to bring their creations into such a lifelike form that they may even walk or talk on their own. Thankfully, these creations won't turn upon their creator. Right?

Bonus Proficiencies: One Artisan's Tool, Disguise Kit
Bonus Spells (Always Prepared): Arcane Notebook, Conjure Servant, Cloud of Glitter, Fabricate, Polymorph, Creation

Innate Feats:

Animator's Song

Traits: Burn, Audible, Magical, Summon

10 Actions: 1 Bardic Inspiration

Range: 30 ft.

Target: One Small or Smaller Object

Duration: 10 Minutes

The Target animates in a lifelike manner for the Duration, becoming a Construct with 10 in all Ability Scores, 10 Hit Points, and a Walking Speed of 10 feet.

It shares your Turn, and may only take either the Move (full Movement), Attack or Interact Action for free, ending its Turn. The Interact Action can only Target itself or other Objects that it could reasonably interact with.

The Object also produces visuals, sounds, and smells that compliment its appearance, which are illusory.

Creation: Enduring Summons

Traits: Burn, Duration

Free Action: 1 Bardic Inspiration

Trigger: When you Summon a Creature or Animate an Object.

The Duration of the Triggering effect is doubled.

Special: You can use this effect multiple times on the same Trigger, compounding the effect.

Creation: Greater Animator

Traits: Edge, Improvement, Size

The Size of Object you can animate with Animator's Song or Create with Power of Creation increases by 1 Category.

You can take this Feat any number of times increasing the Size of animatable object by 1 each time.

Creation: Power of Creation

Traits: Utility, Magical

2 Actions: 1 Bardic Inspiration

Duration: 10 Minutes

You conjure one Tiny, Non-Magical Object for up to 10 Minutes. Such an Object has 1 Hit Point and disappears when broken.

If you don't know how to Craft the Object, the result is either Non-functional, or limited in its capabilities.

Creation: Weaponized Creations

Traits: Edge, Damage, Improvement

Objects you animate with Animator's Song can deal Damage of a Type you choose with their Unarmed Strikes, which also increases to equal your Bardic Inspiration Die.

Creation: Essence of the Beginning

Traits: Blast, Improvement, Movement, Spellcasting

Prerequisite: 5th Level

10 Actions: 5 Bardic Inspiration

Duration: 10 Minutes

All Summons created by you have a Flying Speed equal to 5 times your Charisma Score, and can use their Free Action to cast any Spell you have Prepared at any Tier you can cast at, using your Spell Slots.

College of Dance

From ballerinas to break dancers, those with happy feet often join the College of Dance. And when a Bard of Dance is upon a battlefield, every move becomes part of a much bigger dance that sweeps the battlefield.

Bonus Proficiencies: Acrobatics, Performance

Bonus Spells (Always Prepared): Force Emotion, Jump, Enhance Ability, Arcane Passage, Telekinesis, Compel

Innate Feats:

Dance Battler

Traits: Edge, Move

Whenever you take an Action with the Attack or Manipulate Trait, you may Step once for free.

Inspiring Haste

Traits: Edge, Improvement, Move

While a Creature has a Bardic Inspiration Die granted by you, they can Step an additional time each Round.

Dance: Backup Dancer

Traits: Utility, Advantage, Improvement

When a Creature expends a Bardic Inspiration Die granted by you, and is Adjacent to another Creature with Bardic Inspiration granted by you, they also gain Advantage on the Triggering Roll.

Note: The secondary Creature keeps their Bardic Inspiration.

Dance: Dance Battle Master

Traits: Edge, Move

When a Creature Misses you with an Attack Roll, or you Succeed on a Dexterity Saving Throw, you may Step once for Free.

Note: This also Triggers if you use the Step Action to cause a Miss, or Successful Save.

Dance: Dancer's Grace

Traits: Utility, Ability Check, Success

Free Action: 1 Bardic Inspiration

Trigger: You make any Ability Check using Dexterity.

You improve your Degree of Success by 1.

Dance: Happy Feet

Traits: Edge

When you grant a Bardic Inspiration Die to a Creature, they gain access to one Free Action of your choice, provided you have access to it.

If the Action requires any Class Resources (e.g. Action Surge), it expends your Bardic Inspiration instead.

Dance: Irresistible Dance

Traits: Blast, Audible, Concentration, Debuff, Disadvantage, Nullify

Prerequisite: 5th Level

5 Actions: X Bardic Inspiration

Range: 60 ft.

Up to X Creatures within Range must make a Charisma Saving Throw against your Charisma Score:

- **Critical Failure:** Same as Failure, but they cannot take Actions with the Manipulate Trait, and cannot Concentrate.
- **Failure:** While you are Concentrating, the Target cannot Dash, has Disadvantage on Attack Rolls, and is considered Distracted every Turn for the purpose of Concentration.
- **Success:** No effect.

This is effect accompanied by lights and music that appear in a Non-blinding/deafening manner, and compliment your performance.

College of Lore

Lore Bards are commonly thought of as nerds, especially since they are particularly adept at recalling information.

But in Combat, they tend to lend insights that even Mystery Bards tend to struggle with, leading to much greater effectiveness with their inspiration.

Bonus Proficiencies: Arcana, Society

Bonus Spells (Always Prepared): Arcane Notebook, Comprehend Languages, Recall Memory, True Speech, Magician's Field Study, Geas

Innate Feats:

Lore Keeper

Traits: Utility, Language, Visual

By observing a Creature for one Minute, you can gain an understanding of what that Creature is trying to communicate, as if you understood a broken version of that Language.

Interpreting a message in this way doesn't allow you to attempt Ability Checks against that Creature as part of the conversation (e.g. you can't determine a lie, but you can still Spot sleight of hand).

Popular Stories

Traits: Edge, Improvement

When you grant a Bardic Inspiration Die to a Creature, you may grant it to one additional Creature within Range of the original effect.

Lore: Magical Inspiration

Traits: Edge, Improvement, Spellcasting

When you grant a Bardic Inspiration Die, you may instead grant one Spell you have Prepared, which the Creature can cast once before the replaced Bardic Inspiration Die would expire, as if they had the Spell Prepared.

If they don't have Spellcasting, they instead use your Spell Slots if needed.

Having this benefit still counts as having a Bardic Inspiration Die from you.

Lore: Reliable Knowledge

Traits: Utility, Improvement

When you make any d20 Test you are Proficient in using Intelligence, you cannot roll lower than 10 on the d20 when rolling with that Skill.

Lore: Second Opinion

Traits: Burn, Ability Check, Audible

Free Action: 1 Bardic Inspiration

Trigger: A Creature within Range that isn't you, fails any Intelligence Check.

Range: 60 ft.

You attempt the Triggering Check yourself, which replaces the Triggering Roll if it's higher.

Lore: Solid Advice

Traits: Burn, Improvement

Free Action: 1 Bardic Inspiration

Trigger: When a Creature in Range expends a Bardic Inspiration Die.

Range: 60 ft.

The Target takes the highest value on their Bardic Inspiration Die, rather than rolling.

Lore: Reveal Lore

Traits: Blast, Audible/Visual, Information, Nullify, Resistance, Saving Throw, Verbal, Weakness

Prerequisite: 5th Level

10 Actions: 5 Bardic Inspiration

Duration: 1 Hour

The Target must make an Intelligence Saving Throw against your Intelligence Score:

- **Critical Failure:** Same as Failure, but their Weakness also bypasses any Resistances they have.
- **Failure:** The Target no longer benefits from any Damage Threshold they may have for the Duration as if exposed to a Weakness, and you can share one Resistance, Immunity or Vulnerability they have.
- **Success:** You learn and communicate one Resistance or Immunity the Target has.
- **Critical Success:** No effect.

Success or Failure, you also reveal one event that the Target (or their people) was involved in, even if you would otherwise not know it.

College of Mystery

A Bard of Mystery loves nothing more than the thrill of questions, asking what happens next, what the next twist will be, or leaving listeners on cliffhangers. It can often be difficult to predict the results of a Mystery Bard's idea, even for another Mystery Bard.

Bonus Proficiencies: Perception, Society

Bonus Spells (Always Prepared): Confuse, Hunter's Mark, Madden, Speak with Dead, Shadow's Guise, Nondetection

Innate Feats:

Puzzling Inspiration

Traits: Edge, Improvement

When a Creature fails any d20 Test using your Bardic Inspiration Die, you may choose to record the result rolled on the Inspiration Die.

The next time any Creature rolls a Bardic Inspiration Die granted by you, you may expend the recorded value, and treat the Triggering Bardic Inspiration Die as if it had rolled the recorded value.

You can only have 1 result recorded at any given time. Recording a second value overwrites the original.

Mystery: Elusive Disguise

Traits: Utility, Magical, Mental, Saving Throw

10 Minutes: 1 Bardic Inspiration

Range: 60 ft.

Target: One Creature you can see and hear for the entire 10 Minutes.

The Target must make a Charisma Saving Throw against your Wisdom Score:

- **Critical Failure:** Same as Failure, but observers have Disadvantage on checks to reveal the disguise.
- **Failure:** You learn enough details to construct the Target's persona, gaining Advantage on any required Checks to pass yourself off as them.
- **Success:** No effect.

If the Target is dead, they treat the Saving Throw as a failure, and you may also take on their appearance for up to an Hour.

Mystery: Shocking Twist

Traits: Burn, Audible/Visual, Charmed, Frightened

5 Actions: 1 Bardic Inspiration

Range: 30 ft.

All Creatures of your choice within Range must make a Charisma Saving Throw against your Charisma Score:

- **Failure:** The Target is Charmed or Frightened by you until you drop Concentration or they take Damage.
- **Success:** No effect.

Mystery: Strange Tales

Traits: Edge, Concentration, Magical, Teleportation

5 Actions: 1 Bardic Inspiration

Range: 30 ft.

As long as you Concentrate, all Creatures within Range can trade places with any other willing Creature within Range.

Mystery: Unsettling Chord

Traits: Burn, Auditory/Visual, Recovery, Saving Throw

3 Actions:

Range: 60 ft.

Duration: 10 Minutes

The Target must make a Charisma Saving Throw against your Charisma Score (even if they're Willing):

- **Critical Failure:** Same as Failure, but they lose Resources up to your Charisma Modifier.
- **Failure:** The Target loses 1 of any Class Resource (or similar) of their choice. If they don't have enough Class Resources, a Recharge X Action is considered expended for each Missing Class Resource. If the Target has nothing to expend, nothing happens.
- **Success:** No effect.

When you remove a Resource or expend a Recharge X in this way, you gain 1 Bardic Inspiration. Or, you can spend 1 Bardic Inspiration to grant 1 Class Resource to one other Creature within Range.

Mystery: Song of Wonder

Traits: Blast, Actions, Audible, Buff, Concentration

Prerequisite: 5th Level

10 Actions: 5 Bardic Inspiration

Range: 60 ft.

While Concentrating, all Creatures of your Choice within Range gain 1 Action Point at the Start of each Round for each other Creature that is benefitting from your Bardic Inspiration.

Additionally, any Creatures that benefit from this Feature can freely swap Class Resource Totals at the Start of each Round (e.g. you can swap a 3 and 17, but you can't combine them for 1 and 19).

Excess Class Resources are lost immediately.

Cleric Domains

Knowledge Domain

Much like Magic Clerics, Knowledge Clerics are all about preservation and Knowledge. However, they are also incredibly skilled in discovering new things, particularly in a specialized field. Few are as skilled at answering questions, and fewer still can reliably uncover secrets.

Common Anathemas:

- Destroying any sources of non-forbidden knowledge.
- Spreading lies.
- Making information impossible to uncover.

Bonus Proficiencies: Arcana, Religion

Bonus Spells (Always Prepared): Message, Discern Craft, Detect Thoughts, Scrying, Magician's Field Study, Creation

Innate Feats:

Divine Knowledge

Traits: Utility, Proficiency

Free Action: 1 Divine Intervention

Duration: 8 Hours

For the Duration, you are considered to be Proficient in one Skill, Tool, Weapon or Language of your Choice.

Profound Intelligence

Traits: Edge, Advantage

You have Advantage on all Intelligence Checks and Saving Throws.

Knowledge: Ancient Secrets

Traits: Utility, Information

10 Minutes: 1 Divine Intervention

You immediately learn where to find the information you seek, such as "Who is Leozaphir?", "What is Borogrog's Weakness?", or "What happened to the lost city of Atlantis?"

The question must state a specific thing, and can lead you to a location such as a library, a ruin, or the Creature in question.

If the GM doesn't have an answer, you learn this information as soon as it becomes available, assuming the GM remembers to provide it (you can remind them, just be polite).

Special: If you have Divine Guidance, that Feat also reveals if the expected outcome for that Feat can be changed through your actions, or if there are factors outside your control.

Knowledge: Mental Fortress

Traits: Edge, Immunity, Mental

You are Immune to Psychic Damage and your mind cannot be read or changed by any means, unless you allow it.

Knowledge: Secret Sharer

Traits: Utility, Ability Check, Improvement, Language, Magical

You gain Telepathy out to 60 feet. You can use this Telepathy to use Society against a Target's Intelligence Score instead of Charisma.

Knowledge: Truth Seer

Traits: Edge, Magical, Sense

You gain Truesight 30 ft.

Knowledge: Confound

Traits: Blast, Nullify

Prerequisite: 5th Level

10 Actions: 5 Divine Intervention

Range: 60 ft.

Duration: 10 Minutes

For the Duration, all Weaknesses, Vulnerabilities, Resistances and Immunities do not apply to Creatures of your choice within Range.

Life Domain

In a world filled with countless monsters, plants and hazards, life is incredibly precious and fragile. Life Domain Clerics protect and guide, so that others can live life to the fullest extent. Moreover, they are Healers rather than Fighters, often appalled at the mere prospect of killing, even to save their own life.

Common Anathemas:

- Killing or Harming a living thing without a good reason. Even indirectly.
- Causing a living thing to suffer needlessly.
- Withholding medicine from the sick or injured.
- Creating Undead. Interacting can be okay.

Bonus Proficiencies: Medicine, Persuasion

Bonus Spells (Always Prepared): False Life, Cure Wounds, Restoration, Revivify, Death Ward, Heal

Innate Feats:

From Death's Door

Traits: Edge, Drained, Improvement

When you use any Action or Feat with the Holy/Unholy or Magical Traits to restore Hit Points to a Creature, you also reduce their Drained Condition by 1.

Persistent Healing only applies this benefit when you first apply it.

Guardian Angel

Traits: Edge, Buff, Death Save, Magical

While you are Conscious and adjacent to a Creature, they cannot gain Death Save Failures.

Life: Invigorating Mercy

Traits: Edge, Actions

When you take any Action with the Healing Trait, you can expend additional Resources or Spell Slots to use it on yourself without spending additional Actions, or impacting the Multi-Attack Limit.

The Resources or Slots must be of the same type, and in the same quantity.

Life: Potent Healing

Traits: Burn, Healing, Improvement

Free Action: 1 Divine Intervention

Trigger: You roll 1 or more dice when you Heal a Creature.

You replace the lowest die with its highest possible value.

Special: You can use this any number of times on the same Trigger.

Life: Restoration Master

Traits: Edge, Improvement

Healing applied by you now works on all Creatures (such as Constructs, Undead, or Poisoned Creatures). If an Action states that it only affects a specific Type of Creature (such as Mending), said Healing doesn't benefit from this Feat.

You may also treat any Creature you choose, as if they were Bloodied for any Healing effects such as Divine Power.

Life: Sanctioned for Life

Traits: Edge, Nullify

1 Minute: 1 Divine Intervention

Duration: 1 Hour

For the Duration, the Target cannot Die.

If an effect would cause them to Die, the Triggering effect is ignored, and the Target is Stabilized if they are already Unconscious or Dying, and automatically wakes up at the end of the Duration if they were Unconscious.

This doesn't force the Target to awaken when Dying.

Life: Mass Heal

Traits: Blast, Healing

Prerequisite: 5th Level

10 Actions: X Divine Intervention

Range: 120 ft.

All Creatures of your choice within Range regain Hit Points equal to X * your Level.

Light Domain

Light Clerics are usually what you would expect from a Cleric. They bring comfort, peace, light and judgment to those around them, while banishing the evils of the world to make it a safer place.

Common Anathemas:

- Creating Darkness. Extinguishing excess light is fine.
- Leaving a Creature without hope.
- Fiends and Undead.
- Confusing or obscuring the Truth.
- Sneaking in the shadows.

Bonus Proficiencies: Perception, Religion

Bonus Spells (Always Prepared): Light, Bless, Zone of Truth, Faerie Fire, Halo of Brilliance, Apotheosis

Innate Feats:

Blinding Light

Traits: Edge, Disadvantage

Any Light sources created by you impose Disadvantage on Attack Rolls made by any Anathema to your Deity, that is within the Bright Light Radius.

Sun's Gift

Traits: Edge, Immunity

You are Immune to the Blinded Condition, and no longer suffer the penalties of having Sunlight or Bright Light sensitivity, if you once suffered from that.

You are also Immune to all Damage from Sunlight, if it would normally do so.

Light: All-Seeing Sun

Traits: Edge, Nullify

Creatures within the Bright Light radius of any Light you have created cannot be Hidden or Invisible to any other Creature within Line of Sight, even if the observing Creature cannot see.

You do become aware of Objects or scrying sensors that are Hidden or Invisible, though you don't learn their exact location.

Light: Burning Light

Traits: Burn, Damage, Improvement, Radiant

3 Actions: 1 Divine Intervention

All Creatures within the Bright Light Radius of any Light source you have created must make a Constitution Saving Throw against your Wisdom Score:

- **Critical Failure:** Double Damage.
- **Failure:** They take 1d6 Radiant Damage.
- **Success:** No Damage.

Light: Hopeful Embers

Traits: Edge, Buff, Immunity, Improvement, Nullify, Temporary Healing

Duration: 1 Hour

When a Magical Light you have created is extinguished or disappears, each Creature in its Bright Light radius can gain Temporary Hit Points equal to your Wisdom Score for the Duration.

While a Creature has these Temporary Hit Points, they are Immune to the Charmed and Frightened Conditions.

Light: Radiance

Traits: Edge, Improvement, Persistent

When you take any Action that Targets an area, any Damage or Healing also adds 1 Persistent Damage or Healing of the corresponding type.

Light: Beacon of Power

Traits: Blast, Improvement

Prerequisite: 5th Level

10 Actions: 5 Divine Intervention

Duration: 10 Minutes

For the Duration, all Actions you take with the Buff or Debuff Trait can apply to any number of additional Creatures (up to your Wisdom Modifier) within the Bright Light radius of any Light you have created, even if such Creatures are outside the Range of the original effect.

This treats Persistent Damage as a Debuff, and Persistent Healing as a Buff.

Magic Domain

A Magic Cleric collects and preserves Magical Items, Spells, and other things that have some Magical significance. As part of their dedication, they often gain access to far more magic, as well as power to strengthen or nullify the magic of those around them.

Common Anathemas:

- Allowing a Spell, or other arcane tradition to be forgotten.
- Destroying a Magical Item, or allowing it to be destroyed (some exceptions may apply).
- Creating a new Twisted Land.

Bonus Proficiencies: Arcana, Occultism

Bonus Spells (Always Prepared): Arcane Shove, Minor Enchantment, Hold Creature, Anti-Magic Field, Magnetism, Dimensional Binding

Innate Feats:

Nullify Magic

Traits: Burn, Debuff, Magical, Nullify, Saving Throw

3 Reactions: 1 Divine Intervention

Trigger: A Creature within Range takes any Action with the Magical Trait.

Range: 30 ft.

The Triggering Creature must make a Charisma Saving Throw against your Spell Save DC:

- **Critical Failure:** Until the End of their next Turn, they cannot use any Action with the Magical Trait, and Magic Items fail to operate for them.
- **Failure:** They cannot use the Triggering Action until the End of their Next Turn.
- **Success:** The Triggering Action costs 5 additional Action Points.
- **Critical Success:** No effect.

Spell Preservation

Traits: Burn, Spellcasting

Free Action: 1 Divine Intervention

Trigger: A Creature within Range casts a Spell that you don't have Prepared.

Range: 60 ft.

You automatically recognize the Triggering Spell, and can cast it once as if you had Prepared it as a Cleric Spell.

This Spell doesn't count against the number of Spells you have Prepared, but is lost after you finish a Long Rest.

Magic: Arcane Aura

Traits: Edge, Actions, Magical, Nullify

Creatures of your choice within 5 feet of you double the Action Cost of all Spells as if they were bypassing a Component, unless you decide otherwise. This also prevents bypassing Components without the use of a Feat.

You also recognize Magic Items on sight, and can similarly prevent their activation while within 5 feet of them, including Curses.

Magic: Keeper of Magic

Traits: Utility, Spellcasting

You can use Spell Scrolls Prepare Spells from any Spell List as a Divine Spell, though this consumes the Spell Scroll.

Additionally, all Spells you cast are considered Holy/Unholy, unless the Spell is an Anathema to your Deity.

Magic: Spell Immunity

Traits: Edge, Nullify

Spells that are cast at 1st Tier or lower have no effect on you if you aren't Incapacitated. Cantrips are considered 1st Tier Spells unless Empowered to a higher Tier.

You can take this Feat any number of times, provided you have access to Spell Slots of an equivalent Tier. However, this effect cannot block 10th Tier Spells.

Magic: Spellkeeper's Power

Traits: Edge, Improvement, Spellcasting

You use Wisdom to determine your Spell Save DC instead of Charisma.

Magic: Power Spell

Traits: Blast, Drained, Improvement

Prerequisite: 5th Level

5 Reactions: X Divine Intervention

Trigger: A Creature within Range casts any Spell.

Range: 30 ft.

The Triggering Spell is Empowered by X for free, and you become Drained X.

Protection Domain

Protecting those who cannot protect themselves is a duty that always arises when evil shows its face. Answering this call are Protection Clerics that will remain strong and vigilant no matter the threat. Sometimes, a Protection Cleric may be assigned to protect something specific.

Common Anathemas:

- Walking away from those that are helpless.
- Betraying allies.
- Leaving someone to fight alone.
- Starting a Fight against Creatures that aren't known aggressors.
- Allowing a greater threat to live and harm others. Excusable if they are truly redeemed.

Bonus Proficiencies: Athletics, Any Armor

Bonus Spells (Always Prepared): Guard, Mage Armor, Protective Bond, Sanctuary of Protection, Warding Circle, Spell Cage

Innate Feats:

Lockdown

Traits: Burn, Attack, Nullify

2 Reactions: 1 Divine Intervention

Trigger: A Creature within your Reach takes any Action with the Move Trait.

Make a Melee Weapon Attack against the Triggering Creature, ignoring the Multi-Attack Limit, and applying the corresponding effect:

- **Critical Hit:** Same as Failure, and the Target cannot take any Action with the Move Trait while they're within your Reach.
- **Hit:** The Triggering Action is wasted.
- **Miss:** No effect.

Protector's Aura

Traits: Edge, Disadvantage

Attack Rolls against allied Creatures within 10 feet of you (excluding you) are at Disadvantage.

Protection: Brave

Traits: Edge, Nullify

You and Creatures within 10 feet of you are unaffected by the Frightened Condition, though secondary effects still apply.

Protection: Heavenly Barrier

Traits: Burn, Buff, Resistance

3 Actions: 1 Divine Intervention

Range: Touch

Duration: 1 Minute

The Target gains Resistance to one Damage Type of your choice for the Duration, with a value equal to your Wisdom Score.

Protection: Protector's Promise

Traits: Edge, Temporary Healing

When you deal Damage with any Action that has the Holy/Unholy Trait, one Creature within your Reach gains Temporary Hit Points equal to the total Damage taken.

Protection: Protector's Rebuke

Traits: Edge, Actions, Long Rest

When you finish a Long Rest, you may select any Creature to be your Charge.

When your Charge is Attacked, you immediately take any Action with the Attack Trait as a Free Action, even if you wouldn't be able to do so, Targeting the Triggering Attacker. This ignores the Multi-Attack Limit.

Protection: True Guardian

Traits: Blast, Concentration, Drained, Immunity

Prerequisite: 5th Level

10 Actions: 5 Divine Intervention

Range: 60 ft.

While Concentrating, one Target within Range cannot take Damage.

If both you and the Target are Willing, you become Drained equal to half your Hit Point Maximum (rounded up), and the Target is also Incapacitated until a condition of your choice takes place.

The condition must be easily spoken by you, but can otherwise be as arbitrary as you and the GM accept (e.g. "until you are safe"). But until this condition is fulfilled you no longer need to Concentrate, and the effect cannot not end, even if you die.

Travel Domain

Clerics of Travel are always on the move. They often follow a trail (seen or unseen) that leads them to where they need to be. With their blessing, any group of travelers can rest easy, knowing they'll be safe along the paths.

Common Anathemas:

- Giving incorrect Directions to travelers.
- Remaining in one place.
- Restraining others, or preventing them from travelling.
- Removing agency.
- Destroying paths.

Bonus Proficiencies: Athletics, Any Vehicle

Bonus Spells (Always Prepared): Compass of Destiny, Longstride, Portal Compass, Teleportation Circle, Sanctuary of Rest, Ghost Ship

Innate Feats:

Jubilant Feet

Traits: Utility, Initiative, Travel

While on any road, trail, or other trodden path, you and any Creatures that accompany you travel in half the time. Additionally, any such Creatures cannot be Surprised at the Start of Combat from an Encounter while Traveling.

Proficient Traveler

Traits: Edge, Actions, Improvement

You can Dash even if you've taken Actions with the Manipulate Trait, and vice versa.

Note: Actions that don't have the Manipulate Trait still prevent the Dash Action.

Travel: Easy Travels

Traits: Edge, Actions, Nullify, Travel

All Actions with the Move Trait cost 1 less Action Point for you, to a minimum of 0. You also cannot gain Exhaustion from traveling quickly, or through hazardous Terrain, unless the Encumbered raises the Action Cost of Moving to the original value or higher.

You can take this Feat any number of times, reducing the Action Cost further.

Travel: Go with Haste

Traits: Edge, Buff

When you Dash, one Creature you can see may also Dash for free at the Start of their next Turn.

Travel: Journey's Blessing

Traits: Utility, Advantage, Travel

When you roll for an Encounter during your travels, you may re-roll once and take either result. Additionally, you gain Advantage on any d20 Tests to negotiate or peacefully resolve the Encounter.

Travel: Safe Flight

Traits: Burn, AC, Buff, Travel

3 Actions: 1 Divine Intervention

Range: Touch

Until the Target ends their Turn without taking the Dash Action, they increase their AC by your Wisdom Modifier.

If the Target Travels at a doubled pace while under this effect, they can choose to skip or ignore all Encounters.

Travel: Freedom of Movement

Traits: Blast, Immunity, Movement, Nullify

Prerequisite: 5th Level

10 Actions: 5 Divine Intervention

Range: Touch

Duration: 10 Minutes

For the Duration, the Target is Immune to the Grappled, Restrained and Slowed Conditions. Additionally, they are unaffected by Difficult Terrain, and cannot have their Movement Speed reduced by any means.

Any pre-existing Condition or effect that falls within these parameters also ends immediately.

Trickery Domain

When the first thing you see is graffiti on your shrine, you were probably the victim of a Trickery Cleric. They specialize in sneaking around, pulling pranks, and making people look twice before they open a doorknob.

Common Anathemas:

- Causing irreparable harm to the innocent, even with a prank.
- Passing up an obvious chance to mess with other Clerics.
- Getting truly caught unexpectedly.
- Ending a prank prematurely.
- Taking items needlessly.
- Letting boredom reign.

Bonus Proficiencies: Stealth, Thievery

Bonus Spells (Always Prepared): Minor Illusion, Arcane Disguise, Cloud of Glitter, Mirror Image, Etherealness, Nondetection

Innate Feats:

Illusory Jaunt

Traits: Burn, Move, Teleport

Free Action: 1 Divine Intervention

You Teleport up to 10 feet, and conjure an illusory image in your place.

The image looks exactly like you, and responds accordingly.

Trickster's Gift

Traits: Utility

Free Action: 1 Divine Intervention

Trigger: A Creature within Range fails a Deception, Performance, Stealth, Thievery, or other Check of a similar nature that may get them into trouble.

The Target may either reattempt the Triggering Check, or treat it as if nothing happened.

Trickery: Duplicity

Traits: Burn, Mental, Summon

Free Action: 1 Divine Intervention

Duration: 1 Hour

You create an Illusory Duplicate of yourself in an unoccupied space within your Reach, which uses your statistics, lasts for the Duration and cannot act on its own.

When you take any Action, you may take it from your Duplicate's space, expending Consumables and Resources as usual.

Whenever you or a Duplicate takes Damage, you may choose to take the Damage, or lose the duplicate, but only once per Damage source.

You can also see, hear and smell from all spaces your duplicates occupy.

Trickery: Mischief Master

Traits: Utility, Advantage, Sense

You have Advantage on Checks you make to Spot, Identify, Set, or Disable Traps. You also become aware when an Invisible or Hidden Creature is within your Line of Sight, though you don't learn their position.

Trickery: Reliable Trickster

Traits: Utility, Improvement

Trickster's Gift now adds your Wisdom Modifier to the Triggering Check.

Trickery: Chaotic Duplicity

Traits: Edge, Improvement

Prerequisite: Duplicity

When you take an Action with the Move Trait, any Duplicate of your choice may replicate that movement for free.

Trickery: Slick Getaway

Traits: Blast, Invisible

Prerequisite: 5th Level

5 Actions: 5 Divine Intervention

Duration: 10 Minutes

You become Invisible for the Duration. While Invisible in this way, Actions with the Magical Trait don't end the Condition unless you allow them to.

Additionally, Divination Magic and Truesight cannot perceive you. You also don't leave any evidence that can be tracked back to you as doors close silently, dust resettles, stains are undone, and images exclude you.

War Domain

War Clerics often roam the world, waging war against enemies of their faith. Sometimes these wars are personal, but a few have escalated to an incredibly dramatic scale, often involving multiple nations, and once, the entire world. No wonder they don't make very many friends.

Common Anathemas:

- Walking away from a fight, especially if you know you can win.
- Negotiating for peace with enemies of your faith (exceptions can be made when there's more at stake).
- Showing mercy or forgiveness.
- Redeeming enemies.
- Letting go of a grudge.
- Living a peaceful life.

Bonus Proficiencies: Any Weapon, Heavy Armor

Bonus Spells (Always Prepared): Sacred Flame, Inflict Wounds, Summon Divine Weapon, Spiritual Guardians, Arcane Artillery, Harm

Innate Feats:

Sense for Battle

Traits: Edge, Improvement, Weapon

Your Weapon Attacks can use your Spell Modifiers instead of your Weapon Modifiers. Saving Throws from Weapons, or with the Weapon Trait use your Spell Save DC.

War: Attrition

Traits: Burn, Damage, Exhaustion, Holy/Unholy, Radiant/Necrotic

Free Action: 1 Divine Intervention

Trigger: You regain Hit Points, or Temporary Hit Points

Range: 30 ft.

One Target within Range must make a Constitution Saving Throw:

- **Critical Failure:** Same as Failure, but they also take Exhaustion 1.
- **Failure:** They take Radiant Damage (or Necrotic if Unholy) equal to the total Healing applied.
- **Success:** No effect.

War: Holy Frenzy

Traits: Edge, Temporary Healing

Whenever you take Damage that doesn't reduce you to 0 Hit Points, you gain a number of Temporary Hit Points equal to your Level.

While you have these Hit Points, you must inflict Damage to at least one Creature that isn't you during your Turn, or lose these Hit Points at the End of your Turn.

War: War Baron's Smite

Traits: Edge, Damage, Improvement, Holy/Unholy, Radiant

Your Weapon Attacks all deal an additional 1d6 Radiant Damage (or Necrotic if Unholy).

War: War's Toll

Traits: Edge, Damage

When you inflict Radiant or Necrotic Damage from an Action or Feat with the Holy or Unholy Trait, you may inflict the same amount of Damage to another Creature within 30 feet of you.

You can take this Feat any number of times, repeating the Damage to an additional Creature within Range.

War: Warrior's Blessing

Traits: Blast, Buff

Prerequisite: 5th Level

10 Actions: X Divine Intervention

Range: Touch

Duration: 1 Minute

For the Duration, one Target you Touch has a +X Bonus to Attack Rolls and AC.

Druid Circles

Circle of the Land

Where the groves grow thickest, the Land Druids settle abundantly. For the trees are their home, and the land provides. Land Druids are the best known on the surface, as they can guide travelers in ways that even Rangers struggle to match.

Bonus Proficiencies: Land Vehicles, Stealth
Bonus Spells (Always Prepared): Prestidigitation, Nature's Eyes, Conjure Tree, Commune with Nature, Sanctuary of Rest, Planar Transportation

Innate Feats:

Improved Climb

Traits: Edge, Movement

You have a Climbing Speed equal to your Walking Speed, or increase it by the same amount. Also, both hands remain free while Climbing, unless you climb on a ceiling.

Nature's Shelter

Traits: Utility, Cover, Rest

When you Rest in an area that contains healthy plantlife, all Creatures that Rest with you are considered Sheltered, and to have comfortable bedding.

Additionally, the entire area grants Half-Cover to all Creatures of your choice during an Ambush against you and your Party.

Land: Goodberry

Traits: Burn, Immunity, Nullify

1 Minute: 1 Druidry

Duration: 1 Hour

You conjure a berry that provides enough nourishment for one Creature, and counts as a cooked meal for the purpose of a Full Rest.

A Creature that eats this berry also becomes Immune to the Poisoned Condition for the Duration, ending any such effect early.

Uneaten Berries rot and lose their potency after the Duration.

Land: Plant Growth

Traits: Burn, Terrain

2 Actions: 1 Druidry

Target: 5 ft. Cube

Range: 30 feet.

You cause any living Plants (not Creatures) within Range to grow into any shape within the Target area. This effect can create Terrain, walls, floors, or camouflage. These plants 10 Hit Points, and Fire Vulnerability 1.

If you create Terrain, you may also choose to make it Difficult Terrain. Regardless, this Terrain maintains any properties of the original Plant.

Land: Primal Awareness

Traits: Edge, Advantage, Magical

You are aware of all Creatures within 100 feet of you as if with an Imprecise Sense. This allows you to pinpoint their location and Creature Type, but not their identity.

You also have Advantage on Perception Checks to track Creatures.

Creatures that cannot be detected by Divination Magic are still detected, but you don't learn their location.

Land: Solid Ground

Traits: Edge, Movement, Terrain

Creatures of your Choice within 30 feet of you ignore Difficult Terrain as long as they are Walking or Climbing.

If they don't have a Climbing Speed, they don't treat Climbing as Difficult Terrain, provided they Succeed on any required Athletics Checks.

Land: Protective Respite

Traits: Blast, Persistent Healing

Prerequisite: 5th Level

20 Actions: X Druidry

Duration: 1 Hour

Range: 15 ft.

You create a sphere of earth or plants around you and any number of Creatures within Range. All Creatures within take no Damage from outside sources.

The sphere has 100 Hit Points, and grants X Persistent Healing to All Creatures inside. This Healing ends early if the sphere is broken, or the Duration ends.

You can also cause the sphere to break at any time as a Free Action, prematurely ending the effect.

Circle of the Moon

Prerequisite: Wildshape or Animal Companion

Many consider the Moon Circle to be a front for Lycanthropic Druids, and in some cases, would be right.

However, the Circle of the Moon is adept at revealing secrets that would otherwise be hidden, as well as the beast inside all, and not just inside themselves.

Bonus Proficiencies: Athletics, Perception

Bonus Spells (Always Prepared): Mark, Hunter's Mark, Identify Curse, Bestow Curse, Warding Circle, Frenzy

Innate Feats:

Enhanced Wildshape

Traits: Edge, Actions, Improvement

If you have the Wildshape Feat, it only takes 5 Actions to use.

Magical Companion

Traits: Edge, Improvement, Languages, Spellcasting

If you have the Animal Companion Feat, your Companion can speak all languages it knows, and one Language you know.

Additionally, you can cast Touch Spells through your Animal Companion's space.

Moon: Moon's Light

Traits: Utility, Information

When you observe any Creature under an Illusion, or effect with the Transformation Trait, you learn what their true form is, though this doesn't reveal identity.

Moon: Lasting Shape

Traits: Edge, Improvement

Prerequisite: Wildshape

Creatures that benefit from your Wildshape Feat (including you) can choose to retain the effects, even if they lose the Temporary Hit Points, or the Duration ends.

Instead, any further Damage is taken to their Hit Points, and they can choose to end this effect at any time afterward, as per Wildshape. However, falling Unconscious still ends the effect if you are reduced to 0 Hit Points.

Moon: Lycanthropic Hide

Traits: Blast, Buff, Resistance

Prerequisite: 5th Level

10 Actions: X Druidry

Duration: 10 Minutes

Range: 30 ft.

Any number of Creatures of your choice within Range that are under an effect with the Transformation Trait gains Physical Resistance equal to your Level.

Moon: Moon's Gift

Traits: Edge, Improvement

Prerequisite: Wildshape

Duration: 1 Hour

Range: Touch

When using Wildshape, you may choose to apply the effects of Wildshape to a Target within Range for the Duration instead. If they are unwilling, they can make a Charisma Saving Throw against your Spell Save DC:

- **Failure:** They are Transformed as per Wildshape for the Duration.
- **Success:** No effect.

When used in this way, Wildshape only ends early when the extra Hit Points are lost, or you revert them as per Wildshape (as if you were the Transformed Creature).

You can always use this on your Animal Companion, even if they aren't within Range.

Moon: Moon Walker

Traits: Edge, Movement, Teleport

Prerequisite: Animal Companion

Restriction: Once per Round

All Spaces adjacent to you can be considered adjacent to your Animal Companion for one Action of your choice, and vice versa.

If you have other Summoned Creatures or Creatures under the effects of the Moon's Gift Feat, they also benefit from this, but the use is shared among all Creatures, and must involve either you or an Animal Companion.

You can take this Feat any number of times, increasing the number of times it can be used.

Circle of the Pack

A howl beneath the midnight moon may signal a Werewolf, but a Pack Druid is often much more frightening. Alongside their arsenal of Primal Magic, a Pack Druid always has many forest friends that are much harder than ordinary beasts.

Warning: Summons can be difficult for a GM to handle, particularly when you Summon a lot of them at once, and/or without warning. There are rules to alleviate this issue (pg. 90), but please talk to your GM about what is and isn't okay, and also be sure to prepare the Beasts you wish to summon in advance (pg. 522).

Bonus Proficiencies: Nurture, Survival

Bonus Spells (Always Prepared): Guidance, Summon Beast, Darkvision, Web, Shadow's Guise, Compel

Innate Feats:

Primal Power

Traits: Burn, Resources

2 Actions: 1 Druidry

You recharge one use of a single Feature that a Summon has, provided it doesn't require a Long Rest.

Alternatively, the Creature you Summoned can be given one of your Spell Slots.

Rally the Wilds

Traits: Edge, Improvement

Whenever you Summon a Creature based on how many Hit Dice they have, you can instead Summon any number of Creatures, provided the total Hit Dice are less than or equal to the maximum.

Additionally, all of your Summons benefit from your Feats, using your Druidry as needed.

Special: If you have the Animal Companion Feat, they can take any Action you have access to (including Spellcasting, which expends your Spell Slots), unless it requires an Item they don't have.

Pack: Animal Alliance

Traits: Utility, Charmed

Until you take an Action that would remove the Condition, all Beasts are considered Charmed by you, even if they're Immune.

Pack: Dying Howl

Traits: Burn, Summon

Free Action: 1 Druidry

Trigger: You begin Dying.

You Summon a Beast (or number of Beasts) with a number of Hit Dice that totals to equal your Proficiency Bonus.

Pack: Parting Gift

Traits: Edge, Actions, Improvement

When a Creature that you have Summoned is reduced to 0 Hit Points, they immediately take one Action that is available to them.

Pack: Sharpened Claws

Traits: Edge, Damage, Improvement

Creatures you Summon roll an additional die of Damage as Precision Damage for all Attacks.

Pack: Pack Rush

Traits: Blast, Attack

Prerequisite: 5th Level

10 Actions: X Druidry

Duration: 1 Minute

Range: 30 ft.

For the Duration, up to X Creatures of your Choice within Range can take the Attack Action for free once per Round, as long as their Target is within the Reach of a different Creature that isn't friendly to said Target.

Circle of the Sea

Where the call of the sea brings many sailors to a new venture, for Sea Druids, the very waters beckon them near and heed their call in turn. A Sea Druid can be a powerful ally for sailors, but also their worst enemy.

Bonus Proficiencies: Aquan, Water Vehicles

Bonus Spells (Always Prepared): Command Water, Conjure Liquid, Water Breathing, Mirror Image, Conjure Wave, Ghost Ship

Innate Feats:

Excellent Swimmer

Traits: Edge, Swimming

You gain a Swimming Speed equal to your Walking Speed or increase it by the same amount.

Also, taking an Action while Holding your Breath no longer counts against the number of Rounds you have left before needing to breathe.

Sea Strike

Traits: Burn, Bludgeoning, Push, Saving Throw, Water

2 Actions:

Range: 30 ft.

The Target must make a Strength Saving Throw:

- **Critical Failure:** Same as Failure, but the Damage and Distance are doubled.
- **Failure:** The Target takes Bludgeoning Damage equal to your Wisdom Modifier, and is pushed 5 feet for every point they take (after Resistances and Vulnerabilities).
- **Success:** No effect.

Creatures that are Swimming or Flying have Disadvantage on the Saving Throw. When used Underwater, you can Target a 5x30 ft. Line, or completely restore a Creature's Breath instead.

Sea: Atlantian

Traits: Utility, Advantage, Water

You can breathe Water, and have Advantage on Saving Throws against effects with the Water Trait.

Additionally, you may restore the Breath of one submerged Creature you are aware of within 30 feet of you, at the Start of your Turn as long as you are Conscious.

Sea: Ocean Coat

Traits: Edge, Resistance, Water

You gain Resistance to Acid, Cold, or Fire Damage equal to your Level. Additionally, you are always considered to be immersed in water unless you choose not to be.

You can take this multiple times, picking a different Damage Type each time.

Sea: Water Walk

Traits: Burn, Movement, Water

5 Actions: 1 Druidry

Range: Touch

Duration: 10 Minutes

The Target can treat liquid surfaces as if they were solid ground. If they are already submerged, they are pushed 120 feet towards the surface at the Start of their Turn.

The Target can choose to walk on the inside or outside of a liquid surface, and can choose not to be pushed to the surface, allowing them to become submerged if they weren't already.

Sea: Wavesense

Traits: Utility, Sense, Water

While Underwater, you have Tremorsense 30 ft. (Precise). This only applies to other Creatures or Objects that are Underwater.

Sea: Rising Tide

Traits: Blast, Cold, Concentration, Damage, Water

Prerequisite: 5th Level

10 Actions: 5 Druidry

Range: 30 ft.

Until you lose Concentration, any area within Range rapidly fills with frigid Water that inflicts Cold Damage equal to your Wisdom Modifier to any Creature of your Choice that Starts its Turn there, or enters it for the first time on its Turn.

You can also allow any number of Creatures of your choice to breathe in this area, even if they couldn't normally.

Circle of the Sky

Where birds glide free is where Sky Druids call home.

Rather than living in trees, caves, or other isolated hovels, the Sky Druids often travel on clouds and winds, going wherever they drift. But even the ones that travel with ground beasts often find themselves taking to the sky.

Bonus Proficiencies: Air Vehicles, Auran

Bonus Spells (Always Prepared): Control Wind, Wind Stream, Earthbind, Fly, Telekinesis, Control Weather

Innate Feats:

Float

Traits: Burn, Movement, Wind

2 Actions: 1 Druidry

Range: Touch

Until the End of their next Turn, the Target treats their Walking Speed as a Flying Speed, and ignores Difficult Terrain caused by Wind.

When this effect Ends, the Target glides down 50 feet at the end of each Round rather than falling, and doesn't take Fall Damage when landing in this way.

Read the Winds

Traits: Utility, Information, Travel

You can predict Non-Magical Weather up to 24 Hours in advance, and cannot be slowed or harmed by it.

Sky: Wind Barrier

Traits: Burn, Buff, Disadvantage, Terrain, Wind

2 Actions: 1 Druidry

While Concentrating, Ranged Weapon Attacks have Disadvantage to Hit you, a 5 ft. Radius around you is subjected to Strong Winds, and other Creatures treat the area as Difficult Terrain.

Sky: Cloud Craft

Traits: Utility, Terrain

You can choose to walk in, or on Clouds as if they were Difficult Terrain. This also extends to thick clouds of Non-Magical smoke, fog, or steam.

If you spend 1 Minute to do so, you may shape a 5 ft. section of cloud to hold other Creatures or Objects for up to 1 Hour, which also protects it from Strong Winds. Additionally, you treat shaped clouds as Non-Difficult Terrain.

Sky: Dust Devil

Traits: Burn, Push, Restrained, Terrain, Wind

5 Actions: 1 Druidry

Range: 30 ft.

You fill a 5 ft. Space with swirling winds that form a Dust Devil.

A Creature that enters the space or starts its Turn there must make a Strength Saving Throw against your Wisdom Score:

- **Critical Failure:** Double Distance.
- **Failure:** They are Thrown 10 feet in a direction of your choice taking Fall Damage in the process, or become Restrained until the Start of their next Turn, at which point, they must re-attempt the Saving Throw.
- **Success:** No effect.

The Dust Devil's Space is considered Difficult Terrain, and filled with Strong Wind. You can also move it up to 10 ft. as an Interact Action.

Sky: Storm Call

Traits: Burn, Lightning, Terrain, Wind

10 Actions: 1 Druidry

Range: 60 ft.

Target: 15 ft. Radius

The Targeted Area is immediately subjected to Strong Winds. It is also considered Difficult Terrain for the Duration, and all Fire Damage that passes through the area is reduced by your Wisdom Modifier.

Additionally, any effect that inflicts Lightning Damage to this area (not just a Creature inside of it) Targets all Creatures inside of it (Attacks use the same roll).

Sky: Battering Winds

Traits: Blast, Push, Saving Throw, Wind

Prerequisite: 5th Level

15 Actions: X Druidry

Range: 60 feet

Target: 15 ft. Radius

All Creatures in the Targeted Area must make a Strength Saving Throw against your Wisdom Score:

- **Critical Failure:** Same as Failure, but double the distance.
- **Failure:** They are pushed 10 feet in any direction of your choice for every Druidry you spent on this. If they hit a Wall or another Creature in this process, they take Damage as if they had fallen the distance pushed.
- **Success:** Half Distance, but no Fall Damage.
- **Critical Success:** No effect.

You can protect any number of Creatures of your Choice from the Fall Damage inflicted, and pick different directions for each Creature.

Circle of the Sun

Those that join a Circle of the Sun often find themselves radiating a light that some say is divine in nature, as they abound in truth and light. Thanks to this, Sun Druids are experts at purging foul influences from the world, and the domains they watch over.

Bonus Proficiencies: Celestial, Religion

Bonus Spells (Always Prepared): Light, Respite, Prayer of Health, Sunlight, Halo of Brilliance, Dimensional Binding

Innate Feats:

Celestial Glow

Traits: Utility, Light

You constantly emit 10 feet of Bright Light, and an additional 10 feet of Dim Light. This is considered Sunlight.

You can toggle or shrink this Radius as a Free Action.

Sun's Gift

Traits: Edge, Nullify

If you had Sunlight Sensitivity, or Bright Light Sensitivity from any source, you no longer suffer the penalties.

This also prevents you from taking Damage from Sunlight, if you normally would.

Sun: Burning Sun

Traits: Edge, Radiant, Vulnerable

A Creature that starts their Turn within an area of Bright Light created by you takes Radiant Damage equal to their Vulnerability to Radiant.

If they aren't Vulnerable to Radiant, they are unaffected. Creatures that already suffer this penalty from Sunlight (e.g. Vampires in your Sunlight) also take this Damage when they End their Turn in the area.

Sun: Flash

Traits: Burn, Blinded, Debuff, Disadvantage

1 Reaction: 1 Druidry

Trigger: When a Creature within the Bright Light Radius of your Celestial Glow Feat is Hit by an Attack Roll.

The Triggering Attacker is Blinded until the Start of their next Turn.

Sun: Healing Glow

Traits: Burn, Improvement, Metamagic

Free Action: 1 Druidry

Trigger: When you use a Magical Action with the Healing Trait.

Target: One other Creature within the Bright Light Radius of your Celestial Glow Feature.

The Target gains the benefits of the Triggering Action, in addition to the original Target.

Sun: Solar Guard

Traits: Edge, Improvement

Creatures that are within the Bright Light Radius of your Celestial Glow Feat can use your Intelligence, Wisdom and Charisma Saving Throw Bonuses instead of theirs, unless theirs is higher.

Sun: Sunburst

Traits: Blast, Blinded, Improvement, Saving Throw

Prerequisite: 5th Level

10 Actions: X Druidry

Duration: 1 Minute

For the Duration, the Radius of your Celestial Glow is multiplied by X. Any Creatures that are in any Bright Light caused by you must make a Constitution Saving Throw:

- **Critical Failure:** Same as Failure, but it lasts until removed.
- **Failure:** They become Blinded for the Duration.
- **Success:** Same as Failure, but the effect ends at the End of their Next Turn.
- **Critical Success:** No effect.

Fighter Categories

Champion

The Champion is a force to be reckoned with. They are powerful and durable, primarily trained in single combat. Few would dare to face a Champion alone, though the prospect and insults make a challenge irresistible to many.

Bonus Proficiencies: Athletics, Intimidation

Innate Feats:

Effective Defense

Traits: Edge, Armor, Resistance

You add your Proficiency Bonus to your Physical Resistance, even when not wearing Armor.

Single Combat

Traits: Burn, Buff

1 Action: 1 Technique

Range: 60 ft.

Duration: 10 Minutes

You gain a +1 Bonus to all Attack Rolls against the Target for the Duration.

If used multiple times against the same Target, the Duration resets, and the bonus stacks.

Champion: Champion's Challenge

Traits: Burn, Ability Check, Audible, Debuff, Disadvantage, Emotion, Movement, Verbal

5 Actions: 1 Technique

Target: One Creature that can hear and understand you.

Make a Persuasion or Intimidation Check against the Target's Charisma Score:

- **Critical Success:** Same as Success, but the Target also immediately Moves once towards you.
- **Success:** The Target cannot willingly move away from you, and has Disadvantage on Attack Rolls against Creatures other than you.
- **Failure:** No effect.
- **Critical Failure:** The Target has Advantage on their next Attack Roll.

This effect overrides the Frightened Condition for the purposes of movement.

Champion: High Praise

Traits: Utility, Ability Check, Improvement

Whenever you make a Charisma Check against a Creature, you may use your Attack Bonus OR Damage Roll with one Weapon you have, in place of the original Bonuses.

Champion: No Quarrel

Traits: Edge, AC, Improvement

You have a +1 Bonus to AC against Creatures that haven't been Attacked or Damaged by you this Combat.

This bonus increases by 1 for each unique Creature Targeted by your Single Combat Feat.

Champion: Rile Up

Traits: Edge, Debuff, Disadvantage, Improvement

When you use Action Surge, Targets of Single Combat have Disadvantage on the next Ability Check or Saving Throw they make against you.

Champion: Unrelenting Fervor

Traits: Blast, Attack, Audible, Damage, Exhaustion, Precision, Verbal, Weapon

Prerequisite: 5th Level

5 Actions: 5 Technique

Target: One Creature that can hear and understand you.

Until the End of your Turn, all Weapon Attacks you make against the Target deal 1 Precision Damage on a Hit. Every Hit also increases this Damage by 1.

When this effect ends, you gain Exhaustion 1.

Knight

Knights are incredibly tough, with their armor deflecting harmful attacks, or even allowing them to stand unhindered as a juggernaut on the battlefield. They are also very hearty, and are capable of incredible feats of endurance.

Bonus Proficiencies: Athletics, Society

Innate Feats:

Guardian

Traits: Edge, Damage

Whenever a Creature within your Reach takes Damage, you may choose to take half of it, applying your Resistances.

Hold the Line

Traits: Edge, Cover

Creatures of your Choice within your Reach gain the benefits of Half Cover. If they already have Half Cover, this improves it.

Knight: Armor Master

Traits: Edge, Armor, Improvement, Resistance

While wearing Armor, Physical Resistance now applies to all Damage Types, provided the Damage is from an Attack Roll, or a Dexterity Saving Throw.

Knight: Bolster

Traits: Burn, Temporary Healing

2 Reactions: 1 Technique

Trigger: A Creature within your Reach takes Damage.

The Target gains Temporary Hit Points equal to your Constitution Score, which applies before the Damage.

Knight: Impale

Traits: Edge, Attack, Improvement, Weapon

When a Creature enters your Reach, you can make an Attack of Opportunity without spending Reactions.

If your Weapon already has Brace, this Attack also prevents the Target from taking any Actions with the Move Trait until the Start of that Creature's next Turn.

Knight: Rally

Traits: Burn, Attack, Improvement, Visual

When you use Action Surge, one Creature within 10 feet can make an Attack without spending Reactions. This Attack ignores the Multi-Attack Limit.

Spells must be cast at their lowest Tier, unless Empowered by some other effect.

Knight: Impervious

Traits: Blast, Exhaustion, Resistance

Prerequisite: 5th Level

Free Action: 5 Technique

Duration: 1 Minute

For the Duration, your Resistance to all Damage is increased by your Constitution Score.

At the End of the Duration, you take Exhaustion 1.

Strategist

Some Fighters are highly intelligent, but Strategists are on a whole other level. They tactically move their allies around the battlefield, rather than themselves, and coordinate to overwhelm an opponent through strategy. Sounds great for a certain famous detective, don't you think?

Bonus Proficiencies: Perception, Society

Innate Feats:

Backup Plan

Traits: Edge, Actions, Improvement

Once per Round (after you end your Turn), you can take any Action as a Reaction with any Trigger, or use a Reaction when you can't normally take Reactions as if you had used the Prepare Action on it.

An affected Action can't have the Attack Trait, unless it's a Reaction.

Improved Tactics

Traits: Edge, Actions

At the Start of each Round, you can distribute any number of your Action Points to any number of Creatures of your Choice.

You can spend Technique to allow another willing Creature to do the same that Round (1 Technique per Creature).

Strategist: Contingency

Traits: Edge, Advantage, Initiative

At the Start of Combat, a number of Creatures you choose up to your Intelligence Modifier (Minimum of 1) may reroll Initiative, and take the higher result.

This counts as Advantage, and treats being Surprised as a base value of 1.

Strategist: Investigations

Traits: Utility, Ability Check, Information

While in the location they took place in, you can recreate a rough description of past events you haven't witnessed without an Ability Check, provided no effort was made to hide said events.

Hidden events can still be uncovered with a Successful Perception or Society Check.

Strategist: Secret Move

Traits: Edge, Actions, Improvement, Visual

Restriction: Once per Turn

Free Action: 1 Technique

One Creature you can see may take an Action of their Choice as if it were a Reaction, provided it doesn't have the Attack Trait.

The Target doesn't need to qualify for Reactions.

Strategist: Stick to the Plan

Traits: Edge, Actions, Initiative

After the Initiating Creature ends their Turn, any number of Creatures you choose up to your Intelligence Modifier, may immediately take a single Action they have, in any order you choose.

Other effects that trigger immediately after the Initiating Creature ends their Turn (like Tactical Analysis) take priority.

Strategist: Pre-Planned

Traits: Blast, Buff

Prerequisite: 5th Level

Free Action: 5 Technique

Until the End of your next Turn, you and any number of Creatures you Choose (up to your Intelligence Modifier) add your Intelligence Modifier to all d20 Tests, Damage/Healing Rolls, and Saving Throw DCs.

Swashbuckler

Just because your average Swashbuckler multiclasses into Rogue, doesn't mean they are exclusive to Rogues. But if you like Rapiers, clever positioning, and parrying, then you will probably like Swashbucklers.

Bonus Proficiencies: Acrobatics, Persuasion

Innate Feats:

Parry

Traits: Blast, Weapon

2 Reactions: X Technique

Trigger: A Creature Hits you with a Weapon Attack.

You reduce the Damage taken by $Xd10 +$ your Dexterity Modifier.

Slip-Strike

Traits: Burn, Damage, Weapon

Free Action: 1 Technique

Trigger: You Hit with a Weapon Attack that has the Finesse Property.

The Triggering Attack ignores Physical Resistance.

If the Triggering Attack was a Reaction, it inflicts Persistent Bleed Damage equal to your Dexterity Modifier.

Swashbuckler: Nimble Fighter

Traits: Edge, Improvement

The Dash Action no longer inhibits Actions with the Attack Trait.

Swashbuckler: Reflect

Traits: Burn, Damage, Weapon

1 Reaction: 1 Technique

Trigger: You use a Reaction to reduce the Damage Taken from a Melee Attack.

You deal Damage with one Weapon you are wielding to the Triggering Attacker, equal to the amount reduced.

Swashbuckler: Unbalance

Traits: Edge, Disadvantage, Weapon

When you Hit a Creature immediately after moving to a new space (even if you were moved unwillingly), the first Attack the Target makes until the End of their next Turn is made at Disadvantage.

Swashbuckler: Uneven Odds

Traits: Edge, Nullify

While you are considered Flat-Footed (even if Immune), you double the Damage Reduction you get from Feats and Actions that don't apply Resistance (such as Knight's Guardian Feature, though it only applies to your part).

Swashbuckler: Make them Dance

Traits: Blast, Actions, Concentration, Weapon

Prerequisite: 5th Level

5 Actions: 5 Technique

While Concentrating, your Weapon Attacks also cost the Target 5 feet of Movement and 1 Action Point on their next Turn, even if they Critically Miss.

You cannot reduce a Creature to 0 Actions or Less with this Feat.

Monk Dedications

Way of the Brawler

Also known as the way of throwing everything, Brawlers specialize in using every known item as a Weapon. From table legs, rocks and bottles, to silverware, pens, rope and... a monkey? Okay, each to their own I guess. But a brawler is always armed and dangerous. Even without arms.

Bonus Proficiencies: Athletics, All Improvised Weapons

Innate Feats:

Forceful Assault

Traits: Edge, Improvement, Weapon

Whenever you Successfully Overpower a Creature, your next Attack doesn't count against the Multi-Attack Limit.

Use your Environment

Traits: Edge, Improvement, Weapon

Improvised Weapons are considered Monk Weapons for you.

Reminder: d4 Weapons usually cost 2 Action Points, d6 Weapons cost 3, d8 costs 4 and are usually versatile (d10), and d12 Weapons cost 5, are Two-Handed and sometimes Heavy.

Brawler: Deflect Strike

Traits: Burn, Nullify

2 Reactions: 1 Ki

Trigger: You take Bludgeoning, Piercing or Slashing Damage.

You reduce the Triggering Damage by half.

Brawler: Improved Surprise

Traits: Edge, Actions, Weapon

When you Attack with an Improvised or Natural Weapon you haven't used this Turn, it costs 1 less Action.

Brawler: Martial Slam

Traits: Edge, Grappled, Improvement, Push

While a Creature is Grappled by you, you may wield them as if they were a 5 Action, Heavy and Two-Handed Improvised Weapon that deals 1d12 (Doubled for each Size Category).

Doing so in this way allows you to either deal the Weapon Damage to them on a Hit (half on a Miss), or use their Unarmed Strike or Natural Weapon as part of the same Attack (you use your Attack Roll for the extra Attack too).

Brawler: Striker Stance

Traits: Edge, Attack, Concentration, Weapon

Free Action: 1 Ki

While Concentrating, if a Creature within your Reach Attacks you, then Hit or Miss, you may spend Reactions to Attack them with any Monk Weapon, ignoring the Multi-Attack Limit.

If your Concentration is ended by the Triggering Attack, you can still make the Attack, but you have Disadvantage on it.

Brawler: Shattering Blow

Traits: Blast, Attack, Nullify, Vulnerable

Prerequisite: 5th Level

10 Actions: X Ki

Duration: 1 Minute

Make an Attack Roll against a Creature within the Range or Reach of one Weapon you are wielding:

- **Critical Hit:** Same as a Hit, but the Target becomes Stunned X as well.
- **Hit:** The Target has one Resistance they have (of your choice) reduced by X to a Minimum of 0 for the Duration.
- **Miss:** No effect.

Hit or Miss, you become Flat-Footed until the End of your Next Turn.

Way of the Elements

Water, Earth, Fire, Air. Long ago, there was peace between the nations. Then everything changed when... Wait, wrong quote. But those that master the Way of the Elements learn to command them for powerful blows, and what others see as a dance.

Bonus Proficiencies: Religion, Survival

Innate Feats:

Elemental Focus

Traits: Edge, Choice, Special

Pick one Element: Earth, Fire, Water, or Wind.

This Choice influences the benefits you gain from other Feats.

Special: If you have another Subclass that uses these Elements, all choices are combined between them, using their respective rules.

Elemental Strike

Traits: Burn, Attack, Improvement

Free Action: 1 Ki

Trigger: You make an Attack with a Monk Weapon.

The Triggering Attack deals Bludgeoning (Earth, Wind), Fire, or Cold (Water) Damage, depending on your choice from Elemental Focus, and gains a 30 ft. Reach, or extends its Short and Long Range by 30/60 ft. respectively.

Elements: Elemental Mastery

Traits: Edge, Actions, Improvement, Resources

Your Actions with the Trait you picked for Elemental Focus require 1 less Class Resource, or half as many Action Points (rounded down) if they don't require a Class Resource.

You can take this Feat any number of times, reducing the Resource Cost further, but not the Action Cost.

This can't reduce the number of Actions expended to 0.

Elements: Elemental Precision

Traits: Edge, Range

All Feats and Actions you have with the Trait you picked for Elemental Focus have their Range doubled.

You can take this Feat any number of times, doubling the Range further

Elements: Focus Expansion

Traits: Utility, Improvement

You pick another option for Elemental Focus, and can choose which Element you wish to use for any given instance.

You can take this Feat any number of times, picking a different Element each time.

Elements: Secret Techniques

Traits: Edge, Special, Spellcasting

You learn 2 Spells of up to 5th Tier with the Trait you picked for Elemental Focus.

You can cast these Spells by expending a number of Ki Points equal to twice the Spell's Tier, with Cantrips only requiring one per Tier, including Empowerment, which you can do up to 5th Tier this way.

You can take this Feat any number of times, picking 2 new Spells each time. You can also retrain these Spells if you have a Spell Scroll with the desired Spell on it.

Elements: Elemental Surge

Traits: Blast, Improvement, Movement, Resources

Prerequisite: 5th Level

10 Actions: 5 Ki

While Concentrating, all your Attacks benefit from Elemental Strike for free.

Additionally, you can use Ki as the Class Resource for any Actions with the Trait you picked for Elemental Focus, though Spells require the Secret Techniques Feat.

Lastly, all of your other Movement Speeds increase to equal your fastest, which doesn't affect your Action Limit (no Walking/Flying Speed loops either).

Note: this effect allows you to cast higher Tier Spells through Secret Techniques, as long as you have them Prepared through other means.

Way of the Healer

The way of Healing requires that one master the mind and body, as well as the manipulation of Ki, bringing wholeness of body and mind to those around them. And while they aren't the best healers, they make up for it through their natural evasiveness.

Bonus Proficiencies: Medicine, Nuture

Innate Feats:

Air of Peace

Traits: Edge, Healing, Improvement

When a Creature within 30 ft. of you expends or loses Hit Dice for any reason, they regain a number of Hit Points equal to your Spell Healing Modifier for each Hit Die lost.

Soothing Touch

Traits: Burn, Healing, Nullify

2 Actions: 1 Ki

Range: Touch

The Target is Stabilized, and/or degrades all Persistent Damage they have by your Spell Healing Modifier.

Healer: Guided Meditation

Traits: Burn, Auditory/Visual, Nullify

5 Actions: 1 Ki

You reduce one of the following Conditions by 1, on one Creature that can see or hear you: Drained, Frightened, Slowed.

Healer: Healing Touch

Traits: Edge, Healing, Improvement

Soothing Touch also allows a Target to expend and roll 1 of their Hit Dice to Heal, affected by Hit Die oriented Feats from both you and the Target.

Healer: Pacifist Stance

Traits: Burn, Advantage, Concentration

5 Actions: 2 Ki

While Concentrating, all Creatures of your Choice within 30 ft. of you have Advantage on all Saving Throws.

Healer: Proper Rest

Traits: Edge, Nullify, Rest

You reduce Exhaustion by 1 on a Half Rest, or gain 1 Hit Die.

Healer: Mortal Strike

Traits: Blast, Damage, Force, Saving Throw

Prerequisite: 5th level

10 Actions: X Ki

Trigger: You Hit a Creature with a Monk Weapon.

The Target must make a Constitution Saving Throw against your Wisdom Score:

- **Critical Failure:** The Damage is doubled, and scales to the Creature's Size.
- **Failure:** The Target takes Xd6 Force Damage immediately, or when you do so as a Free Action, even if you are Dead. This Damage cannot be reduced by Resistance, Immunity, or a Damage Threshold.
- **Success:** Half Damage, and the Damage can be reduced.
- **Critical Success:** No effect.

Way of the Ninja

Those that study the way of the ninja cling to the shadows, and find ways to hide anywhere and everywhere. And while they aren't inherently deadly (wielding fists of fury), ninjas excel at trapping and fooling their enemies into isolation.

Fun Fact: real ninjas focus on stealth, not kicking butt.

Bonus Proficiencies: Deception, Stealth

Innate Feats:

Distract

Traits: Utility, Manipulate

5 Actions: 1 Ki

Range: 30 ft.

You cause a minor effect within Range, such as one of the following:

- Extinguish a Non-Magical light source, or make a Ranged Attack Roll against the Spell Save DC of a Magical Light Source, extinguishing it on a Hit.
- Produce a curious sound.
- Trigger a button that is easily pushed.
- Interact with a Non-Magical Item or object.

The effect you produce cannot be detected by any means short of Truesight, unless it is intended to be seen or heard. Even still, it cannot be traced to you.

Leave No Trace

Traits: Utility, Improvement

You cannot be tracked by any Non-Magical means, and you can roll Stealth to avoid being detected by Magical effects, even if they normally ignore protection from Divination Magic.

Ninja: From the Dark

Traits: Edge, Auto-Hit, Hidden

While you're Hidden, your Attacks cannot Miss, though you still roll if you can Critically Hit.

Ninja: Master of Shadows

Traits: Edge, Invisible, Masked, Silent

While in Darkness, you are Invisible, Silent and Masked.

When you Attack, you can't benefit from this Feat until the next time you become Hidden.

Ninja: Shadow Step

Traits: Burn, Movement

Free Action: 1 Ki

Range: 30 ft.

Until the Start of your next Turn, you treat all spaces within Range of you that are in Dim Light or Darkness, as if they are adjacent for the purposes of Movement.

This effect ends early if you are illuminated by Bright Light at any point.

Ninja: Substitution

Traits: Blast, Move, Special

10 Reactions: 1 Ki

Restriction: You must be adjacent to a space that is within Darkness.

Trigger: You take Damage

You take no Damage, and Step into an unoccupied space that is within Darkness, even if you've already Stepped this Round.

Special: If you have Shadow Step, you can use it when Stepping in this way. This usage doesn't expend Ki, but expires immediately.

Ninja: Isolate

Traits: Blast, Anosmiated, Blinded, Deafened, Movement, Restrained, Saving Throw

Prerequisite: 5th Level

10 Actions: 5 Ki

Range: Touch

The Target must make a Wisdom Saving Throw:

- **Failure:** The Target is Anosmiated, Blinded, Deafened, Silenced, and Restrained, and you can move them into any space you can see that is in Darkness. While suffering from these Conditions, the Target cannot be detected by the corresponding senses.
- **Success:** No effect.

At the End of each of their Turns, a Creature can reattempt the Wisdom Saving Throw to end one of these Conditions of their choice.

Way of the Samurai

When Weapons are included in the spiritual martial arts that Monks employ, one begins to walk the path of the Samurai. While on this path, one finds new and powerful methods for wielding Weapons of the world, instead of honing one's self into a Weapon.

Bonus Proficiencies: Any Weapon, Heavy Armor

Innate Feats:

Weapon Mastery

Traits: Edge, Attack, Improvement, Proficiency, Weapon

When a Feat allows you to make an Unarmed Strike, or Attack with a Natural Weapon, you can instead use any Weapon you are wielding, and Proficient in.

You also treat all Weapons you are Proficient in as Monk Weapons.

Samurai: Deflection Stance

Traits: Edge, Concentration, Disadvantage, Weapon
Free Action: 1 Ki

While Concentrating, all Attacks have Disadvantage against you, but Attacks you make are also at Disadvantage, unless you make them as Reactions.

Samurai: Undying Resolve

Traits: Burn, Buff

Free Action: 2 Ki

Trigger: You are reduced to 0 Hit Points, or you End your Turn at 0 Hit Points while still Conscious.

You delay the Dying and Unconscious Conditions until the End of your Next Turn. However, additional Damage you take during this time still inflicts the Drained Condition.

If you regain at least 1 Hit Point before you would fall Unconscious, you don't fall Unconscious.

Samurai: Warrior's Resolve

Traits: Edge, Temporary Healing

Whenever you End your Turn while not in Reach of any Enemy, you gain Temporary Hit Points equal to your Level.

Samurai: Will of the World

Traits: Utility, Buff

Free Action: 1 Ki

Trigger: You make a Charisma Check or Saving Throw.

You use Wisdom instead of Charisma for the Triggering Roll.

Samurai: Unstoppable Force

Traits: Blast, Damage, Exhaustion, Weapon

Prerequisite: 5th Level

Free Action: X Ki

All Weapon Attacks you make this Turn always deal at least X Damage, even through Immunities. Gain Exhaustion 1.

Rogue Subtypes

Assassin

Assassins are the ones that most people think of when they talk about a Rogue with a vendetta. They focus on the elements of Poison, Stealth and Surprise to execute their Targets quickly and quietly, rather than engaging in open combat.

Bonus Proficiencies: Perception, Stealth

Innate Feats:

Poisoner

Traits: Burn, Damage, Item, Poison

Free Action: 1 Cunning

Trigger: You Hit with a Poisoned Weapon.

The Triggering Attack treats all Damage Dice as 1s, but the Target has their Degree of Success against the Poison reduced by 1.

If a Poison doesn't have a Saving Throw, one Damage Die uses the highest value instead.

Quick Finish

Traits: Edge, Damage, Improvement

The First Attack you Hit each Combat takes the highest value on all Damage Dice, even if it would normally use the lowest values.

Assassin: Early Advantage

Traits: Edge, Damage, Initiative

When you Hit a Creature that hasn't taken an Action in Combat, they take one additional Die of each Damage Type you inflict.

Assassin: "Fool Me Twice"

Traits: Edge, Hidden, Improvement

When you become Hidden, your Feats, Items and Spells treat you as being out of Combat (as if it ended), though you remain in Initiative.

When you are no longer Hidden, all effects you have that require Combat to Start, or that require Creatures to go after you treat the Turn order as if the current Creature was Initiating.

This effect doesn't affect Initiative, and only benefits you, and other Creatures that have an effect during Initiation, even if they've already taken their Turn (doesn't reset any limits).

Reminder: You can make a Stealth Check while outside of Line of Sight to become Hidden from unseen Creatures, which doesn't expend Actions (pg. 117).

Assassin: Poison Handler

Traits: Utility, Harvest, Item

When you apply Poison to a Weapon, it lasts until the End of your next Long Rest, or the Poison is expended. Whichever comes first.

Additionally, when harvesting a Poison from a Creature or Plant, you always harvest at least one dose, regardless of any required Check.

Assassin: Sharp Reflex

*Traits: Edge, Damage, Improvement,
Precision/Bludgeoning*

When you Target a Creature with a Reaction, the Reaction deals Precision Damage (or Bludgeoning if the Action deals no Damage) to them equal to your Proficiency Bonus, even if you Miss, or the Reaction wasn't an Attack.

Note: This doesn't cause an Action to be considered as an Attack if it wasn't one already.

Assassin: Element of Surprise

*Traits: Blast, Attack, Damage, Final, Precision, Special,
Weapon*

Prerequisite: 5th Level

15 Actions: 5 Cunning

Requirement: You can only use this once on the First Round of each Combat.

Make an Attack with one Finesse Weapon you are wielding, expending no Actions to do so:

- **Hit:** Whenever you roll the highest value on any Damage Die for this Attack, you add another die of the same Size as Precision Damage, even if the die was added.
- **Miss:** You End your Turn.

Special: effects such as Quick Finish that force a Damage Die to roll the highest value don't apply to dice that are added by this Action.

Ranger

While some may argue that Rangers deserve their own place, many have already discovered that they already fight like Rogues, but with more nature-based abilities. But their true capability lies in their ability to navigate, and forage in safety, and to quietly explore the area.

Bonus Proficiencies: Perception, Survival

Innate Feats:

Favored Enemy

Traits: Edge, Choice, Flat-Footed

Pick any Creature Type. Those Creatures are always Flat-Footed to you.

You can change this Creature Type through the Retrain Activity, spending only 1 day to do so, provided you can observe or track a Creature with the corresponding type.

Natural Explorer

Traits: Utility, Travel

When Traveling, you double the Distance your party can cover in a day (this also reduces travel costs).

Also, if you take the Druid Archetype, you can use Wisdom in place of Intelligence for your Class Initiative Modifier, and Rogue Feats.

Ranger: Animal Companion

Traits: Edge, Feat

You gain the Druid's Animal Companion Feat, as if it were a Rogue Feat (pg. 176).

This also allows you to take any Druid Feat as if it were a Rogue Feat that expends Cunning in place of Druidry. However, any benefit that would apply to you, only applies to your Animal Companion. And any Action granted by such a Feat is only available to your Animal Companion.

If you already have access to these Druid Feats, you can still use either Cunning or Druidry (not both in the same Action), and both you and your Animal Companion gain the benefits as possible.

You can take this Feat any number of times, which grants an additional copy of the Druid's Animal Companion Feat.

Ranger: Foraging Expert

Traits: Utility, Craft, Food, Special

You can provide food for a number of Creatures your Size (halved or doubled for each category) equal to your total Survival Modifier in any environment. This is considered Cooked for the purpose of a Full Rest.

Additionally, you can spend Cunning during a Short or Long Rest to Craft or Prototype a single Non-Magical Consumable for each Cunning, which must be made of Herbs, Stone or Wood, without expending materials.

If you gain Cunning Outside of Combat, while you are already at your maximum, you may choose to use it to Craft or Prototype an Item in this way.

Special: Items Crafted this way are considered to be Crafted with Supply Points for Artificer Feats.

Ranger: Hunter's Quarry

Traits: Edge, Damage, Precision, Sensory

1 Actions: 1 Cunning

Duration: 10 Minutes

Target: One Creature you can See.

For the Duration, all Attacks you make against the Target deal Precision Damage equal to your corresponding Modifier (Including things such as Exhaustion) in the corresponding Intelligence check for that Creature's Type (see pg. 115). Any temporary bonuses are consumed as if it were a check, except for Advantage.

Example: An Aberration would take extra Damage from Occultism, or Arcana (whichever is higher), while a Humanoid would take Damage from Survival, or a Fiend would take Damage from Religion.

Ranger: Survivor

Traits: Edge, Advantage, Dying, Nullify

You are no longer hindered by Difficult Terrain, and take Half Damage from all sources that aren't deliberately caused by Creatures (eg. Thorns, Lava, Falling Rocks, etc.).

You also remain Conscious, and can take a single Action (Free or otherwise) each Turn while Dying, other than the Incapacitated Actions. However, you must remain Prone while Dying in this way, and you cannot expend Cunning Points or Concentrate.

Ranger: Assault

Traits: Edge, Attack, Weapon

Prerequisite: 5th Level

15 Actions: 5 Cunning

You do one of the corresponding using each Weapon you are wielding:

- **Melee:** Make one Attack Roll against All Creatures within your Reach.
- **Ranged:** Select a 10 ft. Radius that doesn't exceed that Weapon's Range. Make one Attack Roll against All Creatures within the area.

You still expend Ammunition for each Target, though you don't spend additional Actions to Attack or Reload, and treat this Action as one Attack for the Multi-Attack Limit.

Precision Damage applies to all Targets instead of just one.

Spy

Spies are masters of blending in, rather than fighting a tough opponent. They prioritize learning flaws and weaknesses, then exploiting such a weakness to cripple and manipulate a Creature. Just don't do that to your friends. They don't usually like that.

Bonus Proficiencies: Deception, Society

Innate Feats:

Infiltrator

Traits: Utility, Deception

You can use Deception in place of any Check or Saving Throw involved in concealing your true identity, even against Magic that allows you to Save.

Example: Persuading someone you are who you say you are, Saving against Zone of Truth, or juggling to prove you really are the jester.

Threaten Secrets

Traits: Burn, Nullify, Saving Throw, Stunned, Weapon

Free Action: 1 Cunning

Trigger: You Hit a Creature that is either Charmed or Frightened by you.

The Target must make an Intelligence Saving Throw against your Intelligence Score:

- **Critical Failure:** Same as Failure, but they also remain Charmed.
- **Failure:** They become Stunned X where X is your Intelligence Modifier. They also lose the Charmed Condition.
- **Success:** The Target becomes Stunned 1, and is no longer Charmed.
- **Critical Success:** The Target is no longer Charmed or Frightened.

Spy: Believe the Lie

Traits: Utility, Deception, Information

5 Reactions: 1 Cunning

Trigger: A Spell or other effect would reveal information about you.

The Triggering effect cannot force you to reveal information, and otherwise detects that you have Failed the Saving Throw if they normally reveal that information.

Some effects such as Geas may still inflict Damage if you knowingly act against it, though you can conceal such effects with a Deception Check against the corresponding DC.

Spy: Intuitive Deduction

Traits: Utility, Information

3 Actions: 1 Cunning

Target: One Creature you've previously observed for a total of 10 Minutes or more, or have Critically Succeeded a Society Check on.

You learn one of the following about the Target:

- Their Proficiency Bonus.
- One Language, Skill, Saving Throw, Tool, or Weapon Proficiency (Only works if the GM has that information).
- One Hint about their Weakness such as: whether you've seen it in the past, any things they avoid, if they're being deceptive/evasive about something, or if they find a topic particularly sensitive.
- One Immunity, Resistance, or Vulnerability.
- One Secret the GM has prepared.

Spy: Slippery Escape

Traits: Burn, Move

Free Action: 1 Cunning

Trigger: A Creature ends their Turn while you aren't in their Reach.

You immediately Move once for free, without expending Movement.

Spy: Spy's Eye

Traits: Utility, Ability Check, Advantage

You have Advantage on Perception and Society Checks.

Spy: Exploit

Traits: Blast, Damage, Weakness

Prerequisite: 5th Level

10 Actions: 5 Cunning

Target: One Creature you can See.

Duration: 10 Minutes

For the Duration, the Target no longer benefits from any Resistances or Damage Threshold they have for the Duration.

Additionally, if you are utilizing the Target's Weakness, you treat their Damage Threshold as a Vulnerability.

Surgeon

Despite the bad rap that Thieves and Assassins get, Surgeons usually use their cunning capabilities for good, through the use of medical supplies to better heal their allies in the heat of battle, and eviscerate any poor monster that is unfortunate enough to get in the way of a healer's blade.

Bonus Proficiencies: Alchemist's Supplies, Medicine

Innate Feats:

Anatomical Strike

Traits: Burn, Damage, Persistent Bleed, Weapon

Free Action: 1 Cunning

Trigger: You Hit with a Light Weapon that inflicts Piercing or Slashing.

You inflict 1 Persistent Bleed. If the Target is already suffering from Persistent Bleed, increase it by 1.

First Aid

Traits: Burn, Healer's Kit, Healing, Nullify

2 Actions: 1 Cunning

Range: Touch

You end all Persistent Bleed on the Target, and add one Death Save Success if they're Dying.

If you have a Healer's Kit, you can spend a Charge to apply its effects as part of this Action (doesn't grant Cunning).

Surgeon: Doctor's Orders

Traits: Utility, Nullify, Rest

When you take a Long Rest, you may reduce 1 Condition of your choice from you and one Creature of your choice as if they took an additional Full Rest.

You can take this Feat any number of times, benefitting one additional Creature each time.

Surgeon: Healer's Touch

Traits: Edge, Healing, Improvement, Item

When you grant Healing or Temporary Hit Points with an Item, the Target also regains a number of Hit Points equal to your Intelligence Modifier.

Surgeon: Field Operation

Traits: Burn, Nullify, Manipulate Healer's Kit

5 Actions: 1 Cunning

Target: One Willing and Prone Creature that is suffering from an Affliction.

Make a Medicine Check against the Affliction's DC, and apply the benefits of a Healer's Kit based on this roll:

- **Critical Success:** The Target takes 1d6 Piercing Damage and ends the Affliction.
- **Success:** The Target takes 2d6 Piercing Damage, and ends the Affliction.
- **Failure:** The Target takes 4d6 Piercing Damage, and you gain Advantage on the next attempt on the same Target within the next Minute, provided they don't regain Hit Points before then.
- **Critical Failure:** The Target is reduced to 0 Hit Points and acquires the Heavily Scarred Bleed.

If the Target isn't Bloodied, they take twice the amount listed.

Additionally, you may inflict the Amputee/Crippled Bleed to force a Success, dealing 4d6 Piercing instead of 2d6.

If you spend 10 Minutes or more, the Target is automatically Stabilized if they would die to the Damage from this Action.

Other effects that aren't a Condition (such as Persistent Damage, or Monster Actions with lasting effects) may be nullified in this way, with a DC as set by the GM.

Note: This Ability Check doesn't restore Cunning, since it uses Cunning.

Surgeon: Proper Care

Traits: Utility, Advantage, Nullify

You and any Creatures you care for (up to your Level) during a Short or Long Rest no longer contract any Diseases you were exposed to earlier that day, and have Advantage on all Saving Throws against Disease.

However, you and such Creatures still roll to contract a Disease if you were exposed by an Action, or Feat that explicitly mentions the disease, such as an infected Zombie, Rat, or Weapon.

Surgeon: Rupture

Traits: Blast, Damage, Persistent Bleed, Weapon

Prerequisite: 5th Level

Free Action: X Cunning

Trigger: You Hit a Creature with a Finesse Weapon that deals Piercing or Slashing.

The Target takes X Persistent Bleed, which also Triggers whenever they take Physical Damage.

If the Triggering Hit was Critical, the Persistent Bleed is also doubled.

Thief

Thieves are well known for their tendency to get in and out of situations faster than you can check your purse. And while many Rogues are capable pickpockets, a Thief masters the art of escape to leave their enemies flabbergasted.

Bonus Proficiencies: Acrobatics, Athletics

Innate Feats:

Bob and Weave

Traits: Edge, Flat-Footed, Improvement

When you take any Action with the Move Trait while within a Creature's Reach, they are Flat-Footed until the Start of their Next Turn.

Hit and Run

Traits: Edge, Improvement, Move

When you Hit a Flat-Footed Creature with an Attack Roll, you can take the Step Action for free.

Note: This does Trigger Bob and Weave.

Thief: Ambush

Traits: Edge, Move

When you take your first Turn each Combat, you may cause any number of Creatures up to your Intelligence Modifier to take the Move Action once, which doesn't count against Movement.

Thief: Curse Familiarity

Traits: Utility, Attunement, Saving Throw

Free Action: 1 Cunning

Trigger: When you Attune to a Cursed Magic Item, even if such wasn't revealed.

Make an Intelligence Saving Throw against the Item's Charisma Score (or its Complexity if it has none):

- **Critical Success:** For the next 24 Hours, you ignore all Curse effects of the Item.
- **Success:** You may choose to immediately Unattune, even when forced.
- **Failure:** You Attune as normal.

Thief: On the Run

Traits: Edge, Actions

All Actions with the Move Trait cost 1 Less Action Point for you. If this would reduce an Action's Cost to 0, you can use one such Action once for free, while subsequent Actions cost 1.

You can take this Feat any number of times, reducing the cost by 1, and allowing you to take an additional 0 cost Action with the Move Trait.

Note: For Actions like Step that are already free, this adds an extra use.

Thief: Quick Hands

Traits: Utility, Actions

The first time you take the Interact Action each Round is Free.

If you Interact with an Item in a bag you are wearing or carrying, you may extract the Item as you Interact with it.

Thief: Book It

Traits: Blast, Audible, Move, Visual

Prerequisite: 5th Level

5 Actions: X Cunning

You and any number of Creatures you can see can take the Move Action up to X times divided between all Creatures, without spending Action Points.

Alternatively, a Creature can spend Action Points to take an Action with the Move Trait instead of Moving. Such Actions ignore the Multi-Attack Limit.

Movement that is triggered in this way doesn't trigger Reactions, and is treated as if all Movement Speed was doubled, and stacks with the Dash Action if a Creature took it on their previous Turn, or as part of this Action.

Sorcerer Bloodlines

Astral Soul

Sometimes when someone touches the heavens, picks out the right constellation, or happens to be in the right

place, at the right astrological time, they become an

Astral Soul. Of course this isn't always the case, particularly when space travel is a thing, but Astral Soul

Sorcerers have a greater capacity for manipulating reality and dreams alike.

Bonus Proficiencies: Navigator's Kit, Perception

Bonus Spells (Always Prepared): Dimensional Storage, Detect Magic, Invisibility, Warp Strike, Etherealness, Dimensional Binding

Innate Feats:

Gravity Well

Traits: Edge, Gravity, Movement

Free Action:

You can choose to fall in any direction, even in a zero-gravity environment.

If the direction is against a pre-existing gravitational pull (such as Gravitational Shift), you either fall at half Speed (halving Fall Damage), or negate a weaker pull, while moving with it allows you to double the distance moved.

You are also Immune to effects with the Gravity Trait, unless you wish to be affected.

Unchanging Star

Traits: Edge, Advantage

You and any Creature within 5 feet of you has Advantage on Saving Throws against effects with the Transformation Trait, or that would apply the Impaired Condition.

Astral: Astral Projection

Traits: Utility, Ethereal, Saving Throw, Travel, Unconscious

10 Minutes: 1 Sorcery Point per Target

Range: 10 ft.

Unwilling Targets can make a Charisma Saving Throw against your Charisma Score to resist this effect.

All Targets fall Unconscious, though their souls are separated from their bodies. While in this state, none of the Targets require air, food, water, or sleep.

Your soul is Ethereal, and can cross Planes of Existence freely as if they were Scrying sensors. Any Target can return as a Free Action.

During this state, you die if your body is killed. But if your soul takes Damage that would reduce it to 0 HP or less, it immediately returns to your body. Your soul may also do so if it chooses to do so as a Free Action.

This effect bypasses effects such as Dimensional Binding that prevent extraplanar travel.

Astral: Gravitational Shift

Traits: Burn, Gravity

5 Actions: 1 Sorcery Point

Area: 30 ft. Cube

Range: 60 ft.

Gravity within the Area shifts into a direction you choose or is completely nullified. Any Creature within the Area that Succeeds on their Acrobatics Check to reduce Fall Damage can instead grab onto a nearby anchored object instead of falling.

For the Duration, you can change the direction of Gravity within this area for 2 Action Points.

Reminder: Falling is not calculated until the Creature's Turn ends.

Astral: Greater Alacrity

Traits: Burn, Actions, Concentration

3 Actions: 1 Sorcery Point

Until you drop Concentration, the Target doubles the number of Actions they gain from all sources.

Astral: Star Child

Traits: Edge, Gravity, Resistance

You become Immune to Force Damage from Holding your Breath in a Vacuum, or from high Gravity (such as a Black Hole), and have Resistance to Force Damage equal to your Level.

Astral: Black Hole

Traits: Blast, Damage, Force, Gravity, Push, Saving Throw

Prerequisite: 5th Level

20 Actions: X Sorcery Points

Range: 120 ft.

The Target Point becomes a Black Hole. All Creatures that Start their Turn within 30 ft. of the Black Hole (including you) must make a Strength Saving Throw against your Charisma Score. Flying or otherwise unanchored Creatures roll at Disadvantage:

- **Critical Failure:** Same as Failure, but the Creature takes Xd6 Force Damage instead of X.
- **Failure:** The Creature is pulled into the Point's space, or adjacent to it if a Creature is already there, and takes X Force Damage, plus Fall Damage. The Target cannot take any Action with the Move Trait this Turn, but cannot be knocked Prone.
- **Success:** The Creature is Pulled into the Point's space, and only takes Damage if they End their Turn in the Black Hole's Space.
- **Critical Success:** The Creature is only pulled 5 feet.

All Creatures treat the area as Difficult Terrain.

Divine Soul

Touched by the divine influence of a celestial, whether a Dream Seeker or an Angel, Divine Soul Sorcerers have a strong connection to divine magic, allowing them to become powerful heralds, priests, or even avatars of the deity they serve. But far more never learn the true source of this power, instead seeking the meaning behind such power.

Bonus Proficiencies: Celestial, Religion

Bonus Spells (Always Prepared): Sacred Flame, Bless, Command, Spiritual Guardians, Warding Circle, Apotheosis

Innate Feats:

Divine Boon

Traits: Edge, Holy, Spellcasting

You can pick Sorcerer Spells from the Divine Spell List, in addition to the Arcane Spell List.

Fate's Favor

Traits: Burn

Free Action: 1 Sorcery Point

Trigger: You Fail (or Critically Fail) a Saving Throw or Attack Roll.

Roll 1d4. On a 3 or 4, you Succeed instead. On a 1 or 2, the effect is wasted.

Divine: Celestial Aid

Traits: Burn, Holy, Metamagic, Saving Throw

Free Action: 1 Sorcery Point

Trigger: You cast any Spell on the Target.

The Target may reattempt one Saving Throw against an ongoing effect, including Death Saving Throws.

Divine: Heavenly Recovery

Traits: Burn, Healing, Holy

Free Action: 1 Sorcery Point

You regain a number of Hit Points equal to half your Charisma Score.

Divine: Heroes Never Die

Traits: Edge, Healing, Holy, Improvement

You add your Charisma Modifier to the Healing granted by any Action or Ability you use, even if it's not for a Spell. If you would already add a Modifier, such as Wisdom to Spell Healing, you choose which one to use.

This only affects the first instance for Persistent Healing, rather than increasing the Persistent Healing Granted.

Divine: Reforming Light

Traits: Edge, Improvement

Your Spells can Heal Constructs or Undead, even if they normally wouldn't.

Divine: Divine Avatar

Traits: Blast, Advantage, Healing, Holy, Radiant

Prerequisite: 5th Level

10 Actions: 5 Sorcery Points

Duration: 10 Minutes

For the Duration, you gain a Flying (Hover) Speed equal to twice your Walking Speed, ignore the Encumbered Condition, and have Advantage on all Saving Throws.

During this time, whenever you receive Healing through any means, you can instead grant it to a Creature you Touch as a Free Action, or inflict it as Radiant Damage instead.

Dragon Blood

As a Dragon Blood Sorcerer will likely tell you, it's one thing to have a Dragon as your Patron, but it's another entirely to have one as your ancestor, or with their blood in your veins. Dragon Blood Sorcerers are often descended from dragons in some degree, and have the capacity to replicate draconic power, which some Dragonborn have innately.

Bonus Proficiencies: Arcana, Persuasion

Bonus Spells (Always Prepared): Merchant's Exchange, Take Inventory, Incite Greed, Fireball, Polymorph, Magma Pools

Innate Feats:

Draconic Scales

Traits: Edge, Resistance

You have Physical Resistance equal to your Proficiency Bonus.

Dragon's Bloodline

Traits: Edge, Choice, Special

Pick an option from the Dragonborn's Draconic Ancestry Table. This impacts a number of Feats from this Subclass.

Special: If you are already a Dragonborn, this

Dragon: Draconic Resilience

Traits: Burn, Metamagic, Resistance

Free Action: 1 Sorcery Point

Duration: 1 Minute

For the Duration, the Target of one Spell you cast also gains any Resistances you have from your Sorcerer Feats, including Draconic Scales and Elemental Resistance.

If you lose the Dragon Form benefit for Elemental Resistance, affected Targets also lose the corresponding Resistances.

Dragon: Elemental Resistance

Traits: Edge, Resistance

You gain Resistance to the corresponding Damage Type for Dragon's Bloodline, equal to your Level.

If you are currently benefiting from Dragon Form, this Resistance applies to all other Damage Types, except Types you are Vulnerable to.

Dragon: Frightful Presence

Traits: Edge, Ability Check, Frightened, Improvement, Visual

Whenever you Succeed on an Intimidation Check against a Creature, you can choose to inflict Frightened equal to your Charisma Modifier.

If the corresponding Intimidation Check would already Frighten them or they are Frightened already, increase the value by 1 instead.

Lastly, at the Start of your Turn, you can make an Intimidation Check against the Charisma Score of any Creature that sees you, which Triggers this Feat on a Success.

Dragon: Sorcerous Breath

Traits: Burn, Damage, Improvement, Saving Throw, Special

5 Actions: 1 Sorcery Point

Target: See Dragon's Bloodline for the affected Area.

All Creatures within the Targeted Area must make a Dexterity (Acid, Fire, Lightning, Piercing) or Constitution (Cold, Force, Poison, Radiant) Saving Throw, with a DC equal to your Constitution Score. The Damage Type is decided by your choice from Dragon's Bloodline:

- **Critical Failure:** Double Damage.
- **Failure:** They take 2d6 of the corresponding Damage Type.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

Special: If you already have the Dragonborn's Dragon's Breath Feat, you gain an additional Ancestry Feat with Dragon's Breath as a prerequisite, and consider both this Feat and Dragon's Breath to be the exact same Action, except for the Magical Trait.

If you are currently benefiting from Dragon Form, the Area and Damage is doubled.

Dragon: Dragon Form

Traits: Blast, Buff, Immunity, Movement, Transform

Prerequisite: 5th Level

10 Actions: 5 Sorcery Points

Duration: 10 Minutes

For the Duration, you turn into a Dragon of the Type corresponding to your choice for Dragon's Bloodline. While you're a Dragon, you gain the following benefits:

- Your Size increases by 1 Category.
- You gain a Flying Speed equal to twice your Walking Speed, or double it if you already have one (Affects Action Limit).
- You use your Charisma Score in place of Strength.
- You gain a Light Natural Melee Weapon that costs 2 Actions, and inflicts 1d6 Slashing or Piercing.
- You gain Immunity to the Damage Type corresponding to the Dragon you turn into.
- You gain Immunity to the Frightened Condition.

If you are reduced to 0 Hit Points, this effect ends early.

Also, some Dragon Blood Sorcerer Feats may behave differently while this effect is active.

Elemental Core

Elemental Blood Sorcerers often gain their power from brief trips to the Elemental Plane, or when an Elemental changes them on accident, though other methods aren't unheard of.

Bonus Proficiencies: Primordial, Perception

Bonus Spells (Always Prepared): Prestidigitation, Summon Elemental, Portal Compass, Slow, Telekinesis, Chaotic Storm

Innate Feats:

Elemental Prodigy

Traits: Edge, Actions, Choice, Improvement, Special, Spellcasting

Pick between Earth, Fire, Water or Wind. Any Spell or Action with the Trait you picked has its total Action Cost reduced by 1 (minimum of 1 Action).

Additionally, you gain one Spell of each Tier up to 5th, which must have the Trait you picked, and is treated as a Bonus Spell.

Special: If you have another Subclass that uses these Elements, all choices are combined between them, using their respective rules.

Elemental: Elemental Essence

Traits: Utility, Nullify, Movement

You don't take Damage from Falling, ignore Difficult Terrain, cannot be pushed by Earth, Fire, Wind or Water effects, ignore the penalty for fighting Underwater, and don't take Persistent Fire Damage.

You can suppress any number of these benefits as a Free Action.

Elemental: Fury of the Elements

Traits: Burn, Buff, Metamagic

Free Action: 1 Sorcery Point

Trigger: When you cast a Spell with the Trait from Elemental Prodigy.

The Spell Save DC for the Triggering Spell is increased by your Proficiency Bonus.

Elemental: Greater Prodigy

Traits: Edge, Actions, Improvement

You can pick another Trait from Elemental Prodigy, including new Spells. However, your Feats can only benefit from one Element at a time.

You can take this Feat any number of times. If you run out of options, you can choose any other Trait on at least one Spell you have Prepared, provided the Trait isn't Edge, Burn, Blast, Utility, Buff, Debuff, Attack, Saving Throw or Ability Check.

Elemental: Unbridled Elements

Traits: Edge, Improvement

Whenever you take an Action with the Trait you picked for Elemental Prodigy, it ignores the Multi-Attack Limit.

Elemental: Primordial Mastery

Traits: Blast, Actions

Prerequisite: 5th Level

10 Actions: 5 Sorcery Points

Duration: 1 Minute

Range: 60 ft.

For the Duration, you take control of all effects within Range that have the Trait you picked for Elemental Prodigy, without requiring Concentration.

You may also use the corresponding Command or Control Cantrip for the chosen Element for 1 Action even if you don't have them Prepared, and those Spells can cause manipulated Objects to Fly within Range.

During this time, you also gain the benefits of all Elements you picked for Elemental Prodigy without needing to switch between them.

Fiend Heart

When a Fiend gets a child involved in their plans, said child often receives a mark of some kind that betrays their power, usually bringing mistrust. Fiend Hearts are often reclusive or ashamed of their power. But those that learn to use their infernal gift usually bring severe consequences upon anyone who dares to interfere.

Bonus Proficiencies: Infernal, Intimidation

Bonus Spells (Always Prepared): Fire Blast, Inflict Wounds, Command, Bestow Curse, Wall of Fire, Fire Storm

Innate Feats:

Darkened Luck

Traits: Burn, Auto-Failure, Nullify

Free Action: 1 Sorcery Point

Trigger: You fail a d20 Test.

Reroll the Triggering d20, and take the higher result. If this results in a Success, the next d20 Test you roll is instead a Failure.

You can also use this Feature to ignore an effect with the Auto-Fail Trait, as if the Auto-Fail was barely under the DC..

Infernal Ravage

Traits: Burn, Damage

Whenever you inflict Damage by any means, you can expend any number of Hit Dice to increase the inflicted Damage by the amount rolled.

Fiend: Flames of Envy

Traits: Burn, Damage, Metamagic, Persistent Fire

Free Action: 1 Pact Point

Trigger: A Creature Succeeds on a Saving Throw against an Action you take, but doesn't Critically Succeed.

The Target takes Persistent Fire Damage equal to your Charisma Modifier.

Fiend: Severe Magic

Traits: Edge, Improvement

When a Magical Action you take rolls the highest value on any of its Damage Dice, you roll additional dice for each maximized roll, and add them to the result.

This doesn't apply to Damage dice that were added to the original Action (e.g. Sneak Attack).

You can take this Feat any number of times, allowing this effect to happen once on added dice, for each additional copy of this Feat.

Fiend: Soul Siphon

Traits: Edge, Recovery

When a Creature is reduced to 0 Hit Points by a Magical effect caused by you, you regain 1 Sorcery Point.

If this recovery would exceed your Limit, you regain a Hit Die for each excess Sorcery Point recovered, up to the number of Spell Slots, or Sorcery Points used (Minimum of 1).

Fiend: Vengeful Rebuke

Traits: Burn, Damage, Fire

3 Reactions: 1 Sorcery Point

Trigger: When you Take Damage from any Creature

The Triggering Creature takes 1d6 + your Constitution Modifier as Fire Damage, or any Damage Type you have access to with one of your Spells, except Radiant, Psychic and Force*.

You can take this Feat any number of times, adding another d6.

**:Your Patron may allow forbidden Damage Types depending on their true nature.*

Fiend: Fiend's Ire

Traits: Blast, Damage, Improvement, Metamagic

Prerequisite: 5th Level

Free Action: 5 Sorcery Points

Trigger: You inflict Damage with a Spell.

The Triggering Spell inflicts its Damage as Persistent Damage.

Undead Lineage

Whether one of their ancestors was a Lich, an immortal, or was gifted with an aspect of undeath, Sorcerers of an Undying Lineage often seem to be immortal themselves, to the point where people confuse them with Undying Warlocks. However, Undying Sorcerers have a greater affinity for the more Shadow based powers.

Bonus Proficiencies: Intimidation, Religion

Bonus Spells (Always Prepared): Death Grip, Regenerate, Darkness, Cycle of Life, Vampiric Cloak, Despair

Innate Feats:

Death's Edge

Traits: Utility

You don't need to breathe, and cannot die to old age.

Shadow Sight

Traits: Edge, Nullify, Sense

You gain Darkvision out to 60 feet, which pierces Magical Darkness.

Undead: Shadow Magic

Traits: Edge, Improvement

Whenever you use any Action with the Metamagic Trait, it costs 1 less Resource or Spell Slot if you are in Darkness (Minimum of 0).

Undead: Shadow Step

Traits: Burn, Move, Teleport

3 Actions: 1 Sorcery Point

Range: 60 ft.

You immediately Teleport to an unoccupied space of Darkness that you can see within Range.

Undead: Strength of the Grave

Traits: Burn, Dying, Information, Special, Spellcasting

Free Action: 1 Sorcery Point

Trigger: When a Creature you can see fails a Death Saving Throw (including you).

Special: You can use this Action while you are Dying.

You cast any Spell you have access to that is Empowered to no more than 1st Tier, without consuming Spell Slots or spending Actions. If you expend Spell Slots to do so, you can instead cast any Spell you have access to without spending Actions.

As part of this Feat, you know when a Creature Fails a Death Saving Throw. Creatures that don't roll Death Saves are considered to only Trigger this once when they reach 0 Hit Points or less.

Undead: Unkillable

Traits: Burn, Nullify, Saving Throw, Special

1 Reaction: 1 Sorcery

Trigger: You take Damage that reduces you to 0 Hit Points.

You make a Charisma Saving Throw with a DC equal to the amount of Damage taken over your remaining Hit Points (Minimum of 5):

- **Critical Success:** You take no Damage.
- **Success:** You are reduced to 1 Hit Point.
- **Failure:** You begin Dying as normal.

If the Damage is Radiant or from a Critical Hit, your Degree of Success is reduced by 1.

Special: If you have Strength of the Grave, you Trigger it as part of this Reaction even if you don't begin Dying, though you still spend Sorcery for it.

Undead: Umbral Form

Traits: Blast, Ethereal, Improvement

Prerequisite: 5th Level

10 Actions: 5 Sorcery

Duration: 1 Minute

You become Ethereal for the Duration, which doesn't render you Invisible.

While Ethereal in this way, you can still Target other Non-Ethereal Creatures with Spells, provided you can cast them while bypassing, or without providing Verbal, Material, or Focus components.

Warlock Patrons

Archfey

An Archfey Warlock gains their power from an Archfey or similar Entity, which can have a number of different motivations from curiosity and boredom, to helpfulness, or filling a court. Archfey Warlocks are usually very elusive. Some people also like calling them "Hippielocks."

Bonus Proficiencies: Sylvan, Survival

Bonus Spells (Always Prepared): Confuse, Copy Spell, Misty Step, Faerie Fire, Dream Snare, Geas

Innate Feats:

Mind Trick

Traits: Burn, Mental, Saving Throw, Stunned

3 Actions: 1 Pact Point

Target: One Creature

You state a suggestion or attempt a distraction. The Target must make an Intelligence Saving Throw against your Charisma Modifier:

- **Critical Failure:** The Creature completely falls for the provided suggestion or distraction.
- **Failure:** Same as Success, but the Stunned Condition increases to your Charisma Modifier.
- **Success:** The Creature is Stunned 1.
- **Critical Success:** No effect.

This effect doesn't count as a Debuff or harmful effect.

Otherworldly Charm

Traits: Burn, Charmed, Special

Free Action: 1 Pact Point

Trigger: You Critically Succeed on a Persuasion or Performance Check.

Target: One Creature that you Succeeded against.

Duration: 1 Hour

The Target is Charmed by you for the Duration.

Special: You can use this any number of times on the same Trigger, provided the Target is different each time.

Archfey: Guilt Trip

Traits: Burn, Final, Saving Throw

3 Reactions: 1 Pact Point

Trigger: A Creature Damages you.

The Target must make a Charisma Saving Throw against your Charisma Score:

- **Failure:** They End their Turn.
- **Success:** No effect.

If it isn't their Turn and they fail, they end the Damaging effect if possible, or skip their next Turn if not.

Archfey: Prankster's Ease

Traits: Edge, Immunity

You become Immune to the Charmed and Frightened Conditions.

Archfey: Trickster

Traits: Burn, Improvement, Saving Throw

Free Action: 1 Pact Point

Trigger: When you successfully apply the Charmed Condition.

Target: The Charmed Creature.

The Target must make an Intelligence Saving Throw against your Charisma Score or suffer one of the following penalties:

- They cannot Concentrate while Charmed.
- They forget their Name or an important piece of information.
- You compel them to perform an Action of your choice at the Start of their next Turn.
- You apply some other non-harmful effect that sounds reasonable to the GM.

Archfey: Vanish

Traits: Burn, Invisible

3 Actions: 1 Pact Point

Duration: 1 Minute

You become Invisible for the Duration, or until either you Attack a Creature, or a Creature touches or Hits you.

Archfey: Fey Presence

Traits: Blast, Charmed, Disruptable, Saving Throw

Prerequisite: 5th Level

10 Actions: 5 Pact Points

Targets: Any number of Creatures in Range.

Range: 120 ft.

Duration: 24 Hours

Make a Performance or Persuasion Check against the highest Charisma Score among all Targeted Creatures:

- **Critical Success:** Same as Success, but the Targets will gradually agree with anything you say, provided it isn't obviously suicidal.
- **Success:** The Targets become Charmed for the Duration, and willingly perform any course of activity that doesn't result in any significant amount of harm or distress to them, even if they distrust you. However, they can attempt an Intelligence Saving Throw against your Spell Save DC to end the effect early, if they take Damage.
- **Failure:** The Targets don't notice or automatically become Hostile from this attempt, but otherwise suffer no effect.
- **Critical Failure:** The Targets notice the effect, and become Immune to it for 24 Hours.

If the Targets have already begun work on a task you have assigned to them once the duration wears off, they may finish the task anyways if there's no understandable reason not to.

Blood Brand

Blood Brand Warlocks claim a highly feared power from an unknown source, often in an effort to perform a great act of vengeance. However, those that can put past their thirst for blood often come out as powerful monster hunters.

(Inspired by a Homebrew Class for D&D 5e by Matthew Mercer)

Bonus Proficiencies: Survival, Perception

Bonus Spells (Always Prepared): False Life, Moonlight, Zone of Truth, Faerie Fire, Sanctuary, Planar Portal

Innate Feats:

Blood Curse

Traits: Burn, Curse, Damage, Debuff, Force

2 Actions: 1 Pact Point

Duration: 1 Minute

For the Duration, the Target takes Force Damage equal to your Charisma Modifier whenever they reduce Damage they take by any means, even if the Damage is blocked by a Damage Threshold.

This Damage cannot be reduced by any means, except Immunity.

Hunter's Senses

Traits: Burn, Spellcasting

4 Actions: 1 Pact Point

You cast Hunter's Mark at its lowest Tier, without expending a Spell Slot.

While under the effects of the Spell when cast in this way, the Target's trail remains after the Spell ends, only disappearing when you die or cast the Spell again through this method.

Blood: Brand of Affliction

Traits: Burn, Curse, Debuff, Disadvantage

2 Actions: 1 Pact Point

Duration: 1 Minute

Range: 60 ft.

Target: One Creature.

For the Duration, the Target has Disadvantage on all Ability Checks and Saving Throws that use one Ability Score that you choose.

Blood: Faltering Brand

Traits: Burn, Curse, Debuff, Saving Throw

5 Actions: 1 Pact Point

Range: 30 ft.

Duration: 1 Hour

Target: One Creature that is Concentrating.

The Target must make a Concentration (Wisdom) Saving Throw:

- **Failure:** They lose Concentration and cannot Concentrate for the Duration.
- **Success:** No effect.

Blood: Ghost Slayer

Traits: Edge, Ethereal, Weapon

Your Weapon and Spell Attacks deal half Damage (Rounded up) to Creatures with the Ethereal Condition regardless of Resistance or Immunity, if the Attack would normally do less.

This also applies while you are Ethereal, and your Target is not.

Blood: Sigil of Endurance

Traits: Burn, Advantage, Buff

Free Action: 1 Pact Point

Trigger: Any Creature you can see makes a Saving Throw.

The Triggering Saving Throw is rolled at Advantage, and uses your Charisma Modifier in place of the original Ability Score, unless the original Ability Score is already greater.

Blood: Curse of Weakness

Traits: Blast, Curse, Debuff, Weakness

Prerequisite: Level 5

5 Actions: 5 Pact Points

Duration: 1 Minute

Range: 60 ft.

Target: One Creature

For the Duration, the Target no longer benefits from any Damage Threshold, and doesn't add their Damage or Healing Modifiers to any effect, unless they're negative.

Celestial

While not the most common occurrence, a Celestial may grant their power to a follower, or as part of a promise. A

Celestial Warlock often takes the role of protector and healer when no other aid is available, becoming a shining light in the dangerous dark.

Bonus Proficiencies: Celestial, Religion

Bonus Spells (Always Prepared): Guard, Bless, Zone of Truth, Sunlight, Death Ward, Apotheosis

Innate Feats:

Aided Smite

Traits: Burn, Buff, Damage, Metamagic, Radiant

1 Reaction: 1 Pact Point

Trigger: When you cast a Spell with the Buff Trait.

Duration: 1 Minute

The Target's next Successful Attack before the Duration ends deals an additional 1d6 Radiant Damage.

Touch of Light

Traits: Burn, Bloodied, Healing

1 Action: 1 Pact Point

Target: One Creature that is Bloodied.

Range: Touch

The Target regains Hit Points equal to your Charisma Modifier.

Celestial: Celestial Power

Traits: Edge, Improvement, Radiant

Whenever you use a Spell, or Warlock Feat to deal Damage, you can change the Damage Type to Radiant.

Celestial: Divine Guard

Traits: Edge, Disadvantage, Improvement

While you have Temporary Hit Points, any Attack Rolls against you are made at Disadvantage.

Celestial: Radiant Channel

Traits: Edge, Resistance

You gain Resistance to Radiant Damage, equal to your Level.

Whenever you take Radiant Damage, you gain a Pact Point, even if it's reduced to 0.

Celestial: Secret Guardian

Traits: Burn, Buff, Nullify

2 Actions: 1 Pact Point

Target: One Creature.

Range: Touch

Duration: 10 Minutes

For the Duration, all Critical Hits against the Target become Hits instead.

Celestial: Celestial Accuracy

Traits: Blast, Buff

Prerequisite: 5th Level

10 Actions: X Pact Points

Range: 60 ft.

Duration: 10 Minutes

For the Duration, X Creatures of your choice within Range gain a bonus to their Attack Rolls and Saving Throws equal to your Charisma Modifier.

Djinn

Djinn Warlocks draw strength from the Elemental Planes, granting them power to change the world around them for the better... in their favor at least. As a bonus,

Djinn Warlocks occasionally learn to grant wishes to their allies, within certain restrictions.

Bonus Proficiencies: Arcana, Primordial

Bonus Spells (Always Prepared): Dimensional Storage, Summon Elemental, Enlarge/Reduce, Anti-Magic Field, Polymorph, Dimensional Binding

Innate Feats:

Elemental Aspect

Traits: Edge, Resistance

You have Resistance equal to your level to one of the following Damage Types, corresponding to your choice for Elemental Gift, or any other type if you didn't replace any Spells:

- **Earth:** Bludgeoning.
- **Fire:** Fire.
- **Water:** Cold.
- **Wind:** Thunder.

Elemental Gift

Traits: Edge, Choice, Improvement, Special, Spellcasting

Any number of your Bonus Spells from Subclasses can be replaced with a different Spell of the same Tier as long as it has the Earth, Fire, Water or Wind Traits, of which you choose one.

All Bonus Spells added in this way must use the Trait you have chosen.

Special: If you have another Subclass that uses these Elements, all choices are combined between them, using their respective rules.

Djinn: Djinn Bottle

Traits: Edge, Item, Magical

Either gain or modify a Container that doesn't exceed your carrying capacity. It has a number of Hit Points equal to 10 times your Level. These Hit Points ignore Size bonuses and penalties (even colossal Creatures roll base Damage against it).

You treat the Container as if it was an unoccupied space that you can enter or exit, provided it isn't sealed. However, entering or exiting ends your Turn if the Action you used to enter wasn't already Magical.

While inside the Container, you cannot use Touch effects or Melee Attacks on Creatures outside the Space, and your Ranged Attacks are made at Disadvantage on Creatures outside the space. You also can't regain any Pact Points while within this space.

If destroyed, any Creatures inside are harmlessly expelled to the nearest unoccupied space, and you may obtain a replacement over the course of a Long Rest.

Djinn: Elemental Enhancement

Traits: Burn, Damage, Item

3 Actions: 1 Pact Point

Target: One Weapon you Touch.

Duration: 1 Minute

For the Duration, the Target deals an extra 1d6 Damage of the Type you Resist from Elemental Aspect.

Djinn: Expanded Gift

Traits: Utility, Improvement

You regain the Spells you replaced using Elemental Gift.

For Spells you didn't replace, you gain a Spell of the Trait you originally chose for Elemental Gift as a Bonus Spell.

You can take this Feat any number of times, picking a Trait for Elemental Gift.

Djinn: Limited Wish

Traits: Blast, Audible

Prerequisite: 5th Level

50 Reactions: 5 Pact Points

Trigger: When a Creature you can hear makes a wish.

You immediately fulfill the wish under the terms of the Wish Spell (as if you had the component), so long as you follow the following additional rules:

1. You cannot inflict Damage or Debuffs to any Creature, unless they fail a Charisma Saving Throw against your Spell Save DC. If they do fail, you apply it from any Spell or Action you have access to, as if it were Empowered to your Level.
2. All effects must be within your senses.
3. Any effects that you don't already have access to (such as creating wealth), only last for 1 Hour at maximum. These effects also end early if you grant a second wish to the same Creature.
4. You decide the specifics of how you fulfill the Wish, which must be permitted by the GM. If the Wish isn't approved, all Actions and Pact Points are refunded.

Djinn: Room for Everyone

Traits: Edge, Improvement

Prerequisite: Djinn Bottle

When you use any Action with the Move Trait to enter your Container from Djinn Bottle, you can bring a willing Creature you can touch, or an unwilling Creature you Teleport, or can touch while they are Grappled or Restrained, into the bottle with you.

You can only have one other Creature with you in the Container, plus one Minion or Summon associated with that Creature (excess Minions are counted for other Creatures, or as their own Creatures). Any Creature is considered a guest, and can leave as freely as you can.

If you are Incapacitated, all guests are forced out of the Container as if they had taken the Move Action (at no cost). You can also force any number of guests out of your container as a single Interact Action.

Unless you decide otherwise, all guests gain the same benefits you do, as long as they remain within the container. Also, Touch and Melee effects always apply within the Bottle.

You can take this Feat multiple times, increasing the number of Creatures you can have inside by 1. If the inside of the Bottle would be unable to fit all your Guests, the space inside Magically expands to accommodate them.

Special: If you have the Mutual Binding Feat, you can use your Bottle as the destination, only releasing you and the bound Creature when a Creature rubs the Bottle.

Draconic

Draconic Warlocks draw their power from a Dragon, which sometimes do so out of curiosity or boredom. Such Warlocks use their Draconic power to better utilize the Magical items they find and learn secrets that others may Miss.

Bonus Proficiencies: Draconic, Intimidation

Bonus Spells (Always Prepared): True Strike, Identify, Dragon's Breath, Knock, Magician's Field Study, Spell Cage

Innate Feats:

Dragon Hide

Traits: Edge, Resistance

You have Resistance to Physical Damage equal to your Proficiency Bonus.

Lesser Enchantment

Traits: Edge, Enchantment, Item

10 Minutes: 1 Pact Point

Target: An Item you Touch.

Duration: 1 Hour

The Target Item gains the properties of any Common Enchantment you know for the duration, as long as the Enchantment is compatible with the Item.

You learn one Common Enchantment of your Choice when you gain this.

Draconic: Consume Enchantment

Traits: Edge, Item, Manipulate, Special

2 Actions: 1 Pact Point

Duration: 24 Hours

Target: One Non-Consumable Magical Item you Touch.

You destroy the Target and gain the benefits granted by it for the Duration, as if you were wielding it, and Attuned to it (doesn't require Attunement).

Any Curses that the Item had apply to you for the full Duration, unless they would otherwise end early.

You can have any number of Magical Items consumed at a time, though matching bonuses use the highest value.

Special: If you have the Artificer's Temporary Enchantment Feat, you can instead apply it to yourself under these rules, rather than an Item.

Draconic: Draconic Scrutiny

Traits: Utility, Improvement, Spellcasting

Free Action: 1 Pact Point

Trigger: You cast Identify.

The Triggering Spell ignores effects that inhibit Divination Magic or fool the Identify Spell, and reveals the details of any Curse that has been applied, regardless of Tier.

It also gives you an estimated market value if the GM has one.

Draconic: Improved Enchantment

Traits: Edge, Improvement

You can apply Uncommon Enchantments using your Lesser Enchantment Feat, and learn a new Common or Uncommon Enchantment immediately.

Each Rarity above Common increases the Pact Point cost by 2.

You can take this Feat any number of times, increasing the Rarity of available Enchantments by 1, up to Legendary.

Draconic: Shed Magic

Traits: Burn, Spellcasting

2 Actions: 2 Pact Points

You cast Dispel Magic on yourself as if you had used a Warlock Spell Slot to do so, without expending said Spell Slot.

Draconic: Draconic Avatar

Traits: Blast, Buff, Final, Impaired, Movement, Transformation

Prerequisite: 5th Level

10 Actions: 5 Pact Points

Duration: 10 Minutes

For the Duration, you gain a Flying Speed equal to twice your Walking Speed and your Size increases by 1 Category. End your Turn.

During this time, All Creatures of your Choice that Start their Turn within 30 feet of you gain the effects of any Enchanted Items you are wielding or wearing, and any Items you have Consumed with Consume Enchantment.

After this effect ends, or you are reduced to 0 Hit Points, you gain Impaired Strength 2 and Impaired Dexterity 2.

Eldritch

When you say Eldritch Warlock, many think about a giant octopus from outer space. Really, it's much weirder than that. Some Eldritch Patrons are as unknowable as the powers they grant and the secrets they wield.

Eldritch Warlocks are a bit tough to describe as the results are maddening to say the least.

Bonus Proficiencies: Eldritch, Occultism

Bonus Spells (Always Prepared): Wrack, Echo Agony, Madden, Haste, Impair, Frenzy

Innate Feats:

Eldritch Mind

Traits: Edge, Language, Mental, Resistance

You gain Telepathy 30 ft., and have Resistance to Psychic Damage equal to your Level.

Additionally, you always know when a Creature is reading your mind, and can roll Deception against their Intelligence Score to decide what they learn.

Mental Fortress

Traits: Burn, Damage, Psychic, Saving Throw

1 Reaction: 1 Pact Point

Trigger: When you resist Psychic Damage, or a Creature Targets you with any Mental effect.

The Triggering Creature must succeed on an Intelligence Saving Throw against your Charisma Score:

- **Critical Failure:** Double Damage.
- **Failure:** They take 1d6 Psychic Damage, and you are unaffected by the Triggering effect.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Eldritch: Alien Comprehension

Traits: Edge, Immunity

You are Immune to any Mental effects you are not a willing Target of. Any pre-existing Bleeds such as Hallucinations no longer cause further harm, while others such as Amnesiac still require effort to recall lost memories.

Eldritch: Forbidden Knowledge

Traits: Utility, Feat, Information

You immediately gain two General Feats of your choice, and you may ask your GM any question about a Creature, Object or organization, which must be answered truthfully. If the GM cannot answer this truthfully, they must at least give you the reason. You can also ask this question at any later time if you wish to save it.

You also gain the Hunted Bleed permanently, with your Hunter being any Creature that opposes your Patron, or any Creature that is involved with what you've discovered. This Bleed is only removed at GM discretion.

If the secret becomes irrelevant (e.g. the organization was eliminated, the quest is finished, it becomes public knowledge without your intervention, it was completely forgotten and the GM feels merciful, etc.), you can ask one additional question at any later time.

Once you have had a chance to write it down or record it, the GM isn't required to remind you of a secret.

Eldritch: Temporal Distortion

Traits: Burn, Nullify

Free Action: 1 Pact Point

Trigger: When you take an Action with the Final Trait, that isn't the Prepare Action.

Your Turn continues as normal.

If you use this Action multiple times in the same Turn, the Pact Point cost increases by 1 for the rest of that Turn.

Eldritch: Glimpse of Madness

Traits: Blast, Frightened, Mental, Saving Throw

Prerequisite: 5th Level

10 Actions: X Pact Points

All Creatures that can see you must make an Intelligence Saving Throw against your Charisma Score:

- **Critical Failure:** Same as Failure, but they remain Frightened until they finish a Long Rest instead of when they Critically Succeed on the Save when they Move.
- **Failure:** They become Frightened X.
- **Success:** They become Frightened 1 until the End of their next Turn.
- **Critical Success:** No effect.

Eldritch: Haunting Visions

Traits: Blast, Improvement, Metamagic, Psychic, Saving Throw

Prerequisite: 5th Level

Free Action: 5 Pact Points

Trigger: You cast an Illusion Spell.

Target: One Creature that can see the resulting Illusion.

Duration: 1 Month

The Target must make a Wisdom Saving Throw:

- **Critical Failure:** Same as Failure. If the Triggering Illusion would be of something that does deal Damage, it inflicts 1d12 Psychic Damage. However, it cannot reduce the Target below 1 Hit Point.
- **Failure:** For the Duration, the Target continues to see the Illusion and cannot disbelieve it, even after the Triggering effect ends. This cannot deal Damage, even if the Triggering Illusion could.
- **Success:** The Target cannot attempt any Checks or Saving Throws to disbelieve the Triggering Illusion.
- **Critical Success:** No effect.

Infernal

Infernal Warlocks are what comes to mind when most people say "Warlock". They usually sell their souls, sacrifice others, or perform various rituals to summon even more Fiends that cause problems everyone else has to deal with. But the ones that don't are usually really smart, or well liked.

Bonus Proficiencies: Infernal, Religion

Bonus Spells (Always Prepared): Fire Blast, Summon Fiend, Fiend Fire, Fireball, Wall of Fire, Geas

Innate Feats:

Hungry Pact

Traits: Burn, Damage

Free Action: 1 Pact Point

Trigger: When you deal Damage to a Creature on your Turn.

Duration: 1 Minute

For the Duration, the Target takes additional Necrotic Damage equal to your Charisma Modifier whenever they take Damage that is caused by you.

This also includes Damage inflicted by a Pact Boon, even if that Pact Boon isn't wielded by you.

Infernal Alliance

Traits: Edge, Improvement

When you Summon any Fiend, it will never Attack or Target you unless you Attack it first. Additionally, other Fiends recognize your ties, treating you as if you were another Fiend.

You are also considered Unholy.

Infernal: Devil's Skin

Traits: Edge, Choice, Immunity

You gain Immunity to any Damage Type you choose equal to your Level. This Immunity is Nullified when you are in contact with Silver.

If you have the Soulless Feat, you can take this Feat any number of times.

Infernal: Fair Bargain

Traits: Edge, Recovery

When you cast Summon Fiend, you gain Hit Dice equal to the number of Spell Slots, or Tier of Warlock Spell Slot used to cast it.

Infernal: Infernal Strike

Traits: Edge, Affliction, Improvement

All of your Attacks also inflict the Infernal Fever Affliction, and Trigger it as if you were a Fiend.

Additionally, you cannot contract Infernal Fever by any means.

Infernal: Soulless

Traits: Edge, Recovery

You no longer regain Hit Dice from taking a Long Rest, and Magic cannot Heal you unless it's an Occult Spell, or Unholy. Instead, you regain 1 Hit Die when a Creature dies within 60 feet of you, and you roll it immediately if you already have all your Hit Dice.

If you Die, you cannot be resurrected, as your soul is taken by your Patron as part of the deal.

This Feat cannot be retrained until your soul is retrieved and returned to you.

Infernal: Retribution

Traits: Blast, Damage, Saving Throw

Prerequisite: 5th Level

Free Action: 5 Pact Points

Range: 60 ft.

Expend all remaining Hit Dice. All Creatures in Range must make a Dexterity Saving Throw against your Spell Save DC:

- **Critical Failure:** Double Damage.
- **Failure:** They take Necrotic Damage equal to the total of all expended Hit Dice.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Undying

Undying Warlocks often draw their power from a powerful Undead, or a Creature that has incredible power over the grave. As a result, they tend to be very hard to kill, and use the natural fear of death to keep their enemies separated.

Bonus Proficiencies: Intimidation, Religion

Bonus Spells (Always Prepared): Death Grip, Fear, Necrotic Eruption, Speak with Dead, Death Ward, Ghost Ship

Innate Feats:

Living Corpse

Traits: Edge

You gain the Undead Creature Type.

Reminder: Many forms of Healing don't affect Undead.

Semi-Immortal

Traits: Burn, Exhaustion, Nullify

Free Action: 1 Pact Point

Trigger: You Fail a Death Saving Throw.

You ignore the Triggering Death Save Failure.

You may also take Exhaustion 1 to replace the Failure with a Success.

Undying Stand

Traits: Edge, Improvement, Nullify

When you are Stabilized, you immediately become Conscious at 1 Hit Point, and remove your Death Save Failures.

Undying: Deathly Shroud

Traits: Edge, Magical, Resistance, Healing

You gain Resistance to Necrotic Damage equal to your Level. Additionally, Necrotic Damage you resist now Heals you instead.

Undying: Mortal Fear

Traits: Edge, Improvement

When a Creature is Frightened of you, you ignore any Damage Threshold they have, though this doesn't count as exploiting a Weakness.

Undying: Undead Nature

Traits: Utility

You no longer need to eat, drink, sleep, or breathe, and cannot die to old age.

Undying: Unsettling Resilience

Traits: Burn, Frightened, Saving Throw

Free Action: 1 Pact Point

Trigger: When a Creature Hits you with an Attack Roll.

Duration: 1 Minute

The Triggering Creature must make a Charisma Saving Throw against your Charisma Score:

- **Critical Failure:** Same as Failure, but they immediately Move once, either away from you, or to any Cover they can Move to.
- **Failure:** They become Frightened equal to your Charisma Modifier for the Duration.
- **Success:** They become Frightened 1 until the End of their Turn.
- **Critical Success:** They become Immune to this Action.

Undying: Eternal Presence

Traits: Blast, Buff, Immunity, Temporary Healing

Prerequisite: 5th Level

20 Actions: X Pact Points

Range: 60 ft.

Duration: 1 Hour

For the Duration, you grant Xd6 Temporary Hit Points to any Creatures you choose within Range, including yourself.

While a Creature has these Temporary Hit Points, they cannot die, or receive a Death Save Failure.

Beta

Wizard Schools

Abjurer

Abjurers are Wizards who actually do consider safety to be an important field of study. Because when allowed to help, an Abjurer can more than suffice as a safety instructor when the Barbarian gets knocked out.

Bonus Proficiencies: Medicine, Light Armor

Bonus Spells (Always Prepared): Guard, Dispel Magic, Protective Bond, Remove Curse, Sanctuary of Rest, Death Ward

Innate Feats:

Abjuration Adept

Traits: Edge, Actions, Improvement

Your Abjuration Spells have their Action Cost reduced by their Tier, to a minimum of 1.

Arcane Ward

Traits: Edge, Magical

When you cast any Abjuration Spell, you gain a Ward with Hit Points equal to 1d6 for each Spell Slot used (Cantrips and Spells cast without a Slot count as 0) + your Spell Damage/Healing Modifier. If you already have a Ward, you replace it if the new one would be stronger.

When you take Damage from any source that you do not willingly take, and isn't self-inflicted, your Ward absorbs up to half of that Damage, even if it's from a Spell such as Protective Bond that ignores Resistance. If it doesn't have enough Hit Points, you take what it can't absorb.

This doesn't count as Temporary Hit Points, Damage dealt to the Ward is considered as dealt to a separate Creature, and the Ward fades after a Long Rest.

Abjurer: Resilient Ward

Traits: Edge, Improvement

When you would gain an Arcane Ward while another is active, your Ward instead regains Hit Points up to the maximum, and is only replaced if the new Ward exceeds the maximum, which is equal to your Level + your Intelligence Score.

Abjurer: Shared Ward

Traits: Burn, Magical

Free Action:

Trigger: A Creature or Object you can see takes Damage.

Your Ward takes half the Triggering Damage.

Note: If two or more effects reduce the same Damage by half, the original Target takes no Damage.

Abjurer: Magic Resistance

Traits: Edge, Advantage

You have Advantage on Saving Throws against Magical effects.

Abjurer: Countermaster

Traits: Edge, Advantage, Improvement

Prerequisite: Counterspell

When you cast Counterspell, you have Advantage on the Ability Check.

Abjurer: Invulnerability

Traits: Blast, Immunity, Magical

Prerequisite: 5th Level

50 Actions: X Scholar Points

You grant the Target Immunity to All Damage for X Rounds (ending at the Start of their Turn). Every time the Target takes an Action during their Turn, The number of Rounds they have left is reduced by 1.

This effect still allows Targets to benefit from abilities that require being Hit, or to take Damage.

Conjurer

Conjurers are amazing at gift exchanges, but also at taking people from one place to another. Because of this, they are highly adept at making a battlefield easier or harder to traverse, or making a journey much faster.

Bonus Proficiencies: Arcana, Perception

Bonus Spells (Always Prepared): Dimensional Storage, Summon Elemental, Demiplane, Teleportation Circle, Etherealness, Planar Transportation

Innate Feats:

Basic Conjunction

Traits: Burn, Item, Magical, Manipulate, Special, Summon

5 Actions:

Duration: 1 Minute

You create a Non-Magical Object that isn't worth more than 1 GP, and doesn't exceed your Carrying Capacity (pg. 113). This Object is considered to be Magical (Common for effects that need rarity), lasts for the Duration, has 1 HP. It only exhibits the non-magical properties of the Item if you Succeed on a Crafting Check.

When the Item is destroyed, or expires, any lasting effects are undone. Any Healing is instead applied as Temporary Healing that last until this effect ends.

If a Spell is cast using such a conjured Item as a Material or Focus Component, you always treat the Spell as if you don't have access to the Tier you're casting it at.

Special: If you have the Supplier Feat, Items you make this way are considered to be made with Quick Craft and doesn't expire.

Conjunction Adept

Traits: Edge, Actions, Improvement

Your Conjunction Spells have their Action Cost reduced by their Tier, to a minimum of 1.

Also, when you cast any Spell with the Summon Trait, you can instead reduce the Action cost to 10 Actions (before other reductions), and End your Turn, with Final Trait.

Conjurer: Advanced Conjunction

Traits: Utility, Improvement

When you use Basic Conjunction to create an Object, you can create functional Magical Items with the same restrictions, though they require twice as much value for each Rarity above and including Common, and you must Concentrate for as long as you wish the effects to take place.

You can also Concentrate on Basic Conjunction to extend the Duration. It lasts up to 1 Minute after you lose Concentration. If you regain Concentration, remaining Duration isn't restored.

You can take this Feat any number of times, further doubling the maximum value of the created Item.

Conjurer: Minor Banishment

Traits: Burn, Magical, Teleport

3 Actions: 1 Scholar Point

One Creature within 30 feet of you must make a Charisma Saving Throw against your Intelligence Score:

- **Critical Failure:** Double Distance.
- **Failure:** They are Teleported 30 feet away to an unoccupied space you can see.
- **Success:** No effect.

Conjurer: Quick Jaunt

Traits: Burn, Magical, Move, Teleport

3 Actions:

You can Teleport up to 15 feet to a space you can see. If a willing Creature is in that space, you can choose to trade places with them.

If you are Grappling, or Grappled by a Creature when you attempt to use Quick Jaunt, or you attempt to Swap with an Unwilling Creature, they may make a Charisma Saving Throw against your Intelligence Score:

- **Critical Failure:** You can choose to bring the other Creature along with you, or leave them behind.
 - No additional effect for Swapping.
- **Failure:** Both you and the Target Teleport.
- **Success:** You are unable to Teleport unless the Target allows you, and the Actions are wasted.

When using any other Action with the Teleport Trait, you may spend 1 Scholar Point to apply the effects of Quick Jaunt to that Action.

Conjurer: Splinch

Traits: Edge, Damage, Improvement, Force

Whenever you Teleport a Creature, you can choose to inflict Force Damage equal to your Intelligence Modifier for every 5 feet traveled.

This Damage is doubled if inflicted by a Critical Hit, or Critical Failure.

Any Creature that is reduced to 0 Hit Points or less by this effect is Stable. This effect also cannot harm a Creature that is at 0 Hit Points or less.

Conjurer: Gate

Traits: Blast, Concentration, Magical, Movement, Teleport

Prerequisite: 5th Level

10 Actions: 5 Scholar Points

Range: 100 ft.

Duration: 10 Minutes

Pick any two surfaces you can see within Range.

You place a Portal on each surface for the Duration. Neither of the Portals can be more than 2 Sizes larger than you. Spaces occupied by either Portal are considered to be adjacent relative to the other Portal, until closed, or you End your Turn while more than 200 feet from one, which closes both.

If you Concentrate on one Portal, it lasts until you drop Concentration, rather than when the Duration expires or if you exceed the 200 ft. limit. If you have only 1 Portal active and are Concentrating, you can use this Action again (expending Actions, but not Scholar Points) to place a new Portal that connects to the old one regardless of Range, and even across Planes.

For 2 Action Points, you may temporarily close or re-open both Portals, or close one permanently. If a Portal doesn't have a counterpart, it acts as if closed.

Anything inside a Portal as it closes is pushed to one side or the other depending on the available space, and its current velocity.

If the surface a Portal rests on is ever broken or bent such that it can no longer match the approximate shape of the other Portal, the Portals shrink or close to exclude the offending surface, until the surface is sufficiently repaired.

Diviner

Diviners are the ones that look through both time and space to seek that which is lost, or simply doesn't want to be found. And while they do get a bad rep for playing with fate, there's nothing funnier than watching a Diviner meander through a plethora of traps without a single scratch. But with great vision comes great awareness.

Bonus Proficiencies: Occultism, Perception,
Bonus Spells (Always Prepared): True Strike, Identify, Detect Thoughts, Scrying, Magician's Field Study, Foresight

Innate Feats:

Divination Adept

Traits: Edge, Actions, Improvement

Your Divination Spells have their Action Cost reduced by their Tier, to a minimum of 1.

Seeker's Mark

Traits: Utility, Information, Magical

When a Creature is affected by a Debuff, Condition, or similar effect that was applied by you (such as Bloodied), any Divination effect you use can target that Creature regardless of distance, and planar boundaries, as long as the effect lasts.

Additionally, you always know the exact Location of such Creatures if they are within 300 feet of you, ignoring Protection from Divination Magic, and Illusions that fool Truesight.

Diviner: All Seeing

Traits: Utility, Improvement, Saving Throw, Sense

As long as you aren't Blinded, any Creature that is within 100 feet of you cannot be Hidden from you, even if Invisible, as if you had Truesight.

Additionally, when Divination Magic you use is Nullified or prevented by an effect other than Anti-Magic, you can choose to attempt an Intelligence Spellcasting Check against the Spell Save DC of the inhibiting effect:

- **Critical Success:** Same as Success, but your attempt is undetected.
- **Success:** You Succeed anyways, though your attempt is detected by the creator of the Nullifying effect.
- **Failure:** Your attempt at Divination fails and is detected by the creator of the Nullifying effect, and all Creatures within 15 feet of where the effect would've taken place.

Diviner: Interpreter

Traits: Utility, Language

Free Action: 1 Scholar Point

Until the End of your next Long Rest, you understand one additional Language of your choice, as long as the information doesn't come from an illusion or recording.

Diviner: Portent

Traits: Edge, Long Rest, Resource

You have a single d20 that you can roll, which is called a Portent Die. Whenever you make a d20 Test, or a Creature makes a d20 Test against you, you can replace the result with your Portent Die, ignoring Advantage or Disadvantage.

You regain expended Portent Dice when you finish a Long Rest.

You can take this Feat multiple times, gaining an additional Portent die each time. Just beware of irritated GMs.

Diviner: Command Fate

Traits: Blast, Buff, Impaired

Prerequisite: 5th Level

10 Actions:

Duration: 10 Minutes

Until the Duration expires, when a Creature rolls any dice for any reason, you can spend 1 Scholar Point to force them to re-roll, much akin to GM Inspiration.

At the End of this Duration, gain Impaired Intelligence 1.

Diviner: Greater Portent

Traits: Edge, Improvement, Recovery

Prerequisite: Portent

You can use a Portent Die on any d20 Test, as long as you can see at least one Creature involved.

Additionally, you can spend 1 Scholar Point to roll and recover 1 expended Portent Die as a Free Action on your Turn.

Enchanter

Enchanters are the Bards of the wizarding world. They use their arcane knowledge to command and control others, or fill their minds with horrors. Or maybe just hypnotize them into being mindless "drone" zombies. Then again, that's just a stereotype. There's a reason they're both the most loved and hated in schools.

Bonus Proficiencies: Performance, Society

Bonus Spells (Always Prepared): Apathy, Fear, Charm, Haste, Dream Snare, Geas

Innate Feats:

Enchantment Adept

Traits: Edge, Actions, Improvement

Your Enchantment Spells have their Action Cost reduced by their Tier, to a minimum of 1.

Quick Charm

Traits: Burn, Charmed, Emotion, Magical, Mental

3 Actions: 1 Scholar Point

Target: One Creature

Duration: 1 Minute

For the Duration or until the effect ends, the Target cannot Attack or harm you as if they were Charmed.

If the Target is reminded of their reason for hostility, or is notably threatened by you or your allies, the effect ends early.

This doesn't affect Creatures that are Immune to being Charmed, nor does it grant you Advantage on Charisma Checks against them, but does count as being Charmed for other effects.

Enchanter: Brain Games

Traits: Edge, Improvement

Enchantment Spells you cast can use Intelligence for the Spell Save DC.

Enchanter: Good Feelings

Traits: Utility, Emotion, Improvement

When the Duration of a Charm effect applied by you runs out (assuming it doesn't end early), the Target cannot willingly fight, or bring harm to you for 24 Hours, or until you harm them.

Enchanter: Horrible Allure

Traits: Edge, Charmed, Frightened, Improvement, Magical

When you apply either the Frightened or Charmed Conditions, you can exchange one for the other, and apply other effects accordingly.

The Charmed Condition becomes Frightened 1 when converted. And if the original Frightened Condition has no Duration, the resulting Charm is ended on a Saving Throw as if it were the Frightened Condition.

Enchanter: Scare to Death

Traits: Edge, Damage, Improvement, Psychic

When a Creature fails a Saving Throw to resist being Frightened by you, or to end the Frightened Condition, they take Psychic Damage equal to their Frightened Condition.

This Damage ignores Damage Thresholds and Resistances, but not Immunity.

Note: Creatures aren't forced to make the Saving Throw if they don't take any Action with the Move Trait.

Enchanter: Dominate

Traits: Blast, Improvement, Magical, Metamagic

Prerequisite: 5th Level

Free Action: X Scholar Points

Trigger: A Creature Critically Fails any Saving Throw against being Charmed.

X equals the Target's effective Level (or number of Hit Dice), and is refunded if you don't have enough Scholar Points.

The Target falls under your control, and obeys your orders (even if they are obviously harmful) until the Triggering effect ends.

Once the Triggering effect ends, the Target knows you controlled them, even if the Triggering effect would normally go unnoticed.

Evoker

Also known as Fireballers, Shooters, Artillery, or the Wizards that make things happen, Evokers are very good at making an impact. But even though they tend to prioritize offense over everything else, watching their firework display is entertaining in its own right.

Bonus Proficiencies: Arcana, Perception

Bonus Spells (Always Prepared): Fire Blast, Magic Missile, Mind Blast, Fireball, Arcane Artillery, Chaotic Storm

Innate Feats:

Boosted Power

Traits: Edge, Improvement

When you roll a 1 on any Damage or Healing die for a Magical effect, reroll it.

Evocation Adept

Traits: Edge, Actions, Improvement

Your Evocation Spells have their Action Cost reduced by their Tier, to a minimum of 1.

Evoker: Chaotic Magic

Traits: Edge, Damage, Improvement

Whenever you Miss with an Attack that has the Magical Trait, the Target still takes Damage equal to your Intelligence Modifier, unless the Miss was Critical.

Evoker: Forceful Magic

Traits: Edge, Improvement

When you Push a Creature with a Spell, or Magical effect, you double the maximum Push distance.

Evoker: Increased Potency

Traits: Edge, Improvement

The Damage Dice of all Spells you cast are increased by 1 category, up to a d12.

Evoker: Responsible Arsonist

Traits: Edge, Magical, Nullify

2 Actions: 1 Scholar Point

Range: 30 ft.

Target: 5 ft. Cube

You immediately end one type of Persistent Damage of your choice within the area.

Should a Creature be too large to fit entirely within the area, you instead divide the Damage by the Target's Health Modifier from Size, or reduce it by your Spell Healing Modifier, whichever is greater.

Evoker: Unleash Destruction

Traits: Blast, Concentration, Improvement, Metamagic, Persistent Damage

Prerequisite: 5th Level

5 Actions: X Scholar Points

Duration: 1 Minute (Concentration)

While Concentrating, when you inflict Damage of any type to a Creature with a Magical effect, you also deal X Persistent Damage of the same type. Physical Damage types instead inflict Persistent Bleed.

Illusionist

Often known as performers and tricksters, Illusionists can be some of the most dangerous wizards to confront if you aren't prepared. But even if they aren't fighting, the most talented of illusionists can make you question your reality.

Bonus Proficiencies: Deception, Persuasion

Bonus Spells (Always Prepared): Minor Illusion, Arcane Disguise, Invisibility, Mirror Image, Shadow Stealth, Nondetection

Innate Feats:

Illusion Adept

Traits: Edge, Actions, Improvement

Your Illusion Spells have their Action Cost reduced by their Tier, to a minimum of 1.

“Not Where I Seem”

Traits: Edge, Spellbook, Spellcasting

Free Action: 1 Scholar Point

Trigger: You are Hit by an Attack Roll or fail a Saving Throw that deals Damage.

You spend Actions to cast any Illusion Spell in your Spellbook as if it were a Reaction Spell, even if it's not Prepared.

The Triggering effect then deals no Damage, though other effects still apply as if it did Hit, but was reduced to 0.

Illusionist: Behavior Study

Traits: Edge, Improvement

When you cast any Illusion Spell, you can use Intelligence for the Saving Throw DC, if it's higher.

Illusionist: Lifelike

Traits: Utility, Metamagic

Free Action: 1 Scholar Point

Trigger: You create any Illusion

The Illusion becomes “real” until it ends.

A “real” Illusion cannot be discerned through interaction, but can only deal 1d6 Psychic Damage to any given Creature each Round.

As long as a Creature believes the Illusion, it supports their weight and interacts with them as if it were real. However, this effect doesn't apply if they realize it's an Illusion, unless you Concentrate to allow them to treat it as real (you only Concentrate once per Illusion). You do not need to believe the Illusion to gain this benefit.

Objects aren't fooled, and require your Concentration to interact with Illusions.

Illusionist: Now You See Me

Traits: Burn, Invisible, Magical, Move, Special, Stealth

5 Reactions: 1 Scholar Point

Trigger: You are Detected, or fail a Stealth Check.

You become Invisible, Move once, and immediately re-attempt the Triggering Check, but you cannot Critically Succeed by any means.

This effect ends when you take another Action with the Attack, Move, or Manipulate Traits.

Special: You can use this Reaction as an Action to Hide during your Turn, even without sufficient Cover from Hostile Creatures. Doing so allows you to roll Stealth immediately, though you have Disadvantage if you would be detected by a Creature's Precise Sense.

Illusionist: Living Illusion

Traits: Utility, Improvement

Prerequisite: Lifelike

Your Illusions now behave sensibly, without requiring any Actions from you. However, your GM might quiz you on up to 3 behaviors or have you narrate the Illusion, allowing a Target to disbelieve it if you aren't accurate enough.

An Illusion created this way ceases to function if it takes Damage, though it remembers information just fine.

Illusionist: Question Reality

Traits: Blast, Magical, Saving Throw

Prerequisite: 5th Level

10 Actions: 5 Scholar Points

Range: 30 feet

Duration: 1 Month

One Creature of your choice within Range must make an Intelligence Saving Throw against your Intelligence Modifier:

- **Failure:** They witness any Illusion of your choice as if it were a Spell you had cast, which lasts for the Duration.
- **Success:** No effect.

While under this Illusion, a Creature cannot detect or Target Creatures of your choice for anything while they believe the Illusion.

This effect cannot end early until you are Incapacitated or it is Dispelled. This effect also fools Truesight.

Necromancer

Dark people wearing dark robes in dark graveyards, reciting dark rituals to raise a dark army. At least that's what everybody thinks of Necromancers. Most of the time, they're hobbyists trying to bring back a loved one, or using undead to do the work nobody else wants to.

Bonus Proficiencies: Religion, Occultism

Bonus Spells (Always Prepared): Command Undead, Summon Undead, Necrotic Eruption, Speak with Dead, Impair, Harm

Innate Feats:

Aura of Undeath

Traits: Utility, Movement

Undead cannot Target you with any effect with the Damage, Debuff, or Attack Traits, unless you do so to them first. Under these conditions, you may also pass through their space as if it were unoccupied.

Necromantic Adept

Traits: Edge, Actions, Improvement

Your Necromancy Spells have their Action Cost reduced by their Tier, to a minimum of 1.

Necromancer: Ghost Whisperer

Traits: Utility, Audible, Information, Magical, Visual

Free Action: 1 Scholar Point

Duration: 10 Minutes

For the Duration, you see the souls of Creatures that have either died to the Actions of a Creature you can see, or that was emotionally attached to a Creature you can see, when they died.

You can speak with these souls, who can only tell you information up to the point at which they died, or that they would have logically observed while following the Creature you see.

This may also allow you to see a Creature's soul regardless of the Ethereal Condition if it is temporarily separated from their body, such as with the Haunting Flask Spell.

Necromancer: Reaper's Veil

Traits: Utility, Information, Magical

You are aware of the presence and general direction of all Undead within 5 miles of you (but not their distance or location), and can determine if they are Mindless or not.

You can determine their exact location if they are within 100 feet of you as if you observed them with a Precise Sense. This ignores any Protection from Divination Magic.

Necromancer: Shielded from Death

Traits: Edge, Advantage, Improvement

You have Advantage on Death Saving Throws.

If you would normally die instantly, vanish in mist or be otherwise unable to roll Death Saves (e.g. Lichdom), this Feat instead allows you to make Death Saving Throws.

If you fail all 3 Death Saves, the original effect takes place.

Necromancer: Command the Horde

Traits: Blast, Saving Throw

Prerequisite: 5th Level

20 Actions: X Scholar Points

Range: 1 Mile

All Undead in Range with X Hit Dice or less must make a Charisma Saving Throw against your Spell Save DC:

- **Failure:** All affected Creatures must follow the command you issue as part of this Action, until they are commanded otherwise.
- **Success:** No effect.

Undead that are Larger or Smaller than you are treated as if they have twice as many or less Hit Dice per Size Category, much like Summoning.

Necromancer: Snare the Soul

Traits: Blast, Magical, Spellcasting

Prerequisite: 5th Level

10 Actions: 5 Scholar Points

You replicate the effects of the Revivify Spell without expending Spell Slots, or Material Components.

If you provide the Material Component (or suitable replacement), you can Resurrect a Creature that has been dead for up to 1 week, assuming they're willing.

Transmuter

Often regarded as the greediest of all wizards, Transmuters pursue the art of converting materials through magic, and shaping the world around them with an incantation. While some have a habit of converting materials on a whim, a Transmuter is handy to have around if you need some unique materials.

Bonus Proficiencies: Acrobatics, Athletics

Bonus Spells (Always Prepared): Mending, Alter Object, Body Alteration, Fabricate, Polymorph, Embrittle

Innate Feats:

Lesser Alchemy

Traits: Burn, Concentration, Transformation

1 Minute: 1 Scholar Point

You can convert one Non-Magical Object into another Non-Magical Object of lesser or equal value, for as long as you Concentrate.

The resulting Item cannot occupy a larger space than the original Item, unless it unfolds to a greater Size, and you must understand any mechanisms required for the object's function (e.g. the inner workings of a lock).

Any Object that would intersect with another or not have enough room (e.g. a boulder in a Creature's mouth) is shunted to the nearest unoccupied space, taking 1d6 Force Damage for every space moved, and inflicting 1d6 to any Creature or Object in the way for each Space they occupy.

Tip: This is a good point of reference for any such effect.

Transmutation Adept

Traits: Edge, Actions, Improvement

Your Transmutation Spells have their Action Cost reduced by their Tier, to a minimum of 1.

Transmuter: Greater Alchemy

Traits: Utility, Improvement

When you use Lesser Alchemy, you can also convert Objects into other Objects that are of greater Size and value, though you can only do this between materials that would fall under the same vague category (e.g. Copper to Gold, Parchment to Paper, etc.).

This effect lasts up to 24 Hours after Concentration is lost or when you use Lesser Alchemy again on the same Object. However, the Object can revert sooner at any time you choose, even if you are dead.

Tip: If you need to quickly adjust a price, divide by the current material's price and multiply by the new material's price. But do try to calculate this for the GM, and beware of angry merchants.

Transmuter: Shape Weakness

Traits: Edge, Improvement, Resistance, Vulnerability

Any Target under the effects of a Transmutation Spell or Transformation effect applied by you, also has one Resistance or Vulnerability of your choice increased or decreased by your Proficiency Bonus.

Transmuter: Transmuter's Stone

Traits: Burn, Improvement, Item, Magical, Short Rest, Special, Spellcasting

You gain a Transmuter's Stone that can be used by any Creature to do one of the following as part of an Interact Action:

- Cast any Transmutation or Spell (up to 5th Tier) from any Spell List you have access to (even if not Prepared), without expending a Spell Slot (still costs Actions, and requires a Check for Tiers you don't have access to).
- Reduce a Creature's Age by 1 week.
- Convert one incoming Damage Type of your choice that isn't Physical (Bludgeoning, Piercing and Slashing are okay), to a different Damage Type of your choice for the next 8 Hours.

Once used, the Transmuter's Stone breaks, but can be remade over the course of a Short or Long Rest. You can only have a number of unbroken Transmuter's Stones equal to your Proficiency Bonus, breaking any existing Transmuter's Stone if you try to make another.

Special: If you take the Wizard Subclass for a different School of Magic, you can use the Transmuter's Stone to cast Spells of those Schools as if they were Transmutation Spells, or vice versa.

Transmuter: Unstable Earth

Traits: Edge, Terrain

Creatures of your choice treat all Terrain within 10 feet of you as Difficult Terrain.

You can take this Feat any number of times, extending this area by 15 feet.

Transmuter: Monstrous Transformation

Traits: Blast, Improvement, Temporary Healing, Transformation

Prerequisite: 5th Level

10 Actions: X Scholar Points

Duration: 10 Minutes

You Transform into a monstrous version of yourself that has Xd6 Temporary Hit Points, a 2 Action Light Natural Melee Weapon that deals 1d8 Damage of your choice, and treats your Strength and Dexterity as if they were equal to your Intelligence.

Alternatively, you may replace the Natural Melee Weapon with any Non-Magical Action or Ability from any Monster you've seen or studied.

General

General Feats can only be taken through a General Feat, or Utility Feat if the Feat has the Utility Trait. However, these Feats often come with simple, but effective benefits that should be available to all Classes, but are a bit strong to be granted every Level.

Ability Score Increase

Traits: Edge, Improvement

Increase any of your Ability Scores by a total of 2 (up to a default maximum of 20), or increase the limit of an Ability Score by 2 (up to a secondary maximum of 30).

You can take this feat any number of times.

Always Ready

Traits: Utility, Disadvantage, Initiative

Pick any Skill or Tool Proficiency of your choice. When you roll Initiative, you can take Disadvantage on the d20 Test to use the chosen Proficiency when it wasn't called for.

If you were Surprised, you don't suffer any penalty.

Archetype

Traits: Edge, Feat

Pick any Class for which you have a 14 or higher in at least one Ability Score, and fulfill all Archetype Prerequisites (if any).

You gain all the Signature Abilities for that Class, as well as one Skill, Weapon, or Armor Proficiency from that Class. Additionally, you can choose whether to use the Class Initiative Modifier from your Class, or from any Archetype you have.

If your Archetype uses multiple Ability Scores, you can only use one of those scores, even if it normally adds them together.

You cannot take Feats from your Archetype if they have a Level Prerequisite.

You can take this Feat multiple times, choosing a different Archetype each time.

Boundless Capability

Traits: Edge, Improvement

Double the Maximum Class Resources you can have at a time (Technique, Rage, Divine Intervention, Pact, etc.).

This doesn't apply to Class Resources from Archetypes.

Clever Implementation

Traits: Utility, Improvement

Pick one Skill or Tool you are Proficient in. You use Intelligence instead of whatever Ability Score would normally be used.

Alternatively, you can instead pick either Performance or Intimidation to use Dexterity or Strength, Stealth or Perception to use Charisma, and Survival or Persuasion to use Wisdom.

Your GM may allow another combo that isn't listed including Weapons, provided you can explain how you make it work.

You can take this Feat any number of times, picking a different skill/score combo.

Convenience Shopper

Traits: Utility, Money

When you visit a shop, you may record any Items available, how many are in stock, and their prices.

At any time afterwards, you may purchase any items from that list by informing the GM. However, such purchases cannot be retracted.

If you visit a new shop, you can choose to record a new collection of items, or keep your old collection. You may only have one list of recorded items at a time, and it is not recommended to change the list every time you visit a shop.

As with everything else, some GMs may decide to have you track how much money you have during the visit, allow you to purchase from any shop in the same town, or purchase from any shop you have visited at least once, based on what you know they have in stock.

Craft Magic Item

Traits: Edge, Craft, Downtime, Drained

The next time you Craft a Magical Item that isn't Consumable or apply an Enchantment, you may choose to do so in 1 Hour without expending any materials, requiring the corresponding Facility, or making an Ability Check.

If it is Consumable, you gain the ability to Craft a single copy of that Item once each day, becoming Drained equal to a roll on your Hit Die (excluding Constitution), instead of spending materials.

In order to Craft a Magic Item this way, you must have Successfully Crafted one Item of the Rarity before it, whether through this Feature, or actual Crafting. You cannot craft Artifacts this way.

Items you Craft this way must be of the Variant and Rarity you originally selected.

You can take this Feat any number of times, benefitting a different Item each time.

Detect Magic

Traits: Utility, Information, Sense

You can see radiant auras around Objects or Creatures that are Magical, or impacted by magic, as if they were perfectly illuminated by Dim Light. Otherwise, you detect the aura if the Object or Creature is within the limits of any Precise Sense you have.

Also, you can always tell if a Creature you can see casts a Spell, even if they bypass all components that can be sensed.

Elemental Specialist

Traits: Edge, Actions, Improvement

Choose a Damage Type except Bludgeoning, Physical, Piercing, and Slashing. All Actions that have, or are affected by the corresponding Trait cost 1 less Action Point (Minimum of 1).

You can take this Feat any number of times, picking a different Damage Type, or further improving the cost reduction.

Greater Concentration

Traits: Edge, Improvement

You can Concentrate on one additional effect before suffering the Action penalty at the Start of your Turn, and reduce the Action Penalty from Concentration by 1 (Minimum of 1).

You can take this Feat multiple Times.

Honed Instincts

Traits: Edge, Proficiency

You become Proficient in one Saving Throw of your Choice.

Improved Multi-Attack

Traits: Edge, Improvement

You can take the Attack Action one additional time with each appendage (or Weapon), and cast one more Spell on your Turn.

This Feat can be taken any number of times.

Improviser

Traits: Utility, Improvement, Item, Proficiency

You can treat any Object you're holding as if it was a Weapon you're proficient in, based on its Size and Weight in comparison to similar Weapons.

The following table recommends the Action cost, and Damage dice used by the Weapon. Some Objects like Pillows deal more or less Damage for obvious reasons, though they still count as Attacks:

2 Actions: 1d4

3 Actions: 1d6

4 Actions: 1d8 (Versatile d10)

5 Actions: 1d12 (Heavy, Two-Handed)

Furthermore, when you Hit with an Improvised Weapon Attack, the Target has Disadvantage on their next Attack Roll. You also treat all Weapons as if they have the Thrown 20/60 ft. Trait.

Last Shot

Traits: Blast, Auto-Crit, Auto-Success

After you take this Feat, you can choose to Critically Succeed on any d20 Test, which you announce in place of the roll. In addition, you choose the exact value of any corresponding dice or random outcomes as long as they are within the original range, such as making a Saving Throw deal minimal Damage for all other Creatures, or maximizing the Damage of an Attack Roll.

Once you use this Feat, you cannot do so again until you spend 2 GM Inspiration to recharge it, the GM says otherwise, or if a natural 1 or 20 was rolled on a d20 Test in favor of any Creature that opposes you. In the last case, your benefitting roll must happen after the Triggering one, or on the following Turn.

A recommendation for a refund, is as a reward for completing a major Character Arc, training with a legendary hero, or even just during a particularly dramatic moment.

Overdrive

Traits: Burn, Drained, Recovery, Special

Free Action:

You regain any number of Class Resources, becoming Drained equal to your Hit Die average (not including Constitution) for each Resource gained in this way.

You can also regain Action Points this way, becoming Drained 1 for each.

Special: This ignores Immunity to the Drained Condition.

Reminder: When you become Drained, you lose any Hit Points above the new maximum.

Swift

Traits: Edge, Actions, Movement

Your Movement Speed increases by 5 feet, which applies you your Action Limit.

You can take this Feat any number of times.

Tough

Traits: Edge, Improvement

Your Hit Point Maximum increases by an additional 2 points for each Level.

You can take this Feat any number of times.

Acrobat

Traits: Burn, Auto-Success, Move, Movement

Prerequisite: Proficiency in Acrobatics

3 Actions:

Until the End of your Turn, you treat your Walking Speed as a Climbing Speed. If you don't end your Movement on any Terrain that can support you, you fall.

Additionally, your Movement during this time ignores all Creatures and Terrain, you automatically Succeed on Acrobatics Checks to balance and orient yourself, and you have a +5 Bonus to Acrobatics Checks to reduce or avoid Fall Damage.

You can also use the Step Action to Stand Up if you are Prone.

Alert

Traits: Utility, Advantage, Initiative

Prerequisite: Proficiency in Perception

You cannot be Surprised in Combat, even if you cannot detect any Ambushing Creatures, and have Advantage on Initiative Checks.

Bait and Switch

Traits: Burn, Ability Check, Item, Manipulate

Prerequisite: Proficiency in Thievery

5 Actions:

Range: Touch

You replace the Target Object with another Object of similar Size, provided you aren't detected. If the Target Object is being held, make a Thievery Check against the Target's Strength Score, or Wisdom if it isn't held, but you are detected:

- **Success:** You Successfully replace the Target Object without being Detected.
- **Failure:** No effect.

The GM determines the DC for Traps, using values like 10 for Objects sitting on simple Pressure Plates.

Beast Rider

Traits: Utility, Auto-Success, Nullify

Prerequisite: Proficiency in Nurture

While you are Mounted on a Creature that hasn't been tamed or is Hostile to you, they can't attempt to throw you off or Target you with any Attack Roll. Additionally, you can choose to have them take one Action of your Choice immediately before or after yours (still costs them Actions).

While Mounted on a Creature that has been tamed, you don't need to roll Acrobatics to stay Mounted while in an unusual position unless pushed (e.g. balancing on a Dragon's back), and can force them to take an additional Turn immediately before or after yours (no extra Actions, but does reset Limits).

A Creature is considered tamed if they are friendly towards you, and trust you, or if they are Charmed by you, and not currently exposed to any circumstance that would allow them to contest the Charm.

Brutalize

Traits: Edge, Ability Check, Frightened

Prerequisite: Proficiency in Intimidation

Free Action:

Trigger: You reduce a Creature to 0 Hit Points, you Critically Hit a Creature, or when the GM feels you have done something sufficiently intimidating.

Make an Intimidation Check against the Charisma Scores of each Creature that can see or hear you:

- **Critical Success:** Same as Success, but Creatures that are already Frightened have their Frightened Condition increased by the same amount.
- **Success:** The Target becomes Frightened 1 of you.
- **Failure:** No effect

Crafter

Traits: Utility, Craft, Downtime, Money, Tool

Prerequisite: Proficiency in any Artisan's Tool

Pick one Non-Magical Item, Vehicle, Addon or Facility that has a Complexity that is lower than your Intelligence Score, or that you already know how to Craft, and requires any Artisan's Tool you are Proficient in.

You can Craft the Item as if it were Primitive, provided you have the Tools to do so. If it has alternate versions that only change one detail, or the material it is Crafted with, you can make those alternate versions the same way.

If the Item you Craft has a Gold Value that exceeds your Level, you must spend a number of downtime Hours equal to the value divided by your Level, rounded up.

You can take this Feat any number of times, adding another Item to this list.

Deal Maker

Traits: Utility

Prerequisite: Proficiency in Religion

Whenever you strike a deal or contract with any Creature that isn't Mindless, you can choose to bind both you and the Target to the terms and conditions as agreed at the time of making the deal.

Should you or the Target knowingly violate the terms of the deal at any time, this fact immediately becomes known to the other, and the Creature at fault cannot benefit from any kind of Rest until the deal is ended. Your GM may allow you to invoke an alternative punishment, which must apply to both Creatures under terms of violation.

The deal cannot be changed after it has been struck, must be possible for both parties to fulfill, and cannot be built on a lie (such as whether one party can fulfill their end or not).

The deal can be dismissed by both Creatures if they are in agreement (even if they don't realize they are in agreement, and are on separate Planes of Existence).

If no Duration or such Condition is set, penalties for not completing the deal occur when one Creature decides to collect their reward after at least one week, and the other cannot fulfill their part, or refuses to fulfill it.

The number of incomplete deals initiated by you cannot exceed your Charisma Modifier (minimum of 1). A deal is considered complete if your end is fulfilled and delivered, even if the other Creature hasn't performed their end of it.

It is possible to become a Warlock's Patron through this Feat, though you don't gain any benefits other than what the GM grants in addition to flavor, and it counts as an incomplete deal until the Warlock in question gains what they wanted, or breaks the Pact.

GM Tip: If you want to grant an incentive for Players wanting to be Warlock Patrons, you could grant a Feat like Magically Gifted (pg. 131) or give them a single Spell Slot for each completed Pact, as a way to show their growing power. Just be wary of exploitation.

Distract

Traits: Burn, Ability Check, Audible/Visual, Debuff

Prerequisite: Proficiency in Performance

5 Actions:

Target: Any number of Creatures that can See or Hear you.

Make a Performance Check against the Target's Charisma Score:

- **Success:** Save the result. Until the End of your next Turn, one Ability Check or Attack Roll against one of the Targets (or more for multi-Target effects) has its result replaced with your result.
- **Failure:** No effect.

While Debuffed in this way, affected Targets can't take Reactions, and don't take their Turn until after they are Targeted by any other Action, or this Debuff ends.

Expertise

Traits: Utility, Improvement, Proficiency

Prerequisite: Proficiency in at least 1 Skill or Tool.

Pick a Skill or Tool you are Proficient in. You add your Proficiency Bonus twice instead of once to the selected Proficiency.

You can take this Feat any number of times, picking a different Proficiency each time.

Fond Farewell

Traits: Utility

Prerequisite: You must have approval from either the GM, or a majority of other Players.

You retire from Adventuring, and can no longer use this Character in this Campaign (unless the GM says otherwise) as the GM gains full control of them. This Character may continue to aid you and your Party in the background, with GM discretion to all functionality. And if they die, they are unwilling to return to life.

When you roll a new Character to replace this one (in the Campaign it was used in), you can choose to gain a single Feat that this Character has, ignoring Level Prerequisites. Additionally, your new Character may be of any Level you choose, provided it's lower than your current Level (your GM can overrule this of course).

If you do not wish to retire your Character immediately (e.g. you want a chance to finish their story properly, set up a grand sendoff, or you simply expect to die soon and want to be ready), you may forego the immediate benefits, in order to apply them when it would be more appropriate.

Healer's Instinct

Traits: Utility, Information, Visual

Prerequisite: Proficiency in Medicine

When a Creature rolls Death Saving Throws, you know how many they've failed, provided you can see them.

Additionally, Once on your Turn, you may pick any Creature, except Boss Monsters. That Creature must tell you how many Hit Points they have, rounded to the nearest 10.

Improved Archetype

Traits: Edge, Improvement

Prerequisite: Archetype, 5th Level

Pick one class you have selected for the Archetype Feat. You can take any Feats from that Archetype as if you were Level 5. This change also applies to the Maximum amount of Class Resources you can have from that Class.

You can take this Feat any number of times, picking a different Class each time.

You can also pick the same Class when taking this Feat again, increasing to the next multiple of 5 (e.g. 10, 15 and 20). However, these values must be less than, or equal to your Level.

Infiltrator

Traits: Utility, Ability Check

Prerequisite: Proficiency in Stealth

You can attempt to Hide in a Creature's Precise Sense, provided you don't take any Action other than the Step or Move Actions on the Turn you start Hiding.

While Hidden in this way, you can reduce the result of your Stealth Check by 5 to reduce all DCs to conceal your presence, or the presence of another Creature by the same amount until revealed.

Finally, Interacting with an Object doesn't force you to re-roll Stealth, even if it would normally produce a noteworthy amount of noise (e.g. opening a chest, picking a lock, activating a secret door, etc.).

Reminder: Hiding happens automatically at the End of your Turn (pg. 117).

Keen Mind

Traits: Utility, Information

Prerequisite: Intelligence of 13 or Higher

Whenever you make, or observe a Creature that makes a Saving Throw or Ability Check, you may declare your intention to learn one of the following before the attempt is made:

- The consequences of a specific result, such as a Critical Success, or a Failure.
- The approximate DC of the Saving Throw or Ability Check (rounded to the nearest 5).

You can't observe Ability Checks or Saving Throws with the Mental Trait, unless you have Detect Magic (if the effect is Magical), Truesight, or Telepathy.

Lycanthropic Mastery

Traits: Edge, Choice, Improvement

Prerequisite: Lycanthrope (Bleed)

You may pick one of the following benefits:

- As a Free Action, you can switch between Hybrid and Humanoid Form, Ending your Turn. Switching to Humanoid Form requires you to pass a DC 20 Charisma Saving Throw if you would be forced to Attack.
- While in Hybrid Form, you aren't forced to Attack (but may still do so), can speak normally, and can use Actions that are normally inhibited by Hybrid Form, even for the free Attack.
- You gain the benefits of Hybrid Form even when in Humanoid form, except any Actions and Movement Speeds, and you can choose not to inflict Lycanthropy on a Creature you Hit with a Natural Weapon.
- Your Resistance to Non-Silvered Bludgeoning, Piercing, and Slashing increases to equal your Level if it's higher. Also, while in Hybrid Form, you can Dash as a Free Action.

You can take this Feat multiple times, picking a different effect each time.

Master of Disguise

Traits: Utility, Ability Check

Prerequisite: Proficiency in Deception

When you attempt to conceal your identity or dismiss information about you, you can make a Deception Check against the Wisdom Score or Society Check (if rolled) of any Creatures that are trying to discern the truth from you.

- **Critical Success:** Same as Success, but all Society Checks they make against you can only reveal details or information of your choice for the next 24 Hours, regardless of Success or Failure.
- **Success:** The Target only notices details you choose for them to notice, and cannot attempt to discern any lie by you until you attempt to harm them.
- **Failure:** The Target notices one detail you choose for them to notice, but they can still attempt to discern lies you tell, and cannot be hampered by this Feat for the next Minute.
- **Critical Failure:** The Target knows you are concealing your identity, or information about yourself. This may also reveal some information about you, if they know you, or have clues. Furthermore, they are Immune to your use of this Feat for 24 Hours.

If used against a Player Character (Ask if it's okay with the group first, please), you only reveal your result to the opposition on a Critical Failure, or if another effect reveals the DC.

Mental Awareness

Traits: Edge, Advantage, Disadvantage, Improvement

Prerequisite: Proficiency in Occultism

Any Action with the Mental Trait has Disadvantage on d20 Tests against you, or gives you Advantage on d20 Tests to contest it.

While you are under any effect with the Mental Trait, you can Target the source with Mental or Magical Actions regardless of Range.

Paragon

Traits: Edge, Improvement

Prerequisite: 17th Level

One Ability Score of your choice is increased to its maximum possible value. This includes when the maximum is increased, but doesn't override the Impaired Condition.

You can take this Feat any number of times, choosing a different Ability Score. You cannot retrain this Feat by any means.

Party Crasher

Traits: Blast, Advantage, Disadvantage

Prerequisite: 5th Level

Free Action:

When you make an Ability Check or Attack Roll, you can call a number, then someone rolls a d20 with you, and compare (ignoring Advantage or Disadvantage).

If either d20 matches the called number, or the difference between the rolls is equal to the called number, you take the highest result and increase the Degree of Success by 1. Otherwise, you take the lowest result, and reduce the Degree of Success by 1.

You only add Bonuses after the result is finalized.

Tactical Analysis

Traits: Utility, Initiative, Reactions

Prerequisites: Proficiency in Society

When you Roll Initiative, you can choose to take your Turn for that Round immediately after the Initiating Creature, even if another effect would normally prevent you from doing so.

If you choose not to, you can take Reactions this Round as if your Initiative were higher than all other Creatures, as long as it isn't 0 or less.

When multiple Creatures use this Feat, highest Initiative goes before the other, unless they agree otherwise.

Taunt

Traits: Edge, Audible, Auto-Hit, Auto-Crit, Buff, Debuff

Prerequisite: Proficiency in Persuasion

5 Actions:

Target: One Creature that can See or Hear you.

Duration: 1 Minute

Make a Persuasion Check against the Target's Charisma Score:

- **Critical Success:** The Target cannot willingly Attack any other Creature for the Duration, or until it inflicts Damage to you.
- **Success:** The Target has Disadvantage on Attack Rolls against Creatures other than you for the Duration, or until they Successfully Hit you.
- **Failure:** No effect.
- **Critical Failure:** Same as Success, but their next Attack against you is guaranteed to be a Critical Hit.

Trick Magic Item

Traits: Utility, Advantage, Item, Special

Requirement: Proficiency in Arcana

You can Attune to, and use any Magic Item, without meeting any Restrictions or Prerequisites. Furthermore, you have Advantage on all d20 Tests required to use a Magical Item, such as the Spellcasting Check for Spell Scrolls of a Tier you don't have access to (see pg. 55).

This Feat doesn't allow you to learn Spells that aren't part of your Spell List. However, you treat Class Resources, Actions and Spell Slots you don't have access to, as if they can be used once per Long Rest.

Special: If you have a way to replace a Class Resource such as Bardic Inspiration, you may use that to replace any required Class Resources. You can also take the Drained Condition to replace Spell Slots in Magic Items, as if you had the Spellcasting Feature (pg. 55).

Wilderness Traveler

Traits: Utility, Rest, Travel

Prerequisite: Proficiency in Survival

While Traveling, you can choose to either construct a temporary shelter against all Weather for, procure and properly cook enough food for, or improve the Quality of a Full Rest by 1 (assuming it's already 1 or higher) for a number of Creatures equal to your Survival Modifier.

If you gain any of these benefits, you roll an additional Wilderness Encounter. Food and Shelter from this Feat contribute to Full Rests, and Food lasts up to 2 weeks before spoiling.

Additionally, you regain 1 additional Hit Die whenever you gain the benefits of a Long Rest, even if it isn't a Full Rest.

Wrestler

Traits: Edge, Advantage, Concentration, Debuff, Grapple, Improvement, Unconscious

Prerequisite: Proficiency in Athletics

When you Hit a Creature with an Unarmed Strike, Natural Weapon or Improvised Weapon, you have Advantage on your next attempt to Overpower them.

While you have a Creature Grappled, you can Overpower them a second time to Restrain them as long as you maintain Concentration, and the Grapple. While Restraining a Creature in this way, you cannot Attack any Creature other than your Grappled Target, unless your Grappled Target is Prone.

While Restrained this way, a Creature cannot perform Verbal Components, is considered to be Concentrating on this effect even if they would lose Concentration, and makes Concentration Checks at the Start of each of their Turns, using Constitution instead of Wisdom.

When you break a Grapple or the Restrained Condition, you can attempt to Grapple any Creature in your Reach as part of the same Action.

Afflictions

While Diseases aren't a central focus of Mages & Mansions, they do play a significant role in presenting long-term health problems for those that fail to tend their wounds, or bring medical supplies, usually encouraging PCs to return to town and rest on occasion.

Something important about Afflictions, is that when they apply Conditions, those Conditions cannot be reduced by Resting while any Affliction that applies them remains, unless otherwise stated.

When an Affliction is ended, any Condition that was inflicted by the Affliction isn't ended, unless it has no inherent end condition, such as Exhaustion, Drained and Slowed needing Full Rests to decay.

And for those that forgot which was which, Conditions are on pg. 80.

Any Affliction which has been cured cannot be contracted again until after you finish another Long Rest. And to help keep things moving, only roll to contract one Affliction per character, per Rest.

And finally, Creatures that apply an Affliction directly will usually list that Affliction on their statblock.

Arcanist's Blight

Traits: Disease, Anti-Magic, Drained, Magical, Poisoned, Special

Source: Failed Magical Experiments, consuming multiple Potions at a time, direct contact with Infected Objects or Creatures, Resting in Twisted Lands (Inhaled).

Special: Can infect Constructs and Undead.

DC: 13

Effect: The Target is Poisoned as long as the Affliction remains, which also inhibits Magical sources of Healing.

When the Target is either subjected to, or uses any effect that has the Magical Trait but not the Anti-Magic Trait, or completes a Long Rest, they must make a Constitution Saving Throw:

- **Critical Success (Full Rest Only):** The DC to Save against this Disease decreases by 1 until either the next Failure, or the Affliction ends.
- **Success:** The DC to save against this Disease increases by 1 until the next Failure (this persists until your next Full Rest if you aren't already Afflicted).
- **Failure:** The Target becomes Drained 1.

If you are under the effects of Anti-Magic for at least 1 Hour between Saving Throws, your Degree of Success is increased by 1.

Starting your Turn under any effect with the Magical is considered being subjected to it.

End Condition: You gain the benefits of the Restoration Spell while under the effects of Anti-Magic, or the DC is reduced to 0. Incense can also end the Affliction if it ends the Drained Condition.

Dementia

Traits: Disease, Impaired, Mental

Source: Old age, Various cursed items.

DC: 12

Effect: At the End of each Day, the Target must make a Constitution Saving Throw:

- **Success:** No effect.
- **Failure:** The Target Impaired Intelligence, Wisdom or Charisma 1 (Whichever is still highest).

End Condition: The effect causing this one ends.

Infection

Traits: Disease, Exhaustion, Slowed

Source: Piercing or Slashing Damage from dirty Weapons or other unsanitary attacks, or when taking either a Short or Long Rest while Bloodied.

DC: 11

Effect: The Target makes a Constitution Saving Throw at the end of each Long Rest:

- **Critical Success:** The Affliction ends.
- **Success:** The Conditions decrease as if the Target didn't have the Affliction, unless they are still Bloodied or took a Half Rest. If they Succeed 3 times, the Affliction ends, even if they're Bloodied.
- **Failure:** The Target gains Exhaustion 1, and Slowed 1.

End Condition: The Target Critically Succeeds once, Succeeds three times, or both the Exhaustion and Slowed Conditions reach 0.

Tip: You can decrease Exhaustion by expending Hit Dice (pg. 82).

Infernal Fever

Traits: Disease, Damage, Drained, Fire, Vulnerable

Source: Taking Damage from a Fiend, Long Resting in Diablo.

DC: 13

Effect: The Target becomes Drained 1.

While Drained in this way, the Target is Vulnerable X to Fire Damage, where X is the Drained Condition. If the Fire Damage is from a Fiend or this Affliction, the Damage from Vulnerability ignores Immunity and Resistance.

When the Target finishes a Long Rest, they must reattempt the Saving Throw:

- **Critical Success:** If rolled 5 times, the Affliction ends.
- **Success:** No Change (Auto-rolled on a Full Rest).
- **Failure:** The Target becomes Drained 1.
- **Critical Failure:** The Target also takes Fire Damage equal to their Fire Vulnerability.

A Creature that dies while under the effects of Infernal Fever cannot be resurrected until their soul is retrieved from Diablo.

Fiends are Immune to this Affliction.

End Condition: A single use of Holy Water reduces the Drained Condition by the Radiant Damage that would be dealt, and the Affliction ends when the Drained Condition reaches 0, or after 5 Critical Successes are rolled.

Petrification

Traits: Incapacitated, Restrained, Transformation

Source: Basilisk, Certain Magic

DC: 20

Effect: The Target is Restrained, and Incapacitated. Their weight is also doubled (if tracked), and they take half Damage from all sources except Thunder. Additionally, they are Immune to any Damage types that don't affect stone (or the Material they were converted into if not stone).

Mending can be used to restore lost Hit Points, provided the pieces are present. Targets are also considered Dead for the purposes of all Magic.

End Condition: The Condition can be ended by the application of Basilisk Saliva, unless a different method is specified. A Successful Restoration Spell against the DC, also ends the Affliction.

If the Creature is Resurrected through any means that can create a new body, the Statue disintegrates. Any Damage that isn't repaired before a Creature is cured reflects on their state afterward, leaving such limbs Missing until granted through other means.

Shade Fever

Traits: Disease, Impaired

Source: Shadow Creatures, Resting without Light in the Shadow Lands.

DC: 15

Effect: The Target makes a Constitution Saving Throw at the end of each Long Rest:

- **Success:** No effect.
- **Failure:** The Target gains Impaired Constitution 1.

A Creature that dies to this Affliction rises as any Undead with an equal or lesser amount of Hit Dice (increased to equal, if less), and can't be Resurrected until the Undead is killed.

End Condition: Cannot be removed, except through a Holy Action, the Wish Spell, or a cure concocted from Shadow Aloe, which grows in warm climates near graveyards.

Items

While items aren't needed, they play important roles in the early days of adventuring, and even have some continued utility once you get into cosmic threats.

Another purpose that Items play, is establishing what kind of world you're playing in. Because the biggest difference between a Sci-Fi sky city above an acid planet, and a Fantasy sky city above an acid pit, is that one uses technology that just requires materials, and the other requires magic, which often needs Spellcasters to support it.

But since not all GMs will want to use Sci-Fi or even Modern Items, please talk to them about the setting before adding them to your Character. Even Bombs or Firearms can be a bit much for some settings.

Also, the values assume how much a standard merchant will sell them for, so feel free to correct any values based on in-game factors, such as lack of materials, ease of production, legal restriction, and so on.

Who knows? Maybe that's your next adventure right there! Seriously, I know this isn't the best place to state this, but if you're struggling for ideas, look around this book for a while. It's amazing how many you can find.

Important Traits

Because of the design of various Items, it's important to understand that not all Weapons are designed the same way. Of course there are major outliers that use the Special Trait, but it's still good to know if a Weapon is Finesse or not.

- **Balanced:** This Weapon has its Damage Die halved (rounded down, minimum of d4), but rolls twice as many.
- **Brace:** While Wielding this Weapon, you can Attack any Creature that enters your Reach for 1 Reaction (treated as Attack of Opportunity).
- **Finesse:** This Weapon may use Dexterity for Damage Rolls instead of Strength.
- **Light:** When used to make an Attack Roll that doesn't currently benefit from this reduction, the next Light Weapon you use that isn't this one costs 1 less Action to use.
 - Creatures that are one Size smaller can use Light Weapons as if they were designed for their Size, in exchange for the benefits of the Light Trait.
- **Misfire X:** When you roll X or lower on the d20 for an Attack Roll with this Weapon, you don't expend ammunition, but must immediately Reload it if it has the Loaded Property. Otherwise, you waste the Actions used.
- **Primitive:** This Item can be Crafted over the Course of a Short Rest by any Creature without spending materials (provided they are available in the area) or providing Tools. Primitive Ammunition doesn't need to be explicitly Crafted in this way if you have the corresponding container.
- **Range X/Y:** This Weapon uses Ammunition to make Ranged Attack Rolls within the Range of X. Attack Rolls within the Range of Y, or while you are in the Reach of a Non-Incapacitated Hostile Creature are made at Disadvantage.

Note: This Range assumes how far a projectile will fly before taking multiple Rounds to Hit.

 - **Thrown X/Y:** The Weapon itself is used as Ammunition, and has a Melee Attack. Doesn't require Range.
 - **Point-Blank:** You don't have Disadvantage from Weapon Traits when the Target is within your Reach.

...

- **Reach (+X):** This Weapon adds 5 feet or X to your reach, but only for Attacks using this Weapon. Attacks against a Creature within 5 or X feet of you are made at Disadvantage.
- **Recoil:** When you Attack with this Weapon, your next Ranged Attack this Turn is made at Disadvantage, unless you take the Interact Action to negate this penalty.
 - This Also applies to Saving Throws from Weapons like the Shotgun, except the Targets gain Advantage on the Saving Throw.
- **Reload X:** You can't Attack with this Weapon until you spend X Actions to Load it as an Interact Action, which requires your off-hand to have ammunition. While Loaded in this way, it requires Concentration and both hands to keep loaded. You can Reload as part of an Attack, spending extra Actions to do so.
 - **Loaded X:** Keeping this Weapon loaded doesn't require Concentration, or either of your Hands. Additionally, you can make X Attack Rolls before you need to Reload.
 - **Fling X:** Any Objects smaller than X can be used as ammunition, and Trigger any effects that would require it to be Thrown.
- **Strength X:** If your Strength Score is less than X, you either cannot Attack with this Weapon, Reload it if it's Ranged, or Attack with it more than once if it has Recoil.
 - If it's Armor, your Movement Speed and Action Limit are both halved while wearing it.
- **Two-Handed:** If you use only one Hand to Attack with this Weapon, you make the Attack at Disadvantage. Otherwise, it counts against both limbs.
 - **Heavy:** Creatures that are one Size smaller than Medium (or the corresponding Size), make Attack Rolls at Disadvantage while using this.
- **Versatile (dX):** You can treat this Weapon as if it had the Two-Handed property, rolling dXs for Damage, instead of the original Damage Die.
 - The dX scales with all effects that adjust Damage Dice.

Materials and Tools

Each Item is made of various kinds of materials, categorized as the following based on what kinds of Items they're used in:

- Dye
- Earth
- Fabric
- Gem
- Herb (or Food)
- Metal
- Mineral
- Wood

It is a bit unusual, but it should help keep a balance of simplicity and flexibility when Crafting Items. And if you don't think this works, feel free to change it.

The Following is a list of Materials, as well as their prices and preferred tools, and what type they fall under, so that if you do feel the need to do some kind of business handling, you have a baseline to work from.

Material	Primary Tools	Value /lbs	Type
Bone	Woodcarver's	1 SP	Wood
Brass	Smith's, Jeweler's, Tinkerer's	1 GP	Metal
Canvas	Weaver's	1 SP	Fabric
Clay/Mud	Potter's	1 CP	Earth
Cloth	Weaver's	5 SP	Fabric
Common Herbs	Alchemist's, Brewer's	2 SP	Herb
Copper	Smith's, Jeweler's, Tinkerer's	5 SP	Metal
Essence	Any*	1k GP	Null
Feathers	Woodcarver's, Weavers	5 SP	Wood
Gemstones (Low Grade)	Jeweler's	1k GP	Gem
Gemstones (Mid Grade)	Jeweler's	25k GP	Gem
Gemstones (High Grade)	Jeweler's	500k GP	Gem
Gold	Jeweler's	50 GP	Metal
Grain	Chef's, Brewer's	5 CP	Herb
Hemp	Weaver's	5 CP	Fabric
Hide	Leatherworker's	5 SP	Fabric
Ink	Calligrapher's, Cartographer's	160 GP	Dye
Intricate Components	Tinkerer's, Electrician's	25 GP	Metal
Iron	Smith's	1 SP	Metal
Leather	Leatherworkers	1 GP	Fabric

Material	Primary Tools	Value /lbs	Type
Meat	Chef's	1 SP	Food
Paper	Calligrapher's, Cartographer's, Painter's	20 GP	Fabric
Parchment	Calligrapher's, Cartographer's, Painter's	10 GP	Fabric
Pigments	Painter's	100 GP	Dye
Platinum	Jeweler's	500 GP	Metal
Sand	Glassblower's	1 CP	Earth
Silk	Weaver's	5 SP	Fabric
Silver	Smith's, Jeweler's	5 GP	Metal
Steel	Smith's	1 GP	Metal
Stone	Mason's	1 CP	Earth
Wood	Carpenter's, Woodcarver's	5 CP	Wood

**:Essence Is used as a Material Substitute to Craft/Enchant Items or replace Material Components for Spells, and requires an Enchanting Station to use in Crafting (pg. 603).*

The Tools (A.K.A. Artisan's Tools) for Crafting are as follows:

Tool	Crafts	Cost	Weight
Alchemist's Supplies	Potions, Poisons, Misc. Alchemical Items	50 GP	10 lbs
Brewer's Supplies	Alcohol, Drinks	5 GP	50 lbs
Calligrapher's Supplies	Scrolls, Documents, Books	5 GP	0.5 lbs
Carpenter's Tools	Wooden Structures, Furniture, Chests, Crates, Vehicles	1 GP	5 lbs
Cartographer's Tools	Maps, Blueprints	10 GP	0.5 lbs
Cobbler's Tools	Footwear	5 GP	5 lbs
Chef's Tools	Food, Drinks	5 SP	20 lbs
Glassblower's Supplies	Bottles, Windows, Vials, Lenses	25 GP	25 lbs
Jeweler's Kit	Jewelry, Tokens, Gem infused Inks and Chalk, Cut Gemstones	50 GP	1 lbs
Leatherworker's Tools	Bags, Armor, Clothing, Furniture	5 GP	1 lbs
Mason's Tools	Furniture, Runes, Structures, Misc. Stonework	1 GP	1 lbs
Navigator's Tools	None, tells you where you are when lost.	50 GP	0.5 lbs

Tool	Crafts	Cost	Weight
Painter's Supplies	Artworks, Basic Pigments and Scrolls	10 GP	0.5 lbs
Potter's Tools	Pots, Pans, Misc. Ceramics	2 GP	10 lbs
Smith's Tools	Tools, Weapons, Armor, Metalwork	50 GP	50 lbs
Tinker's Tools	Intricate Components, Firearms, Traps, Vehicle Mechanisms, Misc. Contraptions	100 GP	10 lbs
Weaver's Tools	Ropes, Mats, Clothes, Drapery, Fabric	1 SP	0.1 lbs
Woodworker's Tools	Trinkets, Arrows, Toys, Tools, Misc. Wooden Objects	5 GP	10 lbs

Each set of Tools is assumed to have a Complexity of 15 for the purposes of Crafting, though this is more of an estimate than anything.

You can improvise primitive versions of Mason's Tools, Potter's Tools, Smith's Tools, and Woodworker's Tools that have a permanent -5 penalty to all checks and Saving Throws, and only a 1% for value. Others are on a case-by-case basis.

Fantasy

Acid

Traits: Attack, Consumable

Weight: 0.5 lbs (Minuscule)

Cost: 1 GP

Complexity: 13

Material: Mineral

Actions: 2 or 5

Damage: 1d4 Persistent Acid

This Item can only be used once.

A Vial of Acid can be used to dissolve metals or refine various minerals, alongside other uses.

5 Actions: The Vial is poured out, returning the Vial.

Antidote

Traits: Consumable, Ingested, Injury, Nullify

Weight: 0.1 lbs (Minuscule)

Cost: 5 SP

Complexity: 13

Material: Herbs

Actions: 5

This Item can only be used once, and returns a Vial.

A Creature that consumes a Generic Antidote reduces Persistent Poison Damage by 5, and allows them to reattempt any Constitution Saving Throw to remove the Poisoned Condition.

A Specialized Antidote removes all Persistent Poison and effects from the selected Poison, but is otherwise no different in cost or complexity.

Arrow

Traits: Attack, Consumable, Primitive

Weight: 0.01 lbs (Minuscule)

Cost: 2 CP

Complexity: 6

Material: Wood

Actions: 2

Damage: 1d4 Piercing

Typically used as ammunition for Bows.

Axe (Hand/Battle/Great)

Traits: Simple (Battleaxe/Greataxe: Martial)

(Handaxe: Light, Thrown 20/60 ft.) (Battleaxe:

Versatile: 1d10) (Greataxe: Heavy, Two-Handed)

Weight: 0.5 lbs (Tiny) (Battleaxe: 10 lbs (Small)

Greataxe: 15 lbs (Small))

Cost: 2 SP (Battleaxe: 2 GP, Greataxe: 5 GP)

Complexity: 7 (Battleaxe: 12, Greataxe: 14)

Material: Metal

Actions: 3 (Battleaxe: 4, Greataxe: 5)

Damage: 1d6 Slashing (Battleaxe: 1d8, Greataxe: 1d12)

Sometimes also known as the bane of trees everywhere.

Bag

Traits: Container

Weight: 0.1 lbs (Minuscule)

Cost: 5 CP

Complexity: 11

Material: Fabric

A Bag can hold up to 1 Tiny Object, or 1 Gallon of Liquid. You cannot mix and match Liquids and Objects.

A Bag cannot carry more than 50 lbs or it breaks.

Bag of Ball Bearings

Traits: Consumable, Prone, Saving Throw

Weight: 0.5 lbs (Minuscule)

Cost: 1 GP

Complexity: 12

Material: Metal

Actions: 2

This Bag contains 1,000 individual Ball Bearings about half the Size of a marble.

A single Ball Bearing can be used to test for traps, or as a brief distraction.

25 Ball Bearings can turn a single space into Difficult Terrain. A Creature that enters the space must Succeed on a DC 10 Dexterity Saving Throw or Fall Prone. The DC increases by 2 for every 25 Ball Bearings in a 5 ft. space, up to a DC of 16.

Basic Trap Kit

Traits: Consumable, Item, Saving Throw

Weight: 5 lbs (Tiny)

Cost: 5 SP

Complexity: 12

Material: Metal (Tinkering)

Over the course of an Hour, a Basic Trap Kit can be used to designate a 5 ft. Space to be Trapped.

A Trapped space requires at least one Object that you possess or have access to, and performs one Non-Magical Action upon being Triggered, provided you can use the Action involved.

The Trigger can be upon Entering, Leaving, or Interacting with something in the Space (even another Trap triggering), and Targets either the Triggering Creature or a pre-determined Space. A Creature that notices the Trap may avoid it with a Successful Acrobatics Check against the Trap DC, or disable it with a Thievery Check with Thieves' Tools against the same DC.

The DC for the Trap equals your Intelligence Score, while the Attack Bonus equals your Thievery Bonus.

You can only set 1 Trap per Trap Kit. However, you can retrieve a Trap you've set, and any components used in it over the course of 10 Minutes without Thieves' Tools.

Battering Ram

Traits: Attack, Disadvantage, Heavy, Simple (Greatchub), Special, Two-Handed

Weight: 50 lbs (Small)

Cost: 1 GP

Complexity: 8

Material: Metal or Wood

Actions: 5

Damage: 1d12 Bludgeoning

Attacks from this Weapon are at Disadvantage against Creatures that aren't Incapacitated.

Special: This Weapon can be wielded by multiple Creatures, allowing them to add their Damage Modifiers together for 1 Action Point from each extra Attacker.

Beast Armor

Traits: Medium Armor

Weight: 25 * 4 lbs for each Size Category larger, and divided for smaller (Small)

Cost: 50 GP (Exotic: 200 GP) * 4 for each Size Category larger, and divided for smaller

Complexity: 13 (Exotic: 17)

Material: Fabric

AC: 12 (up to +2 from Dex)

Physical Resistance: 5

Beast Armor is designed for Beasts or commonly mounted Creatures that can purchase from most vendors, such as a Horse, or in some places, a Drake.

The Exotic variant is for any Creature that isn't commonly found, has an unusual body shape or needs special attachments, such as a Dragon, or Gryffin.

Blanket

Traits: None

Weight: 1 (Tiny)

Cost: 5 CP

Complexity: 8

Material: Fabric

A Blanket can be used to provide warmth or shelter for Resting, among other creative uses.

Bloodletting Tool

Traits: Exhaustion, Harvest

Weight: 0.1 lbs (Minuscule)

Cost: 1 SP

Complexity: 16

Material: Metal

Over the course of 10 Minutes, you can extract enough blood from a single Creature to fill 1 Flask, but inflict Exhaustion 1.

If the Creature is immune to Bleed Damage, or doesn't take Exhaustion from this, you can't extract any blood.

Bolt

Traits: Attack, Consumable

Weight: 0.02 lbs (Minuscule)

Cost: 5 CP

Complexity: 10

Material: Metal

Actions: 2

Damage: 1d4 Piercing

Ammunition for Crossbows.

Bomb

Traits: Attack, Consumable, Explosive, Saving Throw

Weight: 0.5 lbs (Minuscule)

Cost: 5 GP

Complexity: 15

Material: Mineral (Tinkering)

Actions: 5

Damage: 1d6 Thunder

This Item can only be used once.

You can throw the Bomb up to 60 feet as part of the Interact Action to light it.

The Bomb detonates early if it takes at least 5 Fire Damage from a singular source.

When the Bomb detonates at the End of the Round (after Reactions), all Creatures within 5 feet of it must make a Dexterity Saving Throw against your Dexterity Score:

- **Critical Failure:** Double Damage.
- **Failure:** The Target takes full Damage.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Book

Traits: Information, Language, Recovery, Visual

Weight: 0.5-2 lbs (Minuscule)

Cost: 1-5 GP

Complexity: 18

Material: Fabric

A blank Book can be filled with a wide range of information or converted into a Spellbook (pg. 52), but many are fictional, and only worth 1 GP.

A Book that is filled with anything, prefers the price of 5 GP, and a Bard can study it to regain 1 additional Bardic Inspiration over the course of a Short Rest.

An Informative Book can also be a source of information for the Study Activity (pg. 109). Once studied, a Creature can reference it to recall information without a Skill Check, such as a documented weakness.

Books may vary greatly, with some being bigger, smaller, cheaper, or more expensive than listed.

Boomerang

Traits: Simple, Thrown (20/60 ft.)

Weight: 0.1 lbs (Minuscule)

Cost: 2 CP

Complexity: 7

Material: Wood

Actions: 2

Damage: 1d4 Bludgeoning

When you Miss an Attack Roll with the Boomerang, it returns to your hand, unless occupied.

Bow (Short/Long)

Traits: Finesse, Range 80/300 ft. (Longbow: 160/600 ft.), Reload 3 (Longbow: 4), Simple (Longbow:

Martial), Strength: 10 (Longbow: 13), Two-Handed

Weight: 0.5 lbs (Small) (Longbow: 1 lbs (Medium))

Cost: 2 SP (Long: 5 SP)

Complexity: 11 (Long: 12)

Material: Wood

Actions: Free

Damage: 1d6 Piercing (Longbow: 1d8)

Bows use Arrows as Ammunition.

Candle

Traits: Consumable, Visual

Weight: 0.1 lbs (Minuscule)

Cost: 1 SP

Complexity: 8

Material: Food

A lit Candle sheds 10 feet of Bright Light, and Dim Light for an additional 10 feet. It also lasts for up to 1 Hour.

A Lamp is considered a form of Candle that can be refilled with 1 Ounce of Oil after burning out (1.6 ounces if persnickety, or 1/20th of a flask).

Chain (10 ft.)

Traits: None

Weight: 5 lbs (Tiny)

Cost: 1 GP

Complexity: 13

Material: Metal

Unlike Rope, Chain is Immune to Fire Damage, and can carry 5,000 lbs at a time, but comes in 10 ft. increments.

Chalk

Traits: Visual

Weight: 0.1 lbs (Minuscule)

Cost: 1 CP

Complexity: 13

Material: Minerals

Actions: 2

You draw a symbol or mark, which remains until washed with Water or Acid. The complexity of the desired symbol determines the drawing time, with a simple or vague symbol such as a line, arrow, or rough square being only 2 Actions.

Cloak

Traits: None

Weight: 0.5 lbs (Tiny)

Cost: 2 SP

Complexity: 10

Material: Fabric

A Cloak can be used to more effectively keep rain and sunlight off of a given Creature, such as a Vampire.

Clothes

Traits: None

Weight: 0.25 lbs (Tiny)

Cost: 5 SP

Complexity: 13

Material: Fabric

Clothing can be designed for specific environments, protecting a Creature from the effects of it. Otherwise, it's primarily cosmetic, and for decency.

All Creatures are assumed to have Clothing based to their Description, and what is most appropriate.

Club (Great Club)

Traits: Primitive, Simple, (Great Club: Two-Handed)

Weight: 1 lbs (Tiny) (Great Club: 5 lbs (Small))

Cost: 1 CP (Great Club: 2 CP)

Complexity: 5

Material: Wood

Actions: 2 (Great: 4)

Damage: 1d4 Bludgeoning, (Great: 1d8)

Perfect for hitting things.

Cooking Pot

Traits: Rest

Weight: 5 lbs (Tiny)

Cost: 1 GP

Complexity: 8

Material: Metal

Whenever you take a Long Rest while foraging, you can make a Wisdom Check with your Proficiency in Chef's Tools (if any), with a DC of 10, unless food is scarce, or difficult to forage (both of which would increase it).

Success: You can provide a Cooked Meal to one Creature, plus one for every 5 you roll above the DC.

Failure: No effect.

You can use Rations to make this an Auto-Success with a +5 for each additional Ration you add.

This Item is included with Chef's Tools.

Crossbow (Hand/Light/Heavy)

Traits: Finesse (Hand: Light), Loaded 1, Simple (Heavy: Martial), Ranged 20/60 ft. (Light: 40/80 ft., Heavy: 60/120 ft.), Reload 2 (Light: 3, Heavy: 4) (Light/Heavy: Two-Handed), (Heavy: Heavy)

Weight: 0.1 lbs (Minuscule) (Light: 1 lbs (Tiny), Heavy: 10 lbs (Small))

Cost: 1 GP (Light: 8 SP, Heavy: 5 GP)

Complexity: 15 (Light: 13, Heavy: 18)

Material: Wood (Tinkering)

Actions: 1

Damage: 1d4 Piercing (Light: 1d6, Heavy: 1d10)

Crossbows use Bolts as Ammunition.

Crowbar

Traits: Advantage

Weight: 2 lbs (Tiny)

Cost: 5 SP

Complexity: 12

Material: Metal

Actions: 5

If you use this Item to force open a Container, you either gain Advantage on the Check or reduce the DC by 5 (your Choice).

This also works for anything that you can get leverage on, such as pulling something off of a wall, breaking a lock, or forcing open a door or gate.

Dagger

Traits: Finesse, Light, Primitive, Simple

Weight: 0.25 lbs (Minuscule)

Cost: 5 SP

Complexity: 13

Material: Metal or Stone

Actions: 2

Damage: 1d4 Slashing or Piercing

Daggers are easy to improvise in many situations.

Dart

Traits: Consumable, Finesse, Light, Primitive, Simple, Thrown 20/60 ft.

Weight: 0.01 lbs (Minuscule)

Cost: 5 CP

Complexity: 10

Material: Wood or Metal

Actions: 2

Damage: 1d4 Piercing

Attacks with Darts have Disadvantage on Melee Attack Rolls.

Darts also include shuriken, kunai, and throwing knives.

Dinnerware

Traits: None

Weight: 1 lbs (Minuscule)

Cost: 5 SP

Complexity: 6

Material: Earth

Whenever a Creature makes a meal or drink (e.g. using Cook's Tools or a Cooking Pot), this Item can be used to apply the benefits to an additional Creature.

Explosive Ammunition

Traits: Consumable, Improvement, Special

Additional Weight: 0.01 (Minuscule)

Additional Cost: 1 SP

Complexity: 16

Material: Mineral (Tinkering)

Damage: 1d4 Thunder

This Item can only be used once.

This Ammunition behaves as standard Ammunition for any Weapon, except it explodes at the End of the Round if it takes Fire Damage (or instantly if 5 or more), dealing the listed Damage.

Additionally, any Creature within 5 feet of the original Target must make a DC 13 Constitution Saving Throw or become Deafened until the End of their next Turn.

Special: If the Ammunition inflicts Fire Damage as part of the Attack for any reason, it also detonates on impact, and doubles the Damage.

Fire Starting Kit

Traits: Persistent Fire

Weight: 0.1 lbs (Minuscule)

Cost: 5 CP

Complexity: 12

Material: Wood

Actions: 5

Damage: 1 Persistent Fire

The Damage is inflicted to any unequipped or unattended Object that can take Fire Damage. Cannot be used on Creatures that aren't Restrained or Incapacitated.

Otherwise, this Item allows you to automatically provide Warmth for a Full Rest, if enough flammable material is available.

Fishing Supplies

Traits: Harvest

Weight: 2 lbs (Small)

Cost: 1 SP

Complexity: 11

Material: Wood

A Creature with Fishing Supplies can provide Rations for a number of Creatures equal to their Wisdom Modifier, while near a river or pond with fish.

Glass Container (Vial/Flask/Bottle)

Traits: Container

Weight: 0.1 lbs (Minuscule)

Cost: 2 CP (Flask: 5 CP, Bottle: 1 SP)

Complexity: 13

Material: Earth

Vials can hold up to 2 ounces of liquid, Flasks can hold 2 pints, and Bottles can hold 1 quart.

Glue

Traits: Consumable

Weight: 0.1 lbs (Minuscule)

Cost: 5 CP

Complexity: 12

Material: Herbs

Actions: 5

This Item can cover no more than 5 square feet before being expended.

Over the course of 10 Minutes, you temporarily Repair one Object, or attach two Objects together. A Creature with a Strength Score of 10 or Higher can undo this repair with 5 Actions as an Interact Action.

An Object repaired in this way only loses a -1 from its Attack Penalty, not Damage Penalty. This benefit is lost on a Critical Miss.

Grappling Hook

Traits: None

Weight: 5 lbs (Tiny)

Cost: 1 GP

Complexity: 13

Material: Metal

Actions: 2

When attached to the end of a Rope or Chain over the course of 1 Minute, the Grappling Hook can be thrown up to 60 feet to a ledge, branch, or other such Object that a hook could grip on to, and anchor one end the Rope or Chain in place.

Hammer (Light/Standard/Maul)

Traits: Simple (Standard/Maul: Martial) (Light: Light, Thrown 20/60 ft.) (Standard: Versatile d10) (Maul: Heavy, Two-Handed, Reach)

Weight: 1 lbs (Tiny) (Standard: 10 lbs (Small), Maul: 25 lbs (Medium))

Cost: 2 SP (Standard: 1 GP, Maul: 5 GP)

Complexity: 9 (Standard: 11, Maul: 13)

Material: Metal

Actions: 3 (Standard: 4, Maul: 5)

Damage: 1d6 Bludgeoning (Standard: 1d8, Maul: 1d12)

Hammers are also great for construction or demolition.

Healer's Kit

Traits: Consumable, Healing, Temporary Healing

Weight: 2 lbs (Tiny)

Cost: 1 GP

Complexity: 14

Material: Herbs

Actions: 5

This Item has 10 Uses, and is destroyed when the last one is expended.

1 Use: Make a Medicine Check. The Target gains that many Temporary Hit Points. If the Target still has these Temporary Hit Points when they complete a Long Rest, they regain Hit Points equal to the remaining Temporary Hit Points.

Additionally, they automatically Succeed against Infection while they have these Hit Points, and are Stabilized if they weren't already.

Constructs and Undead cannot benefit from this.

Healing Salve

Traits: Consumable, Healing

Weight: 0.1 lbs (Minuscule)

Cost: 1 GP

Complexity: 11

Material: Herbs

Actions: 4

Healing: 1d4 + 1

This Item can only be used once.

The Target is Healed for the listed amount, and degrades all Persistent Damage by 1.

More expensive variants have additional uses, but also take 2 additional Actions to apply.

Heavy Armor (Ring Mail/Full Plate/Fortress)

Traits: Heavy Armor, Strength: 12 (Full Plate: 15, Fortress: 18)

Weight: 5 lbs (Tiny) (Full Plate: 25 lbs (Medium), Fortress: 75 lbs (Medium))

Cost: 25 GP (Full Plate: 500 GP, Fortress: 10,000 GP)

Complexity: 16 (Full Plate: 18, Fortress: 22)

Material: Metal

Damage Resistance: +3 Physical (Full Plate: +5, Fortress: +10)

While Wearing this Armor, your AC is 13 (Full Plate: 14, Fortress: 15), but cannot be increased or decreased by Ability Scores.

While wearing Heavy Armor, the Move Action costs 3 Action Points instead of 1.

This Armor also imparts Disadvantage on Stealth Checks.

Full Plate and Fortress: You have Disadvantage on All Dexterity Checks.

Holster/Sheathe

Traits: None

Weight: 0.1 lbs (Minuscule)

Cost: 1 SP

Complexity: 11

Material: Fabric

Retrieving an Item from a Sheathe is a Free Action, if the Sheathe is equipped.

It can store a single item, or up to 5 Consumable Items of the same type.

Starting Equipment is assumed to come with a Sheathe.

Holy Water

Traits: Attack, Consumable, Holy, Thrown (20/60 ft.)

Weight: 0.5 lbs (Minuscule)

Cost: 1 GP

Complexity: 15

Material: Earth

Actions: 2 or 5

Damage: 1d6 Radiant

This Item can only be used once.

If a Fiend or Undead is doused with Holy Water, all subsequent Attacks against them are treated as if they were Weaknesses for up to 1 Minute. Furthermore, they cannot Concentrate on any effect.

Only Fiends and Undead take Damage when in contact, even when Ethereal.

A Creature that drinks Holy Water takes the Radiant Damage as if it were an Ingested Poison (no Save), whether or not they are Fiends or Undead. And if they are, they take the Damage as Persistent Radiant Damage.

5 Actions: The Flask is returned, but the Range is limited to 20 feet.

Hourglass

Traits: Visual

Weight: 0.2 lbs (Minuscule)

Cost: 2 SP

Complexity: 16

Material: Earth

Actions: 2

An Hourglass allows you to accurately keep time for 1 Hour at a time, and is often used to keep track of Spell Durations, Cooking Times, or even to trigger certain Spells that require an observable Trigger.

Hourglasses also come in 1 Minute, 10 Minute, and 8 Hour variants.

Incense

Traits: Buff, Nullify, Rest, Scent

Weight: 0.1 lbs (Minuscule)

Cost: 1 SP

Complexity: 8

Material: Herbs

Duration: 1 Hour

When burned over the course of a Short or Long Rest, Incense decreases the Exhaustion and Drained Conditions of all participating Creatures by 1, even if from an Affliction that would normally prevent this reduction.

For the Duration, a Creature under this, and any effect with the Emotion Trait can attempt a Wisdom Saving Throw at the End of their Turn to end the Emotion effect early, as if it had the Disruptible Trait.

If this Item ends a Condition from a Magical effect, the Magical effect is removed.

A Creature under the effects of Incense cannot gain the benefits of any other Incense for the Duration.

Inkwell

Traits: None

Weight: 0.05 lbs (Minuscule)

Cost: 5 SP

Complexity: 13

Material: Earth

An Inkwell is required to use a Quill, and holds enough Ink for 1,000 pages.

Can also hold the required Gem Infused Inks for Crafting Spell Scrolls, or Recording Spells into a Spellbook (pg. 52).

Instrument (Drum, Flute, Lute)

Traits: Audible

Weight: 2 lbs (Tiny/Small)

Cost: 2 SP

Complexity: 11

Material: Wood

Actions: 3

An Instrument can be used to play music, and can be used as a Spellcasting Focus for Bards.

Jar

Traits: Container

Weight: 2 lbs (Tiny)

Cost: 5 CP

Complexity: 7

Material: Earth

The Jar can hold four Minuscule Objects, or a Tiny Creature, or 8 Gallons of any Fluid such as Water or Air.

Jewelry

Traits: None

Weight: 0.01 lbs (Minuscule)

Cost: Varies

Complexity: 12

Material: Any

Jewelry encompasses things like necklaces, earrings and bracelets to name a few, and is often employed in gifts and Magical items.

Sometimes, mundane jewelry is used alongside magic items to disguise them from thieves.

The Cost of Jewelry varies depending on the exact Material, but for something like a silver Ring or Necklace, it starts at 1 GP.

Key

Traits: None

Weight: 0.01 lbs (Minuscule)

Cost: 1 SP

Complexity: 15

Material: Metal

Actions: 3

A Key can be used to open a corresponding Lock. However, you cannot make a Key for a Lock, unless you have the original Key, or have picked the Lock Successfully.

Lantern

Traits: Visual

Weight: 0.25 (Minuscule)

Cost: 5 SP

Complexity: 15

Material: Metal

Actions: 2

A Lantern can hold 1 pint of Oil (or half a flask), which is used as fuel, and lasts for up to 40 Hours at a time.

When lit, a Lantern can provide up to 20 feet of Bright Light and an additional 20 feet of Dim Light. However, it cannot be extinguished by wind or rain.

Light Armor (Padded/Leather/Reinforced)

Traits: Light Armor

Weight: 2 lbs (Tiny) (Leather: 5 lbs (Small), Reinforced: 10 lbs (Small))

Cost: 5 SP (Leather: 5 GP, Reinforced: 50 GP)

Complexity: 13 (Leather: 14, Reinforced: 17)

Material: Fabric

Damage Resistance: +1 Physical (Padded: +Fire & Cold, Leather: +1, Reinforced: +2)

While wearing Light Armor, your base AC is 10 (Leather/Reinforced: 11).

Lock

"You call that a lock? I've opened these with other locks." -Alara Blackclaw

Traits: None

Weight: 0.5 lbs (Minuscule)

Cost: 1 SP

Complexity: Equal to the Picking DC

Material: Metal (Tinkering)

Actions: 2

Locks come in multiple different strengths and difficulties, ranging from so weak it'll only stop honest friends, to so strong that you might as well break whatever they're locking.

Locks also come with the Key that is made for them, at no additional cost, or Crafting Time.

When you Craft a Lock, the DC to pick is equal to the result of an Intelligence Check which you always make when Crafting it, while the DC to break the Lock is based on the materials used.

When used, you lock an Object that can accept the Lock, such as a Door or Chest. You need the correct Key to open a Lock without Picking or Breaking it.

DCs: (Picking)

- **Basic:** 10 (a generic key is universal to these)
- **Simple:** 12 (+1 GP)
- **Advanced:** 15 (+25 GP)
- **Superior:** 18 (+100 GP)
- **Complex:** 21 (+250 GP)
- **Supreme:** 24 (+2,500 GP)

DCs: (Breaking)

- **Delicate:** 10
- **Weak:** 12 (+1 GP)
- **Standard:** 15 (+25 GP)
- **Sturdy:** 18 (+100 GP)
- **Strong:** 21 (+250 GP)
- **Overkill:** 24 (+2,500 GP)

Magnifying Glass

Traits: Visual

Weight: 0.05 lbs (Minuscule)

Cost: 1 GP

Complexity: 20

Material: Glass

Actions: 2

Using a Magnifying Glass grants Advantage on Perception Checks to inspect fine details, such as a signature, or the inner workings of a Mechanism such as a Trap.

Map

Traits: Travel, Visual

Weight: 0.01 lbs (Minuscule)

Cost: 1 GP

Complexity: 15

Material: Fabric

When Traveling, you have Advantage on d20 Tests to avoid getting lost, but can also reveal landmarks.

Mechanical Parts

Traits: None

Weight: 5 lbs (Tiny)

Cost: 5 GP

Complexity: 12

Material: Metal

Over the course of 1 Hour, a Creature can use Mechanical Parts to move any Object that is normally beyond their weight limit as if it was within your carrying capacity, or repair a Construct that has been Damaged.

This requires you to reach any points you wish to use as anchor points.

Medium Armor (Hide/Scale Mail/Half-Plate)

Traits: Medium Armor, (Hide: Primitive), (Scale Mail: Strength 11, Half-Plate: Strength 13)

Weight: 5 lbs (Small), (Scale Mail: 15 lbs (Small), Half-Plate: 20 lbs (Small))

Cost: 5 SP (Scale Mail: 10 GP, Half-Plate: 50 GP)

Complexity: 8 (Scale Mail: 13, Half-Plate: 15)

Material: Fabric (Scale Mail/Half-Plate: Metal)

Damage Resistance: +2 Physical (Hide: Fire & Cold, Scale Mail: +4, Half Plate: +6)

While wearing this Medium Armor, your AC is equal to 12 (Scale Mail: 14, Half-Plate: 13), and adds no more than +2 from Dexterity.

While wearing Medium Armor, the Move Action costs 2 Action Points.

Scale Mail and Half Plate: This Armor imposes Disadvantage on Stealth Checks, but don't add negative modifiers to AC.

Mirror

Traits: Visual

Weight: 0.1 lbs (Minuscule)

Cost: 5 SP

Complexity: 15

Material: Metal

A Silvered Mirror can be used to observe any Visual effect without being unwillingly subjected to it, or to peek around corners without needing a Stealth Check.

Mirror Goggles

Traits: Visual

Weight: 0.1 lbs (Minuscule)

Cost: 10 GP

Complexity: 18

Material: Metal (Tinkering)

You have Disadvantage on Perception Checks using Sight, but can no longer be unwillingly Targeted by any Visual effects. This also extends to any effect relating to Silvered Mirrors (like Vampires in some Settings being Invisible through them).

Mundane Remedy

Traits: Advantage, Buff, Consumable

Weight: 0.5 lbs (Minuscule)

Cost: 10 GP

Complexity: 16

Material: Herbs

Actions: 5

This Item can only be used once, and returns a Flask.

When applied to a Creature, they gain Advantage on their next Saving Throw against one Disease, which must have been chosen and understood during the Crafting Process, unless a cure ingredient was used during Crafting.

Additionally, a Success will always contribute to removing the Affliction (3 Successes to remove if not otherwise defined), and cannot increase any Conditions, or the DC of the Affliction.

Net

Traits: Grappled, Simple, Restrained, Thrown 20/60 ft.

Weight: 5 lbs (Tiny)

Cost: 2 SP

Complexity: 11

Material: Fabric

Actions: 4

Damage: None

When the Net Hits a Creature, they are Grappled by the Net. If the Net Critically Hits, the Creature is also Restrained while Grappled in this way.

When used as a Melee Weapon, the Target can choose to immediately drop one item they were holding instead of becoming Grappled.

The DC to escape a Net is 10 + the Attacker's Proficiency Bonus, provided they are Proficient with Nets. Otherwise, it's just 10.

Oil Flask

Traits: Attack, Consumable

Weight: 0.5 (Minuscule)

Cost: 1 SP

Complexity: 10

Material: Earth

Actions: 2 or 5

A Creature that's been doused in Oil takes 1d4 Persistent Fire Damage when they take Fire Damage.

A Creature that Moves into doused Terrain treats it as Difficult Terrain, or attempts a DC 10 Acrobatics Check + 5 for each space traveled, or falls Prone.

5 Actions: The Oil is poured out, and the Flask is preserved.

Paper

Traits: None

Weight: 0.01 lbs (Minuscule)

Cost: 2 SP

Complexity: 12

Material: Fabric

Paper is typically used to carry writing, or in origami. Parchment is a variant made from animal hide.

Perfume

Traits: Consumable, Scent

Weight: 0.1 (Minuscule)

Cost: 1 GP

Complexity: 13

Material: Herbs

Actions: 2

Can be used 10 times, returning a Vial.

Grants Advantage on Persuasion or Performance Checks against nobles, or Creatures of the opposite gender for up to 8 Hours.

Creatures within 15 feet of you are Masked, except to Creatures within 5 feet of them. You cannot Hide from Creatures using Smell while this effect is active, and you are Anosmiated to all but the strongest smells (poison gas, rot, smoke, etc.).

Pickaxe

Traits: Attack, Harvest, Two-Handed

Weight: 5 lbs (Tiny)

Cost: 5 SP

Complexity: 11

Material: Metal

Actions: 4

Damage: 1d10 Piercing

Over the course of 1 Hour, a Pickaxe can be used to clear a 5 ft. cube of Stone, or loosen soil.

It is also required for collecting various forms of Earth, Metal Ores and Minerals.

Portable Ladder

Traits: None

Weight: 5 lbs (Medium)

Cost: 2 SP

Complexity: 10

Material: Wood

When placed, the Portable Ladder provides a 10x5 ft. climbable surface that can support a Medium Creature, or 300 lbs without risk of being Damaged.

Pouch of Caltrops

Traits: Ability Check, Debuff, Consumable, Terrain

Weight: 0.5 lbs (Tiny)

Cost: 5 SP

Complexity: 13

Material: Metal

Actions: 2

Damage: 1d4 Piercing

This Item can be used 4 times, and returns a Pouch.

When poured out or thrown, one Space within 20 feet of you becomes Difficult Terrain. A Creature that enters this Difficult Terrain (even if they ignore it) must make a DC 10 Acrobatics Check. A Creature that falls Prone in the Space automatically Fails Critically.

- **Critical Failure:** Double Damage, and the Creature cannot Walk or Climb.
- **Failure:** The Creature takes the listed Damage, and has their Walking and Climbing Speeds reduced by 5 feet (Also impacts the Action Limit to a Minimum of their Action Recovery).
- **Success:** No effect.

A Creature that has their Movement Speed reduced in this way ends the penalty upon regaining Hit Points, or spending 5 Actions to remove all the Caltrops.

Pouch of Sand

"Pocket Sand!" -Shad the Great

Traits: Attack, Blinded, Consumable

Weight: 0.5 lbs (Minuscule)

Cost: 5 CP

Complexity: 5

Material: Earth

Actions: 3

This Item has 5 Uses before it needs to be refilled.

1 Use: Make a Thievery Check against the AC of a Creature within 10 feet of you. On a Hit, that Creature is Blinded until it uses the Interact Action to clean off the sand.

5 Uses: You render a 5 ft. space of Non-flowing Acidic, or Poisonous Terrain harmless until the effect is reapplied.

Prosthetic

Traits: None

Weight: 5 lbs (Tiny)

Cost: 10 GP

Complexity: 15

Material: Wood, Metal (Tinkering)

A Prosthetic can be used to restore functionality to a lost limb, countering the Amputee Bleed. However, this Prosthetic imparts a -5 Penalty to all Dexterity Checks that require the Missing limb.

Quarterstaff

*Traits: Primitive, Simple, Versatile (1d10)
(One-Handed: Reach)*

Weight: 2 lbs (Medium)

Cost: 1 SP

Complexity: 5

Material: Wood

Actions: 4 Actions

Damage: 1d8 Bludgeoning

A very simple Weapon, that is used for hitting things, testing for traps, or irritating students who struggle to pay attention.

Rain Collection Kit

Traits: Harvest

Weight: 0.5 lbs (Small)

Cost: 1 GP

Complexity: 12

Material: Wood

While you have this, you always find enough clean water for One Creature each day, provided you aren't in an Arid (dry) environment.

Rations

Traits: Consumable

Weight: 0.1 lbs (Minuscule)

Cost: 5 CP

Complexity: 5

Material: Food

Provides enough Food and Water for One Medium Creature, for a Day. Can be cooked to enable a Full Rest.

Recipe

Traits: Special

Weight: 0.01 lbs (Minuscule)

Cost: Varies*

Complexity: Varies*

Material: Fabric

A Creature that provides a Recipe while Crafting can expend the listed amount of Materials, in exchange for a predetermined set of Items or Constructs, without an Ability Check. Or, they can study the Recipe to lower the DC to Craft the Item or Construct.

Special: Each unique Recipe is considered a Unique Item for the purpose of Crafting, and DCs. Furthermore, a Creature that Crafts a Recipe must know how to Craft the Item or Construct.

**:The Price of the Recipe is usually equal to 1/10th of the Item it Crafts, while the Complexity is equal to the Complexity of the Item +5.*

Restraints

Traits: Disadvantage, Grappled

Weight: 1 lbs (Tiny)

Cost: 1 GP

Complexity: 18

Material: Metal

Actions: 2

When applied to a Creature's hands, they cannot perform Actions with the Manipulate Trait, with some obvious exceptions, like Two-Handed Attacks with Non-Two-Handed Weapons.

When applied to a Creature's feet, they have Disadvantage on Acrobatics Checks and Strength Saving Throws to avoid being knocked Prone, and cannot Dash.

When applied to multiple Creatures, they are considered to be Grappled by each-other (cannot escape without removal), and cannot move further than 5 feet from each-other at any given time.

Regardless, a Creature that has Restraints applied cannot Climb except on a ledge, and can be Grappled with any connected Chain. The DC to break Restraints is 30, while picking depends on the Lock used.

Rope (50 ft.)

Traits: None

Weight: 20 lbs (Small)

Cost: 1 SP

Complexity: 8

Material: Fabric

Actions: 1 or 5

You tie one knot in the Rope, reducing its effective length by 1 ft., allowing you to attach it to something, or provide a point to allow Creatures to Climb it without a Check.

1 Action: you shift your grip up to 10 feet in either direction, assuming you are a Medium Creature, and there is no significant load.

Rope can be used to Restrain or Grapple a Creature that is too big, or doesn't resist using Thievery as the DC. It is also strong enough to hold over 2,000 lbs without issue.

The Rope has 25 Hit Points, Vulnerability 5 to Slashing and Fire, but Immunity to Bludgeoning and Piercing.

Saddle

Traits: Advantage

Weight: 5 lbs (Small)

Cost: 5 SP

Complexity: 17

Material: Fabric

A Saddle gives you Advantage on Ability Checks and Saving Throws to stay mounted, or maintain control over a Creature that is at least one Size Larger than you.

Saddles are adjustable to fit different Creatures.

Shovel

Traits: Harvest, Two-Handed

Weight: 5 lbs (Medium)

Cost: 5 SP

Complexity: 13

Material: Metal

Actions: 4

Damage: 1d8 Bludgeoning

Can be used to dig a 5 ft. cube in soft earth and dirt, or other loose material over the course of 10 Minutes, depositing the material within 10 feet.

Shield (Buckler/Round/Tower)

Traits: Cover (Buckler: Obscured, Round: Half Cover, Tower: Full Cover), Shield

Weight: 0.1 lbs (Minuscule), (Round: 10 lbs (Small), Tower: 25 lbs (Medium))

Cost: 2 SP (Round: 5 SP, Tower: 5 GP)

Complexity: 10 (Round: 8, Tower: 13)

Material: Wood or Metal

Actions: 1 (Round: 3, Tower: 5)

Buckler: You can use a Non-Thrown Weapon in the same hand as a Buckler.

Tower: While Blocking, your space counts as Half-Cover for other Creatures.

Simple Poison

Traits: Consumable, Injury, Ingested

Weight: 0.1 lbs (Minuscule)

Cost: 1 GP

Complexity: 12

Material: Herbs

Actions: 5

Damage: 1d4 Persistent Poison

This Item can only be used once, but returns a Vial.

When applied to a Weapon, Food, or up to 5 pieces of Ammunition that inflicts Piercing or Slashing Damage, the next Creature to take unblocked Damage from a Poisoned Weapon, or consume a Poisoned Food, must make a DC 12 Constitution Saving Throw:

- **Critical Failure:** Same as Failure, but the Poisoned Condition lasts 24 Hours.
- **Failure:** The Target is Poisoned for 1 Hour, and takes the listed Damage.
- **Success:** No Damage, but the Target is Poisoned for 10 Minutes.
- **Critical Success:** No effect.

Sling

Traits: Fling (Minuscule), Loaded 1, Primitive, Range 30/120 ft., Reload 2, Simple

Weight: 0.1 lbs (Minuscule)

Cost: 1 CP

Complexity: 7

Material: Fabric

Actions: 3

Damage: 1d4 Bludgeoning

A simple piece of leather or cord, with a seat for a small rock, pebble, or small vial to sit. Also handy for flinging poison vials.

Soap

Traits: Consumable, Advantage

Weight: 0.01 lbs (Minuscule)

Cost: 1 SP

Complexity: 5

Material: Herbs

While you have Soap, you are assumed to have Advantage on Saving Throws against Infection.

If you really want to bother, it has 20 uses.

Spear (Short/Long)

Traits: Brace, Primitive, Simple (Short: Thrown 20/60 ft.) (Long: Reach, Versatile 1d10)

Weight: 0.5 lbs (Medium) (Long: 1 lbs (Medium))

Cost: 1 SP (Long Spear: 5 SP)

Complexity: 5 (Long: 7)

Material: Wood

Actions: 3 (Long Spear: 4)

Damage: 1d6 Piercing (Long Spear: 1d8)

Very popular for its reach, availability, and ease of use.

Spellcasting Focus

Traits: None

Weight: 0.1 lbs (Minuscule)

Cost: 5 GP

Complexity: 13

Material: Wood, Metal or Earth

A Spellcasting Focus can take many forms such as a Wand, Orb, Staff, or Holy Symbol.

This Item fulfills the Focus Component while held, but only for Spells from one List, depending on what the Focus is intended for (Arcane, Divine, Occult, Primal).

Some Spellcasting Classes such as Bards can use specific Items as focuses in place of a Spellcasting Focus.

Spool of Thread

Traits: None

Weight: 0.1 lbs (Minuscule)

Cost: 1 SP

Complexity: 11

Material: Fabric

Actions: 5

Contains up to 4,000 feet of thread.

Thread can be used to pull no more than 20 lbs of material, repair Fabric items, act as a tripwire, activate certain Non-Magical triggers, and other uses that can get pretty creative. It also has 1 Hit Point.

When used, you can secure an end of the Thread to any Object it can wrap around, or tie a knot, much like Rope.

Spyglass

Traits: Visual

Weight: 0.05 lbs (Minuscule)

Cost: 50 GP

Complexity: 25

Material: Earth

Actions: 2

A Creature peering through a Spyglass has their Vision Range extended by 10 times the original range, but they are considered Blinded to their surroundings within 60 feet, unless they pass in front of the Creature.

Storage Container (Crate/Barrel/Chest/etc.)

Traits: Container

Weight: 10 lbs (Medium)

Cost: 1 SP

Complexity: 10

Material: Wood

This Container can contain up to four Small Objects, or one Creature, or up to 100 gallons of any liquid. It only breaks from Weight if being used to hold more than 3,000 lbs without support, or reinforcement.

Sword (Short/Long/Great)

Traits: Simple (Longsword/Greatsword: Martial) (Shortsword: Finesse, Light), (Longsword: Versatile: 1d10), (Greatsword: Heavy, Two-Handed, Reach)

Weight: 1 lbs (Tiny) (Longsword: 5 lbs (Small), Greatsword: 8 lbs (Medium))

Cost: 5 GP (Longsword: 10 GP, Greatsword: 50 GP)

Complexity: 13 (Longsword: 15, Greatsword: 18)

Material: Metal

Actions: 3 (Long: 4, Great: 5)

Damage: 1d6 Slashing (Long: 1d8, Great: 1d12)

A Rapier has the statistics of a Longsword, but replaces Versatile with Finesse.

Tent

Traits: None

Weight: 4 lbs (Tiny)

Cost: 5 SP

Complexity: 8

Material: Fabric

A Tent can provide shelter for up to 2 Medium Creatures, or Objects, requiring 10 Minutes to set up. Stakes or posts can be improvised with ease.

Thieves' Tools

Traits: None

Weight: 1 lbs (Minuscule)

Cost: 15 GP

Complexity: 13

Material: Metal

Actions: 10

Thieves' Tools can be used to Pick Locks, Disarm Traps or other similar tasks, and use your Thievery Bonus for any Ability Checks using this Item.

Torch

Traits: Attack, Consumable, Simple (Club), Visual

Weight: 0.1 (Tiny)

Cost: 2 CP

Complexity: 7

Material: Wood

Actions: 2

Damage: 1d4 Bludgeoning OR Fire (Only while lit)

A lit Torch provides 20 feet of Bright Light, and 20 feet of Dim Light for up to 10 Minutes.

Travel Bedding

Traits: Rest

Weight: 2 lbs (Tiny)

Cost: 5 GP

Complexity: 7

Material: Fabric

Allows you to ignore Terrain for the purpose of Full Rests, and adds a +1 to Quality if you qualify.

Traveling Shoes

Traits: Travel

Weight: 0.2 lbs (Minuscule)

Cost: 1 SP

Complexity: 13

Material: Fabric

A Creature wearing these shoes can travel an extra 5 miles on foot each day, and can't fall Prone from Moving on slick surfaces like ice.

Trinket

Traits: Primitive

Weight: 0.01 lbs (Minuscule)

Cost: Varies

Complexity: 8

Material: Any

A Trinket doesn't have any special properties on its own, and encompasses things like bells, buttons, small toys, symbols, carvings, and other knick-knacks that may be decorative or otherwise symbolic in nature.

The price for most trinkets ranges from 1 CP to 1 GP, though it can exceed this for more valuable materials, or intricate designs.

Walking Stick

Traits: Advantage, Primitive, Travel

Weight: 0.5 lbs (Small)

Cost: 2 CP

Complexity: 5

Material: Wood

While holding the Walking Stick, you have Advantage on Saving Throws against being knocked Prone, and treat the Encumbered Condition as being reduced by your Proficiency Bonus while Traveling.

Weapon Coating Kit

Traits: Consumable, Improvement

Weight: 2 lbs (Minuscule)

Cost: 5 GP + 0.5 lbs of the Material you want to coat with.

Complexity: 18

Material: Metal

This Item can only be used once.

Over the course of an Hour, a Creature can permanently apply the benefits of the predetermined coating --such as Silver or Adamant-- to one Weapon, or up to Five pieces of Ammunition.

Whetstone

Traits: Improvement, Primitive

Weight: 0.05 lbs (Minuscule)

Cost: 5 CP

Complexity: 5

Material: Earth

Over the Course of one Hour, one Melee Weapon or five pieces of Ammunition of your choice that deals Piercing or Slashing Damage, gains a +1 Bonus to Damage Rolls until the next time you take a Long Rest.

Whistle

Traits: Audible

Weight: 0.01 lbs (Minuscule)

Cost: 2 SP

Complexity: 15

Material: Wood or Metal

Actions: 2

A Creature that blows this Whistle can be heard for up to 1 mile.

This comes in alternate versions that only specific kinds of Creatures (such as Wolves/Dogs) can hear when blown.

Firearms

Firearm Rounds (Pistol/Rifle/High Caliber/Shot)

Traits: Attack, Consumable

Weight: 0.01 lbs (Minuscule)

Cost: 1 SP (Rifle/Shot: 2 SP, High Caliber: 5 SP)

Complexity: 13

Material: Metal (Tinkering)

Actions: 5

Damage: 1d6 Piercing (Rifle: 1d8 (1d10), High Caliber: 1d12, Shot: 2d6)

Firearm Rounds do varying amounts of Damage depending on what Weapon they're designed for, assuming basic functions. They cannot be used in a Weapon that deals less Damage, and are at Disadvantage in Larger Weapons.

Firearm Rounds cannot be Poisoned or affected with Improvement effects from Items, but can be fired on their own, dealing half Damage, and having Disadvantage to Hit.

Shot Rounds specifically, use a 15 ft. Cone, and require a Dexterity Saving Throw against your Dexterity Score, dealing half Damage on a Success (counts as a Miss). This Attack counts as one Hit for each Creature that Fails the Saving Throw, and one Attack overall.

Other Firearms that use a dedicated kind of Ammunition will either have a reference to the used Ammunition, or include the statistics.

Flintlock

Traits: Finesse, Light, Loaded 1, Misfire 3, Range 60/180 ft., Recoil, Reload 5, Simple (Pistol)

Weight: 2 lbs (Minuscule)

Cost: 10 GP

Complexity: 15

Material: Metal (Tinkering)

Actions: 1

Damage: 1d6 Piercing

This Item uses Pistol Rounds as Ammunition.

Musket

*Traits: Finesse, Loaded 1, Martial (Rifle), Misfire 4,
Range 120/600 ft., Recoil, Reload 10*

Weight: 20 lbs (Small)

Cost: 50 GP

Complexity: 18

Material: Metal (Tinkering)

Actions: 1

Damage: 1d10 or 2d6 Piercing

A Musket uses either Rifle Rounds, or Shot Rounds as Ammunition.

See Shot Rounds for their behavior.

Pepper Box

*Traits: Finesse, Light, Loaded 6, Misfire 2, Range
30/120 ft., Recoil, Reload 5, Simple (Pistol)*

Weight: 2 lbs (Minuscule)

Cost: 15 GP

Complexity: 16

Material: Metal (Tinkering)

Actions: 1

Damage: 1d6 Piercing

This Item uses Pistol Rounds as Ammunition.

Vehicles

Boat

Traits: Water

Weight: 500 lbs (Huge)

Cost: 50 GP

Complexity: 15

Material: Wood

HP: 30 (Medium: 120)

A Fishing Boat can carry up to 2 Large Creatures or Objects, or 8 Medium ones. It can hold a maximum of 1,500 lbs before sinking under the weight.

2 Actions: Steer (Sail must be deployed, 1/Round)
You change the direction of Movement by up to 90 degrees.

Manned Action: Deploy/Retract Sail (1 Crew)
When the Sail is deployed, the Vehicle moves 10 feet at the start of each Round, in the direction of the wind. When the Sail is retracted, the Vehicle doesn't move with the wind.

The Boat can travel up to 5 miles every Hour while the sail is up.

Manned Action: Row (Oars, 1 Crew)
You move the Boat up to 10 feet, regardless of wind.

The Fishing Boat is strong enough to withstand rapids or waves that are no higher than 5 feet.

Cart

Traits: Land

Weight: 50 lbs (Large)

Cost: 5 SP

Complexity: 8

Material: Wood

HP: 10 (Medium: 20)

The Cart can hold up to two Medium Objects or Creatures, which are treated as being half their weight. A Creature using the Move Action can pull it behind them without any Movement penalty.

Chariot

Traits: Land

Weight: 25 lbs (Medium)

Cost: 5 GP

Complexity: 12

Material: Wood, or Metal

HP: 10

A Chariot can hold up to 2 Medium Creatures, or 1 Medium Object. It must be pulled by at least One Large Creature, or the equivalent.

Manned Action: Move

All Creatures pulling the Chariot move up to their averaged Movement Speed rounded up.

Mercenary Ship

Traits: Water

Weight: 10,000 lbs (Gargantuan)

Cost: 750 GP

Complexity: 15

Material: Wood

HP: 40 (Medium: 320)

A Mercenary Ship, Sailing Ship, Pirate Ship, or similar vessel can carry up to 20 Medium Creatures in close quarters with storage for 8 Large Creatures or Objects. It can carry a maximum of 50,000 lbs before sinking under the weight.

2 Actions: Steer (1/Round)

You change the direction of Movement by up to 90 degrees. Attempting to Steer in Stormy Weather may require an Athletics Check while the Sail is up, in order to avoid turning with the Wind.

Manned Action: Deploy/Retract Sail (6 Crew)

When the Sail is deployed, the Vehicle moves 30 feet at the Start of each Round in the direction of the Wind, or Steering. If Crew is insufficient, it takes 1 continuous Minute to perform this task.

While sailing in the direction of the Wind, the Ship can travel 15 Miles in 1 Hour.

Manned Action: Row (6 Crew)

The Vehicle moves up to 10 feet, regardless of Wind. If there aren't enough Creatures Rowing, the Speed becomes negligible for Travel. If there are less than 2 Creatures rowing, the Ship cannot be moved.

Manned Action: Ballista (4 Crew, Range: 120/360)

This Attack deals 1d4 (Medium: 8d4) Piercing Damage, and requires Proficiency in Heavy Crossbows.

Uses Medium Sized Bolts (64x cost).

A Mercenary Ship is capable of withstanding any kind of waters, taking no Damage from waves shorter than 10 feet while Manned, though they can still capsize it.

Pack Mule

Traits: Creature, Land

Weight: 1,000 lbs (Large)

Cost: 5 GP

See the Young Horse Statistics on pg. 524.

A Pack Mule has a Strength Score of 18, and is often difficult to work with.

Raft

Traits: Water

Weight: 50 lbs (Large)

Cost: 1 GP

Complexity: 13

Material: Wood

HP: 10 (Medium: 20)

A Raft or Rowboat can hold 1 Large Creature, or 2 Medium Creatures, with a limit of 500 lbs. Any more and it sinks.

3 Actions: Row (Oar or Long Pole)

You Move the Vehicle up to 10 feet in a straight line. A sufficiently long object is any object that can reach any solid terrain, such as a riverbed.

This Vehicle can travel up to 2 Miles every Hour assuming no current. A Creature can double or triple this Speed, but takes 1 or 2 Levels of Exhaustion if they do so alone.

This Vehicle isn't strong enough to survive rapids for long, or any crashing waves.

War Horse

Traits: Creature, Land

Weight: 1,000 lbs (Large)

Cost: 50 GP

See the Horse Statistics on pg. 525.

Wheelbarrow

Traits: Land

Weight: 20 lbs (Medium)

Cost: 5 SP

Complexity: 12

Material: Wood or Metal

Actions: 2

A Wheelbarrow can hold up to 1 Medium Creature, 2 Medium Objects, or 1,000 lbs. Objects inside are treated as being half their Weight.

It only moves when being moved by a Creature, and requires a Strength Check using Proficiency in Land Vehicles to move over Difficult Terrain that is bumpy and uneven without tipping.

Modern

Barricade

Traits: Cover

Weight: 20 lbs (Small)

Cost: 2 GP

Complexity: 11

Material: Metal

Actions: 5

A Barricade covers a 5 ft. Space with Half Cover from one direction, until tipped over or dismantled.

Concrete versions are much heavier, and not portable.

Battery

Traits: Consumable, Electronic

Weight: 0.01 lbs (Minuscule)

Cost: 1 SP (Rechargeable: 5 GP)

Complexity: 13

Material: Metal

Actions: 3

A Battery is required for many Technological Items, such as a Flashlight, and restores 1 Charge to Items with the Electronic Trait. It can also be used to power Objects like a Tinkerer's Clockwork Creation.

Batteries are Immune to EMPs and other ionic effects.

A Rechargeable variant exists, which can be charged over the course of 8 Hours, provided you have access to Electricity, and a Charger.

If it is an important problem for your Setting, Batteries may come in different shapes and Sizes, which only work with specific types of Items.

Binoculars

Traits: Visual

Weight: 0.5 lbs (Minuscule)

Cost: 1 GP

Complexity: 18

Material: Earth

Actions: 2

Binoculars can be used to multiply your Sight Range by up to 10 times.

Bulletproof Vest

Traits: Armor

Weight: 25 lbs (Tiny)

Cost: 25 GP

Complexity: 14

Material: Fabric

Damage Resistance: +5 Piercing & Slashing

A Bulletproof Vest only reduces Damage from Ranged Attacks or Dexterity Saving Throws that aren't Critical. Not Melee Attacks.

A Bulletproof Vest can be worn over or under Armor, and doesn't require Proficiency.

Camera

Traits: Electronic

Weight: 0.5 lbs (Minuscule)

Cost: 1 GP

Complexity: 18

Material: Earth

Actions: 2

This Item has 2 Charges, which lasts for 4 cumulative Hours each.

A Camera can be used to record an event in perfect detail, and sometimes audio as well, and put them on a Portable Data Drive. However, capturing Video requires Concentration to provide a good view.

Charger

Traits: Electronic

Weight: 0.1 lbs (Minuscule)

Cost: 5 SP

Complexity: 15

Material: Metal

Actions: 2

With access to electricity, a Charger can be used to recharge Batteries and Items that are Rechargeable over the course of 8 Hours, allowing them to remain functional, as long as there is sufficient electricity.

A Larger Charger may be needed for Larger Batteries and Items.

Computer

Traits: Electronic, Information, Visual

Weight: 25 lbs (Small)

Cost: 100 GP

Complexity: 20

Material: Metal

A Computer can be used to connect to other Computers (a.k.a. the Internet), and can have a variety of uses such as destroying databases with cat videos.

Computer-based Ability Checks (such as Computers or Hacking) are primarily Intelligence-based, and require their own specialized Proficiencies.

EMP Grenade

Traits: Attack, Consumable, Electronic, Ionic, Incapacitated

Weight: 0.1 lbs (Minuscule)

Cost: 1 GP

Complexity: 15

Material: Metal

Actions: 2

This Item can only be used once.

You can throw the EMP up to 60 feet as part of the Interact Action.

At the End of the Round, all Electronic Items and Constructs within a 25 ft. Radius of the Grenade are disabled, unless they were already disabled, powered off, or have Protection against Ionic Weapons.

A Device or Construct that is disabled in this way is Incapacitated, or cannot expend Charges until it has been repaired over the course of a Short Rest.

Fire Suppressor

Traits: Consumable

Weight: 10 lbs (Tiny)

Cost: 5 SP

Complexity: 14

Material: Metal

Actions: 3

Damage: 2d6 Cold

This Item has 10 Uses, but is not destroyed when empty.

1 Use: When used on a space within 10 feet, all flames inside are extinguished immediately, and cannot spread until the Start of the Next Round (doesn't include things like Magma).

Creatures made of Fire such as Fire Elementals must make a Dexterity Saving Throw against your Dexterity Score:

- **Critical Failure:** Double Damage.
- **Failure:** They take the Listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

All other Creatures are considered Immune to this Damage, or have their Persistent Fire Damage reduced accordingly.

Flashbang

Traits: Attack, Consumable, Blinded, Deafened, Saving Throw, Stunned

Weight: 0.1 lbs (Minuscule)

Cost: 5 SP

Complexity: 13

Material: Mineral

Actions: 3

Duration: 1 Minute

This Item can only be used once.

You can throw the Flashbang up to 60 feet as part of the Interact Action.

At the End of the Round, any Creature within a 50 ft. Radius of the Flashbang that isn't a Construct must make a Dexterity Saving Throw against your Dexterity Score:

- **Critical Failure:** Same as Failure, but the Target is also Stunned 5.
- **Failure:** The Target is both Blinded and Deafened for the Duration.
- **Success:** The Target must choose to be either Blinded or Deafened for the Duration.
- **Critical Success:** No effect.

A Creature that is under the Blinded or Deafened Conditions from this Item may attempt a DC 12 Constitution Saving Throw at the End of their Turn to end one of the Conditions.

Flashlight

Traits: Electronic, Visual

Weight: 0.1 lbs (Minuscule)

Cost: 1 SP

Complexity: 13

Material: Metal

Actions: 1

This Item has 4 Batteries, each lasting up to 4 Hours.

This Item provides a 120 ft. Cone of Bright Light, with an additional 240 feet of Dim Light.

Frag Grenade

Traits: Attack, Consumable, Saving Throw

Weight: 0.1 lbs (Minuscule)

Cost: 5 SP

Complexity: 10

Material: Mineral

Actions: 3

Damage: 1d6 Thunder + 1d6 Piercing

This Item can only be used once.

You can throw the Frag Grenade up to 60 feet as part of the Interact Action.

At the End of the Round, any Creature within a 10 ft. Radius of the Grenade must make a Dexterity Saving Throw against your Dexterity Score:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

Fuel Canister

Traits: Consumable

Weight: 1 lbs (Minuscule)

Cost: 1 GP

Complexity: 8

Material: Mineral

Actions: 5

This Item can be used once before it needs to be refilled, though partial uses and charges are determined by the referencing Item.

A Fuel Canister is often used to operate Technological Items and Objects that need to move quickly, or use a lot of heat, such as Vehicles and Blowtorches.

The Action Cost depicts how long it takes to Remove or Replace a Canister for a specific Item.

Anything that uses a Canister will specify that it does so. Also, some Canisters may contain different fuel types, or only be usable for specific Items, depending on the Item, and the Campaign.

Gas Mask

Traits: Advantage, Anosmiated

Weight: 0.1 lbs (Minuscule)

Cost: 5 SP

Complexity: 13

Material: Fabric

Actions: 5

This Item lasts for up to 24 cumulative Hours of use.

Any Creature that wears a Gas Mask is Immune to Inhaled Poisons and Gas-based environmental hazards, but is Anosmiated.

After the Gas Mask loses its potency, it only grants Advantage on any corresponding Saving Throws, until the filter is replaced (1 SP, same Complexity).

GPS

Traits: Electronic, Information, Visual

Weight: 0.05 lbs (Minuscule)

Cost: 5 GP

Complexity: 25

Material: Metal

Actions: 2

This Item has 2 Charges, which last for 8 cumulative Hours each.

A GPS provides a comprehensive and interactive map of the surrounding area, as well as other mapped areas, provided there are Satellites that have been deployed on your current planet.

Alternatively, a GPS can also track a Homing Device (using the statistics of a Portable Data Drive), or a Phone.

Hacking Equipment

Traits: Electronic

Weight: 10 lbs (Tiny)

Cost: 35 GP

Complexity: 25

Material: Metal

Actions: 10

Hacking Equipment can be used to Hack Electronic Objects, even if they don't have an interface.

Uses Proficiency in Hacking or Electronics.

Incendiary Grenade

Traits: Attack, Consumable, Saving Throw

Weight: 0.1 lbs (Minuscule)

Cost: 1 GP

Complexity: 13

Material: Mineral

Actions: 3

Damage: 1d6 Thunder + 1d6 Persistent Fire

This Item can only be used once.

You can throw the Incendiary Grenade up to 60 feet as part of the Interact Action.

At the End of the Round, all Creatures within a 10 ft. Radius of the Grenade must make a Dexterity Saving Throw against your Dexterity Score:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Any flammable objects in the area ignite immediately.

Medikit

Traits: Consumable, Improvement

Weight: 1 lbs (Tiny)

Cost: 5 GP

Complexity: 15

Material: Mineral

Actions: 10

This Item works exactly like a Healer's Kit (pg. 349), except the Healing isn't reduced if the Target loses any of these Temporary Hit Points.

Multi-Tool

Traits: Disadvantage, Tool

Weight: 0.01 lbs (Minuscule)

Cost: 5 SP

Complexity: 17

Material: Metal

Actions: 2

This Item can be used as Tinker's Tools, Thieves' Tools, and a Basic Trap Kit in one Item, though any Checks are made at Disadvantage.

This Item may have additional functionality, depending on the design, and the creativity of the Players.

Night Vision Goggles

Traits: Electronic, Visual

Weight: 0.1 lbs (Minuscule)

Cost: 65 GP

Complexity: 26

Material: Earth

Actions: 5

These Goggles have 2 Charges, which last for 4 cumulative Hours each.

While wearing these Goggles, you have Darkvision as far as your Sight, which also allows you to see through smoke. However, you also have Bright Light Sensitivity.

Parachute

Traits: Consumable

Weight: 2 lbs (Tiny)

Cost: 1 GP

Complexity: 11

Material: Fabric

Actions: 2

This Item only has 1 Use, but can be repacked by a Creature with Proficiency in Air Vehicles over the course of a Short Rest.

1 Use: When Deployed, you fall no more than 120 feet each round, and take no Fall Damage when falling at least 30 feet.

Pepper Spray

Traits: Attack, Blinded, Consumable, Contact, Saving Throw

Weight: 0.02 lbs (Minuscule)

Cost: 5 SP

Complexity: 8

Material: Herbs

Actions: 2

Duration: 1 Minute

This Item has 50 Uses.

1 Use: One Creature within 10 feet of you must make a Dexterity Saving Throw against your Dexterity Score:

- **Critical Failure:** Same as Failure, but they cannot Speak, or Concentrate.
- **Failure:** The Target is Blinded for the Duration.
- **Success:** The Target is Blinded for 1 Round.
- **Critical Success:** No effect.

Creatures wearing Goggles or similar eye protection automatically Succeed Critically.

Phone

Traits: Electronic, Information

Weight: 0.1 lbs (Minuscule)

Cost: 10 GP

Complexity: 18

Material: Metal

Actions: 10

This Item has 1 Charge, which lasts for 8 cumulative Hours. This can only be recharged with a Charger (a working Charger is included with *most* purchases).

Primarily, it can be used to communicate with other Creatures, provided that both you and the Target are within 100 miles of any city, and not beneath more than 10 feet of stone (exceptions apply).

Some phones may come with access to the Internet, Cameras, Flashlights, Radio, GPS capability, or even the same capabilities of a Computer, depending on technological advancements in the setting.

Portable Data Drive

Traits: Electronic, Information

Weight: 0.01 lbs (Minuscule)

Cost: 5 SP

Complexity: 15

Material: Metal

Actions: 2

A Portable Data Drive can only be accessed by a Computer, but can contain digital files, which may be encrypted.

However, it is only able to hold so much data, before the contents lose accuracy, such as only being able to store 10 Minutes of high quality footage with sound before risking some degree of loss from data compression.

Specialized Data Drives exist, which are exclusive to other forms of reading, such as cassettes, film, and other such mediums that may or may not have the Electronic Trait.

When destroyed, any data contained within cannot be recovered. If disabled, you must Succeed on a Computers Check to repair against the disabling effect (or DC 20), or lose the data.

Radio (Standard/Handset)

Traits: Electronic, Audible, Information

Weight: 5 lbs (Tiny) (Handset: 0.1 lbs (Minuscule))

Cost: 5 SP

Complexity: 13

Material: Metal

Actions: 2

This Item has 2 Charges (Handset: 1), which lasts for 12 cumulative Hours each.

A Radio is often used to transmit auditory messages across large distances, though this signal is blocked by more than 50 feet of stone.

A Creature can adjust the channel to a specific frequency, and listen to all sound on that frequency (e.g. 99.1 Hz), which may intercept broadcasts.

A Radio can also be used to transmit audio, or record it onto a specialized Portable Data Drive.

Security Pass

Traits: None

Weight: 0.01 lbs (Minuscule)

Cost: 1 GP

Complexity: 14

Material: Mineral

Actions: 2

A Security Pass is required to access certain functions in various locations, such as a government facility, office building, or hidden laboratory.

You can only buy blank Security Passes, which must be configured for a location by an administrator with access to the corresponding Computer.

Try to avoid rolling Sleight of Hand more than 3 times a session to see if you can get it to work properly, unless it's either Combat, or funny.

Smoke Grenade

Traits: Consumable

Weight: 0.1 lbs (Minuscule)

Cost: 2 SP

Complexity: 11

Material: Minerals

Actions: 3

Duration: 1 Minute

This Item can only be used once.

You can throw the Smoke Grenade up to 60 feet as part of the Interact Action.

At the End of the Round, a 15 ft. Radius around the Grenade is filled with Smoke that Obscures all Creatures within, and blocks Vision and Smell, but doesn't inflict Poison Damage.

The Smoke lasts for the Duration, and is dispersed by Strong Wind.

Firearms

Gatling Gun

Traits: Finesse, Heavy, Loaded 10, Range 60/300 ft., Recoil, Reload 5, Martial, Special, Two-Handed

Weight: 40 lbs (Small)

Cost: 100 GP

Complexity: 22

Material: Metal

Actions: 1

Damage: 1d8 Piercing

This Item uses Rifle Rounds as Ammunition.

Special: The Gatling Gun can reload itself from a Holster that is either worn, or on the ground within 5 feet of it, as part of all Attacks.

Also, instead of making an Attack Roll, you can spend 5 Actions and 100 Rifle Rounds to force all Creatures within a 300 ft. Cone to make a Dexterity Saving Throw against your Dexterity Score:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No Damage, and they can take one Action with the Move Trait.

Grenade Launcher

Traits: Finesse, Fling (Minuscule), Loaded 1, Martial, Range 60/180 ft., Reload 5, Two-Handed

Weight: 25 lbs (Small)

Cost: 35 GP

Complexity: 13

Material: Metal

Actions: 1

Damage: None

Any Grenade fired from this Weapon is activated as if you had performed the Interact Action on it.

Pistol

Traits: Light, Loaded 8, Point-Blank, Range 60/300 ft., Recoil, Reload 2, Simple

Weight: 2 lbs (Minuscule)

Cost: 10 GP

Complexity: 15

Material: Metal

Actions: 1

Damage: 1d6 Piercing

This Item uses Pistol Rounds as Ammunition.

Rifle

Traits: Finesse, Loaded 10, Martial, Range 120/600 ft., Recoil, Reload 3, Versatile 1d10

Weight: 20 lbs (Small)

Cost: 30 GP

Complexity: 17

Material: Metal

Actions: 1

Damage: 1d8 Piercing

This Item uses Rifle Rounds as Ammunition.

Rocket Launcher

Traits: Loaded 1, Martial (Grenade Launcher), Range 120/480 ft., Recoil, Reload 3

Weight: 50 lbs (Medium)

Cost: 50 GP

Complexity: 13

Material: Metal

Actions: 1

Damage: None

This Item uses Rockets as Ammunition (Bomb statistics), which detonate on contact, Hit or Miss.

Shotgun

Traits: Finesse, Loaded 2, Recoil, Reload 4, Saving Throw, Simple, Two-Handed

Weight: 10 lbs (Tiny)

Cost: 15 GP

Complexity: 10

Material: Metal

Actions: 2

Damage: 2d6 Piercing

This Item uses Shot Rounds, and requires all Creatures within a 15 ft. cone to make a Dexterity Saving Throw against your Dexterity Score:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

This effect counts as one Hit/Attack, provided at least one Creature Fails, though each Failure triggers its own effects and Reactions individually.

Sniper Rifle

Traits: Finesse, Heavy, Loaded 6, Martial, Range 600/2,400 ft., Recoil, Reload 5, Two-Handed

Weight: 15 lbs (Small)

Cost: 85 GP

Complexity: 18

Material: Metal

Actions: 3

Damage: 1d12 Piercing

This Item uses High-Caliber Rounds as Ammunition.

The Sniper Rifle has a stand that allows a Creature of any Size to wield it without penalty (also ignoring the Heavy Property), provided they have a stable surface to rest it on.

Stun Gun

Traits: Light, Loaded 4, Range 20/60 ft., Reload 10, Simple (Pistol), Special

Weight: 2 lbs (Minuscule)

Cost: 25 GP

Complexity: 15

Material: Metal

Actions: 1

Damage: 1d4 Lightning

This Item uses a special kind of Pistol Round (Stun Gun Cartridge) as a Clip of Ammunition.

A Creature Hit by this Weapon takes any unresisted Lightning Damage as the Stunned Condition, instead of losing Hit Points.

Special: Damage Bonuses applied to this Weapon (e.g. Precision Damage) doesn't increase the Stunned Condition, but applies as Non-Lethal Lightning Damage. This Weapon also doesn't apply Weapon Damage Modifiers from Strength or Dexterity.

Vehicles

Boat

Traits: Water

Weight: 1,800 lbs (Huge)

Cost: 150 GP

Complexity: 15

Material: Earth or Metal

HP: 20 (Medium: 80)

The Boat can house up to 4 Creatures as crew, and 2 Large Objects as cargo, or 2,500 lbs. It requires at least 1 Fuel Canister to operate, though it can store up to 10 canisters worth.

2 Actions: Steer (1/Round)

You turn the Vehicle up to 90 degrees in any direction.

1 Action: Move (3/Round)

You Move the Vehicle up to 200 feet forward over water.

You can also expend 1 Canister to travel up to 20 miles over the course of 10 Minutes.

The Boat can be capsized by harsh conditions, but isn't directly hindered or Damaged by weather.

Car

Traits: Land

Weight: 2,600 lbs (Large)

Cost: 100 GP

Complexity: 13

Material: Metal

HP: 40 (Medium: 80)

The Car can carry up to 6 Medium Creatures, with room for 2 Medium Objects as cargo, or 5,000 lbs. It requires at least 1 Fuel Canister to operate, though it can store up to 10 Canisters worth.

2 Actions: Steer (1/Round)

You turn the Vehicle up to 90 degrees.

1 Action: Move (3/Round)

You move the Vehicle up to 300 feet forward over land.

You can also expend 1 Fuel Canister to Travel up to 30 miles over the course of 10 Minutes.

Plane

Traits: Air

Weight: 4,000 lbs (Large)

Cost: 500 GP

Complexity: 18

Material: Metal

HP: 20 (Medium: 40)

The Plane can carry up to 2 Medium Creatures as crew, and 2 Small Objects as Cargo or 500 lbs. It requires at least 1 Fuel Canister to operate, though it can store up to 5 canisters worth.

2 Actions: Steer (1/Round)

You turn the Vehicle up to 90 degrees in any direction.

1 Action: Fly (3/Round)

You Move the Plane up to 200 feet forward on the ground, or 4,000 feet while Flying. If the Plane doesn't Fly at least once each Round, it falls.

You can also spend 1 Fuel Canister to travel up to 400 miles in 10 Minutes.

Train

Traits: Land

Weight: 40,000 + 10,000 lbs per extra car (Huge)

Cost: 1,000 + 250 GP per extra car

Complexity: 11

Material: Metal

HP: 40 (Medium: 160)

The Train can house up to 2 Large Creatures as Crew per Car, and 4 Large Objects as cargo, or 250,000 lbs. It also requires either flammable material such as Wood or Coal, or Fuel Canisters to operate (The front car can store 100 Fuel Canisters to burn autonomously).

The Train can pull any number of Cars, which are considered the same Vehicle for Manned Actions.

1 Action: Accelerate

You increase or decrease the distance the Train moves at the Start of each Round by 10 feet, up to 1,500 feet.

This also increases or decreases the distances traveled in 10 Minutes by 0.2 miles.

The Train consumes 20 lbs of Material or 1 Fuel Canister per car to travel 1 mile.

If there is no Crew or stored Fuel at the front car for over 1 Minute, the Train decreases its movement by 10 each Round.

Manned Action: Disconnect (1 Crew)

You disconnect two Cars, or reconnect two Cars that are adjacent to each-other.

The Train cannot turn on its own, and always follows the Track. Most junctions must be operated manually, and are the only way to change paths without a Magical train.

Each car is treated individually for Addons.

Vehicle Addons

Armory

Traits: Improvement

Cost: 100 GP

Complexity: 13

Material: See Base

This Addon can safely store Weapons and Armor that fit in the Vehicle, without risking unwanted Damage or discharge.

Also, any Weapons attached to the Vehicle can draw Ammunition directly from the Armory.

Barracks/Bedroom

Traits: Rest

Cost: 20 GP

Complexity: 5

Material: Fabric

This Addon can house up to 1 additional Creature that is one Size smaller than the Vehicle, allowing them to take a Full Rest while traveling, if cooked food is provided.

Remember that for each Creature you can house, 4 Creatures of a smaller Size can be housed instead.

Factory

Traits: Craft

Cost: 750 GP

Complexity: 25

Material: Metal (Tinkering)

This Addon can be used to maintain 8 copies of an Item you know how to Craft, provided the materials are available.

This only functions if the Vehicle is fueled and running.

Hanger

Traits: Container

Cost: 200 GP

Complexity: 11

Material: See Base

This Addon can store 1 Vehicle that is 1 Size smaller than it.

A Vehicle stored in this way is always fully stocked with any resources it needs, provided the original Vehicle with the Hanger has enough of those resources, or has them redirected to the smaller Vehicle.

Kitchen

Traits: None

Cost: 100 GP

Complexity: 10

Material: See Base

This Addon allows cooked meals to be shared with all Creatures on board, applying any such benefits to all of them.

Medbay

Traits: Buff, Nullify

Cost: 700 GP

Complexity: 30

Material: See Base

A Creature that takes a Long Rest in a Medbay cannot contract any Affliction, and adds the Medicine Bonus of one Creature on-board to any Constitution Saving Throw they make for any reason.

Additionally, a Creature in the Medbay cannot die to Exhaustion, and degrades the Exhaustion, Drained, and Impaired Conditions by an additional 1, even if an Affliction otherwise prevents it, or they don't take a Full Rest.

Sci-Fi

Augmentation Kit

Traits: Electronic

Weight: 0.1 lbs (Minuscule)

Cost: Varies

Complexity: Varies

Material: Metal

This Item can only be used once. Please dispose of all excess components as biohazardous waste after use.

Over the Course of a Long Rest, a Creature that is Proficient in Medicine can apply the Augmentation onto a Creature that isn't themselves. Some hospitals may also perform this operation for 5-50 GP, depending on your Setting.

You can only have one Augmentation for a particular body part unless otherwise stated. Also, you may temporarily lose the functionality of an Augmentation while you are Bloodied, depending on the Augmentation.

Note: Some Augmentations may be available in a Modern Setting at a higher price.

Augmentations come in many forms, each with their own prices. Here are some Examples:

Bio Battery:

Price: 250 GP

Complexity: 16

This Augmentation must go under your skin, and allows you to use Electronic Items that require a Battery, without needing any Charges.

Prosthetic Limb:

Price: 10 GP

Complexity: 10

This Augmentation replaces a Missing limb or body part as if it had never been gone, and works with other Augmentations. This limb is also considered Armored for the purposes of Unarmed Strikes.

Space Adaptation:

Price: 1,000 GP

Complexity: 15

This Augmentation is applied to your Skin and Lungs, allowing you to hold your Breath or use a Breathing Mask in a Vacuum without taking Damage.

Breach Foam Grenade

Traits: Consumable, Terrain

Weight: 0.1 lbs (Minuscule)

Cost: 5 SP

Complexity: 15

Material: Mineral

Actions: 3

This Item can only be used once.

You can throw the Breach Foam Grenade up to 60 feet as part of the Interact Action.

When thrown, this Grenade creates a 5 ft. diameter sphere of solid foam that blocks movement, but also creates a perfect seal against any non-corrosive gasses, liquids and atmosphere.

Creatures in the Space are pushed out harmlessly.

Cloaking Device

Traits: Buff, Electronic, Invisible

Weight: 0.5 lbs (Minuscule)

Cost: 50 GP

Complexity: 25

Material: Metal

Actions: 2

This Item has 1 Charge which lasts for 10 cumulative Minutes.

When activated, you become Invisible to all Constructs, Cameras, and other Technological detection methods.

Cryo-Grenade

Traits: Attack, Consumable, Debuff, Disadvantage, Slowed, Stunned

Weight: 0.1 lbs (Minuscule)

Cost: 5 GP

Complexity: 15

Material: Mineral

Actions: 3

Damage: 1d6 Persistent Cold

This Item can only be used Once.

You can throw the Cryo-Grenade up to 60 feet as part of the Interact Action.

At the End of the Round, all Creatures within a 5 ft. Radius must make a Constitution Saving Throw against your Dexterity Score:

- **Critical Failure:** Same as Failure, but they are Stunned 10 until the Slowed Condition ends.
- **Failure:** They take the listed Damage, and the same amount as Slowed.
- **Success:** Half Damage, and they have Disadvantage on all Attack Rolls or Ability Checks until the End of their Next Turn.
- **Critical Success:** No effect.

A Creature that is Slowed by this Grenade ends the Slowed Condition early if the Persistent Cold Damage is reduced to 0.

Heavy Combat Armor (Standard/Advanced/Superior)

Traits: Heavy Armor

Weight: 30 lbs (Advanced: 50 lbs, Superior: 70 lbs)

Cost: 50 GP (Advanced: 250 GP, Superior: 1,250 GP)

Complexity: 15 (Advanced: 19, Superior: 24)

Material: Metal

Damage Reduction: +4 Physical (Advanced: +7, Superior: +10)

While Wearing this Armor, your AC is 13 (Advanced: 15, Superior: 17), but cannot be increased or decreased by Ability Scores.

While wearing Heavy Armor, the Move Action costs 3 Action Points instead of 1, and you have Disadvantage on Stealth Checks.

Hologram Emitter

Traits: Electronic, Visual

Weight: 0.1 lbs (Minuscule)

Cost: 10 GP

Complexity: 18

Material: Metal

Actions: 2

This Item has 1 Charge, which lasts for 10 cumulative Minutes.

This Item can replay any holographic recording from a Portable Data Drive, and can be configured to play such a recording on loop, freeze when the loop ends, or simply disappear.

A Creature that succeeds on a DC 18 Perception Check can determine the nature of the Hologram as if it were an illusion.

Hover Plate

Traits: Electronic, Improvement, Movement

Weight: 2 lbs (Medium)

Cost: 15 GP

Complexity: 20

Material: Metal

Actions: 2

This Plate can hold up to 1,000 lbs no more than 5 feet off the ground. A Creature that is mounted on this Plate can move 50 feet as a single Move Action, but only once per Round.

A larger or smaller version has its Capacity quadrupled or quartered respectively, and some are designed as hoverboards.

Hyperdrive Fuel Canister

Traits: Consumable, Special

Weight: 10 lbs (Tiny)

Cost: 50 GP

Complexity: 24

Material: Mineral

Actions: 5

This special type of Fuel Canister is required to use a Hyperdrive. For Ships larger than Medium, you need a Canister that is one Size larger than usual (see pg. 92 for modifications).

Special: All Feats and Actions with the Craft Trait cannot Craft this Item, unless it is Crafted as a Legendary Magic Item (still considered Non-magical).

Jetpack

Traits: Improvement, Movement

Weight: 25 lbs (Small)

Cost: 250 GP

Complexity: 16

Material: Metal

This Item requires two Fuel Canisters in order to operate, each of which lasts for 10 cumulative Minutes.

While the Jetpack is activated, you can Fly 50 feet as a Move Action, but only once each Turn.

This is considered a Hover Speed, though you may lose control if knocked Prone, or Incapacitated.

Life Support (Base/Mask/Standard/Superior)

Traits: Electronic, Nullify

Weight: 5 lbs (Small)

Cost: 5 GP (Mask: 5 SP, Standard: 25 GP, Superior: 500 GP)

Complexity: 12 (Mask: 8, Standard: 13, Superior: 18)

Materials: Fabric (Superior & Mask: Fabric and Metal (Electronics))

This Item has 2 Charges, which lasts for 1 cumulative Hour each. Life Support is always rechargeable.

You may wear Life Support Gear either over, or underneath armor.

While wearing Life Support, you can breathe normally in all environments, you cannot contract Diseases, and are unaffected by Damage from being in a Vacuum. However, it doesn't protect from other effects that aren't Inhaled or Contact.

If you take Piercing or Slashing Damage that reduces your Hit Points, the Duration is reduced to 10 Minutes, and cannot be extended until the gear is repaired.

Standard: This Gear grants Resistance 5 to all Damage caused by environments such as volcanoes, radioactive isotopes, or corrosive atmospheres, which is reduced by 1 every time you take Damage that Damages the gear, and lasts until repaired.

Superior: Same as Standard, but this Gear cannot be Damaged by any means, but lasts for no more than 10 cumulative Minutes per charge. However, it does hold up to 12 Charges at once.

Mask: You can breathe normally in all environments, and are unaffected by Inhaled effects, but doesn't protect against environments such as a Vacuum (considered holding your breath). This Mask cannot be Damaged, unless Targeted directly, but is also not disabled by Ionic effects.

Light Combat Armor (Standard/Advanced/Superior)

Traits: Light Armor

Weight: 5 lbs (Advanced: 10 lbs, Superior: 15 lbs)

Cost: 10 GP (Advanced: 50 GP, Superior: 250 GP)

Complexity: 13 (Advanced: 16, Superior: 19)

Material: Fabric

Damage Resistance: +2 Physical (Advanced: +3, Superior: +4)

While wearing this Armor, your base AC is 10 (Advanced: 11, Superior: 12).

Map Projector

Traits: Electronic, Information, Visual

Weight: 0.1 lbs (Minuscule)

Cost: 15 GP

Complexity: 20

Material: Metal

Actions: 2

This Item has 1 Charge, which lasts for a cumulative 1 Hour.

Not only can this Item be used to navigate through unknown terrain, it also allows you to spot hazards in advance. It may not have the ability to highlight these hazards for you, depending on how advanced it is or isn't.

Medium Combat Armor (Standard/Advanced/Superior)

Traits: Medium Armor

Weight: 20 lbs (Advanced: 30 lbs, Superior: 40 lbs)

Cost: 25 GP (Advanced: 125 GP, Superior: 750 GP)

Complexity: 14 (Advanced: 18, Superior: 22)

Material: Metal

Damage Resistance: +3 Physical (Advanced: +5, Superior: +7)

While Wearing this Armor, your AC is 12 (Advanced: 13, Superior: 14), but cannot be increased by more than +2 from your Dexterity Modifier.

While wearing Medium Armor, the Move Action costs 2 Action Points instead of 1.

Unlike most kinds of Medium Armor, this Armor doesn't impose any penalty to Ability Checks.

Nanobot Deployer

Traits: Electronic

Weight: 0.1 lbs (Minuscule)

Cost: 25 GP

Complexity: 13

Material: Metal

Actions: 2

This Item has 1 Charge, which lasts for 1 cumulative Hour.

While active, the Deployer activates a Nanobot Swarm that has been loaded into the Deployer over the course of a Breather.

While the Nanobot Swarm is active, you can use the Deployer again to move the Swarm up to 10 feet, Activate one of its abilities, or deactivate and recollect the swarm if it is within 10 feet of you, which immediately reloads it.

Each deployer can only control one swarm at a time, though a Computer can be used to automatically operate a Swarm through a connected Deployer.

Nanobot Swarm

Traits: Consumable, Electronic

Weight: 0.1 lbs (Minuscule)

Cost: Varies

Complexity: Varies

Material: Metal

A Nanobot Swarm can be deployed with a Nanobot Deployer, and remains active until deactivated, or the Nanobot Deployer runs out of power.

A Nanobot Swarm can only ever Attack once each Round, and has a 50 ft. Fly Speed, though it can also fit through any opening larger than about 1/8th of an inch. It cannot be Hit by any Attack, but when it takes Damage, it requires an additional Interact Action to reset if not within an active source like a pool of acid or lava, which completely disables it.

Nanobot Swarms come in many varieties, each with their own prices. Some examples are as follows:

Disabler Bot:

Price: 500 GP

Complexity: 18

When Activated (as a Reaction), one Item or Object of your choice that is adjacent to the Nanobot Swarm cannot Trigger (such as a Grenade).

However, if it was already activated (such as a Grenade), it goes off the next time the Conditions are met (such as at the End of the Round), once it is no longer adjacent to the Swarm.

Repair Bot:

Price: 100 GP

Complexity: 25

When Activated, an adjacent Construct or Object regains 2d6 Hit Points, or inflict the same amount as Force Damage.

Utility Bot:

Price: 250 GP

Complexity: 20

When Activated, the Nanobot Swarm allows you to spend Actions to take the Interact Action on any Object adjacent to the Nanobot Swarm, as long as you do so through the Nanobot Deployer.

Personal Shield Emitter

Traits: Armor, Electronic

Weight: 0.5 lbs (Minuscule)

Cost: 50 GP (Standard: 250 GP, Superior: 2,500 GP)

Complexity: 15 (Standard: 20, Superior: 25)

Materials: Metal (Electronic)

Reactions: 2

Trigger: When you take Non-Psychic Damage from an Attack.

This Item can store 1 Charge, which lasts for 5 Uses.

When activated, you take no Damage, or effects from the Triggering Attack.

Standard: This Forcefield can be activated as an Action instead of a Reaction, and lasts until the End of your Next Turn, or it runs out of Uses. You cannot discriminate between Attack Rolls with this Forcefield.

Superior: This Forcefield can remain active for up to 1 Minute, and grants 5 Physical Resistance as long as it has at least 1 Charge. It also doesn't lose Charges on Damage Sources that don't reduce your Hit Points.

Plasma Blade

Traits: Light, Martial (Longsword)

Weight: 0.5 lbs (Minuscule)

Cost: 75 GP

Complexity: 17

Material: Ceramic

Actions: 2

Damage: 1d8 Fire + 1d4 Slashing

This Item has requires a Minuscule Fuel Canister which lasts for a cumulative 1 Minute.

Plasma Blades cannot inflict Bleed Damage through any means.

Plasma Torch

Traits: Attack

Weight: 2 lbs (Minuscule)

Cost: 10 GP

Complexity: 10

Material: Metal

Actions: 2

Damage: 1d8 Fire

This Item requires a Fuel Canister, which lasts for 1 cumulative Hour.

The Plasma Torch can be used to cut through Metal Walls and Objects over the course of 10 Minutes.

Stationary Shield Emitter **(Standard/Advanced/Superior)**

Traits: Armor, Electronic, Terrain

Weight: 0.5 lbs (Minuscule)

Cost: 25 GP (Advanced: 150 GP, Superior: 1,000 GP)

Complexity: 12 (Advanced: 18, Superior: 24)

Materials: Metal (Electronic)

Actions: 3

This Item has 1 Charge, which lasts for up to 1 Minute.

When anchored to a stable surface, a 10 ft. Diameter around the emitter is surrounded with a forcefield that prevents entering or exiting the Radius, and blocks Attacks and effects (including Environmental Hazards) from passing through the forcefield. However, Light and Sound still pass through.

At the End of the Duration, or when the projector itself is moved from the surface it was anchored to, the Forcefield deactivates, and must be recharged.

You can also configure the Forcefield instead of Activating it.

Note: Some effects without the Damage Trait, or Any with the Audible, Mental, or Visual Traits still pass through. Some Spells and effects such as Fireball can originate from inside or outside the forcefield, but the subsequent effects are contained accordingly.

Advanced: The Diameter can be increased to up to 20 feet, and can be configured to allow All Creatures to pass through the Force Field. When configured in this way, any Attacks or Saving Throws that would normally be blocked instead treat the Force Field as Full Cover.

Superior: The Diameter can be increased to up to 40 feet, and comes with 5 special tags (additional tags may be Crafted with 0.05 lbs of Electronics). A Creature with one of these special tags may pass through the Forcefield unhindered. All Attacks and other Creatures must continue to follow the configured behavior.

Firearms

Ionic Stunner

Traits: Electronic, Ionic, Light, Loaded 6, Range 60/180 ft., Reload 3, Simple (Pistol), Special, Stunned

Weight: 1 lbs (Minuscule)

Cost: 10 GP

Complexity: 21

Material: Metal

Actions: 1

Damage: 1d6 Lightning

This Weapon uses Batteries as an Ammunition Clip, but treats the stored Charges as Ammunition. The contained Batteries are returned once expended or replaced.

The Lightning Damage dealt by this Weapon disables Electronic Items until repaired, or inflicts the Stunned Condition equal to the Lightning Damage dealt, instead of reducing Hit Points.

Special: Damage Bonuses applied to this Weapon (e.g. Precision Damage) doesn't increase the Stunned Condition, but applies as Non-Lethal Lightning Damage. This Weapon also doesn't apply Weapon Damage Modifiers from Strength or Dexterity.

Laser Cannon

Traits: Electronic, Finesse, Heavy, Loaded 2, Martial (Gatling Gun), Range 200/2,400 ft., Reload 5, Two-Handed

Weight: 50 lbs (Medium)

Cost: 35 GP

Complexity: 18

Material: Metal

Actions: 1

Damage: 1d12 Fire

This Item uses Batteries as the clip, but treats the stored Charges as Ammunition. The contained Batteries are returned once expended or replaced.

Laser Pistol

Traits: Electronic, Finesse, Light, Loaded 4, Range 120/600 ft., Reload 2, Simple (Pistol)

Weight: 2 lbs (Minuscule)

Cost: 20 GP

Complexity: 14

Material: Metal

Actions: 1

Damage: 1d4 Fire

This Item uses Batteries as the clip, but treats the stored Charges as Ammunition. The contained Batteries are returned once expended or replaced.

Laser Rifle

Traits: Electronic, Finesse, Loaded 10, Martial (Rifle), Range 480/1,200 ft., Reload 3, Versatile d10

Weight: 20 lbs (Small)

Cost: 20 GP

Complexity: 16

Material: Metal

Actions: 1

Damage: 1d8 Fire

This Item uses Batteries as the clip, but treats the stored Charges as Ammunition. The contained Batteries are returned once expended or replaced.

Plasma Cannon

Traits: Electronic, Finesse, Heavy, Loaded 4, Martial (Gatling Gun), Range 100/1,200 ft., Recoil, Reload 10, Two-Handed

Weight: 50 lbs (Medium)

Cost: 50 GP

Complexity: 21

Material: Metal

Actions: 1

Damage: 1d12 Fire + 1d12 Force

This Item uses Small Gas Canisters (Fuel Canister statistics) and Small Batteries as the clip, but treats the stored Charges as Ammunition. The contained Canister and Battery are returned once they are expended or replaced.

The Gas Canister is not required or expended in atmosphere.

Plasma Pistol

Traits: Electronic, Finesse, Light, Loaded 8, Range 90/450 ft., Recoil, Reload 5, Simple (Pistol)

Weight: 2 lbs (Minuscule)

Cost: 30 GP

Complexity: 15

Material: Metal

Actions: 1

Damage: 1d4 Fire + 1d4 Force

This Item uses Gas Canisters (Fuel Canister statistics) and Batteries as the clip, but treats the stored Charges as Ammunition. The contained Canister and Battery are returned once they are expended or replaced.

The Gas Canister is not required or expended in a gaseous atmosphere.

Plasma Rifle

Traits: Electronic, Finesse, Loaded 30, Martial (Rifle), Recoil, Reload 200/900 ft., Versatile (d10)

Weight: 20 lbs (Small)

Cost: 35 GP

Complexity: 18

Material: Metal

Actions: 1

Damage: 1d8 Fire + 1d8 Force

This Item uses Tiny Gas Canisters (Fuel Canister statistics) and Tiny Batteries as the clip, but treats the stored Charges as Ammunition. The contained Canister and Battery are returned once they are expended or replaced.

The Gas Canister is not required or expended in atmosphere.

Vehicles

Assault Class

Traits: Space

Weight: 10,000 lbs (Huge)

Cost: 5,000 GP

Complexity: 18

Materials: Metal

HP: 20 (Medium: 80)

An Assault Class can carry up to 2 Large Creatures, or Objects alongside 1 Medium Creature to pilot. It requires at least 1 Medium Fuel Canister to operate, but can store up to 8.

This Ship has 3 unique Systems that can be piloted independently: Pilot (All), Weapons (Fire + Attachments), Generator (Route Power + Hyperdrive).

Manned Action: Fly (1 Power, 3/Round)

The Assault Class flies up to 100 feet in any direction. However, it must use at least 1 Action to Move while under the effects of Gravity, or descend 50 feet.

Alternatively, you can spend 1 Fuel to enter or leave atmosphere, or travel up to 1,000 miles in 10 Minutes.

Manned Action: Fire (4 Rifle Rounds, 1 Power, 240/600 ft.)

You make a Ranged Weapon Attack against a Target within Range. On a Hit, this Weapon deals 4 (1d6) Piercing Damage, which doesn't deal increased Damage based on Size difference.

Manned Action: Route Power (Base: 3 Power)

You Route any amount of Power from one system to another. Certain Manned Actions require Power to function, but Power is occupied, not consumed.

Manned Action: Hyperdrive (1 Hyperdrive Fuel, 2 Power)

After 1 Minute, you jump to an adjacent system, or any planet or other object in the current system (negligible Fuel use).

If the Hyperdrive goes offline before a Jump can be completed, the Ship takes 4 (1d6) Force Damage (Medium: 14, 4d6).

Carrier

Traits: Space

Weight: 100,000 lbs (Gargantuan)

Cost: 75,000 GP

Complexity: 25

Material: Metal

HP: 20 (Medium: 160)

The Carrier can house up to 16 Large Creatures, with room to store up to 4 Huge Objects. It also requires at least 1 Large Fuel Canister to operate, but can store up to 4.

This Ship has 3 unique Systems that can be piloted independently: Pilot (All), Weapons (Fire + Attachments), Generator (Route Power + Hyperdrive)

Manned Action: Fly (1 Power, 3/Round)

The Carrier flies up to 80 feet in any direction. However, if it doesn't use at least 1 Action to Move while under the effects of Gravity, it descends 80 feet.

Alternatively, you can spend 1 Fuel to enter or leave atmosphere, or travel up to 800 miles in 10 Minutes.

Manned Action: Fire (8 Rifle Rounds, 1 Power, 240/600 ft.)

You make a Ranged Weapon Attack against a Target within Range. On a Hit, this Weapon deals 4 (1d6) Piercing Damage, which doesn't deal increased Damage based on Size difference.

Manned Action: Route Power (Base: 4 Power)

You Route any amount of Power from one system to another. Certain Manned Actions require Power to function, but Power is occupied, not consumed.

Manned Action: Hyperdrive (1 Hyperdrive Fuel, 2 Power)

After 1 Minute, you jump to an adjacent system, or any planet or other object in the current system.

If the Hyperdrive goes offline before a Jump can be completed, the Ship takes 4 (1d6) Force Damage (Medium: 28, 8d6).

Manned Action: Attachment/Addon

You use the Action of an Attachment or Addon.

Special: This Ship comes with 4 Hangers built in.

Cruiser

Traits: Space

Weight: 10,000 lbs (Huge)

Cost: 7,500 GP

Complexity: 15

Material: Metal

HP: 10 (Medium: 160)

The Cruiser can house up to 16 Medium Creatures, with room to store up to 4 Large Objects. It also requires at least 1 Large Fuel Canister, but can hold up to 8.

This Ship has 2 unique Systems that can be piloted independently: Pilot (All), Generator (Route Power + Hyperdrive)

Manned Action: Fly (1 Power, 3/Round)

The Cruiser flies up to 100 feet in any direction.

However, if it doesn't use at least 1 Action to Move while under the effects of Gravity, it descends 50 feet.

Alternatively, you can spend 1 Fuel to enter or leave atmosphere, or travel up to 1,000 miles in 10 Minutes.

Manned Action: Route Power (Base: 3 Power)

You Route any amount of Power from one system to another. Certain Manned Actions require Power to function, but Power is occupied, not consumed.

Manned Action: Hyperdrive (1 Hyperdrive Fuel, 2 Power)

After 1 Minute, you jump to an adjacent system, or any planet or other object in the current system.

If the Hyperdrive goes offline before a Jump can be completed, the Ship takes 4 (1d6) Force Damage (Medium: 14, 4d6).

Manned Action: Attachment/Addon

You use the Action of an Attachment or Addon.

Fighter

Traits: Space

Weight: 2,000 lbs (Large)

Cost: 500 GP

Complexity: 15

Materials: Metal

HP: 15 (Medium: 30)

A Fighter is a small ship that has little more than the bare necessities, such as life support, rudimentary communications, room for up to 2 Medium Creatures, and storage for up to 2 Small Objects, or Ammunition for a Weapon. It also requires at least 1 Large Fuel Canister to operate, and can hold up to 2.

Manned Action: Fly (1 Power, 3/Round)

The Fighter flies up to 200 feet in any direction.

However, if it doesn't use at least 1 Action to Move while under the effects of Gravity, it descends 40 feet.

Alternatively, you can also spend 1 Fuel to enter or exit atmosphere, or travel up to 2,000 miles in 10 Minutes.

Manned Action: Fire (2 Rifle Rounds, 1 Power, 120/360 ft.)

You make a Ranged Weapon Attack against a Target within Range. On a Hit, this Weapon deals 4 (1d6) Piercing Damage, which doesn't deal increased Damage based on Size difference.

Manned Action: Route Power (Base: 2 Power)

You Route any amount of Power from one system to another. Certain Manned Actions require Power to function, but Power is occupied, not consumed.

Miner Pod

Traits: Space

Weight: 500 lbs (Large)

Cost: 50 GP

Complexity: 11

Materials: Metal

HP: 10 (Medium: 20)

A Mining Pod is basically a fancy thruster attached to a metal frame with storage space for 2 Medium Objects, plus a Medium Creature and a replaceable mining arm. A Creature inside has about 10 Minutes of breathable air before they begin to suffocate. It also requires 1 Fuel Canister to operate, and is considered unpowered without it.

It is not sturdy enough to survive a rough re-entry (entering an atmosphere without engine use). It also cannot accept attachments or addons without extensive modification.

Manned Action: Fly (3/Round)

The Mining Pod flies up to 50 feet in any direction. If the Mining Pod doesn't fly once each Round, it falls.

Alternatively, you can spend 1 Fuel to travel up to 250 miles as a round trip.

Manned Action: Mine

The Mining Pod deals 1d6 Piercing Damage to an Object it can Reach, which cannot be reduced by Armor. This Action can also be used to store any material that has been Damaged in this way.

Variant: Escape Pod (No Mining Arm, No Engine, Safe Landing Gear, 8 Medium Creature Capacity).

Starship

Traits: Space

Weight: 2,000,000 lbs (Colossal)

Cost: 5,000,000 GP

Complexity: 30

Material: Metal

HP: 30 (Medium: 960)

The Starship can house up to 2 Gargantuan Creatures, with room to store up to 8 Huge Objects. It also requires 1 Huge Fuel Canister to operate.

This Ship has 3 unique Systems that can be piloted independently: Pilot (All), Weapons (Fire + Attachments), Generator (Route Power + Hyperdrive)

Manned Action: Fly (1 Power, 3/Round)

The Starship flies up to 50 feet. However, if it doesn't use at least 1 Action to move under the effects of Gravity, it descends 200 feet.

Alternatively, you can spend 1 Fuel Canister to enter or leave atmosphere, or travel up to 1000 miles.

Manned Action: Fire (16 Assault Rounds, 240/600 ft.)

You make a Ranged Weapon Attack against a Target within Range. On a Hit, this Weapon deals 4 (1d6) Piercing Damage, which doesn't deal increased Damage based on Size difference.

Manned Action: Route Power (Base: 5)

You Route any amount of Power from one system to another. Certain Manned Actions require Power to function, but Power is occupied, not consumed.

Manned Action: Hyperdrive (1 Hyperdrive Fuel, 2 Power)

After 1 Minute, you jump to an adjacent system, or any planet or other object in the current system.

If the Hyperdrive goes offline before a Jump can be completed, the Ship takes 4 (1d6) Force Damage (Medium: 14, 4d6).

Vehicle Addons

Armor Plating

(Basic/Standard/Advanced/Elite/Superior)

Traits: Armor, Resistance

Weight: 500 lbs

Cost: 50 GP (Standard: 250 GP, Advanced: 1,250 GP, Elite: 7,500 GP, Superior: 25,000 GP)

Complexity: 5

Material: Metal

Damage Reduction: +5 Physical (Standard: +6, +1 Non-Physical, Advanced: +8 + 2 Non-Physical, Elite: +11 + 3 Non-Physical, Superior: +15 + 4 Non-Physical)

All Sci-Fi Vehicles come with Basic Armor Plating.

When applying this Addon, you can change the primary Resistance Type at no additional cost. This only applies to one Damage Type at a time.

The Price and Weight scales based on Vehicle Size, and assumes a Large Vehicle.

Autopilot

(Basic/Standard/Advanced/Elite/Superior)

Traits: Electronic

Weight: 10 lbs (Tiny)

Cost: 15 GP, (Standard: 125 GP, Advanced: 500 GP, Elite: 1,500 GP, Superior: 25,000 GP)

Complexity: 7 (Standard: 10, Advanced: 13, Elite: 16, Superior: 19)

Material: Metal

The Autopilot requires 1 Power per Tier.

An Autopilot allows any Creature to define a destination, or Target as a Manned Action. The Autopilot will do its best to navigate towards the destination or Target using any Movement-based Actions up to once per Tier every Turn, avoiding environmental hazards, and hostile Constructs. It acts on Initiative Count 20 if not operated.

An Autopilot also sets the AC of a Vehicle to a minimum of 10 (Standard: 11, Advanced: 13, Elite: 15, Superior: 17), and acts as if it has a +0 Bonus to Dexterity Saving Throws (Standard: +1, Advanced: +3, Elite: +5, Superior: +7).

A Vehicle without a Pilot or Autopilot automatically Fails all Dexterity Saving Throws.

Drone Bay

Traits: Minion, Special

Cost: 350 GP

Complexity: 13

Material: See Base

This Addon requires 1 Power, and at least 1 Crew.

A Drone Bay can be used to deploy Vehicles within a Hanger without a Creature inside. Any Crew in this Bay can operate deployed Vehicles as if they were piloting them simultaneously, sharing the Manned Action Limit between the ones they control. Each Vehicle can only benefit from 1 Crew member at a time.

Special: An Autopilot can substitute for Crew if present, but also divides their Manned Actions.

Energy Shield

(Basic/Standard/Advanced/Elite/Superior)

Traits: Armor, Electronic

Weight: 50 lbs (Small)

Cost: 125 GP (Standard: 750 GP, Advanced: 2,500 GP, Elite: 20,000 GP, Superior: 75,000 GP)

Complexity: 15 (Standard: 18, Advanced: 21, Elite: 24, Superior: 27)

Material: Metal

This Addon requires 1 Power per Layer, up to a maximum of 1 Layer (Standard: 2 layers, Advanced: 3 Layers, Elite: 4 Layers, Superior: 5 Layers).

An Energy Shield prevents all Damage from one Damage Source, but loses 1 Layer every time it does so. It also prevents the loss of Atmosphere in the event of a hull breach.

An Energy Shield regains 1 Layer at the Start of each Round, provided it still has sufficient Power.

The Price and Weight scales based on Vehicle Size, and assumes a Large Vehicle.

Variant: Absorption Shield

An Absorption Shield grants 10 Temporary Hit Points in place of each Layer. Don't forget, this is scaled up.

Engine Optimizer
(Basic/Standard/Advanced/Superior)

Traits: Electronic, Improvement, Movement

Weight: 5 lbs (Tiny)

Cost: 25 GP (Standard: 150 GP, Advanced: 300 GP, Superior: 800 GP)

Complexity: 13 (Standard: 15, Advanced: 18, Superior: 21)

Material: Metal

This Addon requires 1 Power per Tier.

When activated, the Vehicle moves an additional 60 (Standard: 80, Advanced: 100, Superior: 120) feet when Moving.

Vehicles with this Addon that Fly can't fall, unless power is lost.

Flak Cannon
(Basic/Standard/Advanced/Superior)

Traits: Attack, Saving Throw, Simple (Shotgun)

Weight: 50 lbs (Small)

Cost: 75 GP (Standard: 200 GP, Advanced: 500 GP, Superior: 1,000 GP)

Complexity: 8 (Standard: 13, Advanced: 17, Superior: 20)

Material: Metal

Damage: 1d6 Piercing (Standard: 2d6, Advanced: 3d6, Superior: 4d6)

This Addon requires 1 Power, and consumes 2 Shot Rounds per Manned Action, which is doubled for each Size Category above Large when fired.

Any Object or Creature within a 30 ft. Cone must make a Dexterity Saving Throw against the Dexterity Score of the Creature activating this Weapon:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Damage dealt in this way removes an equal number of Energy Shields, but treats Resistance as if it were doubled.

The Price, Weight and Area scales based on Vehicle Size, and assumes a Large Vehicle.

FTL Drive (Basic/Standard/Advanced/Superior)

Traits: Electronic, Teleport, Travel

Weight: 200 lbs (Medium)

Cost: 750 GP (Standard: 2,500 GP Advanced: 50,000 GP, Superior: 200,000 GP)

Complexity: 20 (Standard: 23, Advanced: 26, Superior: 30)

Material: Metal

This Addon requires 1 Power per Tier, and consumes Hyperdrive Fuel Canisters when used.

All Spaceships intended for interstellar Travel come with a Basic FTL Drive.

When Activated, the FTL Drive spends 1 Minute to charge. During this time, any malfunction that causes the FTL Drive to become Offline deals 1d6 Force Damage to the Ship.

After the FTL Charges, you may expend 1 Hyperdrive Fuel to jump no more than 1 System (Standard: 2, Advanced: 3, Superior: 4) at a time.

The Hyperdrive can store up to 10 Canisters of Fuel at a time.

Improved Reactor

Traits: Electronic, Improvement

Cost: 75 GP

Complexity: 10

Material: Metal

All Ships come with a Reactor that provides Power for any and all functions it has or serves (listed in the Route Power Action).

An Improved Reactor can provide +1 Power to the Vehicle, which can be Routed to an Action as needed.

This Addon can be manned to provide additional Manned Actions to the Vehicle similarly to the Captain, but only to Systems that require more than 1 Power.

This Addon can be installed additional times, increasing the Cost by 75 GP, the Complexity by 1, and the total power provided by +1 (up to +20) each time.

The Price scales based on Vehicle Size, and assumes a Large Vehicle.

Ion Cannon

(Basic/Standard/Advanced/Elite/Superior)

Traits: Attack, Electronic, Ionic, Martial (Rifle)

Weight: 35 lbs (Small)

Cost: 75 GP (Standard: 200 GP, Advanced: 500 GP, Elite: 1,000 GP, Superior: 2,000 GP)

Complexity: 23 (Standard: 25, Advanced: 27, Elite: 29, Superior: 30)

Material: Metal

Damage: 1d4 Lightning (Standard: 2d4, Advanced: 3d4, Elite: 4d4, Superior: 5d4)

This Addon requires 1 Power per Tier above Basic.

This Weapon only does Lightning Damage to Creatures, which is Non-lethal, though this Damage isn't increased based on Size.

When used on a Vehicle, the Vehicle loses 1 (Standard: 2, Advanced: 3, Elite: 4, Superior: 5) Power until the End of the Round.

The Price and Weight scales based on Vehicle Size, and assumes a Large Vehicle.

Laser Weapon

(Basic/Standard/Advanced/Elite/Superior)

Traits: Attack, Electronic, Martial (Rifle)

Weight: 40 lbs (Small)

Cost: 60 GP (Standard: 125 GP, Advanced: 300 GP, Elite: 750 GP, Superior: 2,000 GP)

Complexity: 10 (Standard: 13, Advanced: 16, Elite: 19, Superior: 22)

Material: Metal

Damage: 1d6 Fire (Standard: 2d6, Advanced: 3d6, Elite: 4d6, Superior: 5d6)

This Addon requires 1 Power, +1 for each Tier above Basic.

Any Creature in part of a Vehicle or structure that is Hit by this Weapon also takes the listed Damage, though Damage taken this way isn't increased based on Size.

The Price and Weight scales based on Vehicle Size, and assumes a Large Vehicle.

Machine Gun

(Basic/Standard/Advanced/Elite/Superior)

Traits: Attack, Electronic, Martial (Gatling Gun)

Weight: 50 lbs (Small)

Cost: 40 GP (Standard: 80 GP, Advanced: 120 GP, Elite: 160 GP, Superior: 200 GP)

Complexity: 8 (Standard: 10, Advanced: 12, Elite: 14, Superior: 16)

Material: Metal

Actions: 1d8 Piercing (Standard: 2d8, Advanced: 3d8, Elite: 4d8, Superior: 5d8)

This Addon requires 1 Power, and consumes 1 Rifle Round when used, which is doubled for each Size Category the Vehicle is above Medium.

All Ships that come with Weapons come with a Basic Machine Gun.

Missile Launcher

(Basic/Standard/Advanced/Elite/Superior)

Traits: Attack, Electronic, Martial (Grenade Launcher), Saving Throw

Weight: 100 lbs (Small)

Cost: 175 GP (Standard: 350 GP, Advanced: 750 GP, Elite: 2,000 GP, Superior: 5,000 GP)

Complexity: 13 (Standard: 16, Advanced: 19, Elite: 22, Superior: 25)

Material: Metal

Damage: 1d6 Piercing + 1d6 Thunder (Standard: 2d6 + 2d6, Advanced: 3d6 + 3d6, Elite: 4d6 + 4d6, Superior: 5d6 + 5d6)

This Addon requires 1 Power, and consumes Tiny 1 Missile (Bomb Statistics) when used, which increases in Size based on the Vehicles Size Category.

All Creatures and Objects within 15 feet of the Target must make a Dexterity Saving Throw, against the Manning Creature's Dexterity Score:

- **Critical Failure:** Double Damage.
- **Failure:** They take the Listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

The Price, Weight and Ammo Size scales based on Vehicle Size, and assumes a Large Vehicle.

Targeting System
(Basic/Standard/Advanced/Elite/Superior)

Traits: Electronic

Weight: 1 lbs (Tiny)

Cost: 50 GP (Standard: 150 GP, Advanced: 350 GP, Elite: 1,000 GP, Superior: 2,500 GP)

Complexity: 8 (Standard: 12, Advanced: 17, Elite: 23, Superior: 30)

Material: Metal

This Addon requires 1 Power for each Tier.

While this Addon is active, All Weapon Attacks from the Vehicle have a minimum Attack Bonus of +2 and DC of 10 (Standard: +4, 12, Advanced: +6, 14, Elite: +8, 16, Superior: +10, 18).

Additionally, the Vehicle can make one Attack on the same Target each Round while unmanned.

Magical Items

Magical Items are intentionally separated, as there are situations where they might be out of place, or exceptionally hard to find.

However, some are exceptionally strong to have in abundance, or even on demand, and thus require Attunement.

Attuning to a Magical Item can be done while you take a Short Rest, though you can only be Attuned to no more than three at a time.

Alchemist's Fire

"Sometimes also known as Greek fire! Don't ask me what a Greek is. I haven't the faintest idea." -Ivote Ofab

Traits: Common to Legendary, Consumable, Thrown 20/60 ft.

Weight: 0.5 lbs (Minuscule)

Cost: 5 GP, (Uncommon: 25 GP, Rare: 200 GP, Very Rare: 1,000 GP, Legendary: 5,000 GP)

Complexity: 12 (Uncommon: 14, Rare: 17, Very Rare: 20, Legendary: 23)

Material: Minerals

Actions: 2

Damage: 1d4 Fire Damage + 1 Persistent Fire Damage (Uncommon: 2 Persistent, Rare: 4 Persistent, Very Rare: 8 Persistent, Legendary: 16 Persistent)

This Item can only be used once.

Variant: Alchemist's Frost

Inflicts Cold Damage instead of Fire Damage.

Variant: Alchemist's Sparks

Inflicts Lightning Damage instead of Fire Damage.

Variant: Alchemist's Acid

Inflicts Acid Damage instead of Fire Damage.

Ambrosia

"One of the hardest concoctions for even a master Alchemist to try and brew up. And while it works as advertised, I would look elsewhere if you just want something tasty." -Ivote Ofab

Traits: Artifact, Buff, Consumable, Healing, Ingested, Nullify, Resurrection

Weight: 0.5 lbs (Minuscule)

Cost: 10,000,000 GP

Complexity: 40

Material: Herbs

Actions: 5

Duration: 10 Minutes

This Item can only be used once, and returns a Flask.

The Target is returned to Full Health, cured of all Afflictions (regardless of description), regains all Hit Dice and Class Resources, is Resurrected at Full Health if they were dead, and regain all Missing Limbs (can also remove the Undead Creature Type if you wish).

For the Duration, the Target is Immune to all Afflictions, Conditions, Damage, Debuffs, Magical effects, and Saving Throws if they are Unwilling Targets. This includes Curses, and reality changing effects, such as the Wish Spell.

Finally, the Target can remove any Bleeds that aren't based on any social standing, such as Lycanthropy, Sacrificial Training or Vampirism, and they are restored to a youthful state, and ceasing to age for the next 100 years.

Amulet of Regeneration

"Now that is really something. I can burn you as much as I want, and you'll still be alive to watch your friends fall!" -Borukan the Smith

Traits: Rare, Cursed, Healing

Weight: 0.05 lbs (Minuscule)

Cost: 5,000 GP

Complexity: 19

Material: Metal

Requires Attunement from any Non-Undead

You have Persistent Healing equal to your Proficiency Bonus.

Curse (DC 19): While you are Attuned, you lose all Hit Dice and cannot regain them Until your Attunement ends. A Successful Remove Curse also removes the main effect.

Amulet of Speech

"In order to ensure the capabilities of our students in co-operation, we provide accommodations for those that don't speak common." -Grandmaster Musasushi

Traits: Common, Audible, Information, Language

Weight: 0.05 lbs (Minuscule)

Cost: 25 GP

Complexity: 15

Material: Metal

Requires Attunement

While Wearing this Amulet, all Creatures that hear you can understand you as if you speak their native language, even if either Language isn't spoken.

Anti-Magic Restraints

"I used to use these on trespassers, but then I remembered that I'm a fire breathing Dragon, with the power to make arcane wards." -Borukan the Smith

Traits: Uncommon, Nullify

Weight: 0.1 lbs (Minuscule)

Cost: 250 GP

Complexity: 16

Material: Metal

Actions: 2

A Creature that wears these Restraints cannot use any Actions with the Magical Trait. The DC to pick them is 15, while the DC to break them is 25.

Arcanist's Eyepiece

"For an apprentice, these are fantastic for figuring out what's wrong with a brand new Spell. But once you learn to see on your own, it's best to hand them down."
-Grandmaster Musasushi

Traits: Uncommon, Feat, Visual

Weight: 0.02 lbs (Minuscule)

Cost: 50 GP

Complexity: 14

Material: Glass

Requires Attunement

While wearing this Item, you gain the benefits of the Detect Magic Feat (pg. 328), but only with Sight.

Armor of Swiftess

"Don't discount it, until you've tried it." -Alara Blackclaw

Traits: Uncommon, Actions, Improvement, Movement

Additional Cost: 200 GP

Additional Complexity: +4

Material: See Base Item

All of the wearer's Movement Speeds are increased by 10 feet (does affect the Action Limit).

Flying Speed is instead increased by 20 feet, unless it's already based on another Movement Speed.

Requires Light Armor as a base.

Bag of Bounties

"Perfect for the prospective shopkeeper! But don't tell."
-Alara Blackclaw

Traits: Uncommon, Harvest

Weight: 0.1 lbs (Minuscule)

Cost: 50 GP

Complexity: 16

Material: Fabric

When a Creature holding this Bag accomplishes a task such as clearing a dungeon, completing a quest, or defeating a Legendary/Boss Monster (the bag just has to be present for most of the Triggering Event), the bag fills with 5 GP, or a Miniscule Item of the GM's Choice.

The GM is encouraged to add success conditions, or to feel out additional times to grant a reward. They may also bypass any limitations, should they feel it appropriate, or to grant a cool new Item they want to add.

It is also detestable to force this Item to produce Items worth less than a combined total of 1 GP, unless the Item is both hard to acquire, and useful/important to the Party, or this Item is secretly Cursed.

Bag of Holding

"You'd think somebody would have figured out the solution to the 'super-destructive-portal' problem earlier. I'm certain it would've saved a few hundred unexpected field trips." -Grandmaster Musasushi

Traits: Uncommon, Container

Weight: 1 lbs (Tiny)

Cost: 200 GP

Complexity: 17

Material: Fabric

Actions: 2

A Bag of Holding can hold up to 16 Huge Objects, or the equivalent, regardless of weight. Objects that are Small or Larger cannot fit inside the opening, though they can still be stowed if shrunk sufficiently (Reminder: 4 Tiny Objects equals 1 Small Object, scaling multiplicatively). These Objects don't increase the Bag's total weight.

A Bag of Holding cannot be placed into another Bag of Holding, or other Item that uses extra-dimensional storage by any means, unless the specific enchantment is selectively dispelled, which reapplies in 1 Minute.

If you do this, you and all Creatures/Objects within 10 feet of the Bag of Holding are sent to a random Plane of Existence, and take 23 (5d8) Force Damage. This Damage cannot be reduced by any means other than Immunity, and scales with a Target's Size.

Retrieving or Storing any Item you choose takes a single Interact Action, though you can harmlessly expel the contents of a Bag of Holding by turning it inside out with a single Interact Action. Objects that aren't expelled onto solid ground can still cause harm if they fall from a sufficient height.

Any Creature that somehow fits into a Bag of Holding cannot die from suffocation while in the bag, but does fall unconscious if they can't hold their breath for more than 1 Minute. A Creature that is Unconscious in this way regains consciousness 1 Round after leaving the bag.

Bead of Sustenance

"It's better than starving, I'll give it that... but I'd rather have some real food." -Alara Blackclaw

Traits: Common, Consumable, Ingested, Rest

Weight: 0.01 lbs (Minuscule)

Cost: 2 GP

Complexity: 18

Material: Earth

When Consumed, a Creature can treat their next Long Rest as if they had a cooked meal, and fresh water, even if they need an alternative kind of food, like Vampires needing Blood. Furthermore, effects that would cause you to die if unattended when resting cannot kill you in this way.

Blade of the Battle Mage

*"I do in fact carry a Focus, and it's right here!"
-Unknown, Marsh's Tome of Famous Last Words*

Traits: Rare, Actions

Additional Cost: 2,500 GP

Additional Complexity: +7

Material: See Base Item

Requires Attunement by a Creature who is Proficient with the Weapon.

This Weapon is considered a Spellcasting Focus, and can optionally fulfill the Somatic Component of a Spell without adding the Manipulate Trait.

Additionally, when you cast any Spell, you can Attack with this Weapon as part of the same Action, adding the Spell's Tier to the Damage Roll of the Weapon Attack, and counting against both Multi-Attack Limits (but not increasing the Action Cost).

Bleeding Edge

"Death by a thousand cuts is a nasty way to die. But only if it actually pierces in the first place." -Borukan the Smith

Traits: Very Rare, Bleed, Improvement

Additional Cost: 15,000 GP

Additional Complexity: +9

Material: See Base Item

When this Weapon deals unblocked Damage to a Creature, it inflicts the same amount of Damage as Persistent Bleed.

The Base for this Magic Item must be a Weapon that deals Piercing or Slashing.

Boots of Alacrity

"WHEEEEEEEEEEEEEEEEE!!!!" -Unknown, Marsh's Tome of Famous Last Words

Traits: Rare, Actions

Weight: 0.5 lbs (Tiny)

Cost: 500 GP

Complexity: 14

Material: Fabric

Actions: Free

This Item has 5 Charges, and regains one Charge daily at dawn.

1 Charge: You immediately gain Action Points as if a new Round had Started.

Bottle of Endless Water

"I mean you absolutely could, but filling an entire dungeon would take forever, especially when you account for drainage or underground rivers. And forget about emptying the ocean." -Grandmaster Musasushi

Traits: Uncommon

Weight: 0.5 lbs (Minuscule)

Cost: 250 GP

Complexity: 15

Material: Earth

Actions: 2

This Bottle is always full of water, and produces it as fast as you can remove said water. The Water can be fresh or salty, as chosen by you.

If you pour more water into the Bottle, the excess is transported to the Elemental Plane of Water as fast as it can be filled.

Box of Endless Treats

"Don't mind if I do!" -Many People

Traits: Uncommon, Ingested

Weight: 0.2 lbs (Minuscule)

Cost: 250 GP

Complexity: 16

Material: Wood

A Creature can withdraw any number of treats from this box, which contains an assortment of candies, and light snacks.

If a Creature relies on these treats for sustenance, they become Poisoned until they finish a Full Rest.

Breathing Bottle

"If it were an option, I'd happily cover the entire school with enchantments for Water breathing, and flood the place for my fellow Pescarians. Unfortunately, that particular solution makes many classes much more difficult and dangerous, particularly with Anti-Magic."

-Grandmaster Musasushi

Traits: Common, Inhaled

Weight: 0.5 lbs (Minuscule)

Cost: 5 GP

Complexity: 14

Material: Glass

Actions: 3

This Item has 3 Charges, which it regains when left open for at least 1 Minute in a breathable atmosphere.

When emptied, you can exhale into it to change which substance the bottle requires, based on your needs.

1 Charge: The Creature using this Item regains their breath, regardless of atmosphere.

Chameleon Armor

"The last person to try that, almost got away with stealing a ruby, before they remembered the importance of bathing." -Borukan the Smith

Traits: Uncommon, Improvement

Additional Cost: +250 GP

Additional Complexity: +5

Material: See Base Armor

Actions: Free

You can change texture and color of this armor to whatever you wish for it to be.

You can also choose to make the Armor reactive, which adds a +5 Bonus to Stealth Checks to hide from Sight and Tremorsense. This can fool Truesight.

Cloak of Escape

"Sometimes I consider teleporting to some forgotten oasis to relax. Then I remember that most of the students are teenagers with access to dangerous magic, under limited supervision." -Grandmaster Musasushi

Traits: Very Rare, Move, Teleport

Weight: 1 lbs (Minuscule)

Cost: 50,000 GP

Complexity: 20

Material: Fabric

Actions: 2

This Item has 1 Charge, which it regains daily.

Using this Item Teleports you and up to 1 willing or Grappled Creature to any place within 1 mile.

Clothing of Environmental Protection

"Well, if you're so cold, maybe you should've grabbed a warmer coat." -Alara Blackclaw

Traits: Common, Immunity

Weight: 1 lbs (Minuscule)

Cost: 250 GP

Complexity: 14

Material: Fabric

Requires Attunement

While wearing this Clothing, you are completely Immune to the prolonged effects of extreme heat and extreme cold from environmental factors, such as being in an arctic region.

Your GM may decide to extend this protection to other environmental factors.

This doesn't however, protect you from immediate Damage from hazards such as lava, acid pools, or a vacuum.

Clothing of Quarantine

"If all these illnesses are so bad, why doesn't anyone just wipe them out with a quick restoration Spell? Surely that's a thing, right?" -Ivote Ofab

Traits: Common, Nullify

Weight: 1 lbs (Minuscule)

Cost: 100 GP

Complexity: 13

Material: Fabric

While Wearing this, you cannot contract or spread an Affliction through any means that isn't ingestion or injury.

Dark Spectacles

"Is this how Humans see all the time? How do you even navigate at night?" -Gerald the Kobold

Traits: Common, Visual

Weight: 0.02 lbs (Minuscule)

Cost: 10 GP

Complexity: 13

Material: Glass

While wearing these, you ignore Bright Light and Sunlight Sensitivity. However, Dim Light is considered Darkness, and Bright Light is considered Dim Light.

A Creature that ignores Magical Darkness also ignores the penalties of this Item.

Death Brew

"I've never been interested in becoming a Lich myself. The thought of dying once to become an unfeeling immortal doesn't sit well with me, as it seems to with some students." -Grandmaster Musasushi

Traits: Artifact, Consumable, Fatal, Ingested, Injury, Nullify

Weight: 0.5 lbs (Minuscule)

Cost: Unmarketable*

Complexity: 25

Material: Herbs

Actions: 5

This Item can only be used once, returning a Flask.

Any Creature that consumes this takes both Necrotic and Poison Damage, each equal to their Hit Point Maximum, which cannot be reduced by Resistance.

If this potion is used as an injury poison (doesn't lose potency), the Target must succeed on a DC 20 Constitution Saving Throw at the end of every Long Rest:

- Critical Failure: Same as Consumption.
- Failure: They become Drained equal to their Hit Point Maximum.
- Success: They take the Poison Damage.
- Critical Success: On 3 Critical Successes, the effect ends, but the Drained Condition remains.

A Creature that isn't killed by this Poison must choose 1 Class or Ancestry Feat that they cannot benefit from, even after the Poison ends. This secondary effect can only be cured by Restoration at at least 7th Tier, or similar magic.

A Creature that is killed by this Poison is raised as an Undead with an equal or lesser number of Hit Dice.

**: An Unmarketable Item is practically impossible to sell on the market for various reasons, and cannot be Created by effects that need a Gold Cost.*

Disease Sigil

"Better safe than sorry, but I'm never sorry." -Alara Blackclaw

Traits: Uncommon, Immunity

Weight: 0.05 lbs (Minuscule)

Cost: 50 GP

Complexity: 13

Material: Metal

Requires Attunement

While carrying this Sigil, You cannot be Exposed to any disease.

Dormant Magic Item

"Yes, some Magic Items do that when they're bored, and sometimes change. But I assure you, mine would never do that on their own." - Borukan the Smith

Traits: Common to Artifact

Base Weight: 1 lbs (Tiny)

Cost: 50 GP, (Uncommon: 500 GP, Rare: 5,000 GP,

Very Rare: 50,000 GP, Legendary: 250,000 GP,

Artifact: 5,000,000 GP)

Cannot be Crafted, unless the GM says otherwise.

A Dormant Magic Item is really a placeholder for when a GM wants to award a Magic Item, but hasn't yet decided on what it should be, or wants to give the Players a chance to do something first, such as Rest. It takes the form of an amorphous blob of crystalline material using the listed Base Weight, or the statistics of another Item if the GM has decided on a base form.

When the GM decides what it should be, the Dormant Magic Item transforms into the resulting Item, provided it has room, would not harm any Creatures during the transformation, and would not be rendered useless, wasted, or a hindrance due to its location.

For example, it couldn't turn into a Magical Boat in a puddle or pond that can be easily crossed without it, but could turn into a Magical Boat on the shore of a small lake, river or ocean, assuming it's possible to shove off with it.

A Dormant Magical Item may also have certain conditions for transforming, such as when it's held by a particular Creature, Identified, tastes blood, regains a Charge, or some other appropriate Condition once the GM is ready.

Dragon Jewel

*"Quite the knockoff you have there. Where'd you get it?
Alara's shop of over-priced knick-knacks?" -Borukan
the Smith*

Traits: Rare, Attack, Resistance, Saving Throw

Weight: 0.01 lbs (Minuscule)

Cost: 5,000 GP

Complexity: 18

Material: Gemstone

Actions: 2

Damage: 5d6

Requires Attunement

This Item has 5 Charges, and regains them daily at dawn.

You have Resistance to the corresponding Damage Type equal to your Level while holding this Item, even if not Attuned.

1 Charge: You become Immune to the Resisted Damage Type until the Start of your Next Turn.

3 Charges: Target a 30 ft. Cone originating from your space. All Creatures within the Targeted Area must make a Dexterity Saving Throw against your Constitution Score:

- **Critical Failure:** Double Damage.
- **Failure:** They take Damage of the corresponding Damage Type.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

The Damage Resistance, and Damage Type of this Item are both determined by its color, which is determined by the materials used.

See the Dragonborn's Ancestry Table on pg. 16 for color to Damage conversions.

Dust of Vanishing

"Just don't touch anything before we get there, and everything will go according to... and this is why I don't hire kleptomaniacs." -Alara Blackclaw

Traits: Uncommon, Consumable, Invisible

Weight: 0.5 lbs (Minuscule)

Cost: 75 GP

Complexity: 16

Material: Mineral

Actions: 2

Range: 30 ft.

Duration: 1 Hour

You and all Creatures within Range become Invisible for the Duration. This Invisibility ends early whenever you Interact, Attack, or Cast a Spell.

Elemental Poison

"Oh, these ones are fun!" -Alara Blackclaw

Traits: Uncommon, Consumable, Injury

Weight: 0.2 lbs (Minuscule)

Cost: 50 GP

Complexity: 15

Material: Minerals

Actions: 5

Damage: 2d6

This Item can only be used once, returning a Vial.

The Damage Type for this Poison is decided upon Creation.

When used, you apply this Poison to a Weapon or piece of Ammunition for 1 Minute. A Creature hit by a Weapon that was poisoned with this must make a DC 15 Constitution Saving Throw:

- **Critical Failure:** One of the Damage Dice applies Persistent Damage instead of normal Damage.
- **Failure:** They take Damage of the dedicated Damage Type.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Ember Edge Weapon

*"It turns out that setting a sword on fire is more intimidating than dangerous, unless it uses magic."
-Shad the Mighty*

Traits: Uncommon, Improvement

Additional Cost: +250 GP

Additional Complexity: +5

Actions: 2

Damage: 1d6 Fire

This Item uses the Statistics of any Weapon or Piece of Ammunition.

1 Charge: Your next Hit with this Weapon deals extra Damage as listed.

This Item has 5 Charges and regains 1d4 Daily.

*Variant: Dissolved Edge
Deals Acid Damage instead of Fire Damage.*

*Variant: Frost Edge
Deals Cold Damage instead of Fire Damage.*

*Variant: Poison Edge
Deals Poison Damage instead of Fire Damage.*

*Variant: Storm Edge
Deals Lightning Damage instead of Fire Damage.*

Empowered Silverware

*"Oh great. Another useless tool. By the time you finish, your entire town will be roasted beyond perfection."
-Borukan the Smith*

Traits: Uncommon to Very Rare, Healing, Rest

Weight: 0.1 lbs (Minuscule)

Cost: 200 GP (Rare: 2,000 GP, Very Rare: 5,000 GP)

Complexity: 15 (Rare: 18, Very Rare: 21)

Material: Precious Metal

You increase the Quality of any consumed Food item during a Short or Long Rest by 1 (Rare: 2, Very Rare: 3).

If the consumed Food Item has no effects from Quality, it increases the Quality of a resulting Full Rest.

Empowered Tool

*"I'm shocked that dwarves make so many tools that would be more easily suited to killing others of my kind, than pursuing the craft. And they call me paranoid." -
Borukan the Smith*

Traits: Rare to Legendary, Improvement

Additional Cost: +500 GP (Very Rare: +5,000, Legendary: +50,000)

Additional Complexity: +2 (Very Rare: +4, Legendary: +6)

Material: See Base Item

This Item adds +1 (Very Rare: +2, Legendary: +3) to all Ability Checks made with it, and cannot be broken.

Enchanted Sail

"So you're telling me, that a titan even bigger than me can use this tiny sheet to travel the skies? That's ridiculous." - Borukan the Smith

Traits: Uncommon, Movement

Weight: 0.01 lbs (Minuscule)

Cost: 200 GP

Complexity: 15

Material: Fabric

While holding both ends of this sail, a Creature falls no more than 20 feet at the end of each of their Turns, and glides up to 60 feet in a straight line.

Focus of Accuracy

"That's not just any wand, that once belonged to a master Wizard named morder... morken... morda... however you say that name, I still don't believe it's in Common." -Marsh

Traits: Common to Legendary, Improvement

Additional Cost: 25 GP (Uncommon: 125 GP, Rare: 1,250 GP, Very Rare: 25,000 GP, Legendary: 75,000 GP)

Additional Complexity: +2 (Uncommon: +5, Rare: +8, Very Rare: +11, Legendary: +14)

Material: See Base

All Spells cast when using this Focus have a +1 Bonus (Uncommon: +2, Rare: +3, Very Rare: +4, Legendary: +5) to Spell Attack Rolls and Spell Save DCs. This also applies to Spells without a Focus Component.

Focus of Potency

"Of course it's the best one I could find, but that doesn't mean I'm helpless without it." -Grandmaster Musasushi

Traits: Common to Legendary, Improvement

Additional Cost: +50 GP (Uncommon: 750 GP, Rare: 5,000 GP, Very Rare: 50,000 GP, Legendary: 250,000 GP)

Additional Complexity: +1 (Uncommon: +5, Rare: +8, Very Rare: +11, Legendary: +13)

Material: See Base Item

All Spells cast when using this Focus have a +1 Bonus (Uncommon: +2, Rare: +3, Very Rare: +4, Legendary: +5) to Spell Damage and Healing rolls. This also applies to Spells without a Focus Component.

Giant Slayer's Weapon

"Very good for the most loyal of Kobolds." -Borukan the Smith

Traits: Rare, Improvement

Additional Cost: +5,000 GP

Additional Complexity: +9

Material: See Base

Actions: Free

This Item has 1 Charge, which it regains every Round.

When this Weapon Hits a Creature that is Larger than the Creature wielding it, the Creature wielding this Weapon can expend 1 Charge to double the Damage dealt for every Size category of difference.

Glue of Binding

"You see, I was testing a new substance I created, and... I'm questioning my choices from up here." -Ivote Ofab

Traits: Common to Artifact, Consumable, Grappled

Weight: 0.2 lbs (Minuscule)

Cost: 10 GP (Uncommon: 50 GP, Rare: 100 GP, Very Rare: 1,000 GP, Legendary 10,000 GP, Artifact: 50,000 GP)

Complexity: 13 (Uncommon: 15, Rare: 17, Very Rare: 19, Legendary: 21, Artifact: 23)

Material: Herbs

Actions: 5

This Item can cover no more than 5 square feet before being expended, and returns a Vial.

When applied to a surface, said surface becomes sticky, and the next Object or Creature that comes into contact with it is immediately Grappled with an escape DC of 15 (Uncommon: 18, Rare: 21, Very Rare: 24, Legendary: 27, Artifact: 30).

Healing Potion

"I got this idea from a wonderful tavern keeper named Quincy. He's also a really good chef! I recommend you visit sometime. I think it's called 'Lucky Griffon' or something like that." -Ivote Ofab

Traits: Common to Legendary, Consumable, Healing

Weight: 0.5 lbs (Minuscule)

Cost: 15 GP (Uncommon: 50 GP, Rare: 250 GP, Very Rare: 2,500 GP, Legendary: 7,500 GP)

Complexity: 10 (Uncommon: 13, Rare: 16, Very Rare: 19, Legendary: 22)

Material: Herbs

Actions: 5

Healing: 1d4 * 1d4 (Uncommon: 1d4 * 1d6, Rare: 1d6*2d6, Very Rare: 1d6*1d6*1d6, Legendary: 1d8*1d8*1d8*1d8)

Can only be used once, and returns a flask.

This also doesn't affect Constructs or Undead.

Horde Breaker's Weapon

"When you're up against a lot of tiny foes, a Weapon like this invaluable. And I do speak from experience."
-Borukan the Smith

Traits: Rare, Improvement

Additional Cost: 2,500 GP

Additional Complexity: +8

Material: See Base

Actions: Free

This Item has 5 Charges, of which it regains 1 every Round.

When you Hit a Creature with this Weapon, you may expend a Charge to inflict the same amount to a Creature that is within 5 feet of the original Target as Force Damage, ignoring Reach limitations.

You can use this effect multiple times on the same Attack, Targeting an additional Creature that is within 5 feet of another Creature you are Targeting.

Incense of Recall

"There's nothing like the smell of home." Ivote Ofab

Traits: Uncommon, Consumable, Movement, Teleportation

Weight: 0.1 lbs (Minuscule)

Cost: 25 GP

Complexity: 15

Material: Herbs

This Item can only be used Once.

When burned over the course of a Short or Long Rest, all Creatures and Objects within a 30 ft. Radius are transported to a predetermined destination on the same Plane of Existence.

Jewelry of Perfection

"So, you have a bracelet that makes you flexible? How about one that makes you smart enough to avoid an Ancient Red Dragon's Lair?" -Borukan the Smith

Traits: Common to Artifact, Ability Score, Improvement

Weight: 0.05 lbs (Minuscule)

Cost: 100 GP (Uncommon: 250 GP, Rare: 2,500 GP, Very Rare: 7,500 GP, Legendary: 50,000 GP, Artifact: 200,000 GP)

Complexity: 15 (Uncommon: 18, Rare: 21, Very Rare: 24, Legendary: 27, Artifact: 30)

Material: Gemstones and Precious Metal

Requires Attunement

While Attuned to this Jewelry, the Targeted Ability Score is increased to a minimum of 11 (Uncommon: 14, Rare: 17, Very Rare: 20, Legendary: 23, Artifact: 26).

This increase applies after any penalties or reductions, but doesn't affect qualifications such as the Requirement for the Archetype feat.

Lens of Darkvision

"Well if you want it, you gotta buy it. A cat's gotta earn her living. Not like you can stop me anyways." -Alara Blackclaw

Traits: Common, Visual

Weight: 0.02 lbs (Minuscule)

Cost: 50 GP

Complexity: 15

Material: Gemstone

A Creature that peers through a Lens of Darkvision has Darkvision out to 300 feet, but also has Bright Light Sensitivity.

Lens of Truesight

"I can see clearly now, my cataracts are gone!" -Ivote Ofab

Traits: Very Rare, Visual

Weight: 0.02 lbs (Minuscule)

Cost: 100,000 GP

Complexity: 25

Material: Gemstone

Requires Attunement

You have Truesight out to 60 feet while wearing this Item.

Lucky Trinket

"I never go anywhere without my lucky dagger." -Alara Blackclaw

Traits: Uncommon, Improvement

Additional Cost: +500 GP

Additional Complexity: +4

Material: See Base

While you have this Item on your person, you have a +1 bonus to all d20 Tests.

This Item uses the Statistics of any Item.

Mage Slayer's Weapon

"It's funny how you clearly forgot that it's a Mage Slayer's sword, and not a Dragon Slayer's sword. Seriously, what is it with you mortals and swords?" -Borukan the Smith

Traits: Uncommon, Disadvantage, Improvement, Nullify

Additional Cost: +500 GP

Additional Complexity: +5

Material: See Base Item

Reactions: See Base Item

Requires Attunement.

When a Creature casts any Spell within your Reach, you may use Reactions to take the Attack Action against them using this Weapon, ignoring the Multi-Attack Limit.

If you Hit, the Target must choose to lose either the Actions or the Spell Slot used in casting the Spell.

Additionally, Creatures you Hit have Disadvantage on Concentration Saving Throws Triggered by you.

The Reaction Attack granted by this Item is considered an Attack of Opportunity.

Magma Vein Weapon

"You call this an enchantment? I literally make hundreds of these in my sleep." -Borukan the Smith

Traits: Rare, Improvement

Additional Cost: +1,000 GP

Additional Complexity: +5

Material: See Base

Actions: 3

Damage: 2d6 Fire

Duration: 1 Minute

This Item uses the statistics of any Weapon or Piece of Ammunition.

1 Charge: For the Duration, this Weapon deals the listed Damage on all Hits, and Critical Hits deal 1 Persistent Damage of the corresponding type.

Variant: Ice Vein

Deals Cold Damage instead of Fire Damage.

Variant: Sickly Vein

Deals Poison Damage instead of Fire Damage.

Variant: Corrosive Vein

Deals Acid Damage instead of Fire Damage.

Variant: Storm Vein

Deals Lightning Damage instead of Fire Damage.

Map of Travel

"Oh, I don't sell simple maps. It's not like they can tell you where you are. And they're not nearly as profitable." -Alara Blackclaw

Traits: Common, Travel

Weight: 0.01 lbs (Minuscule)

Cost: 25 GP

Complexity: 13

Material: Fabric

While Travelling, you cannot become lost. Additionally, the distance covered by you and any Creatures accompanying you is doubled.

Mask of Water Breathing

"Much more stylish than some of those other methods of Water Breathing." -Alara Blackclaw

Traits: Uncommon, Inhaled

Weight: 0.5 lbs (Minuscule)

Cost: 125 GP

Complexity: 16

Material: Fabric

Requires Attunement

While wearing this Mask, you are able to Breathe water, but must Hold your Breath while consuming any Drink, Food or Potion.

Variant: Air Breathing

Allows you to breathe in Air.

Variant: Vacuum Breathing

Allows you to breathe in a Vacuum (doesn't protect from Damage caused by Holding your Breath in a Vacuum).

Mystery Key

"For some reason, I keep finding these all over the place. Yet not a single one will open that stupid lock someone sold me a hundred years back!" -Borukan the Smith

Traits: Common, Consumable

Weight: 0.01 lbs (Minuscule)

Cost: 10 GP

Complexity: 11

Material: Metal

Actions: 2

When you attempt to use this Key on any Lock that isn't an Unpickable Lock, roll a d20.

On anything but a 20, nothing happens, and this key doesn't work on the lock. If you do get a 20, the Key permanently reshapes itself to fit that specific Lock, and becomes Non-Magical.

Necklace of Hatred

"A simple trinket for primitive Creatures. Only a fool would use it carelessly." -Borukan the Smith

Traits: Common, Buff/Debuff, Emotion

Weight: 0.01 lbs (Minuscule)

Cost: 5 GP

Complexity: 8

Material: Bone

Action: Free

Duration: 1 Minute

Requires Attunement by a Barbarian.

You enter a Rage for the Duration. During this time, you take and deal double Damage from all sources, after Resistance and Vulnerability.

If you don't deal any Damage on a given Turn, you take 1d12 Psychic Damage which cannot be reduced, and end the Rage early.

Null Dust

"How does one sneak into a heavily warded mansion undetected? It's not like there's some dust you can just sprinkle over a ward... except that's exactly how I did it." -Alara Blackclaw

Traits: Rare, Buff/Debuff, Consumable, Nullify

Weight: 0.5 lbs (Minuscule)

Cost: 500 GP

Complexity: 16

Material: Herbs

Actions: 3

Duration: 1 Hour

This Item can only be used once.

All Objects and Creatures in a 5 ft. Cube within your Reach are considered under the effects of Anti-Magic for the Duration. However, Magical sources of Damage still apply, dealing half Damage.

Patch of Mending

*"Students that fail to keep these on hand, usually end up learning some embarrassing lessons pretty quickly."
-Grandmaster Musasushi*

Traits: Common, Spellcasting

Weight: 0.1 lbs (Minuscule)

Cost: 15 GP

Complexity: 12

Material: Leather

Actions: 2

This Item has 1 Charge, which it regains daily at dawn.

1 Charge: You cast Mending at its lowest Tier on an Object you Touch. The patch remains in place until it regains its charge, leaving any covered gaps fully repaired.

Pearl of Surfacing

"I hate water! It's cold, and makes my fur cling in the most unflattering and uncomfortable way." -Alara Blackclaw

Traits: Common, Consumable

Weight: 0.01 lbs (Minuscule)

Cost: 10 GP

Complexity: 13

Material: Low-Grade Gemstone

Actions: 2

This Item can only be used once.

You immediately begin to float to the surface of any body of water or other liquid, ascending at a rate of 200 feet at the Start of each of your Turns until you reach the surface. This is independent of your Movement Speed.

Potion of Enhancement

"Just because I can make someone smart, doesn't mean I can cure stupidity. Even turning them into a ruby doesn't help." -Ivote Ofab

Traits: Common to Artifact, Ability Score, Buff, Consumable, Ingested

Weight: 0.5 lbs (Minuscule)

Cost: 10 GP (Uncommon: 50 GP, Rare: 250 GP, Very Rare: 2,500 GP, Legendary: 25,000 GP, Artifact: 100,000 GP)

Complexity: 12 (Uncommon: 15, Rare: 18, Very Rare: 21, Legendary: 24, Artifact: 27)

Material: Herbs

Actions: 5

Duration: 10 Minutes

Increases the Targeted Ability Score by +1 (Uncommon: +2, Rare: +3, Very Rare: +4, Legendary: +5, Artifact: +6) for the Duration, up to a maximum of 30.

Potion Sickness: When you consume a Non-instant Potion while under the effects of another, you must attempt a Constitution Saving Throw against Arcanist's Blight.

Potion of Haste

"It's all fun and games until someone runs into a wall." -Ivote Ofab

Traits: Rare, Buff, Consumable, Hastened, Ingested, Unconscious

Weight: 0.5 lbs (Minuscule)

Cost: 100 GP

Complexity: 16

Material: Minerals

Actions: 5

Duration: 1 Minute

This Item can only be used once, and returns a Flask.

You become Hastened 5 for the Duration.

When this Duration ends, you fall Unconscious until you take Damage, or are shaken awake.

Potion Sickness: When you consume a Non-instant Potion while under the effects of another, you must make a Constitution Saving Throw against Arcanist's Blight.

Potion of Invisibility

"I've had to stop making these after the last few times I've been robbed. That, and I keep losing the ingredients." -Ivote Ofab

Traits: Rare, Buff, Consumable, Ingested, Invisible

Weight: 0.5 lbs (Minuscule)

Cost: 750 GP

Complexity: 15

Material: Mineral

Actions: 5

Duration: 1 Hour

When Consumed, the Target becomes Invisible for the Duration. This effect ends early if you Attack or Cast a Spell.

Potion Sickness: When you consume a Non-instant Potion while under the effects of another, you must make a Constitution Saving Throw against Arcanist's Blight.

Variants: Silence

The Target is Silenced instead of Invisible.

Variant: Masking

The Target is Masked instead of Invisible.

Potion of Magic

"It may seem overly expensive, but it is quite useful." -Ivote Ofab

Traits: Rare, Ingested, Recovery

Weight: 0.5 lbs (Minuscule)

Cost: 500 GP

Complexity: 18

Material: Herbs or Minerals

Actions: 5

This Item can only be used once, and returns a Flask.

You regain up to 5 Class Resources or Spell Slots.

Potion of Morphing

"Why do I have so many? Oh, that's easy. A rich couple that frequently delves into dungeons keep requesting new forms. Safe to say, they work very well." -Ivote Ofab

Traits: Rare to Artifact, Buff/Debuff, Ingested, Nullify, Transformation

Weight: 0.5 lbs (Minuscule)

Cost: 1,000 GP (Very Rare: 25,000 GP, Legendary: 100,000 GP, Artifact: 50,000,000 GP)

Complexity: 16 (Very Rare: 21, Legendary: 26, Artifact: 35)

Material: Herbs

Actions: 5

Duration: 1 Hour

This Item can only be used once, and returns a Flask.

When consumed, you are subjected to the effects of the Polymorph Spell at its lowest Tier for the Duration, without Concentration, turning you into a pre-determined Creature.

The limitation to the new form is that it can have no more than 5 Hit Dice (Very Rare: 10, Legendary: 15, Artifact: No limit) ignoring Size, the effect cannot be ended early without being dispelled, and the resulting form cannot be larger than Medium (Very Rare: Large, Legendary: Huge, Artifact: No Limit).

Potion Sickness: When you consume a Non-instant Potion while under the effects of another, you must make a Constitution Saving Throw against Arcanist's Blight.

Potion of Regeneration

"If you're in a pinch, standard Potions will do just fine. But if you've got the time, Regeneration is your best friend." -Ivote Ofab

Traits: Rare, Buff, Consumable, Ingested, Persistent Healing

Weight: 0.5 lbs (Minuscule)

Cost: 250 GP

Complexity: 16

Material: Herbs

Actions: 5

Healing: 5 Persistent

This Item can only be used once, and returns a Flask.

If this effect doesn't restore any Hit Points before the Healing ends, it regenerates Missing limbs.

This Item doesn't affect Undead.

Potion Sickness: When you consume a Non-instant Potion while under the effects of another, you must make a Constitution Saving Throw against Arcanist's Blight.

Potion of Remedy

"I never thought I'd need to make so many of these, but it's been incredibly useful." -Ivote Ofab

Traits: Common to Legendary, Consumable, Ingested, Nullify

Weight: 0.5 lbs (Minuscule)

Cost: 15 GP (Uncommon: 75 GP, Rare: 250 GP, Very Rare: 1,000 GP, Legendary: 5,000 GP)

Complexity: 13 (Uncommon: 15, Rare: 17, Very Rare: 19, Legendary: 21)

Material: Herbs

Actions: 5

This Item can only be used once, and returns a Flask.

Upon Consumption, this Potion cures any Disease that has a DC that is 13 or lower (Uncommon: DC 15, Rare: DC 17, Very Rare: DC 19, Legendary: DC 21).

Potion of Resistance

"Yes, it's generic, but it's also one of the most useful potions you can get!" -Ivote Ofab

Traits: Common to Very Rare, Consumable, Ingested, Resistance

Weight: 0.5 lbs (Minuscule)

Cost: 50 GP (Uncommon: 200 GP, Rare: 500 GP, Very Rare: 1,000 GP)

Complexity: 12 (Uncommon: 15, Rare: 18, Very Rare: 21)

Material: Mineral

Actions: 5

Duration: 1 Hour

This Item can only be used once, returning a Flask.

You gain Resistance 5 (Uncommon: 10, Rare: 15, Very Rare: 20) to the Targeted Damage Type.

Potion Sickness: When you consume a Non-Instant Potion while under the effects of another, you must make a Constitution Saving Throw against Arcanist's Blight.

Potion of Restoration

"I always make a large batch of the stuff when I go sailing. I never know when I need to share." -Ivote Ofab

Traits: Rare to Legendary, Ingested, Nullify

Weight: 0.5 lbs (Minuscule)

Cost: 1,000 GP, (Very Rare: 5,000 GP, Legendary: 50,000 GP)

Complexity: 18 (Very Rare: 21, Legendary: 24)

Material: Minerals

Actions: 5

This Item can only be used once, and returns a Flask.

The Target has one Condition that isn't Dying, Flat-Footed, Grappled, Incapacitated, Prone, Restrained, or Unconscious reduced by 1 (Very Rare: 2, Legendary: 3).

Additionally, one Affliction with a DC of 15 or Less (Very Rare: 17, Legendary: 19) immediately ends.

Potion of Revival

"I can't guarantee that you'll be fine, but at least you'll be alive when it's over." -Ivote Ofab

Traits: Rare, Consumable, Exhaustion, Ingested, Resurrection

Weight: 0.5 lbs (Minuscule)

Cost: 2,000 GP

Complexity: 21

Material: Mineral

Actions: 5

When fed to a Corpse that has not been allowed to decay for more than 1 Hour, the Creature is Resurrected at 1 Hit Point with Exhaustion 10.

Potion of Snaring

"How else am I supposed to handle the situation? Not trap you in a mound of adhesives?" -Ivote Ofab

Traits: Common to Rare, Consumable, Grappled, Saving Throw, Thrown 20/60

Weight: 0.5 lbs (Minuscule)

Cost: 5 GP (Uncommon: 25 GP, Rare: 125 GP)

Complexity: 11 (Uncommon: 13, Rare: 15)

Material: Herbs

Actions: 2

This Item can only be used once.

Any Creature within a 5 ft. Radius (Uncommon: 10 ft., Rare: 20 ft.) of the Targeted Space must make a DC 11 (Uncommon: 13, Rare: 15) Dexterity Saving Throw:

- **Failure:** The Target is Grappled to their Space for 1 Minute, or until broken.
- **Success:** No effect.

Potion of Stamina

"I don't know why it's so easy to get winded lately, but this Potion works wonders in a pinch." -Ivote Ofab

Traits: Common to Legendary, Actions, Consumable, Ingested

Weight: 0.5 lbs (Minuscule)

Cost: 5 GP (Uncommon: 20 GP, Rare: 100 GP, Very Rare: 250 GP, Legendary: 1,000 GP)

Complexity: 13 (Uncommon: 15, Rare: 17, Very Rare: 19, Legendary: 21)

Material: Herbs

Actions: 5

This Item can only be used once, and returns a Flask.

The Target regains 5 Action Points (Uncommon: 10, Rare: 15, Very Rare: 20, Legendary: 25).

Additionally, they can choose to either restore 1 to their Multi-Attack Limit for all Non-Magical limbs, or 5 feet of Movement (Uncommon: 2, 10, Rare: 3, 15, Very Rare: 4, 20, Legendary: 5, 25).

Potion of Swiftiness

"Sometimes, you just need that extra boost of Speed." -Ivote Ofab

Traits: Common to Legendary, Buff, Consumable, Ingested, Movement

Weight: 0.5 lbs (Minuscule)

Cost: 25 GP (Uncommon: 100 GP, Rare: 250 GP, Very Rare: 1,250 GP, Legendary: 5,000 GP)

Complexity: 12 (Uncommon: 15, Rare: 18, Very Rare: 21, Legendary: 24)

Material: Herbs

Actions: 5

Duration: 10 Minutes

This Item can only be used once, and returns a Flask.

The Target gains a +5 (Uncommon: +10, Rare: +15, Very Rare: +20, Legendary: +25) Bonus to all Movement Speeds you have and your Action Limit, which is doubled for Flying Speed.

Potion Sickness: When you consume a Non-Instant Potion while under the effects of another, you must make a Constitution Saving Throw against Arcanist's Blight.

Potion of Traversal

"I'm not inured to climbing, swimming, flying... okay, I'm just not great at traveling without magic in general." -Ivote Ofab

Traits: Common, Consumable, Ingested, Move, Movement

Weight: 0.5 lbs (Minuscule)

Cost: 10 GP

Complexity: 13

Material: Herbs

Actions: 5

Duration: 8 Hours

This Item can only be used once, and returns a Flask.

For the Duration, all Movement Speeds you have are increased to a minimum of 30 (unless reduced to 0), and you can move any distance up to your remaining Movement whenever you take the Move Action, ignoring Difficult Terrain.

Potion Sickness: When you consume a Non-Instant Potion while under the effects of another, you must make a Constitution Saving Throw against Arcanist's Blight.

Potion of Waking

"I really don't recommend forcing people to wake up early unless you need to. Sleep deprivation is nasty to deal with." -Ivote Ofab

Traits: Common, Consumable, Exhaustion, Ingested, Nullify

Weight: 0.5 lbs (Minuscule)

Cost: 1 GP

Complexity: 11

Material: Herbs

Actions: 5

Duration: 12 Hours

This Item can only be used once, and returns a Flask.

The Target cannot be forced to sleep for the Duration. This also prevents the Creature from taking a Long Rest.

If the Target is Unconscious, but not Dying, they immediately awaken and take Exhaustion 1. This also applies to a Creature that is stabilized.

Potion Sickness: When you consume a Non-Instant potion while under the effects of another, you must make a Constitution Saving Throw against Arcanist's Blight.

Potion of Water Breathing

"The first breath is always the hardest." -Ivote Ofab

Traits: Uncommon, Consumable, Ingested

Weight: 0.5 lbs (Minuscule)

Cost: 50 GP

Complexity: 14

Material: Herbs

Actions: 5

Duration: 8 Hours

This Item can only be used once, and returns a Flask.

When Consumed, the Creature can breathe Water for the Duration.

Potion Sickness: When you consume a Non-Instant Potion while under the effects of another, you must make a Constitution Saving Throw against Arcanist's Blight.

Variant: Air Breathing

Allows you to breathe Air instead of Water.

Variant: Vacuum Breathing

Allows you to breathe in a Vacuum instead of Water. This actually does prevent you from taking Damage from a Vacuum.

Pouch of Endless Sands

*"Perfect for designing your very own beach vacation."
-Alara Blackclaw*

Traits: Uncommon

Weight: 0.5 lbs (Minuscule)

Cost: 300 GP

Complexity: 13

Material: Fabric

This Pouch is always full of Sand or Dirt (your choice), and refills as fast as you can empty it.

Any excess Sand or Dirt is transported to the Elemental Plane of Earth, as fast as you can fill it.

Quiver of Endless Ammunition

"A quiver like that isn't helpful if your arrows don't do anything." -Borukan the Smith

Traits: Uncommon

Weight: 1 lbs (Small)

Cost: 100 GP

Complexity: 14

Material: Leather

While you wear this Quiver, you may draw Non-Magical Ammunition of a form that is chosen when this Item is Crafted, even if you don't have Ammunition.

Any Ammunition drawn this way disappears on impact, or after 1 Minute.

Returning Spellbook

"Everyone knows to ward their Spellbooks against poor study practices, long before they finish their first quarter. Not everyone thinks to have one that comes to them when called." -Grandmaster Musasushi

Traits: Rare

Weight: 5 lbs (Tiny)

Cost: 1,000 GP

Complexity: 16

Material: Fabric

Actions: Free

Requires Attunement.

This Item can be used as a normal Spellbook, even when not Attuned.

While Attuned, you can cause this Item to Fly (Hover) 100 feet at the Start of each Round, taking the fastest non destructive path towards you, even if that path is only known to the GM, though it will wait if that would prove faster.

If a Creature is holding the Spellbook, they must make a Thievery Check against your Spell Save DC or drop the book. If they Succeed, the Spellbook cannot progress until it is no longer being held or contained in a latched container.

The Spellbook doubles its Speed every 24 Hours that it cannot fulfill this order, resetting this value when it finally arrives.

Ring of Accuracy

"It's much easier to do my job when I can actually hit you." -Alara Blackclaw

Traits: Common to Rare

Weight: 0.01 lbs (Minuscule)

Cost: 50 GP (Uncommon: 250, Rare: 2,500)

Complexity: 11 (Uncommon: 15, Rare: 19)

Material: Metal

Requires Attunement

All Attack Rolls you make have a +1 (Uncommon: +2, Rare: +3) bonus to Hit.

Ring of Evasion

"The reason I let those Kobolds have it, is because pesky little Humans like you get frustrated when you can't hit something that's half your Size." -Borukan the Smith

Traits: Uncommon

Weight: 0.01 lbs (Minuscule)

Cost: 100 GP

Complexity: 16

Material: Metal

You gain a +1 Bonus to AC and Dexterity Saving Throws.

This Bonus can stack with itself, but you must Attune to each Ring individually.

Ring of Recovery

"I know we're Catfolk, but maybe if you stop trying to take a nap after every fight, you'd actually have a chance to learn something." -Alara Blackclaw

Traits: Rare, Healing, Recovery

Weight: 0.01 lbs (Minuscule)

Cost: 5,000 GP

Complexity: 21

Material: Metal

Requires Attunement

Whenever you take any kind of Rest, you always recover 1 of all Class Resources, and 1 additional Spell Slot. Additionally, you regain Hit Points equal to your Constitution Modifier.

Ring of True Strike

"Always keep an ace in the hole." -Alara Blackclaw

Traits: Common, Auto-Hit

Weight: 0.01 lbs (Minuscule)

Cost: 10 GP

Complexity: 13

Material: Metal

Actions: Free

Requires Attunement

This Item has 1 Charge, which it regains daily at dawn.

1 Charge: Before you make an Attack Roll, you may choose to make it Hit automatically, but not Crit.

0 Charges: Before you make an Attack Roll, you may choose to make it Hit automatically, but not Crit. It also takes the lowest value on all Damage Dice.

Ritual Scroll

"Now I advise you take care with these rituals, as even one word or incorrect ingredient can summon a goose instead of a ghost. Trust me, it's worse than you think."

-Grandmaster Musasushi

Traits: Uncommon to Rare, Spellcasting

Weight: 0.1 lbs (Tiny)

Cost: 50 GP (Rare: 500 GP)

Complexity: 15 (Rare: 18)

Material: Fabric

Hours: 1

This Item has 1 Charge which it regains daily at dawn.

A Ritual Scroll can contain a Spell, though it can also contain a special Ritual, which is a Magical effect that cannot be obtained through Spellcasting, and may list special requirements.

A Ritual Scroll cannot contain a Spell of 6th Tier or Higher (Such would either be Artifacts, or added by the GM), but it is not consumed on use. A Ritual Scroll that contains a 4th or 5th Tier Spell is Rare.

...

1 Charge: You provide everything listed in the Scroll's Ritual. If all prerequisites are met, the Components are consumed and the listed effect takes effect.

Example Ritual: Resurrection

Components: 10 Candles, 1 Item of incredible significance to the Target, High Grade Gemstones worth a total of 1,000 GP.

Effect: You make a Persuasion Check with a DC of 10 + the number of times the Target has died. If you Succeed, the Creature appears upon the Scroll, with no equipment, no injuries, and Impaired 20 in all Ability Scores. This Reduction cannot reduce an Ability Score below 1.

If you fail, the Creature cannot be Resurrected by you, but the materials aren't expended.

Example Ritual: Summon Looming Stalker

Components: 100 GP of Onyx, 1 vial of Fiend Blood, a piece of the Creature to be Targeted such as a drop of blood or strand of hair.

Effect: You create a Looming Stalker (pg. 517) that begins to hunt the Target.

Once the Target dies, the Looming Stalker Targets you next. Both you and the Target cannot be restored to life by any means short of the Wish Spell or similar magic when you die while hunted in this way.

Seeking Ammunition

"Several Aces, and no Attunement!" -Alara Blackclaw

Traits: Uncommon, Auto-Hit, Consumable

Additional Cost: +50 GP

Additional Complexity: 15

Material: See Base

When you Attack a Creature using this Ammunition, you automatically Hit.

Shard of Communication

"I mean it's handy for the Magically inept, but I'd rather just cast Message." -Grandmaster Musasushi

Traits: Uncommon, Information

Weight: 0.5 lbs (Minuscule)

Cost: 75 GP

Complexity: 17

Material: Gemstone

Actions: 2

This Item has 1 Charge which it regains daily at dawn.

When a Shard of Communication is created, a second one must be created as part of the same process. The two Shards are intertwined, and can be used to communicate with each-other. You can intertwine additional Shards during the Crafting process, but you cannot add or remove Shards afterwards.

1 Charge: You speak a message that lasts up to 1 Minute, which all Creatures holding an intertwined shard hear.

You learn if the message was received successfully by at least One Creature, or if it was lost.

A Message cannot be received from other Planes of Existence.

Shield of Reflection

"Ha! Take that you stupid mage!" -Unknown, Marsh's Tome of Famous Last Words

Traits: Rare, Improvement

Additional Cost: +800 GP

Additional Complexity: +3

Material: See Base Item

When you use the Block Action with this Shield, any Ranged Attack that Critically Misses you Targets the Attacker instead.

This also applies to Spells and effects that Target a Line or Single Target, provided you Critically Succeed on the Saving Throw.

Reflected effect are treated as originating from your space, and must Target the original Attacker. Any DC is unchanged.

Shoes of Perfect Climbing

"Look ma, no hands!" -Many People, Marsh's Tome of Famous Last Words

Traits: Rare, Climbing, Gravity, Movement

Weight: 0.5 lbs (Minuscule)

Cost: 350 GP

Complexity: 18

Material: Fabric

Requires Attunement

While wearing these shoes, you may use your Walking Speed on any surface, as if Gravity was pulling you firmly against that surface, even if there is none, or it is pulling you in a different direction.

This effect ceases when you stray or jump more than 1 foot from the last surface you stood on, and fails to suspend you against Gravity if you are Encumbered.

Silver Oil

"Now it may not seem like much, but it's incredibly useful when getting a Weapon silvered isn't an option." -Ivete Ofab

Traits: Common, Consumable, Injury, Weakness

Weight: 0.5 lbs (Minuscule)

Cost: 2 GP

Complexity: 10

Material: Minerals

Actions: 5

This Item can only be used once, and returns a Vial.

This Poison can be applied to any Weapon or up to 10 pieces of Ammunition for up to 1 Hour, or until they Hit.

Any Damage Dealt by a Weapon coated in this Oil is considered to be from a Silvered Weapon, and applies the effect for 10 Minutes (or 1 for Ammunition).

A Variant exists for each material, adjusting the price accordingly.

Sleeping Potion

"Nobody really appreciates a good night's rest, especially when you're out and about." -Ivote Ofab

Traits: Common, Consumable, Debuff, Exhaustion, Saving Throw, Unconscious

Weight: 0.5 lbs (Minuscule)

Cost: 5 GP

Complexity: 10

Material: Herbs

Actions: 5

Duration: 10 Minutes

This Item can only be used once, and returns a Flask.

When consumed, the Target suffers a -5 penalty to all d20 Tests for the Duration (treated as Exhaustion 5), and must succeed on a DC 10 Constitution Saving Throw at the end of the Duration:

- **Failure:** They begin taking a Long Rest.
- **Success:** The penalty ends.

If splashed onto a Creature within your Reach, the Target must make a DC 10 Constitution Saving Throw:

- **Critical Failure:** Same as Failure, but for the original Duration.
- **Failure:** They fall Unconscious for 1 Minute, or until they take Damage, or are awoken with an Interact Action.
- **Success:** They have Disadvantage on the next d20 Test they make before the Duration Ends.
- **Critical Success:** No effect.

Solvent of Unbinding

"It's the first vial on your left. No, your other left. That's the third- no! It's clearly labeled, right there! Your left hand is literally touching it!" -Ivote Ofab

Traits: Common to Artifact, Consumable

Weight: 0.5 lbs (Minuscule)

Cost: 5 GP (Uncommon: 25 GP, Rare: 125 GP, Very Rare: 625 GP, Legendary: 3,125 GP, Artifact: 10,000 GP)

Complexity: 12 (Uncommon: 15, Rare: 18, Very Rare: 21, Legendary: 24, Artifact: 27)

Material: Mineral

Actions: 5

This Item can cover no more than 5 square feet before being expended, returning a vial.

When applied, All Adhesives and similar effects such as Mending within the Target area are removed, provided they don't come from a Magical Item of greater rarity.

Spell Scroll

"It's a staple of many schools. They're simple, cheap, and can teach you something in a pinch. However, we're still trying to clean out all the forbidden ones from over fifty years ago." -Grandmaster Musasushi

Traits: Common to Artifact, Spellcasting

Weight: 0.1 lbs (Minuscule)

Cost: 10 GP (Uncommon: 75 GP, Rare: 200 GP, Very Rare: 1,000 GP, Legendary: 10,000 GP, Artifact: 100,000 GP)

Complexity: 10 (Uncommon: 15, Rare: 20, Very Rare: 25, Legendary: 30, Artifact: 35)

Material: Fabric

Actions: 5

This Item can only be used once.

When used, you cast the Spell from the Spell Scroll at the recorded Tier as if it were a Spell you knew and have Prepared, even if you don't have Spellcasting. However, you still follow the rules for Tiers you don't have access to, which may waste the Scroll.

This doesn't expend Action Points beyond what is required by the Scroll, doesn't expend Spell Slots and includes all required components, but you cannot Empower the Spell by any means.

When you Craft this Item, you must cast the Spell you wish to inscribe, at the Tier you wish to inscribe it at, including any required Components. Components that aren't required can be excluded during Crafting, and optionally provided during casting.

The Rarity of this Scroll depends on what Tier Spell it can contains:

Rarity	Tiers
Common	0-1
Uncommon	2-3
Rare	4-5
Very Rare	6-7
Legendary	8-9
Artifact	10

Tarot of Fate

"It's just one card, how bad could it be?" -Unknown, Marsh's Tome of Famous Last Words

Traits: Artifact

Weight: 0.1 lbs (Minuscule)

Cost: 1,000,000 GP

Complexity: 40

Material: Fabric

Actions: 2

This deck of Tarot Cards appears like a normal deck in a standard 72 card case, and can be used as such. But closer inspection reveals inscriptions on the inside of the deck, that prevent the magic from going off wantonly.

The cards from this deck cannot be lost, as they reappear after 1 Hour, nor do they tarnish or suffer Damage, unless used as part of the effect.

If you expend a particular price (such as 5 GM Inspiration), you may pull the top card of the Deck, and have the GM replace it with one of 4 others of your choice. The GM may also force a particular card to be drawn first, but must not override a card you force.

If you find this deck on a corpse, or poorly locked container, it is likely to be Missing 1d100 cards. If sealed, it will have all cards.

When you use the Interact Action with this Item you may speak "I accept my fate", draw a single card from a real or simulated Tarot deck, which causes an effect corresponding to the card drawn. If you give a reading in this way, the cards can react differently according to the meaning behind them.

Example: Cards of the Past manifest in the form of a Backstory related event or quest, Cards of the Present manifest immediately, and Cards of the Future manifest when the relevant events take place, while Cards that determine a Condition have no effect, and aren't expended.

For value-based effects, Pages are 11, Knights are 12, Queens are 13, and Kings are 14.

If the GM doesn't have the preparations required to handle these, they happen at the earliest convenience.

...

- **0-The Fool:** Clear your Character Sheet of all but your Backstory and Equipment, and build your character from scratch at Level 1, choosing Ancestry, Background and Class, as you please. You gain a number of General Feats equal to the levels you lost.
- **Reversed:** You become Level 20, but lose all Proficiencies, except Languages from your Ancestry.
- **1-The Magician:** You immediately obtain an important Item for one Quest you are aware of, or will encounter.
- **Reversed:** You become aware of one Item that can, or will be your undoing, if it falls into the hands of your enemy.
- **2-The High Priestess:** A Creature in a position of power takes interest in your actions. If you please them, they may grant requests or rewards.
- **Reversed:** A Known Enemy takes power somewhere, and begins plotting against you.
- **3-The Empress:** The rule of a city, or major establishment falls to you, and it is your duty to protect it.
- **Reversed:** Your deeds become known in a city or major establishment you know, and will protect you at all costs.
- **4-The Emperor:** A Monster of the GMs choice begins to seek a challenge with you. This Challenge results in an Encounter designed specifically for you. The Challenger may allow your Allies to help you, but otherwise establishes the rules you must follow, alongside losing conditions. If you succeed, the Challenger gives you a Legendary Magic Item. Otherwise, you die.
- **Reversed:** You determine the rules (provided the GM agrees), but you gain a Boon/Reward of your choice if you win, and lose one thing of the GM's choice if you lose. A Good GM will choose something that you find particularly precious.
- **5-The Hierophant:** Until you take an Action with the Attack, Damage, or Debuff Traits, you cannot be harmed by any other Creature.
- **Reversed:** You become Ethereal until dispelled by Dispel Magic at 10th Tier.
- **6-The Lovers:** Until this Fate is changed, you and one other Creature that is emotionally attached to you are immune to Debuffs while within 30 feet of each-other.
- **Reversed:** Until this Fate is changed, you and your Greatest Enemy cannot die while the other has at least 1 Hit Point.
- **7-The Chariot:** Until the End of your next Combat, you cannot take Damage.
- **Reversed:** Same as the Main effect, but you die at the End of your next Combat.
- **8-Strength:** One Ability Score of your choice is increased to 30.
- **Reversed:** You become Drained X, where X is equal to your Level, times the average value of your Hit Die. If this would reduce your Hit Point Maximum to 0, it instead reduces your Hit Point Maximum to 1.
- **9-The Hermit:** You become aware of a solitary Creature that can help you with one Quest, or other Goal of your choice. After they help you once, they probably won't help you again.
- **Reversed:** The Creature for the main effect seeks you out, and gives you a Quest or Prophecy. If you do not complete the Quest or fulfill the Prophecy, a cataclysmic event will occur, destroying something the GM believes is most precious or important to you.
- **10-Wheel of Fortune:** You gain an assortment of Random Loot, as determined by the GM (pg. 122 for relevant tables, 5d10 rolls is a good start).
- **Reversed:** You lose all your Money (Money that isn't on your Character is considered lost or stolen), but gain a Magic Item with an Equal or lesser Value. This Magic Item must be usable by your Character, and cannot be stolen from you.
- **11-Justice:** You are judged by a neutral party, who knows everything about you, and your history. They can pick a legal fate for you, or perform/bestow any Spell, Feat, Item, or even a different Tarot Card as either punishment or reward.
- **Reversed:** All your Ability Scores are made equal. If an Ability Score would be less than your Level, increase it by 1.
- **12-The Hanged Man:** You discover the answer to one question you ask the GM, who must answer truthfully.

...

- **Reversed:** You must forfeit the answer to any questions asked of you until the end of your next Full Rest. If you answer nothing, a Creature that is in contest to you (such as a Big Bad Evil Guy) learns one detail that furthers their goals, or hinders yours.
 - **13-Death:** A Looming Stalker (pg. 517) is Summoned to hunt you until banished. Every time you reduce it to 0 Hit Points, you gain 1 General Feat. If it Kills you, you cannot be resurrected.
 - **Reversed:** You resurrect any Creature you know, regardless of the circumstances of their death, or the standard limitations. If their Death was necessary, reality shifts as little as possible to allow them to live, until after you perish.
 - **14-Temperance:** Until you Critically Succeed on a d20 Test, all Misses and Failures you roll have their Degree of Success increased by 1.
 - **Reversed:** Until you Critically Fail on a d20 Test, all Hits and Successes you roll have their Degree of Success reduced by 1.
 - **15-The Devil:** You become aware of a Villain or other Creature with significance to your journey, and they cannot fool you by any means, including with the Wish Spell.
 - **Reversed:** The next time you see one Creature that is close to you, you are forced to Attack them until one of you is reduced to 0 Hit Points. If you run from this encounter, they hunt you until either of you die.
 - **16-The Tower:** A fort, stronghold, business or some other location of importance comes under attack. You have enough time to run and protect it to the best of your abilities. Alternatively, a Villain or BBEG progresses their plan, perhaps even accomplishing their goal, but this result is detrimental to you and your Party. You do get a chance to survive any cataclysmic event that results from this.
 - **Reversed:** At any time, you may choose to subvert the effects of one cataclysmic event, such as the beginning of a war, destruction of a continent, the death of someone important, or the artificer creating and detonating an atomic bomb without permission. This effect can't resolve a quest for you, only halt or delay the consequences.
- ...
- **17-The Star:** You can pick and gain 3 General Feats of your choice.
 - **Reversed:** You cannot expend Class Resources until the end of your next Combat. Doing so inflicts Exhaustion 1.
 - **18-The Moon:** You become aware of the location of one Artifact or other Magic Item that can be, or will be important at some point in the future. Whether you need to destroy, protect or use it is up to the GM.
 - **Reversed:** One Artifact or Magic Item you have is replaced with a fake. The real one instead appears in the possession of a Creature that would use it in a harmful way, such as a Villain the Party was keeping it from.
 - **19-The Sun:** You may cast the Wish Spell once, without Components or Actions as if you had a Tarrasque Heart, but regain this ability if the Wish is denied.
 - **Reversed:** An enemy to you gains the ability to cast the Wish Spell as per the main effect, though they might not realize this until after the wish is granted.
 - **20-Judgement:** You can bestow the effects of the Justice Fate to any Creature of your choice.
 - **Reversed:** You or any Creature you choose loses a Bleed they have.
 - **21-The World:** You may travel to any location of your choice, even if the location is protected against teleportation. When you decide on a location, you also learn the layout and contents, including secret rooms and illusions.
 - **Reversed:** You and your Party become trapped in a Dungeon of the GMs choice. The Size of this Dungeon is up to the GM, and can be extraplanar as with a Demiplane. You cannot leave by any means short of defeating the last Boss in this dungeon, at which point you return to where you originally drew the card.
- ...

- **Cups:** You gain X special Hit Dice, that you can choose to expend and roll at any time, even if you haven't taken a Rest. These special Hit Dice are of the same type you have for your Class.
- **Reversed:** Choose one Ability Score, which becomes Impaired X.
- **Pentacles:** You can increase the total of a d20 Test by any amount up to X, reducing X by the same value.
- **Reversed:** You can instead reduce the total of a d20 Test, as per the main effect.
- **Swords:** Until the End of your next Combat, you can increase the total of any Damage/Healing Roll by X, reducing X by the same value.
- **Reversed:** You can instead reduce the total of any Damage/Healing Roll as per the main effect.
- **Wands:** Until the End of your next Combat, you become Quickened X.
- **Reversed:** Until the End of your next Combat, you become Slowed X.

Obliteration: The Tarot of Fate can be Obliterated by throwing it into a Black Hole, or fully expended before destruction.

Token of Purity

"A small blessing of health, for those in dire need."

-Marsh

Traits: Common, Consumable, Holy, Nullify

Weight: 0.01 lbs (Minuscule)

Cost: 1 GP

Complexity: 12

Material: Metal

Actions: 2

Can only be used by a Cleric, or a Celestial.

This Item can only be used once.

When used on a Creature, the Target treats one Affliction or effect as if they passed one Saving Throw.

If a Success would still apply a penalty, the Target may ignore any penalty from it while gaining any bonuses. If there are no bonuses from a Success, the Target instead ignores any penalty from the next Saving Throw they make against this Affliction.

When used on a source of corruption, poisoned well, disease spilling geyser, or similar impure structure or connection to the land, it is purified, and all negative effects begin to decay naturally.

Token of Recall

"It may seem obvious to travel the world with these, and it is possible. However, some places block teleportation from outside, and reclaiming them afterward is nearly impossible." -Grandmaster Musasushi

Traits: Uncommon, Movement, Teleportation

Weight: 0.01 lbs (Minuscule)

Cost: 50 GP

Complexity: 16

Material: Metal

Actions: 1

This Item has 1 Charge, which it regains daily at dawn.

When a Creature uses this Token, they are Teleported to the place this Token is bound to (even if it moved), along with anything they are wearing, but not carrying, unless the Item is within a worn Container, such as a bag or sheathe.

This form of Teleportation only works while on the same Plane of Existence. To bind a Token, it must be brought to the destination and used.

This Item automatically Triggers when the bearer is reduced to 0 Hit Points or falls Unconscious (Crafter's Choice), but the Token is destroyed when used this way. If you have multiple, you choose which one takes priority.

Tome of Improvement

"Just a few quick tricks, and you'll be speaking with a silvery tongue before you know it! All for the humble price of seven-hundred-fifty platinum!" -Excerpt from a Charisma Tome

Traits: Very Rare, Ability Score, Visual

Weight: 2 lbs (Minuscule)

Cost: 75,000 GP

Complexity: 23

Material: Fabric

A Creature that reads this Tome over the course of a Long Rest permanently gains a +1 to the corresponding Ability Score to a maximum of 30, even if that isn't their current maximum.

The Ability Score is determined when this Item is Crafted, and can even be Crafted as a Variant that can be used for multiple different Ability Scores in the same item. However, the Crafter must have at least 30 in the corresponding Ability Scores.

If a Creature reads a Tome more than once every year, they gain Exhaustion 1, which cannot be removed until the Year ends, due to the stress of learning and following multiple routines at once.

Tools of Refining

"Give a smith an ingot, and he's busy for a day. Teach him to use metals fresh from the mine, and he'll be busy for a lifetime. Or, just give it to me, and skip the disappointment." -Borukan the Smith

Traits: Common

Additional Cost: +50 GP

Additional Complexity: +2

Material: See Base

Whenever you Craft with these Tools, the Materials are considered Pre-Refined.

Traveller's Hut

"I mean, how could I leave behind my entire lab?" -Ivote Ofab

Traits: Rare

Weight: 2 lbs (Tiny)

Cost: 750 GP

Complexity: 18

Material: Wood

Actions: 1

Any Creature that knows the Trigger Word can activate this Item from a distance.

When activated, this Item expands to fill a 5 ft. space, and shrinks back down when deactivated, unless the doorway is broken.

While activated, the interior is simply furnished, and large enough to house 2 Creatures that are Large or Smaller, and entertain 4 Large Creatures, or equivalent cargo, without blocking the entrance.

You can redecorate this space, adding no more than one facility.

Any Creature that is still inside the Hut when it becomes deactivated is forced out of the door, while up to 2 Medium Objects are stored inside, alongside decorative furnishings.

Unpickable Lock

"The first person who can unlock my old hoard may take one thing of their choice. Oh, and take the lock while you're at it." -Borukan the Smith

Traits: Very Rare

Weight: 0.5 lbs (Minuscule)

Cost: 5,000 GP

Complexity: 30

Material: Metal

This Lock is unaffected by Anti-Magic, or any means of disabling, or destroying Magic Items while Locked, including the Wish Spell.

This Lock can be used to Lock anything that an ordinary Lock can. However, it Magically protects whatever it is locking from all forms of travel, unless otherwise decided by the Creature that places the Lock. Additionally, the locked area is Immune to Damage that would pass its boundaries.

The Lock can only be opened by one means that it was designed to be opened by, such as a specific key, or a passphrase. It also opens if the Creature that places the Lock dies, and closes by itself if that Creature is resurrected by any means, including reincarnation, though it can be picked.

The DC to pick this lock is 40.

- **Critical Success:** The Lock stays open, and doesn't force you to close it.
- **Success:** The Lock opens, but forces you to re-lock it and attempt the Check a second time to make sure it wasn't a fluke. If you do Succeed a second time, it stays open.
- **Failure:** You cannot attempt to open this Lock for 1 week.

Vial of Endless Potions

"Every alchemist dreams of finding items like these. I'm not so insecure about my capabilities, but they are helpful in a pinch." -Ivote Ofab

Traits: Legendary

Weight: 0.1 lbs (Minuscule)

Cost: 50,000 GP

Complexity: 25

Material: High-Grade Gemstone

Actions: 3

Daily at dawn, this Vial fills with a single use of the last Potion or Poison it was attuned to. If poured (or used) from the Vial, the Potion or Poison loses potency as soon as the Vial refills.

At the end of a Short or Long Rest, you can Attune the Vial to any Potion or Poison you have, losing the effect of the previous Potion or Poison.

Wand of Spells

"It's always a good idea to keep more Spells on hand than you think you'll need." -Grandmaster Musasushi

Traits: Common to Artifact, Spellcasting

Weight: 0.1 lbs (Minuscule)

Cost: 100 GP (Uncommon: 250 GP, Rare: 1,000 GP, Very Rare: 10,000 GP, Legendary: 50,000 GP, Artifact: 100,000 GP)

Complexity: 15 (Uncommon: 17, Rare: 19, Very Rare: 21, Legendary: 23, Artifact: 25)

Material: Wood

Actions: 2

This Wand has 1 Charge, which it regains at dawn.

1 Charge: You cast the Spell stored within, which uses your Spell Attack Modifier and Spell Save DC (no Bonus, unless explicitly mentioned). Any Spell cast this way doesn't require any Components, Spell Slots, or additional Actions. Also roll a d6. On a 6, the Charge isn't used (considered Recharge 6).

The Type of Spell this Wand contains can be no higher than a Cantrip (Uncommon: 1st, Rare: 2nd, Very Rare: 3rd, Legendary: 4th, Artifact: 5th+).

Upon Crafting, this Wand requires the Crafter to Cast the Spell they wish to have stored within.

Weapon of Death

"All are equal in the face of death, unless you are literally immortal." -Borukan the Smith

Traits: Very Rare, Improvement, Weakness

Additional Cost: 75,000 GP

Additional Complexity: +15

Material: See Base Item

Requires Attunement

When wielded by a Creature that isn't Attuned to it, the Weapon of Death is considered a Weakness for All Creatures.

While Attuned by a Creature, Attacks from this Weapon ignore all forms of Damage Reduction, except Immunity.

Weapon of Slaying

"Now this is my personal favorite! I just put this on their Weapons, and send them off to fight my enemies. Then I laugh when they try to turn on me." -Borukan the Smith

Traits: Common to Legendary, Improvement, Weakness

Additional Cost: +100 GP (Uncommon: +500 GP, Rare: +5,000 GP, Very Rare: 75,000 GP, Legendary: +500,000 GP)

Additional Complexity: +5 (Uncommon: +8, Rare: +11, Very Rare: +14, Legendary: +17)

Material: See Base Item

Damage: 1d6 Force (Uncommon: 2d8, Rare: 3d8, Very Rare: 4d10, Legendary: 5d12)

This Item uses the Statistics of any Weapon, and applies the effect regardless of Ammunition.

The Crafter determines the Creature to receive additional harm from this Weapon. This can be as simple as "Any Dragon" or even as specific as "Blue Dragons that have red paint on their tails, but aren't near children." However, this Criteria must be clear and not arbitrary. Otherwise, it may fail to function as expected.

When this Weapon Hits the specified Creature, it ignores any Damage Threshold, and deals the listed Damage which cannot be reduced by any means.

White Beacon

"Whoever designed these dodecahedrons is truly diabolical. Although, I must say that it makes for a great thief deterrent." - Borukan the Smith

Traits: Common, Cursed

Weight: 5 lbs (Tiny)

Cost: 50 GP

Complexity: 11

Material: Gemstone

Requires Attunement

This is a very well known Cursed Item, and is immediately identified without a Check.

When an unbound Beacon is in a Container, a Creature opening it must make a DC 11 Wisdom Saving Throw or take the Beacon alongside any other things when opening said Container.

When the Beacon is touched by any Creature, it binds itself to that Creature, and loudly proclaims the occurrence, as well as a new Quest that the Creature always remembers until they complete it.

Once bound, the Beacon always returns to the Hand of the Creature it is bound to, or the nearest Container if it ever strays more than 10 feet. Remove Curse only unbinds the Item unless cast at 9th Level, which permanently removes all effects of this Item.

If a Creature willingly Attunes to a Beacon that is bound to them (and they can Unattune freely), they gain the following Action:

Radiant Glory:

Traits: Burn, Auto-Hit, Damage, Magical, Radiant

Actions: 2

One Creature you can see automatically takes 1d8 Radiant Damage. This doesn't count against the Multi-Attack Limit.

This only affects Creatures that are involved in the specific Quest granted by this item, and for some inexplicable reason, doesn't work on Legendary or Boss Monsters.

Wristpocket Weapon

"Are you seriously so lazy, that you can't even be bothered to carry your own Weapon?" -Borukan the Smith

Traits: Uncommon, Improvement, Teleport

Additional Cost: +100 GP

Additional Complexity: +6

Material: See Base

Actions: Free

Requires Attunement

A Wristpocket Weapon can be sheathed into an extradimensional space when dropped, and drawn as if from a Sheathe you are wearing.

If your Attunement Ends while the Weapon is sheathed, it appears nearby in an unoccupied space.

Enchantments

Enchantments are a lot easier to apply and customize as they don't require a check, but are usually much weaker than standard Magic Items, and require a formula, or breaking down an Enchanted Item.

Each Enchantment requires the Rarity before it, and increases the Rarity by 1 Tier (Common -> Uncommon, etc.) until it reaches Artifact. Applying the same Enchantment multiple times also multiplies the cost by 10 each time. Magic Items can also be used as Enchantments.

Enchantments don't count towards this if they come from a Material, such as Elemental from Red Dragon's Blood or Scales.

Accurate

Rarity: Common
Cost: 10 GP
Target: Weapons

Effect: The Weapon gains a +1 Bonus to Attack Rolls.

Aquadynamic

Rarity: Common
Cost: 50 GP
Target: Weapons

Effect: The Weapon suffers no penalties from being used underwater.

Special: This Enchantment can be applied to an Item, without changing its Rarity past Common.

Elemental

Rarity: Common
Cost: 50 GP
Target: Weapon or Armor

Effect: The Weapon deals 1 additional point of the specified Damage Type. If on an Armor, the Armor applies its Physical Resistance to the specified Damage Type.

Additionally, you gain Advantage on Intimidation Checks while This Item is equipped.

Flashy

Rarity: Common
Cost: 10 GP
Target: Any

Effect: This Item produces a purely visual or illusory effect, that could be achieved through Minor Illusion.

Special: This Enchantment can be applied to an Item without changing its Rarity past Common.

Levitating

Rarity: Uncommon
Cost: 125 GP
Target: Any

Effect: This Item has an effective Weight of 0 lbs. When you drop this Item, it can remain floating in the air, rather than falling to the ground.

Alternatively, you can have it ignore all Gravity effects when you Throw it, allowing you to double its Ranges, or Throw it an infinite distance, given enough time.

Luminous

Rarity: Common
Cost: 10 GP
Target: Any

Effect: The Item sheds Bright Light up to 30 feet, and dim light for twice that distance.

Special: This Enchantment can be applied to an Item, without changing its Rarity past Common.

Masked

Rarity: Rare
Cost: 5,000 GP
Target: Any

Effect: The item is protected from Divination Magic, or appears to be affected by a different school of magic.

Protective

Rarity: Rare
Cost: 10 GP
Target: Armor

Effect: The Armor gains a +1 Bonus to its base Avoidance Class.

Reinforced

Rarity: Uncommon
Cost: 250 GP
Target: Armor

Effect: The Armor gains a +1 Bonus to Damage Resistance.

Reloading

Rarity: Uncommon
Cost: 100 GP
Target: Weapon with the Loaded Property

Effect: The Weapon Loads itself whenever it isn't Loaded, provided that you have Ammunition in a Quiver or Holster that is equipped by you.

Returning

Rarity: Uncommon
Cost: 500 GP
Target: Any

Effect: The Item returns to your hand or its Holster (whichever is available) if it is ever more than 5 feet away from you at the End of your Turn.

This effect fails if you are further than 100 feet from the Item.

Sharpened

Rarity: Common
Cost: 50 GP (10 GP with the Minor Enchantment Spell)
Target: Non-Loaded Weapon or 10 Ammunition

Effect: The Weapon gains a +1 to Damage Rolls. This extra Damage ignores Damage Thresholds and Damage Resistance.

Triggered

Rarity: Common
Cost: 5 GP
Target: Any

Effect: You specify a Trigger (typically a command word, or divination Spell) which activates the Item's effects, or specific effects for the full duration.

Special: This Enchantment can be applied to an Item, without changing its Rarity past Common. You can also change a known Trigger for the same price.

Unbreakable

Rarity: Uncommon
Cost: 100 GP
Target: Any

Effect: The Item cannot be destroyed.

If Damaged, it reduces any Attack/Damage/Resistance penalties by 1 at the Start of each Round, and reclaims any lost material that is within 5 feet.

Additionally, this Item cannot be reclaimed for essence. Even if dispelled, the item will eventually return to its original form. This object can only be destroyed by the original creator, a Deity, the Wish Spell, an Artifact, or an attack/creature that states such.

Particularly powerful Items, such as a Lich's Phylactery destabilize this Enchantment, and instead regain Hit Points equal to a quarter of their Hit Points at the End of each Round.

Spells

Cantrip

Acid Blast

Traits: Burn, Acid, Attack

Lists: Arcane, Primal

Evocation Cantrip

Actions: 3

Components: V, S

Range: 30 ft.

Target: One Creature or Object

Damage: 1d8 Acid

Make a Ranged Spell Attack against the Target, which deals the listed Damage.

Empowered: (+1)

You increase the Damage dealt by 1d8.

Empowered: (+3)

The Range is doubled.

Acidic Grasp

Traits: Burn, Acid, Attack, Debuff, Vulnerability

Lists: Arcane, Primal

Evocation Cantrip

Actions: 3

Components: V, S

Range: Touch

Target: One Creature or Object

Damage: 1d10 Acid

Duration: 1 Minute

Make a Melee Spell Attack against the Target which deals the listed Damage.

On a Hit, the Target becomes Vulnerable 1 to Physical Damage for the Duration.

Empowered: (+1)

The Damage increases by 1d10, and the Vulnerability increases by 1.

Alacrity

Traits: Burn, Actions

Lists: Arcane, Occult

Enchantment Cantrip

Actions: 3

Components: V, S, M (an Hourglass), F

Range: 30 ft.

Target: One Creature

The Target gains Action Points equal to your Spell Healing Modifier (Minimum of 1).

Note: If this would cause their Turn to happen before you, they take their Turn immediately after you.

Empowered: (+1)

You can Target an additional Creature.

Apathy

Traits: Burn, Actions, Emotion, Saving Throw

Lists: Arcane, Occult

Enchantment Cantrip

Actions: 3

Components: V, S, M (a blank sheet of paper), F

Range: 30 ft.

Targets: One Creature

The Target must make a Wisdom Saving Throw:

- **Critical Failure:** Same as Failure, but the reduction is doubled, and there is no minimum (can't inflict Exhaustion).
- **Failure:** They lose Action Points equal to your Spell Damage Modifier, to a minimum of 1.
- **Success:** No effect.

Empowered: (+1)

You can Target an additional Creature.

Arcane Notebook

Traits: Utility, Information

Lists: Arcane, Occult

Conjuration Cantrip

Actions: 2

Components: V, S

Range: Self

Duration: 10 Minutes

You conjure a floating book and quill for the Duration, which can be used by anyone within reach to record information and pictures much like a standard book and quill in black ink, with an effectively infinite number of pages.

This information is readable by anyone. If you wish to erase information, you must tear out the page, which is completely destroyed. The book has a 30 ft. hover Speed and follows you or a Creature you give it to.

The book is dismissed if it takes Damage, the Duration ends, or you do so as a Free Action. When resummoned, the book will have all previously contained writing in the original colors.

If used as a Spellbook, each Spell added must be either inscribed with the inks, or added through a Feature.

The book doesn't carry the necessary properties to act as a Spellbook.

Empowered: (+1)

You can conjure an additional copy, which updates all others.

Empowered: (5th)

All quills can be used to record in color.

Arcane Shove

Traits: Burn, Push, Saving Throw

Lists: Arcane, Occult

Evocation Cantrip

Actions: 3

Components: S, M (a Brick or Rock), F

Range: 60 ft.

Target: One Creature or Object

The Target must make a Strength Saving Throw, ignoring Size bonuses and penalties:

- **Critical Failure:** Same as Failure, but double the Distance.
- **Failure:** The Target is pushed away from you, a number of feet equal to 5 times your Spell Damage Modifier, regardless of Size (minimum of 5 feet).
- **Success:** Same as Failure, but larger Creatures are pushed half as far for each category (minimum of 0 feet).
- **Critical Success:** No effect.

Empowered: (+1)

The number of Targets increases by 1.

Chilling Grasp

Traits: Burn, Actions, Attack, Cold, Debuff

Lists: Arcane, Primal

Evocation Cantrip

Actions: 3

Components: V, S

Range: Touch

Target: One Creature or Object

Damage: 1d10 Cold

Make a Melee Spell Attack against the Target which deals the listed Damage.

On a Hit, all Actions the Target takes until the end of their next Turn cost 1 additional action.

Empowered: (+1)

The Damage increases by 1d10, and the Action Cost penalty increases by 1.

Cold Blast

Traits: Burn, Attack, Cold

Lists: Arcane, Primal

Evocation Cantrip

Actions: 3

Components: V, S

Range: 30 ft.

Target: One Creature or Object

Damage: 1d8 Cold

Make a Ranged Spell Attack against the Target, which deals the listed Damage.

Empowered: (+1)

You increase the Damage dealt by 1d8.

Empowered: (+3)

The Range is doubled.

Command Fire

Traits: Edge, Debuff, Fire, Saving Throw

Lists: Arcane, Divine, Primal

Evocation Cantrip

Actions: 2

Components: S, C

Range: 30 ft.

Target: Up to a 5 ft. cube.

Damage: 1d6 Fire

You create an effect using flames, such as harmless flickers, changing the color, or a hovering flame that requires Concentration.

You can cause material within Range to ignite, or extinguish, which extends to ending Persistent Fire Damage (automatic Success).

A Creature in the space when a flame is ignited, starting their Turn there, or entering its space must make a Dexterity Saving Throw:

- **Critical Failure:** Same as Failure, but the listed Damage is taken as Persistent Damage.
- **Failure:** They take the listed Damage
- **Success:** No Damage, and may immediately spend Reactions to Move out of the Space if it's not their Turn, and they have the Movement.

The flame extinguishes when you lose Concentration, unless it has something to burn.

Empowered: (+1)

The largest area you can Target expands by 5 feet, and the Range extends by 10 feet.

Command Undead

Traits: Edge, Audible, Debuff, Disruptable, Mental, Minion, Saving Throw

Lists: Arcane, Divine, Occult
Necromancy Cantrip

Actions: 3

Components: V, M (a Skull), F

Range: 60 ft.

Target: One Undead Creature

Duration: 10 Minutes

If the Target is Mindless, they become controlled by you as a Minion you cannot command for the Duration, and instead follows a verbal order given as part of this Spell, though they are limited by their capabilities, such as known languages.

If the Target is already under another Creature's control, you contest the previous Spellcaster's DC with a Charisma Spellcasting Check, treating your Success as if the Target Failed.

If you Target an Undead Creature that doesn't have the Mindless Trait, they can make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but they cannot contest this effect further.
- **Failure:** They are controlled by you for the Duration, but can repeat the Saving Throw at the End of each Hour.
- **Success:** They become Immune to this effect for the next Hour.

Empowered: (+1)

The Duration doubles.

Empowered: (10th)

The Duration becomes permanent, or until overridden, and the Target can only repeat the Saving Throw while they have no tasks to complete.

Command Water

Traits: Edge, Debuff, Grapple, Prone, Push, Saving Throw, Water

Lists: Arcane, Divine, Primal
Transmutation Cantrip

Actions: 2

Components: V, S

Range: 30 ft.

Target: 5 ft. Cube

All uncontained water (or similar liquid) within the area is moved along a supported surface to any space within Range. Any Creature caught in the Area must make a Strength Saving Throw, while fully submerged Creatures make the Saving Throw at Disadvantage:

- **Critical Failure:** Same as Failure, but they're also knocked Prone.
- **Failure:** They are Pushed to the new position, in accordance to their position in the original area.
- **Success:** No effect.

You can also choose to freeze the water instead, which Grapples Creatures instead of Pushing, and Restrains them instead of knocking them Prone, with an escape DC equal to your Spell Save DC, reduced by Fire Damage inflicted to the space. Thawing a space ends this effect.

Lastly, you can produce a harmless effect using water within the area, such as changing the color and opacity, soaking or drying a Creature or object, or forming shapes.

Empowered (+1)

The area expands by 5 feet, and the Range increases by 10 feet.

Compass of Destiny

Traits: Utility, Information

Lists: Divine, Occult
Divination Cantrip

Actions: 3

Components: S

You begin walking in the direction of a Plot Hook the GM has prepared, or are reminded of your current task if you're in the middle of one already.

Note: This is not a Summon Quest Spell.

Confuse

Traits: Burn, Charmed, Debuff, Disruptable, Frightened, Special

Lists: Arcane, Occult

Enchantment Cantrip

Actions: 2

Components: V

Range: 30 ft.

Targets: One Creature

The Target must make a Charisma Saving Throw:

- **Failure:** The Target is Charmed or Frightened 1 (your choice) by you until the End of their Next Turn.
- **Success:** No effect.

Special: You can also cause the Target to become Frightened or Charmed by a Creature other than you.

Empowered: (+1)

You Target an additional Creature in Range.

Control Earth

Traits: Burn, Cover, Earth, Prone, Push, Terrain

Lists: Arcane, Divine, Primal

Transmutation Cantrip

Actions: 3

Components: S

Range: 30 ft.

Target: Up to a 5 ft. cube

You can move any amount of loose earthen material within the Area, such as stone, dirt or sand along a supported surface, to any unoccupied space within Range.

A Creature standing on the surface can make a Dexterity Saving Throw, though Prone Creatures roll at Disadvantage instead of Advantage:

- **Critical Failure:** Same as Failure, but they are also knocked Prone.
- **Failure:** They are Moved to the new position, in relation to their position in the original area.
- **Success:** No effect.

You can also choose to make any amount of affected Terrain Difficult, or Non-difficult, or modify Cover.

Lastly, you can produce a harmless effect using earth within the area, such as forming patterns and shapes in the material, or stacking objects.

Empowered: (+1)

The area expands by 5 feet, and the Range increases by 10 feet.

Control Wind

Traits: Burn, Prone, Push, Saving Throw, Wind

Lists: Arcane, Divine, Primal

Evocation Cantrip

Actions: 2

Components: S

Range: 30 ft.

Target: 5 ft. Cube

You conjure a breeze of varying strength within the area. Any Creature that is completely inside the area must make a Strength Saving Throw:

- **Critical Failure:** Same as Failure, but they also fall Prone.
- **Failure:** They are Pushed outside the Area.
- **Success:** No effect.

You can also produce a harmless effect using air or gas within the area, such as forming colors or odors.

Empowered: (+1)

The area expands by 5 feet, and the Range increases by 10 feet.

Death Grip

Traits: Burn, Debuff, Grapple, Saving Throw

Lists: Arcane, Divine, Occult

Necromancy Cantrip

Actions: 3

Components: V, S, C

Range: 60 ft.

Targets: One Creature or Object

Duration: 1 Minute

The Target must make a Dexterity Saving Throw:

- **Critical Failure:** Same as Failure, but the Target cannot regain Hit Points by any means while Grappled in this way.
- **Failure:** The Target is Grappled to their Space for the Duration or until they break free with the Overpower Action.
- **Success:** No effect.

Empowered: (+1)

You can Target one additional Creature.

Death's Toll

Traits: Burn, Debuff, Drained, Necrotic, Saving Throw

Lists: Divine, Occult

Necromancy Cantrip

Actions: 3

Components: V, M (a small Bell or Gong), F

Range: 60 ft.

Targets: One Creature

Damage: 1d8 Necrotic

The Target must make a Charisma Saving Throw:

- **Critical Failure:** Double Damage, and they become Drained equal to your Spell Damage Bonus.
- **Failure:** They take the listed Damage.
- **Success:** No effect.

If the Target is Bloodied, their Degree of Success is reduced by 1.

Empowered: (+1)

The Damage increases by 1d8.

Dimensional Storage

Traits: Utility, Extra-Dimensional, Item, Special

Lists: Arcane, Occult

Conjuration Cantrip

Actions: 2

Components: S

You can reach your hand into a Demiplane you created or control, stowing or retrieving an Object you can hold in one hand, that doesn't exceed your Carrying Capacity.

If you don't control or haven't created any Demiplane, you can store one Object at a time, following the same restrictions.

Living Creatures cannot enter a Demiplane in this way, being shunted out as part of the effect.

Special: When you use an Action with any Item Trait (e.g. Ancestor's Strike, Quick Craft, Sneak Attack, etc.), you may treat Items stored by this Spell as if they are in your backpack, or spend the Action Cost of this Spell to treat them as if they are in your hand. Doing so doesn't count towards the Multi-Attack Limit for Spells.

Dodgeball

Traits: Burn, Attack, Prone, Push

Lists: Arcane, Primal

Conjuration Cantrip

Actions: 3

Components: V, S, M (a fruit, or drop of hardened rubber)

Range: 60 ft.

Targets: One Creature or Object

Make a Ranged Attack Roll against the Target.

If the Attack Hits a Creature that is no more than one Size larger than you, you can push it up to 5 feet away from you, and knock it Prone.

On a Critical Hit, it also bounces to one additional Creature, as if the Spell originated from the first Target's original space.

Empowered: (+1)

You Target an additional Creature with the same Attack.

Empowered: (+3)

The Target can be an additional Size larger, and the Range is doubled.

False Life

Traits: Edge, Buff, Temporary Healing

Lists: Arcane, Divine, Occult

Necromancy Cantrip

Actions: 3

Components: V, S, M (a bottle of alcohol), F

Range: Touch

Targets: One Creature

Duration: 1 Hour

Healing: 1d6 Temporary

The Target gains the listed Healing for the Duration.

You can also cast this Spell on any Creature that has accompanied you for at least 10 Minutes (including yourself), causing it to use the highest value, and last until either you have been Incapacitated or remain out of your Reach, for the Duration.

Empowered: (+1)

The Temporary Healing increases by 1d6.

The 10 Minute Version uses your highest available Tier.

Fire Blast

Traits: Burn, Attack, Fire

Lists: Arcane, Primal

Evocation Cantrip

Actions: 3

Components: V, S

Range: 30 ft.

Target: One Creature or Object

Damage: 1d8 Fire

Make a Ranged Spell Attack against the Target, which deals the listed Damage.

Empowered: (+1)

You increase the Damage dealt by 1d8.

Empowered: (+3)

The Range is doubled.

Force Emotion

Traits: Burn, Debuff, Disadvantage, Disruptable, Emotion, Initiative, Saving Throw

Lists: Arcane, Occult

Enchantment Cantrip

Actions: 3

Components: V, M (a Paintbrush), F

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

The Target must make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but they also have Disadvantage on the next Saving Throw they make before the Duration Ends.
- **Failure:** They are forced to display an emotion of your choice, such as joy, anger or sadness for the Duration, and their next Turn is delayed until Initiative Count 0 on the Round it would be taken on.
 - This also restricts Reactions on that Round.
- **Success:** No effect.

Empowered: (+1)

You Target an additional Creature.

Guard

Traits: Edge, Resistance

Lists: Arcane, Divine, Occult

Abjuration Cantrip

Actions: 3

Components: V, S

Range: Touch

Target: One Creature or Object

Duration: 1 Minute

The Target gains Resistance to all Damage equal to your Spell Healing Modifier (Minimum of 1). If the Target loses Hit Points from Damage that is reduced in this way, this Spell Ends at the Start of the Target's next Turn.

Persistent Damage never breaks Guard when it Triggers.

Reminder: Resistance prevents the application of Persistent Damage, but not an instance of Damage.

Empowered: (+1)

The Resistance adds your Spell Healing Modifier an additional time.

Guidance

Traits: Utility, Buff

Lists: Divine, Occult

Divination Cantrip

Reactions: 2

Components: V, S

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

Trigger: When a Creature you can see makes an Ability Check or Saving Throw, or begins any Activity that involves either.

The Triggering Roll adds 1d4 to the result.

Special: You can use this Reaction as an Action on your Turn, applying the benefits when the Target makes or starts an Ability Check or Saving Throw for the Duration.

Empowered: (+1)

Grant the die to one additional Creature within Range.

Igneous Grasp

Traits: Burn, Attack, Fire

Lists: Arcane, Primal

Evocation Cantrip

Actions: 3

Components: V, S

Range: Touch

Target: One Creature or Object

Damage: 1d10 Fire + 1 Persistent Fire.

Make a Melee Spell Attack against the Target, which deals the listed Damage.

Only the Non-Persistent Fire Damage is increased by your Spell Damage Modifier.

Empowered: (+1)

The Damage increases by 1d10, and the Persistent Damage increases by 1.

Light

Traits: Burn, Blind, Debuff, Light, Saving Throw

Lists: Arcane, Divine, Primal

Evocation Cantrip

Actions: 3

Components: V, S, M (a bead of glass, or phosphorescent material), F

Range: 30 ft.

Target: 1 Object or Point

Duration: 1 Hour

You cause the Target to shed up to 10 ft. of Bright Light, and an additional 10 ft. of Dim Light for the Duration.

If the Target was an Object, the light shines from an area no bigger than your hand, and moves with the Object regardless of what you do, and can also be covered to block the light.

If the Target is a Point, the light floats where you leave it, or until you spend 1 Action to move it to another space within Range, provided the light is also within Range. But while this light can still be covered, all Creatures and Objects pass right through it.

Alternatively, you can cause a blinding flash within Range, which forces all Creatures within the Bright Light Radius to make a Constitution Saving Throw:

- **Critical Failure:** Same as Failure, but it lasts for 1 Minute.
- **Failure:** They are Blinded until the End of their next Turn.
- **Success:** No effect.

Empowered: (+1)

The Bright and Dim Light both increase by 10 ft.

Empowered: (5th)

The Duration can be extended up to 1 month.

Empowered: (10th)

The Duration can be extended to become Permanent.

Lightning Blast

Traits: Burn, Attack, Lightning

Lists: Arcane, Primal

Evocation Cantrip

Actions: 3

Components: V, S

Range: 30 ft.

Target: One Creature or Object

Damage: 1d8 Lightning

Make a Ranged Spell Attack against the Target, which deals the listed Damage.

Empowered: (+1)

You increase the Damage dealt by 1d8.

Empowered: (+3)

The Range is doubled.

Mage Hand

Traits: Edge, Minion, Summon

Lists: Arcane, Occult

Conjuration Cantrip

Actions: 2

Components: S, M (a Glove), F, C

Range: 30 ft.

Duration: 1 Minute

You create a Minuscule, hovering, spectral hand within Range for the Duration, or until destroyed.

On its Turn, the Hand can take one Action that requires one hand, including one-handed Attacks, and Move to any point within Range (in any order).

The hand can carry a number of lbs equal to your Intelligence score, and is destroyed if it takes any Damage, or Critically Fails a d20 Test. Its effective AC is 16.

Any Attack you make using this Hand counts as a Spell Attack, using your Spell Attack and Damage Modifiers, benefitting from Feats that affect Cantrips, but not Feats that affect Weapons.

If you have more than one hand created, they can function synchronously, taking the same Turn.

Empowered: (+1)

You create an additional hand.

Mark

Traits: Utility, Visual

Lists: Arcane, Divine, Occult, Primal

Illusion Cantrip

Actions: 2

Components: V, S, M (a bottle of ink), F

Range: Touch

Target: up to a 5 ft. square

You create a mark, drawing, label, or color on the Target surface, or remove an existing one.

This mark lasts until the surface beneath is significantly Damaged, and is translucent to any Creature that can see through illusions.

Lastly, any Object affected by this mark cannot be hidden from Divination magic used by you, until the mark is removed.

Empowered: (+1)

The area increases by 5 feet.

Mend Wounds

Traits: Burn, Nullify

Lists: Divine, Primal

Necromancy Cantrip

Actions: 2

Components: S

Range: Touch

Target: One Creature

You reduce one type of Persistent Damage by your Spell Healing Modifier (Minimum of 1).

Empowered: (+1)

The Persistent Damage Reduction is doubled, or applies to an additional Damage Type.

Mending

Traits: Burn, Healing

Lists: Arcane, Divine, Occult, Primal
Transmutation Cantrip

Actions: 3

Components: S, M (a bottle of Glue), F

Range: Touch

Targets: One Object or Construct.

The Target has any Attack, Damage or Resistance Penalty reduced by 1 if it's an Object.

If the Target is a Construct or has no penalty that repairing could fix, it instead regains 1d4 Hit Points if applicable.

Missing Components or separated pieces in Range are pulled together if nothing stops them, and can be used to determine the direction of such pieces that are out of Range. Otherwise, excess material is required and consumed.

Magical Items that are repaired in this way retain their properties if the effect wasn't explicitly removed when destroyed, and the Item wasn't an Artifact that was Obliterated.

Magical properties and Artifacts cannot be duplicated by this Spell. Remaining Magical fragments lose their potency, when an Item is restored from its original parts.

Merchant's Exchange

Traits: Utility, Money

Lists: Arcane, Occult

Transmutation Cantrip

Minutes: 1

Components: V, S, M (one Silver Piece, which is consumed)

Range: Touch

Target(s): One Non-Magical Object or Item you can carry in one hand, or an amount of non-magical Currency you wish to spend.

The Target is replaced with Non-Magical Currency equal to half the Target's base value (rounded to the nearest coin of the same type). Alternatively, you can purchase any Non-Magical Object you can hold for twice the desired Item's base value.

If you attempt to buy a Magical Item, it has an additional 10x penalty to the price for each Rarity beyond and including Common.

If you cast this Spell with only coinage, you can exchange coins at a perfect rate without needing or consuming the Material Component. Otherwise, you don't get change for purchases.

With this Spell, you can never buy an Item for less than its worth, or sell one for more than its worth, with the exception of changes in value (talk to your GM if Item Value is affected by Market Price, or cosmic rules).

Empowered: (+1)

The amount of currency you spend in a listed denomination (or coin type) is reduced by your Charisma Modifier (minimum of 1), and the currency you recover is increased by the same amount.

Additionally, the penalty for buying Magical Items is reduced by 1x, rather than the original reductions.

Empowered: (5th)

You can Target a Container to sell all contents, including the Container, or buy a Container with any amount of Items within. You don't need to hold these Items.

Empowered: (9th)

You can sell Magical Items as long as they aren't cursed, or attuned by another Creature, with a 10x penalty to the amount of currency you recover for each rarity.

Message

Traits: Utility, Disruptable, Information

Lists: Arcane, Divine, Occult

Divination Cantrip

Actions: 2

Components: V, M (a piece of wire), F

Range: 120 ft.

Targets: One Creature

You send a message of under 10 words to a Target you know, or can see within Range.

The message can be audible or mental and can carry Non-Spell effects with the same Trait, but it must be in a spoken language you know. The Target can immediately reply up to 10 words in the same way, but they must use a language they know.

If you spend at least 1 Minute establishing this connection, you can eliminate the word limit as long as you Concentrate.

Empowered: (+1)

The Range doubles.

Empowered: (3rd)

If you have an Object with a strong connection to the Target (lock of hair, first sword, precious locket, etc.), they don't need to be within Range (but still on the same Plane), but the GM rolls 1d4. On a 1 or 2, the message fails to reach the Target and increases the range of failure by 1 for the day, which you don't notice. Additionally, the Target cannot respond if they're out of Range.

Empowered: (5th)

You can send messages to Creatures in other Planes, though it's considered out of Range.

Empowered: (7th)

You can Target a Creature you know personally, without providing an Object with a strong connection.

Empowered: (10th)

The DM no longer rolls for failure if you Target a Creature that's out of range.

Minor Illusion

Traits: Utility

Lists: Arcane, Occult

Illusion Cantrip

Actions: 2

Components: S, M (a drop of water), F

Range: 30 ft.

Target: 5 ft. Cube

Duration: 1 Minute

You create an illusion within the Targeted space for the Duration, with one of the following effects, gaining the corresponding Trait:

- **Visual:** The illusion appears as a static object, which is revealed as such when touched.
- **Audible:** The illusion produces one sound as you imagine it.
- **Scent:** The illusion produces a single scent of your choice.

The illusion is believable until examined from within 5 feet or with a different Precise sense, at which point the trick is obvious. A Creature can attempt to discern an illusion from any distance with a Perception check against your Spell Save DC.

Once an illusion is discerned, it can be ignored.

Empowered: (+1)

The area expands by 5 feet.

Empowered: (3rd)

The illusion can be roughly animated for 1 Action Point on your Turn (spinning coin, reactive conversation, wafting scent, etc.).

Empowered: (6th)

The illusion is no longer obvious when examined from within 5 feet, and can contain harmless stimuli (touch, shock, etc.).

Empowered: (9th)

You no longer need to spend your Actions animating the illusion, and it cannot be detected through Non-Magical means.

Poison Blast

Traits: Burn, Attack, Poison

Lists: Arcane, Primal

Evocation Cantrip

Actions: 3

Components: V, S

Range: 30 ft.

Target: One Creature

Make a Ranged Spell Attack against the Target, which deals the listed Damage.

Empowered: (+1)

You increase the Damage dealt by 1d8.

Empowered: (+3)

The Range is doubled.

Prestidigitation

Traits: Utility

Lists: Arcane, Occult, Primal

Evocation Cantrip

Actions: 2

Components: V, S

Range: 10 ft.

Target: 5 ft. Cube

You manifest a minor harmless effect that is either cosmetic, or a convenience in nature, within the Target area. Some examples are as follows:

- You clean and fold a pile of dirty laundry.
- You neatly stack a loose collection of papers.
- You soil a pile of clean laundry in a way that merely leaves it disgusting (Creatures get a Charisma Saving Throw to resist this effect).
- You warm a meal or drink to a pleasant degree of warmth.
- You produce a harmless array of visual or sensory effects, such as a cloud of harmless glitter, or cause a brief flicker over a Creature's eyes.
- You alter the flavor of a meal or drink to be more or less pleasant, or obscure a particular flavor you wish to not be present (can still be detected with a Perception Check against your Spell Save DC).
- You produce a scent of your choice, or cause an Object to emit that scent as if perfumed.
- You gently or forcefully open or close a door, window or container that is unlocked, and isn't stuck or otherwise barred.

Things like doors are unaffected if less than approximately three quarters of the object is within the area.

Empowered: (+1)

The Range and area are doubled.

Sacred Flame

Traits: Burn, Debuff, Radiant, Saving Throw

Lists: Divine

Evocation Cantrip

Actions: 3

Components: V, S

Range: 30 ft.

Target: 5 ft. Cube

Damage: 1d8 Radiant

All Creatures in the Target area must make a Dexterity Saving Throw:

- **Critical Failure:** Same as Failure, but Double Damage, and they have a 1d4 penalty to their next d20 Test.
- **Failure:** They take the listed Damage.
- **Success:** No Damage.

Empowered: (+1)

The Damage increases by 1d8.

Empowered: (+2)

The Range increases by 30 feet, and the area by 5 feet.

Shocking Grasp

Traits: Burn, Actions, Attack, Debuff, Lightning

Lists: Arcane, Primal

Evocation Cantrip

Actions: 3

Components: V, S

Range: Touch

Target: One Creature or Object

Damage: 1d10 Lightning

Make a Melee Spell Attack against the Target that deals the listed Damage.

On a Hit, the Target cannot take any Free Actions or Reactions until the Start of their next Turn.

Empowered: (+1)

The Damage increases by 1d10.

Summon or Banish Water

Traits: Utility, Water

Lists: Divine, Primal

Conjuration Cantrip

Actions: 3

Components: V, S, M (a tankard, or cup), F

Range: 30 ft.

Target: 5 ft. Cube

The Target area is either filled with, or drained of clean water, which includes fog if desired.

Any flames within 5 ft. of the conjured water are extinguished.

Empowered: (+1)

The area expands by 5 feet.

Sunder

Traits: Burn, Debuff, Force, Physical

Lists: Arcane, Occult

Transmutation Cantrip

Actions: 2

Components: V, S

Range: 30 ft.

Target: One Creature or Object

Damage: 1d6 Physical

You choose the specific Damage type.

The Target must make a Constitution Saving Throw:

- **Critical Failure:** Double Damage, with the extra being applied as Force Damage.
- **Failure:** The Target takes the listed Damage you choose, and one Item of your choice takes a -1 penalty, to Attack Rolls, Damage Rolls, Avoidance Class and Damage Reduction as applicable.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Empowered: (+1)

You can Target an additional Creature.

Thunderclap

Traits: Burn, Deafened, Debuff, Saving Throw, Thunder

Lists: Arcane, Divine, Occult, Primal

Evocation Cantrip

Actions: 3

Components: S

Range: 5 ft.

Damage: 1d6 Thunder

All other Creatures in Range must make a Constitution Saving Throw:

- **Critical Failure:** Same as Failure, but double Damage, and they are also Deafened for 1 Minute.
- **Failure:** They take the listed Damage.
- **Success:** No effect.

Empowered: (+1)

The Damage increases by 1d6, and the Range increases by 5 feet.

Toxic Grasp

Traits: Burn, Attack, Debuff, Poison, Poisoned

Lists: Arcane, Primal

Evocation Cantrip

Actions: 3

Components: V, S

Range: Touch

Target: One Creature or Object

Damage: 1d10 Poison

Make a Melee Spell Attack against the Target which deals the listed Damage.

On a Hit, the Target is Poisoned until the End of their next Turn.

Empowered: (+1)

The Damage increases by 1d10.

True Strike

Traits: Burn, Auto-Hit, Buff

Lists: Arcane, Divine, Occult

Divination Cantrip

Actions: 3

Components: S, M (a glass lens), F

Duration: 1 Minute

Range: Touch

Target: One Creature

Before the Duration ends, the next Attack made by the Target automatically Hits, or Nullifies an Auto-Miss effect, but cannot Critically Hit unless an effect causes it to do so.

Empowered: (+1)

You can Target an additional Creature, or benefit an additional Attack.

Empowered: (5th)

This Spell effects all attacks made in the same Turn.

Wrack

Traits: Burn, Mental, Psychic, Saving Throw

Lists: Occult

Enchantment Cantrip

Actions: 3

Components: V, S

Range: 60 ft.

Targets: One Creature

Damage: 1d8 Psychic

The Target must make an Intelligence Saving Throw:

- **Critical Failure:** Same as Failure, but Double Damage.
- **Failure:** They take the listed Damage, and use your Spell Save DC for any Triggered Concentration Saving Throw, if it's higher than the original DC.
- **Success:** No effect.

Empowered: (+1)

The Damage increases by 1d8.

1st Tier

Absorb Elements

Traits: Burn, Acid, Cold, Damage, Fire, Lightning

Lists: Arcane, Primal

Abjuration, 1st Tier

Reactions: 1

Trigger: When you take Acid, Cold, Fire, or Lightning Damage

Components: S, C

Duration: 1 Minute

You reduce the Triggering Damage by 1d10 + your Spell Healing Modifier.

The next Attack you make before the end of the Duration also deals the same amount of Damage. If the Attack Misses, the effect is lost.

Empowered: (+1)

The Damage absorbed and dealt increases by 1d10.

Alarm

Traits: Utility, Information, Mental

Lists: Arcane, Divine, Occult

Divination, 1st Tier

Minutes: 10

Components: V, S, M (a small bell and thread), F

Range: 30 ft.

Duration: 24 Hours

Select any area that fits within Range.

For the Duration, you become aware of any Creature that passes through the area, regardless of distance. If you are Unconscious when this happens, you are awakened.

Alternatively, you can have the Spell produce a sound that emanates from the center of the area, which is Audible.

Empowered: (+1)

The Range increases by 10 feet.

Alter Object

Traits: Utility, Item, Transformation

Lists: Arcane, Occult

Transmutation, 1st Tier

Actions: 4

Components: S, C

Range: Touch

Targets: 1 Object

Duration: 1 Hour

The Target becomes another Object of the same weight, provided neither would exceed a 5 ft. Cube. However, this Transformation ends early if the Target takes Damage, or falls apart by a significant margin (e.g. loose sand splitting apart).

Any intersecting Object or Creature is harmlessly shunted into unoccupied space as needed, according to the greatest mass between the Objects.

You can also use this on Terrain within the affected area to shape it into another kind of Terrain.

Empowered: (+1)

The maximum area expands by 5 feet.

Animate Plant

Traits: Blast, Summon

Lists: Primal

Necromancy, 1st Tier

Actions: 10

Components: V, S

Range: 30 ft.

Target: Any inanimate Plant

Duration: 1 Hour

The Target becomes any Plant Creature with no more than 2 Hit Dice (increased to 2 if they have less), which becomes inanimate at the End of the Duration or when reduced to 0 Hit Points.

The Duration isn't reduced, as long as the Plant doesn't Move.

The Plant treats all Actions and Abilities with limited use as if they were all expended (such as Spellcasting).

The Plant treats you as an Ally, and will follow any orders that aren't clearly suicidal. If not given orders, the Plant will defend itself, and any Creatures it sees as either ally or kin.

When Summoning a Plant in this way, you can either apply one Variant, or combine it with the statistics of one other Plant or NPC statblock with (Base) in the name. The Plant is Summoned without any Equipment.

Empowered: (+1)

The number of Hit Dice is increased by 2.

Empowered: (5th)

The Spell's duration becomes permanent, provided the plant has no more than 5 ft. of movement.

Arcane Disguise

Traits: Utility, Choice, Visual

Lists: Arcane, Occult, Primal

Illusion, 1st Tier

Minutes: 1

Components: V, S, M (a hat, amulet, or ring), F, C

Range: Touch

Duration: 1 Hour

You change the Target's appearance, such as eye color, clothing, skin tone, and even apparent height or weight.

You cannot cause the Target to appear as anything that is more than one Size category larger or smaller than they are, and physical interaction or a Perception Check against your Spell Save DC reveals the illusion. Otherwise, the appearance seems natural.

Empowered: (+1)

You can Target an additional Creature within Range, and double the Duration.

Bane

Traits: Edge, Debuff, Disadvantage

Lists: Divine, Occult

Necromancy, 1st Tier

Actions: 4

Components: V, M (a Drop of Blood), F

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

The Target must make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but they also have Disadvantage on the first d20 Test they make.
- **Failure:** They have a Penalty to all d20 Tests they make for the Duration equal to your Spell Damage Modifier (minimum of 1).
- **Success:** They have a -1 Penalty to their next d20 Test.

Empowered: (+1)

You can Target an additional Creature within Range.

Barrier

Traits: Utility, Cover

Lists: Arcane, Occult

Abjuration, 1st Tier

Actions: 4

Components: V, S, C

Range: Touch

Duration: 1 Minute

You create a 5 ft. square barrier that acts as Full Cover to any Creature that is fully behind it, and can support any Creature that fits on it.

This Barrier has 10 HP, and takes half Damage from Attacks that don't Critically Hit a protected Creature. It blocks movement, but is opaque or transparent at your choice.

Reminder: A Creature benefiting from Cover can Attack around it while next to a corner or edge, provided their Target isn't also benefiting from the same Cover.

Empowered: (+1)

The Barrier gains an additional 10 HP, and Resistance to All Damage equal to your Spell Healing Modifier.

Bless

Traits: Edge, Buff

Lists: Divine

Enchantment, 1st Tier

Actions: 4

Components: V, S, C

Range: 30 ft.

Target: One Creature

Duration: 1 Minute

The Target adds 1d4 to all d20 Tests for the Duration.

Empowered: (+1)

You can Target an additional Creature.

Burning Hands

Traits: Burn, Fire, Saving Throw

Lists: Arcane, Primal

Evocation, 1st Tier

Actions: 4

Components: V, S, M (a pinch of ashes), F

Target: 15 ft. Cone

Damage: 2d6 Fire

All Creatures within the cone must make a Dexterity Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

Objects within the area are ignited.

Empowered: (+1)

The Cone is extended by 5 ft. and the Damage increases by 1d6.

Cantrip Overcharge

Traits: Burn, Metamagic, Spellcasting

Lists: Arcane, Divine, Occult, Primal

Evocation, 1st Tier

Actions: Free

Components: None

Target: Self

Duration: 1 Minute

Before the Duration Ends, you can Empower one Cantrip by 1 additional Tier, even if you don't have access to that Tier.

This doesn't cost extra Actions. However, this only applies to Empowered: (+X) effects, not Empowered: (X).

This Spell stacks on itself, adding the additional Tiers together.

Empowered: (+1)

The Cantrip can be Empowered by an additional Tier.

Comprehend Languages

Traits: Utility, Audible, Communication

Lists: Arcane, Divine, Occult, Primal

Divination, 1st Tier

Actions: 5

Components: S, M (a Book and Quill), F

Target: Self

Duration: 1 Hour

For the Duration, you understand one Language that is being spoken to you when you cast this Spell.

Your responses aren't translated by this effect, and you cannot read the Language, or distinguish it from any others that you understand in this way.

This Spell stacks on itself, allowing you to understand multiple Languages at a time.

Empowered: (+1)

The Duration doubles.

Conjure Liquid

Traits: Utility

Lists: Arcane, Divine, Primal

Conjuration, 1st Tier

Actions: 4

Components: V, S, M (a piece of Quartz worth at least 10 GP)

Range: 10 ft.

Target: 5 ft. Diameter

Duration: 10 Minutes

You create any Non-Magical liquid that you fully understand and can be safely held by a container within your hand. As part of the Actions to cast the Spell, you may splash the liquid at a Target within Range.

If the liquid is harmful, it can only deal 1d6 of the corresponding Damage type, which must not affect the container used. Any corresponding DC (such as for Poison) is equal to your Spellcasting DC.

Any remaining liquid, or Objects formed from the liquid evaporate at the End of the Duration.

Some ideas for liquids you can create are as follows:

- Water to extinguish fire, or sustain a Pescarian.
- Oil to create Difficult Terrain that causes Creatures to Fall Prone when entering.
- Acid (in a vial) to inflict Acid Damage.
- Poison to coat Weapons.
- Molten rock or metal (in a crucible) to start a fire or form a Weapon.

Conjure Servant

Traits: Utility, Summon

Lists: Arcane, Divine, Occult

Conjuration, 1st Tier

Minutes: 1

Components: V, S, M (a Silver Bell)

Range: Touch

Duration: 24 Hours

You conjure any Creature you have seen that is at least one Size smaller than you, in an empty space within Range.

This Creature is unable to participate meaningfully in Combat (other than operating simple devices), has a 10 in all Ability Scores, 1 Hit Point, and none of the abilities it would normally have, with the exception of Movement Speeds.

This Creature speaks and understands all Languages you speak, and will perform any task you request to the best of your knowledge, and their abilities.

It can do simple tasks like triggering Traps, follow a written list of simple instructions, or even read a book to someone, but it can't perform any task requiring Proficiency, remembering a list of rules without a sheet of paper, or following indirect orders.

Empowered: (+1)

The Duration is Doubled, or you increase the Size by 1 category.

Conjure Weapon

Traits: Utility, Choice, Improvement, Item

Lists: Arcane, Divine, Occult, Primal

Conjuration, 1st Tier

Actions: 3

Components: V, S

Range: Self

Duration: 1 Hour

A Weapon of your choice, or a single batch/clip of 5 ammunition appears in your hand (or a Loaded Weapon), and can be stowed in a Container for later use. You can dispel the Item as a free action.

Ammunition created this way is dispelled immediately after impact, and other Weapons are Dispelled if you Critically Miss with a Weapon Attack.

A Weapon created in this way loses the Heavy Trait, and you may choose give it the Balanced Trait.

Empowered: (+1)

You can conjure an additional Weapon or batch/clip of 5 mundane pieces of ammunition. Each Weapon can be unique.

Empowered: (+2)

Conjured Weapons and ammunition behave as if they have the Accurate and Sharpened Enchantments increased by 1 (pg. 420).

Copy Spell

Traits: Utility, Ability Check, Special, Spellcasting

Lists: Arcane, Occult

Divination, 1st Tier

Reactions: 3

Trigger: You see a Creature in range casting a Spell from one of your Spell lists of 1st Tier or lower.

Components: V, S

Range: 60 ft.

Target: The Creature that cast the triggering Spell.

Duration: 24 Hours

Make an Arcana, Occultism, Religion, or Survival check against the Spell Save DC, depending on which Spell List the Triggering Spell is from:

- **Critical Success:** Same as Success, but if it's part of any of your Spell Lists, you can replace any other Prepared Spell with this one as if you had Prepared it, which also prevents you from losing it when the Duration Ends.
- **Success:** You prepare the Triggering Spell for the Duration, which you can cast once without a Spell Slot at the Triggering Tier, even if it's not from a List you have access to.
- **Failure:** No effect.

Before the Duration Expires, you can use this Spell for crafting one Item or scribe it in a Spell Book, without providing a Spell Slot, though the Spell is still lost, unless it replaced a different Spell.

Special: If you have a Spell Book, you can use this Spell as an Action to Prepare any Spell from the Spell Book, regardless of Tier.

Empowered: (+1)

You can Target a Tier of Spell, equal to the Tier this one is cast at.

Create Food and Water

Traits: Utility, Resources

Lists: Divine, Primal

Conjuration, 1st Tier

Minutes: 1

Components: V, S, M (a morsel of food), F

You create enough food and water to Magically feed a single Creature for an entire day (ignores Size).

The food is considered Cooked for the purpose of Full Rests.

If you have enough Spell Slots to do so for each day, you ignore any food requirement while traveling.

Empowered: (+1)

You can feed twice as many Creatures with this Spell.

Cure Wounds

Traits: Edge, Healing

Lists: Divine

Necromancy, 1st Tier

Actions: 4

Components: V, S, M (a bit of balm or ointment), F

Range: Touch

Target: One Creature

The Target regains 1d10 Hit Points.

This doesn't affect Constructs or Undead.

Empowered: (+1)

The Healing increases by 2d10.

Detect Magic

Traits: Utility, Sense

Lists: Arcane, Divine, Occult, Primal

Divination, 1st Tier

Actions: 3

Components: V, S, F, C

Range: 60 ft.

Duration: 10 Minutes

For the Duration, you can detect any Magical effects within Range, though anything that is protected from Divination Magic requires a Perception Check to notice (usually against the Spell Save DC).

You can also recognize Magical Items from Non-Magical ones at a glance, and have Advantage on Checks to determine the nature of a Magical effect.

Discern Craft

Traits: Utility, Auto-Success, Craft, Information

Lists: Arcane, Divine, Occult

Divination, 1st Tier

Actions: 4

Components: V, S

Range: Touch

Target: One Object that was not Crafted by you, and a copy that you have not casted Discern Craft on yet.

Your next attempt to Craft or Prototype the Target automatically Succeeds, provided you are Proficient in the required Tools, or help a Creature that is Proficient. Once one of these effects is used, the Spell ends.

Regardless, you learn of the basic Crafting process, required materials, and the history of the Item, including the alias of the Specific Crafter that made it (or name if there's no alias).

Dispel Magic

Traits: Burn, Ability Check Disruptable, Nullify

Lists: Arcane, Divine, Occult, Primal

Abjuration, 1st Tier

Actions: 4

Components: V, S

Range: 60 ft.

Target: Any Object or Creature that has, or is affected by a Spell or Magical effect you know of.

Duration: 24 Hours

Make an Intelligence Spellcasting Check, with a DC equal to the Spell Save DC of the Targeted effect, or the Caster's Charisma Score, if it's not a Spell:

- **Success:** The effect ends.
- **Failure:** No effect.

If the Target is a Magical Item or the Targeted effect is a Feat/action such as Spellcasting, you suppress the effects without a Spellcasting Check, for the Duration or until Successfully Disrupted.

Empowered: (+1)

You gain a +1 Bonus to the corresponding Spellcasting Check.

Echo Agony

Traits: Burn, Psychic, Saving Throw

Lists: Occult

Evocation, 1st Tier

Reactions: 3

Trigger: You take Damage.

Components: V

Range: 30 ft.

Damage: 1d10 Psychic

All Creatures within Range must make an Intelligence Saving Throw or take the listed Damage.

Empowered: (+1)

The Damage increases by 1d10.

Extend Sense

Traits: Utility, Sense

Lists: Arcane, Divine, Occult, Primal
Divination, 1st Tier

Actions: 4

Components: V, S, C

Range: 30 ft.

Duration: 1 Minute

You treat one of your Senses as if they originated from a point within Range, instead of your current space, even behind walls. For 1 Action, you can change this space to another point within Range, centered on you.

If the Sense is ever outside of your Range at the End of your Turn, the Spell ends.

Empowered: (+1)

The Range and Duration doubles.

Far Spell

Traits: Burn, Metamagic

Lists: Arcane, Divine, Occult, Primal
Enchantment, 1st Tier

Actions: Free

Components: None

Target: Self

Duration: 1 Minute

Before the Duration Ends, the Range of one Spell the Target casts is doubled.

Touch Spells increase your effective Reach and are considered Ranged, and Self Spells (including this one) become Touch Spells.

This Spell stacks on itself, increasing the multiplier.

Empowered: (+1)

The Range multiplier increases by 1.

Fear

Traits: Burn, Emotion, Frightened, Saving Throw

Lists: Arcane, Divine, Occult
Enchantment, 1st Tier

Actions: 4

Components: V, S

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

The Target must succeed on a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but the Frightened Condition is Doubled.
- **Failure:** They become Frightened equal to your Spell Damage Modifier for the Duration.
- **Success:** They become Frightened 1 until the End of their next Turn.
- **Critical Success:** No effect.

They can also reattempt the Saving Throw using Wisdom at the End of their Turn, without the penalties of Failure.

Empowered: (+1)

You can select an additional Target, and the Duration is doubled.

Feather Fall

Traits: Edge, Movement

Lists: Arcane, Primal
Transmutation, 1st Tier

Reactions: 3

Components: S, M (a Feather), F

Range: 60 ft.

Targets: Up to Five Creatures

All Targets slowly descend at a rate of no more than 60 feet at the end of their Turns, and take no Fall Damage by any means, which includes Damage from being thrown 10 feet or more.

This effect Ends on a Target when they end two consecutive Turns while on solid ground.

Empowered: (+1)

You can Target two additional Creatures.

Fog Cloud

Traits: Utility, Sense

Lists: Arcane, Primal

Conjuration, 1st Tier

Actions: 4

Components: V, S

Range: 30 ft.

Target: 15 ft. sphere

Duration: 1 Minute

You fill the area with thick fog. Creatures using Sight have their Precise Radius reduced to 5 feet through the area, while other senses work at half range, except Tremorsense.

The fog spreads around corners, and has its Radius reduced by 5 feet at the Start of each Round if it is subjected to strong wind, or when such an effect is first applied.

Empowered: (+1)

The Size of the sphere is doubled.

Hunter's Mark

Traits: Utility, Information, Olfactory, Visual

Lists: Occult, Primal

Divination, 1st Tier

Actions: 4

Components: V, S

Range: 60 ft.

Targets: One Creature

Duration: 1 Hour

For the Duration, the Target leaves behind a Magical trail that only you, and Creatures that can Detect Magic or have Truesight are able to see or Smell.

If you are following this trail, you can move at a fast pace without making any Survival or Perception checks to do so.

Empowered: (+1)

The Duration is doubled.

Identify

Traits: Utility, Information

Lists: Arcane, Divine, Occult, Primal

Divination, 1st Tier

Actions: 5

Components: V, S, M (a pearl worth at least 10 GP), F

Target: One Object or Creature

If the Target is a Creature, you learn their Name, what Ability Score they use for their Class Initiative Modifier, and any Magical effects they are under that aren't hidden from Divination Magic.

If the Target is an Object, you learn what it is, what it does, and how to activate it. This includes any Magical effects and properties that aren't hidden from divination magic.

If the Target is affected by a Curse, you only learn of the presence of the Curse, unless it was cast at an equal or lower Tier than this Spell, in which case you learn about its properties, like any other Magical effects.

Empowered: (+1)

You can identify Curses that were Empowered to 1 Tier higher.

Inflict Wounds

Traits: Burn, Attack, Necrotic

Lists: Divine, Occult

Necromancy, 1st Tier

Actions: 4

Components: S, M (a piece of rotting flesh), F

Range: Touch

Target: One Creature

Damage: 2d10 Necrotic

Make a Melee Spell Attack, which deals the listed Damage.

Empowered (+1):

The Damage increases by 2d10.

Jump

Traits: Utility, Movement

Lists: Arcane, Occult, Primal

Transmutation, 1st Tier

Actions: 4

Components: S, M (a Grasshopper leg), F

Range: Touch

Target: One Creature

Duration: 1 Hour

For the Duration, the Target can Jump a number of Feet equal to 5 times your Spell Healing Modifier (Minimum of 5 Feet), unless the original distance was greater.

Empowered: (+1)

The distance increases by 5 feet, and the Duration is doubled.

Lasting Spell

Traits: Burn, Metamagic

Lists: Arcane, Divine, Occult, Primal

Abjuration, 1st Tier

Actions: Free

Components: None

Target: Self

Duration: 1 Minute

Once before the Duration Ends, one Spell the Target Casts has its Duration Doubled.

This Spell stacks on itself, affecting additional Spells for each cast, though the extra Duration is not increased, except by Empowerment.

Empowered: (+1)

The Duration is doubled again.

Lock

Traits: Utility

Lists: Arcane

Abjuration, 1st Tier

Actions: 10

Components: V, S, M (a bent nail), F

Range: Touch

Targets: One Object

Duration: 24 Hours

The Target is Magically locked for the Duration, and cannot be opened by any Creature other than you, provided they don't know the passphrase you designate upon casting, or have the original key to it.

Any attempts to forcefully open, or pick a lock that has been locked in this way, are made against your Spell Save DC if it's higher.

Empowered: (+1)

The Duration is Doubled.

Empowered: (5th)

The Lock lasts until Dispelled.

Longstride

Traits: Edge, Actions, Movement

Lists: Arcane, Occult, Primal

Enchantment, 1st Tier

Actions: 3

Components: S

Range: Touch

Target: One Creature

Duration: 1 Hour

For the Duration, your Walking Speed (or equivalent) is increased by 5 feet. This also impacts your Action Limit.

Empowered: (+1)

The Walking Speed in feet and Action Limit are both increased by 5, and the Duration is increased by 1 Hour.

Mage Armor

Traits: Edge, AC, Improvement

Lists: Arcane, Occult

Abjuration, 1st Tier

Actions: 10

Components: S, M (a shell or carapace), F

Range: Touch

Target: One Creature

Duration: 8 Hours

The Target's Base AC becomes 11, unless their Armor has a greater base value.

If the Target is already wearing Armor with a greater or equal value, they can add their Dexterity Modifier to AC, even if said Armor would normally restrict it.

Empowered: (+1)

Add +1 to the AC granted.

Magic Missile

Traits: Burn, Auto-Hit, Force

Lists: Arcane

Evocation, 1st Tier

Actions: 4

Components: V, S

Range: 120 ft.

Damage: 1d4 Force

You fire out 2 darts of Magical energy, which automatically hit any combination of Targets you can see within Range, dealing the listed Damage.

Reminder: All Hits include the Spell Damage Modifier individually.

Empowered: (+1)

You fire 2 additional darts.

Minor Enchantment

Traits: Edge, Damage, Improvement, Resistance

Lists: Arcane, Occult

Enchantment, 1st Tier

Actions: 4

Components: V, M (A gemstone worth at least 10 GP), F

Range: Touch

Targets: One Non-Magical Melee Weapon, up to five pieces of Non-Magical Ammunition, or one set of Non-Magical Armor.

Duration: 1 Hour

The Target gains a +1 Bonus to Damage Rolls or Resistance for the Duration, depending on which is applicable.

This Damage Bonus ignores Resistances and Damage Thresholds. If the Target already has the Sharpened or Reinforced Enchantments, the higher value takes priority.

Empowered: (+1)

The Bonus increases by 1.

Empowered: (6th)

The Bonus is also added to Attack Modifiers and Avoidance Class (as applicable) at a -5 penalty (means it starts at +1 at this Tier).

If the Target already has the Accurate or Protective Enchantments, the higher value takes priority.

Moonlight

Traits: Edge, Saving Throw, Transformation

Lists: Divine, Primal
Enchantment, 1st Tier

Actions: 4

Components: V, S

Range: 60 ft.

Target: 15 ft. Radius

Duration: 10 Minutes

For the Duration, any affected Creature under a Transformation effect other than this one must make a Charisma Saving Throw:

- **Failure:** They spend their Actions to end all Transformation effects other than this one, and can't be subjected to any others while affected by this one.
- **Success:** Their true nature is revealed, though they Succeed on subsequent Saving Throws against Moonlight for 1 Hour.

effects that cannot be willingly ended are instead Suppressed within the area on Failure, with their Duration continuing to expire during that time.

Empowered: (+1)

The Radius expands by 5 feet.

Nature's Eyes

Traits: Utility, Sensory

Lists: Primal
Divination, 1st Tier

Actions: 5

Components: V, M (a small biscuit), C

Range: 200 ft.

Targets: All Beasts and Plants in Range

Duration: 1 Hour

For the Duration, you can peer through the senses of any Targets, though you can only use the Spot Action through one at a Time, including your own senses.

Empowered: (+1)

You can Spot through an additional Target, and the Range is Doubled.

Potent Magic

Traits: Burn, Damage, Metamagic

Lists: Arcane, Divine, Occult, Primal
Evocation, 1st Tier

Actions: Free

Components: None

Targets: Self

Duration: 1 Minute

Before the Duration Ends, one Spell the Target casts adds their Spell Damage/Healing Bonus an additional time.

This Spell stacks on itself, adding the total bonuses together.

Empowered: (+1)

The Spell Damage/Healing Bonuses are added one additional time.

Quickened Spell

Traits: Burn, Actions, Metamagic

Lists: Arcane, Divine, Occult, Primal
Enchantment, 1st Tier

Actions: Free

Components: None

Targets: Self

Duration: 1 Minute

Before the Duration Ends, one Spell the Target casts has the final Action Cost reduced by 5 Actions (to a minimum of 0).

This Spell stacks on itself, further reducing the cost.

Empowered: (+1)

The Action Cost is reduced by an additional 5 Action Points.

Regenerate

Traits: Burn, Persistent Healing

Lists: Primal

Necromancy, 1st Tier

Actions: 4

Components: V, S, M (a ball of moss), F

Range: Touch

Duration: 1 Minute

Healing: 1 Persistent

You apply the listed Healing, which doesn't degrade, but isn't affected by your Spell Healing Modifier, unless otherwise stated.

Unlike most Healing, this does affect Constructs and Undead.

Empowered: (+1)

The Persistent Healing increases by 2.

Empowered: (5th)

You can choose to instead maintain a lesser effect that provides no healing, but restores Missing limbs over the course of a Long Rest.

Respite

Traits: Burn, Nullify

Lists: Divine, Primal

Necromancy, 1st Tier

Actions: 4

Components: V, S, M (a ball of herbs), F

Range: Touch

Targets: One Creature or Plant

The Target can expend and roll a single Hit Die as if they completed a Breather, or end one type of Persistent Damage.

This doesn't restore any Resources, or allow any Action or Activity that requires a Breather, but does Trigger and end effects from Buffs or Debuffs that require the Target to finish a Breather, unless they decide otherwise.

Empowered: (+1)

The Target can expend any number of Hit Dice, and the triggered/ended effects can require a Short Rest, then Half Rest, then Quality 1 Full Rest. After that, the Quality improves by 1.

The Target can sacrifice a Hit Die without rolling it to immediately end one type of Persistent Damage, regardless of value.

Skywrite

Traits: Utility, Visual

Lists: Divine, Occult, Primal

Transmutation, 1st Tier

Minutes: 1

Components: S

Range: 5 miles

Duration: 1 Hour

You create a burning symbol, plain piece of writing, strange sculpture of clouds, or some other harmless visual effect that appears in the sky within Range. This visual includes light and color, but not sound.

Empowered: (+1)

The Range is doubled.

Summon Beast

Traits: Blast, Choice, Summon

Lists: Arcane, Divine, Occult, Primal

Conjuration, 1st Tier

Actions: 10

Components: V, S

Range: 30 ft.

Duration: 1 Hour

You Summon any Beast with no more than 2 Hit Dice (increased to 2 if less), which disappears at the End of the Duration or when Killed.

You can reduce the Beast's Hit Dice by half to make it last until you Summon another Permanent Beast.

The Beast treats all Actions and Abilities with limited use as if they were expended (such as Spellcasting).

The Summoned Beast treats you as if you were an ally, and will follow your orders provided they aren't suicidal. If not given any orders, the Summoned Beast will defend itself, and any Creatures it sees as either ally, or kin.

When Summoning a Beast in this way, you can either apply one Variant, or combine it with the statistics of one other Beast or NPC statblock with (Base) in the name. The Beast is Summoned without any Equipment.

Note: If your GM allows you to Summon a PC or NPC with this Spell (or other Summon Spells), their health is unaffected, their loyalty and personality are unaltered, and when they disappear, they return to where they were at the time of casting, as soon as they are dismissed or reduced to 0 Hit Points. Also, you would have to personally know the Creature being Summoned, and they would have to be willing.

Empowered: (+1)

The number of Hit Dice the Beast has is increased by 2.

Summon Celestial

Traits: Blast, Choice, Holy, Summon

Lists: Divine

Conjuration, 1st Tier

Actions: 10

Components: V, S

Range: 30 ft.

Duration: 1 Hour

You Summon a Celestial with no more than 2 Hit Dice (increased to 2 if less), which disappears at the End of the Duration or when Killed.

Regardless of what you Summon, the Celestial can End this Spell early on its Turn to grant its remaining Hit Points to any number of Creatures that are Bloodied within 30 feet.

The Celestial treats all Actions and Abilities with limited use as if they were expended (such as Spellcasting).

The Summoned Celestial treats you as if you were an ally, and will follow your orders, provided they aren't Anathemic to its Edicts (or the Edicts of your Deity if you have one).

If not given any orders, the Celestial will protect itself, and any Creature it perceives as Holy.

When Summoning a Celestial in this way, you can either apply one Variant, or combine it with the statistics of one other Celestial or NPC statblock with (Base) in the name. The Celestial is Summoned without any Equipment.

Empowered: (+1)

The number of Hit Dice is increased by 2.

Summon Elemental

Traits: Blast, Choice, Summon

Lists: Arcane, Primal

Conjuration, 1st Tier

Actions: 10

Components: V, S

Range: 30 ft.

Duration: 1 Hour

You Summon an Elemental with no more than 2 Hit Dice (increased to 2 if less), which disappears at the End of the Duration, or when Killed.

The Elemental treats all Actions and Abilities with limited use as if they were expended (such as Spellcasting).

The Summoned Elemental treats you as an Ally, and will follow your orders, even if they are suicidal. If not given any orders, the Elemental will defend itself.

When Summoning an Elemental in this way, you can either apply one Variant, or combine it with the statistics of one other Beast or NPC statblock with (Base) in the name. The Elemental is Summoned without any Equipment.

Empowered: (+1)

The number of Hit Dice is increased by 2.

Summon Fey

Traits: Blast, Choice, Summon

Lists: Arcane, Primal

Conjuration, 1st Tier

Actions: 10

Components: V, S

Range: 30 ft.

Duration: 1 Hour

You Summon a Fey with no more than 2 Hit Dice (increased to 2 if less), which disappears at the End of the Duration, or when Killed.

The Fey treats all Actions and Abilities with limited use as if they were expended (such as Spellcasting), except for up to one of your choice, which has all uses left.

The Summoned Fey treats you as if you were an ally, and will follow your orders, provided they aren't suicidal. If not given orders, they will defend themselves, and any Creatures they see as allies or kin.

When Summoning a Fey in this way, you can either apply one Variant, or combine it with the statistics of one other Fey or NPC statblock with (Base) in the name. The Fey is Summoned without any Equipment.

Empowered: (+1)

The number of Hit Dice is increased by 2.

Summon Fiend

Traits: Blast, Choice, Summon

Lists: Arcane, Occult

Conjuration, 1st Tier

Actions: 10

Components: V, S, M (a Vial of Blood, which is consumed by the Spell)

Range: 30 ft.

Duration: 1 Hour

You mark your current space, and Summon a Fiend with no more than 2 Hit Dice (increased to 2 if less), which only disappears if it dies, or is dismissed by you for 10 Actions, which you can only do from the space you marked when Summoning it.

The Fiend treats all Actions and Abilities with Limited Use as if they were expended (such as Spellcasting).

The Fiend obeys your orders for the Duration, and will follow your orders in a way that furthers its own ends if possible, provided the orders aren't suicidal.

After the Duration Ends, or if not given any orders, the Fiend will either attack the easiest Target (such as you), or flee from Combat, unless it stands to gain from another course of action.

Any Creature that stands in the space you marked when Summoning this Fiend is completely Immune to all Damage and Debuffs from the Summoned Fiend, including any effects that would force them out of the space.

When Summoning a Fiend in this way, you can either apply one Variant, or combine it with the statistics of one other Fiend or NPC statblock with (Base) in the name. The Fiend is Summoned without any Equipment.

Empowered: (+1)

The number of Hit Dice is increased by 2.

Summon Undead

Traits: Blast, Choice, Summon

Lists: Arcane, Occult

Necromancy, 1st Tier

Actions: 10

Components: V, S

Range: 30 ft.

Target: Any Corpse

Duration: 1 Hour

Replace the Target with an Undead that has no more than 2 Hit Dice (increased to 2 if less), which returns to being a Corpse when it dies, or the Duration ends.

You may reduce the total number of Hit Dice by half, in order to extend the Duration to become Permanent.

The Undead treats all Actions and Abilities with limited use as if they were expended (such as Spellcasting).

If there are enough Corpses in Range, you can divide the Hit Dice freely to Summon any number of Undead, provided you have enough Hit Dice for each one, and you keep it simple enough for the GM to run.

The Summoned Undead is Mindless, and performs any simple task you direct it to perform as part of this Spell, even if it would be suicidal.

Once this task is complete, it becomes Hostile to any Creature that isn't a Construct or Undead, or until given another order with a language it understands, or through another effect such as Command Undead.

When Summoning an Undead in this way, you can either apply one Variant, or combine it with the statistics of one other Undead or NPC statblock with (Base) in the name. The Undead is Summoned with only the Equipment on the corpse.

Empowered: (+1)

The number of Hit Dice is increased by 2.

Take Inventory

Traits: Utility, Information

Lists: Arcane, Occult

Divination, 1st Tier

Minutes: 1

Components: V, S, M (a Quill, and Sheet of Paper)

Range: 30 ft.

Target: 15 ft. Cube

You learn a rough estimate of all items and objects are contained within the area, even if said objects are inside a container, or Invisible.

You only learn what kind of Item or Object you find (e.g. chest, potion, bow, sword, etc.), not any specifics about its design, mechanical function, or Magical properties, and you cannot filter objects off of anything other than form.

You can also get the approximate Weight and Value of each Item, or all Items combined if you so desire.

If there's more than 10 of a particular Item, the value will be rounded to the nearest digit of the highest value (e.g. 523 rounds to 500, 676 rounds to 700, and 987,932 rounds to 1,000,000).

Empowered: (+1)

The Size of the area is doubled.

Wind Stream

Traits: Burn, Push, Saving Throw, Wind

Lists: Arcane, Primal

Evocation, 1st Tier

Actions: 4 Actions

Components: S, M (a Fan), F

Range: Self

Target: 30x5 ft. Line

Duration: 1 Minute

All Creatures within the Area or that Start their Turn there must make a Strength Saving Throw:

- **Critical Failure:** Same as Failure, but the Target also takes Fall Damage for every 10 feet moved.
- **Failure:** The Target is pushed up to 15 feet to the end of the Area, and is knocked Prone.
- **Success:** They are only pushed 5 feet.
- **Critical Success:** No effect.

Creatures that move against the Wind treat it as Difficult Terrain, while those that move with it don't expend Movement for each space they move leave in the area.

The area is also considered Strong Wind.

Empowered: (+1)

The area and Push distance are both doubled.

2nd Tier

Acidify Plants

Traits: Edge, Acid, Damage, Item

Lists: Primal

Evocation, 2nd Tier

Actions: 5

Components: V, S, C

Range: 60 ft.

Targets: One Herb or Wood-based Object (up to 5 cubic feet)

Duration: 1 Minute

For the Duration, any Creature that touches the Target for the First Time on their Turn takes Acid Damage equal to your Spell Damage Bonus.

Empowered: (+1)

You can Target an additional Object.

Air Pocket

Traits: Utility, Exploration, Special

Lists: Arcane, Primal

Transmutation, 2nd Tier

Actions: 5

Components: V, S, C

Range: 30 ft.

Targets: Up to 4 Creatures in their Breathable Atmosphere

Duration: 1 Hour

Each Target is surrounded by the corresponding breathable atmosphere they need for the Duration, and can share their atmosphere with an Adjacent Creature.

However, this does prevent interacting with other atmospheres such as swimming in water (Target sinks if they cannot fly, but ignores penalties from Melee underwater Combat) or taking Force Damage in a vacuum.

Special: Each Target maintains Concentration on their own air pocket, rather than the main caster. And when this effect ends for a Creature, they start holding their Breath instead of drowning if they would (pg. 114).

Empowered: (+1)

You can Target twice as many Creatures, and the Duration is doubled.

Ball of Chaos

Traits: Burn, Attack, Chaos

Lists: Arcane, Occult

Evocation, 2nd Tier

Actions: 5

Components: S, M (a ruby worth at least 50 GP), F

Range: 60 ft.

Targets: One Creature

Damage: 3d6

Make a Ranged Attack Roll against the Target. On a Critical Hit, this Attack is made against an additional Target within Range from the prior Target.

This repetition can happen any number of times, provided there is one other Creature within Range of the previous. Each Target receives Damage based on the same roll (to avoid 50+ Damage Rolls).

Tip: If you have an online dice roller, or other way to roll dice with a clear and obvious order, it is recommended to roll Attacks in bulk if you expect to Critically Hit a lot.

When you roll Damage, pick one of the Damage Dice rolled to determine the Damage Type:

d6	Result
1	Fire
2	Cold
3	Lightning
4	Acid
5	Necrotic
6	Force

Note: If you or the GM modifies this Table, it is recommended to make sure all 6 Damage Types are unique.

Empowered: (+1)

The Spell deals an additional 2d6, which contributes to picking Damage Types.

Blur

Traits: Edge, Buff, Disadvantage

Lists: Arcane, Occult

Illusion, 2nd Tier

Actions: 5

Components: S, M (A shard of quartz), F

Range: Touch

Targets: One Creature

Duration: 1 Minute

For the Duration, all Attack rolls against the Target and attempts to read their intentions (such as recognizing Spells they cast) are at Disadvantage.

Creatures with Truesight are Immune to this effect, other senses aren't.

Empowered: (+1)

You can Target an additional Creature.

Body Alteration

Traits: Edge, Buff, Choice, Transformation

Lists: Arcane, Occult, Primal

Transmutation, 2nd Tier

Actions: 5

Components: S, M (a piece of Chameleon Skin), F

Range: Touch

Duration: 10 Minutes

You apply one of the following effects:

- **Digging Claws:** Gain a Burrow Speed of 10 ft.
- **Movement Adaptation:** Gain a Climbing or Swimming Speed equal to your Walking Speed. If you gain a Swimming Speed, you also gain Waterbreathing, but must hold your Breath while outside of Water.
- **Natural Weapon:** Gain a 2 Action Natural Melee Weapon that deals 1d6 Bludgeoning, Piercing, or Slashing Damage.
- **Sense Shift:** Make any Imprecise Sense, Precise out to 30 feet.
- **Shapeshift:** Appear as a Creature of a different Ancestry or Appearance (same Size Category only, cannot be discerned through interaction).

Empowered: (+1)

The Duration is doubled.

Calm Emotions

Traits: Burn, Buff/Debuff, Disruptable, Immunity, Nullify

Lists: Arcane, Divine, Occult

Enchantment, 2nd Tier

Actions: 5

Components: V, M (a Tissue), F

Range: 30 ft.

Targets: One Creature

Duration: 1 Hour

For the Duration, the Target is Immune to all effects with the Emotion Trait, and is no longer Charmed or Frightened if they were already.

However, they also cannot gain the Benefits or Penalties of the Bloodied Condition, or recover Class Resources with the Emotion Trait, like Rage Points.

Empowered: (+1)

You can Target an additional Creature with this Spell.

Charge Gemstone

Traits: Edge, Damage, Item, Lightning

Lists: Primal

Evocation, 2nd Tier

Actions: 5

Components: V, S, C

Range: 60 ft.

Targets: One Gemstone Object, or piece of Jewelry (up to 5 cubic feet)

Duration: 1 Minute

For the Duration, any Creature that touches the Target for the first time on their Turn takes Lightning Damage equal to your Spell Damage Bonus.

Empowered: (+1)

You can Target an additional Object.

Charm

Traits: Edge, Charmed, Debuff, Disruptable, Emotion

Lists: Arcane, Occult, Primal

Enchantment, 2nd Tier

Actions: 5

Components: V, S, M (a whiff of perfume), F

Range: 30 ft.

Targets: One Creature

Duration: 1 Hour

The Target must make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but the effect lasts for 24 Hours.
- **Failure:** They are Charmed for the Duration.
- **Success:** No effect.
- **Critical Success:** They cannot be Charmed by you for the next 24 Hours.

If the Target is actively Hostile towards you, they have Advantage on this Saving Throw. And if harmed or treated with hostility, they can repeat the Saving Throw.

A Creature that is Charmed in this way will try to find peaceful solutions to any conflict they are part of, and recognize that they were Charmed after the effect ends, responding based on how they were treated, and their personal opinion on being manipulated.

Empowered: (+1)

You can Target an additional Creature with this Spell.

Chill Stone

Traits: Edge, Cold, Damage, Item

Lists: Primal

Evocation, 2nd Tier

Actions: 5

Components: V, S, C

Range: 60 ft.

Targets: One Stone Object (up to 5 cubic feet)

Duration: 1 Minute

For the Duration, any Creature that touches the Target for the First Time on their Turn takes Cold Damage equal to your Spell Damage Bonus.

Empowered: (+1)

You can Target an additional Object.

Cloud of Glitter

Traits: Burn, Blinded, Debuff, Saving Throw

Lists: Arcane, Occult, Primal

Conjuration, 2nd Tier

Actions: 5

Components: V, S, M (a handful of dust), F, C

Range: 30 ft.

Targets: 10 ft. Cube

Duration: 1 Minute

All Creatures within the area must make a Dexterity Saving Throw:

- **Critical Failure:** Same as Failure, but they cannot end the Condition early.
- **Failure:** The Target becomes Blinded for the Duration, or until they End the Condition with the Interact Action, which ends their Turn, as if it had the Final Trait.
- **Success:** No effect.

Empowered: (+1)

The area expands by 10 feet.

Command

Traits: Burn, Audible, Choice, Disruptable, Mental, Saving Throw

Lists: Arcane, Divine, Occult
Enchantment, 2nd Tier

Actions: 3

Components: V

Range: 30 ft.

Targets: One Creature

The Target must make an Intelligence Saving Throw:

- **Failure:** They must obey a single word command on their next Turn.
- **Success:** No effect.

The Command you issue must not be obviously harmful to the Target, (such as walking over lava without sufficient Fire Resistance or Immunity), and the Target must understand the word you utter.

Examples:

- *Run: The Target expends all movement and dashes in a straight line, turning if the path would be obstructed.*
- *Flee: The Target expends all movement and dashes to a space that is as far from you as possible.*
- *Monologue: The Target starts explaining a favored topic, like an evil plan.*
- *Betray: The Target takes any Action that would hinder its allies.*
- *Flop: The Target falls prone.*
- *Throw: The Target throws any Object it's holding up to 60 feet away. Usually at what they're currently focused on.*
- *Party: The Target takes the Move Action once, but treats all spaces as Difficult Terrain.*

The Command doesn't force the Target to End their Turn, but does require that they Succeed before they take any other Action, or End their Turn (unless they are forced to do so).

Empowered: (+1)

You can Target an additional Creature.

Conjure Tree

Traits: Blast, Cover

Lists: Divine, Primal
Conjuration, 2nd Tier

Actions: 10

Components: V, S, M (an Acorn, or other Arborous seed), F

Range: 60 ft.

Target: Unoccupied 5 ft. space

Duration: 1 Hour

A tree springs into being at the Target location. The tree has a 5 ft. diameter, is 25 ft in height, and provides Full Cover to any Creature that is Medium or Smaller.

At the End of the Duration, the tree crumbles apart.

Empowered: (+1)

The tree's diameter increases by 5 feet while the height increases by 25 feet.

Darkness

Traits: Edge, Advantage, Visual

Lists: Arcane, Occult, Primal
Illusion, 2nd Tier

Actions: 5

Components: V, S

Range: 60 ft.

Target: 20 ft. Sphere

Duration: 10 Minutes

The area becomes covered with pure Darkness that even obscures Darkvision.

Creatures can see through the area, but Objects within the area are little more than black shapes, becoming Invisible for the purposes of Stealth.

When a Creature Critically Misses a Ranged Attack against a Creature within the area, they roll to Hit a different Target within 5 feet of the original, if the Attacker relies on Sight.

Mundane light sources fail to illuminate the area, and Magical light sources only illuminate 5 feet of bright light, and no dim light within the area.

Empowered: (+1)

The Sphere grows by 10 feet.

Darkvision

Traits: Utility, Buff, Sight

Lists: Arcane, Divine, Occult, Primal

Divination, 2nd Tier

Actions: 5

Components: V, S, M (a firefly, or bead of glass), F

Range: Touch

Targets: One Creature

Duration: 1 Hour

The Target treats their Precise Vision as Darkvision.

Decaying Bloom

Traits: Edge, Damage, Necrotic

Lists: Divine, Occult, Primal

Necromancy, 2nd Tier

Actions: 5

Components: V, S, M (a seed), C

Range: 30 ft.

Target: Any unoccupied space.

Duration: 1 Minute

Damage: 1d6 Necrotic

For the Duration, any Creature that Starts their Turn, or enters within 5 feet of the Target take the listed Damage.

Undead cannot reduce this Damage by any means, including with Immunity or Damage Thresholds.

Empowered: (+1)

The affected area around the flower increases by 5 feet, and the Necrotic Damage increases by 1d6.

Demiplane

Traits: Utility, Extra-Dimensional, Improvement

Lists: Arcane

Conjuration, 2nd Tier

Minutes: 1

Components: V, S, C

Range: Touch

Target: Any unoccupied space on a surface.

Duration: 10 Minutes

You form a gateway into a demiplane you have created, or control, which remains open for the Duration and allows Creatures of any Size to pass through, though you can open or close it temporarily as an Interact Action. When you first cast this Spell, you gain a new demiplane that can fit a 5 ft. Cube.

When the Duration ends, any Creature that passed through the gateway is pulled back through it, regardless of obstructions. Loose Objects are left behind.

Alternatively, you may change the behavior, transfer ownership, or provide 5 GP worth of gem dust as a material component to add 5 cubic feet. The sides, floor and ceiling of this space can be solid or recursive (Portals), though you determine the color, texture and softness of any solid surfaces which are indestructible.

You can determine the temperature, illumination, gravity and atmosphere of the demiplane, as well as any region boundaries and cycles followed by these effects, such as weather (you'll have to provide water for rain).

Other than these rules you set, the demiplane is considered part of the Plane you are on when you create it, and follows the corresponding rules. This also extends to any Spell Components that are required for planar travel.

Empowered: (+1)

The Duration is doubled.

Empowered: (5th)

Living Creatures are no longer expelled when this Spell Ends. If you are one of these Creatures, your next Portal leads to where you entered from.

Empowered: (10th)

The Gateway is now Permanent, or until you close it as a Free Action, whether or not you are Living.

Detect Thoughts

Traits: Utility, Disruptable, Information, Mental, Saving Throw

Lists: Arcane, Divine, Occult

Divination, 2nd Tier

Actions: 5

Components: S, M (a copper coin), F, C

Range: 30 ft.

Duration: 10 Minutes

You can detect the surface level thoughts of Creatures within Range, which reveals any subject of focus (sadness, confusion, work, fight, play, fun, etc.), or Blank if they aren't focusing on anything specific.

If you choose to pry against a Creature within Range (Free Action), the Target must make an Intelligence Saving Throw:

- **Critical Failure:** Same as Failure, but the Target remains unaware, and the Spell doesn't end.
- **Failure:** You learn one detail of your choice about the Target, such as a memory, aspect of their personality, or more complete thought based on what the GM can come up with. However, the Target notices, and the Spell Ends.
- **Success:** The Target notices you are reading their mind, and the Spell Ends.
- **Critical Success:** Same as Success, but you must repeat the Saving Throw against the Target's Spell Save DC.

Empowered: (+1)

The Range is doubled.

Empowered: (4th)

You gain Telepathy within Range. You don't need to share a Language to understand a Creature in this way, but they must know at least one.

Empowered: (6th)

All Creatures of your choice, that are within Range when this Spell is cast and understand at least one Language, can mentally communicate with each-other for the Duration, regardless of Range.

Detect Traps

Traits: Utility, Information

Lists: Arcane, Divine, Occult, Primal

Divination, 2nd Tier

Actions: 5

Components: S, C

Range: 30 ft.

Duration: 1 Hour

For the Duration, you can detect any areas within Range that are protected by Traps, as if the areas AND Triggers were simple, connected geometric shapes. If an area exceeds this Range, only the area inside is detected, provided the Trigger is also in Range.

A Trap in this case, is any environmental hazard or potential harmful effect that is caused by a Creature taking a specific Action, such as a crumbling ledge that will give way when a Creature Steps onto it, an Ambush that initiates when somebody stops moving, or an unknown Teleportation Circle, even when inert.

You don't learn any details about detected Traps, such as what they do, what parts are Triggers or just Targeted areas, how difficult it is to avoid them, or if the effect is actually beneficial.

Empowered: (+1)

The Range is doubled.

Dragon's Breath

Traits: Burn, Buff, Choice, Saving Throw

Lists: Arcane, Primal

Transmutation, 2nd Tier

Actions: 5

Components: V, S, M (a spicy pepper), F

Range: Touch

Target: One Creature

Duration: 1 Minute

Damage: 3d6

Pick one of the following Damage Types: Acid, Cold, Fire, Lightning, Poison.

Once per Turn for the Duration, The Target can spend 5 Actions on their Turn to exhale the chosen Element in a 15 ft. cone. Any Creature caught in the area must make a Dexterity Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

Empowered: (+1)

The Damage increases by 1d6, and the Cone increases by 5 feet.

Earthbind

Traits: Edge, Debuff, Movement, Nullify

Lists: Arcane, Divine, Occult, Primal

Enchantment, 2nd Tier

Actions: 5

Components: V, S, C

Range: 300 ft.

Targets: One Creature

Duration: 1 Minute

The Target can no longer gain height from Flying, Jumping or Swimming, and must take an additional Move Action at the Start of their Turn, or descend 10 feet if they can.

Empowered: (+1)

The Duration is doubled.

Elemental Shift

Traits: Burn, Chaos, Metamagic

Lists: Arcane, Primal

Transmutation, 2nd Tier

Actions: Free

Components: None

Target: Self

Duration: 1 Minute

Before the Duration ends, one Spell the Target casts (or Spell Attack) can change one Damage Type to another that is available through another Spell you have Prepared.

This Spell stacks on itself, allowing you to affect an additional Damage Type, or an additional Spell.

Empowered: (+1)

One more Spell or Damage Type can be affected.

Enhance Ability

Traits: Edge, Advantage, Buff

Lists: Arcane, Divine, Occult, Primal

Enchantment, 2nd Tier

Actions: 5

Components: V, S, C

Range: Touch

Target: One Creature

Duration: 1 Hour

The Target has Advantage on all d20 Tests that utilize one Ability Score that you choose when casting this Spell.

A Creature can benefit from multiple instances of this Spell if the other instances apply a different effect.

Empowered: (+1)

You can Target an additional Creature within Range, even if it's the same Creature, though additional Instances must affect different Ability Scores.

Empowered: (7th)

One Target of your Choice also adds your Spell Healing Modifier to any affected Rolls.

Enlarge/Reduce

Traits: Edge, Buff/Debuff, Disruptable, Size

Lists: Arcane, Primal

Transmutation, 2nd Tier

Actions: 5

Components: V, S, C

Range: 60 ft.

Target: One Creature

Duration: 1 Minute

You increase or decrease a Creature or Object's Size by one category.

An unwilling Creature can make a Charisma Saving Throw to avoid this effect.

Reminder: Larger Creatures gain a -2 penalty to Attack Rolls, but double all Damage against smaller Creatures, and halve it from the same source. The inverse is true for Smaller Creatures (pg. 92).

Empowered: (+1)

You can Target an additional Creature.

Empowered: (6th)

You can increase or decrease a Creature's Size by 2 categories instead of 1, but this only applies to one Creature.

Fiend Fire

Traits: Burn, Persistent Fire, Saving Throw

Lists: Arcane, Occult, Primal

Evocation, 2nd Tier

Actions: 5

Components: V, S

Targets: 5x30 ft. Line

Damage: 1d4 Persistent Fire

All Creatures within the area must make a Dexterity Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No effect.

This isn't affected by your Spell Damage Modifier.

Empowered: (+1)

The Persistent Fire Damage increases by 1d4.

Healing Wave

Traits: Burn, Healing

Lists: Divine

Necromancy, 2nd Tier

Actions: 5

Components: V, S

Range: 10 ft.

All Creatures within Range regain a number of Hit Points equal to your Spell Healing Modifier.

This effect is applied twice, and doesn't affect Constructs or Undead.

Empowered (+1):

This effect is applied two additional times.

Heat Metal

Traits: Edge, Damage, Fire, Item

Lists: Primal

Evocation, 2nd Tier

Actions: 5

Components: V, S, C

Range: 60 ft.

Targets: One Metal Object (up to 5 cubic feet)

Duration: 1 Minute

For the Duration, any Creature that touches the Target for the First Time on their Turn takes Fire Damage equal to your Spell Damage Bonus.

Empowered: (+1)

You can Target an additional Object.

Hold Creature

Traits: Blast, Disruptible, Incapacitated, Saving Throw

Lists: Arcane, Divine, Occult

Enchantment, 2nd Tier

Actions: 10

Components: V, S, M (a cage), C

Range: 60 ft.

Targets: One Creature

Duration: 1 Minute

The Target must make a Charisma Saving Throw:

- **Failure:** They become Incapacitated for the Duration.
- **Success:** No effect.

The Target can repeat this Saving Throw using Wisdom at the End of each of their Turns.

Empowered: (+1)

The Spell can Target an additional Creature within Range. Each time a Target breaks free, you must attempt a Concentration Saving Throw, or lose the entire Spell.

Identify Curse

Traits: Utility, Information

Lists: Arcane, Divine, Occult, Primal

Divination, 2nd Tier

Actions: 10

Components: V, S, M (a White Feather)

Range: Touch

Targets: One Object or Creature

You learn of any Curse the Target has, even if it doesn't affect them. This includes details such as the Tier of Spell Slot used to apply it, and any effects it has, bypassing protection from Divination Magic.

If the Curse was cast at 2nd Tier or lower, you learn all methods and criteria for removing the Curse.

Empowered: (+1)

The Maximum Tier for learning the removal methods and Criteria is increased by 1.

Incite Greed

Traits: Burn, Debuff, Disruptable, Emotion, Sensory

Lists: Arcane, Occult

Enchantment, 2nd Tier

Actions: 5

Components: V, S, M (any Item with a Value or Perceived Value of at least 10 GP), C

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

The Target must make a Wisdom Saving Throw:

- **Failure:** They become obsessed with the Item used as a Material Component, or another Object with a greater value.
- **Success:** No effect.

Until the effect ends, the Target is forced to use their Actions to acquire the Material Component through the most desirable methods, and cannot detect any Creatures or Objects that don't interfere with their ability to retrieve it.

For example, a friendly Creature might do their best to barter for it, while a hostile Creature would probably fight for it.

If the Target retrieves the Object, the effect ends on them, and they don't notice the effect, but find a desire to retain the Object if possible/reasonable. If the Duration expires, they become aware of the unnatural influence.

Empowered: (+1)

You can Target one additional Creature, who seeks the same object.

Infuse Action

Traits: Utility, Buff, Choice, Improvement, Metamagic

Lists: Arcane, Divine, Occult, Primal

Enchantment, 2nd Tier

Actions: Free

Components: None

Targets: Self

Duration: 1 Minute

Until the Duration Ends, one Action of the Targets choice is considered a Magical Spell (including any secondary actions, and counting against the Spell Multi-Attack Limit), and uses Spell Modifiers in place of Weapon Modifiers where applicable.

This Spell stacks on itself, affecting additional Actions.

Empowered: (+1)

This Spell can affect an additional Action.

Invisibility

Traits: Edge, Buff, Invisible

Lists: Arcane, Occult, Primal

Illusion, 2nd Tier

Actions: 5

Components: S, M (a shard of glass), F, C

Range: Touch

Target: One Creature

Duration: 1 Hour

The Target becomes Invisible for the Duration, along with all equipment they are currently holding, wearing, or carrying.

This effect is lost if the Target interacts with another Creature, or casts a Spell. Items acquired after turning Invisible do not turn Invisible.

Empowered: (+1)

You can Target one additional Creature within a Range of 30 feet.

Empowered: (5th)

The Spell no longer requires Concentration. Items acquired after turning invisible do turn invisible.

Empowered: (7th)

The Spell doesn't End on a Target when they interact with another Creature, or cast a Spell. Instead, it's remaining Duration is reduced by half, unless you take Damage from another Creature which ends the effect immediately.

Empowered: (10th)

One of the Targets remains Invisible until the Duration Ends.

Locate

Traits: Utility, Information

Lists: Arcane, Divine, Occult, Primal

Divination, 2nd Tier

Actions: 5

Components: V, S, M (a Dowsing Rod), F, C

Range: 1 Mile

Targets: One Creature, Location or Object you know

Duration: 1 Hour

The Target must make an Intelligence Saving Throw if it can:

- **Critical Failure:** Same as Failure, but you also learn the distance to you.
- **Failure:** For the Duration, you know which direction the Target is from you.
- **Success:** No effect.

The Scrying Sensor for this Spell appears immediately above the Target.

Empowered: (+1)

The Range is doubled.

Empowered: (5th)

The Duration extends to 24 Hours, and no longer requires Concentration.

Empowered: (6th)

You know if the Target is on the same Plane of Existence as you, regardless of Success or Failure. If they aren't on the same Plane of Existence, the Spell ends immediately, due to Range.

Empowered: (7th)

You can determine which Plane of Existence the Target is on, though this still ends the Spell.

Empowered: (10th)

The Range effectively becomes Infinite, including other Planes of Existence, which no longer ends the Spell.

Madden

Traits: Edge, Bleed, Debuff, Emotion, Exhaustion, Feat

Lists: Arcane, Divine, Occult, Primal

Enchantment, 2nd Tier

Actions: 5

Components: V, S, M (an Eyeball), F

Range: 30 ft.

Targets: One Creature

Duration: 1 Day

The Target must make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but you get to choose the Bleed.
- **Failure:** Roll 1d4. The Target gains the corresponding Bleed:

d4	Result
1	Hallucinations
2	Sleepless
3	Amnesiac
4	Traumatized

- **Success:** No effect.

If a Creature already has one of these Bleeds, re-roll if it comes up. If a Creature has all 4 Bleeds, they instead take Exhaustion 1.

Empowered: (+1)

You can Target one additional Creature with this Spell.

Mind Blast

Traits: Burn, Debuff, Mental, Psychic, Saving Throw, Stunned

Lists: Occult

Evocation, 2nd Tier

Actions: 5

Components: V, S

Target: 10 ft. Cone

Damage: 3d6 Psychic

All Targets must make an Intelligence Saving Throw:

- **Critical Failure:** Same as Failure, but the Stunned Condition is increased to your Spell Damage Modifier.
- **Failure:** The Target takes the listed Damage, and becomes Stunned 1.
- **Success:** Half Damage, and not Stunned.
- **Critical Success:** No effect.

Empowered: (+1)

The Damage increases by 1d6, the Stunned Condition increases by 1, and the cone expands by 5 ft.

Misty Step

Traits: Burn, Move, Sensory, Special, Teleport

Lists: Arcane, Primal

Conjuration, 2nd Tier

Actions: 2

Components: V

Range: 30 ft.

You Teleport to any unoccupied space you can Sense within Range.

Special: Whenever you would take the Step Action, you can instead cast Misty Step through any means you choose, provided you expend Actions and any Spell Slots or other resources required. The Step is still considered used.

Empowered: (+1)

The Range is doubled, and you can bring one additional willing or Grappled Creature of your Size, that is within your Reach.

For this Spell, Creatures that are Larger than you count as 2 Creatures that are one size Smaller than they are.

Necrotic Eruption

*Traits: Burn, Disease, Necrotic, Persistent Poison,
Saving Throw*

Lists: Arcane, Occult, Primal
Necromancy, 2nd Tier

Actions: 5

Components: V, S, M (a maggot), F

Range: 60 ft.

Target: One Corpse

Damage: 1d6 Necrotic + 1 Persistent Poison

All Creatures within 5 feet of the Target must make a Constitution Saving Throw:

- **Critical Failure:** Same as Failure, but all Damage is Doubled.
- **Failure:** They take the listed Damage, and are exposed to all diseases on the Corpse, or Infection if there are none.
- **Success:** Half Damage, but no Disease or Persistent Damage.
- **Critical Success:** No effect.

The Target is destroyed in casting this Spell.

Empowered: (+1)

The explosion radius increases by 5 ft., the Necrotic Damage increases by 1d6, and the Persistent Poison Damage increases by 1.

Poison Fabric

Traits: Edge, Damage, Item, Poison

Lists: Primal

Evocation, 2nd Tier

Actions: 5

Components: V, S, M

Range: 60 ft.

Targets: One Fabric Object (up to 5 cubic feet)

Duration: 1 Minute

For the Duration, any Creature that touches the Target for the First Time on their Turn takes Poison Damage equal to your Spell Damage Bonus.

Empowered: (+1)

You can Target an additional Object.

Portal Compass

Traits: Utility, Exploration, Information

Lists: Arcane, Divine, Occult, Primal
Divination, 2nd Tier

Actions: 5

Components: V, S, M (a needle), C

Duration: 1 Hour

The needle points towards the nearest Unearthly Road or Interplanar Portal that leads to the desired Plane of Existence (1d4*10 days travel if none is planned by the GM).

It can also point towards any other form of portal that you know of.

This Spell doesn't tell you how to open or use the portal.

Prayer of Health

Traits: Blast, Healing

Lists: Divine
Necromancy, 2nd Tier

Minutes: 10

Components: V

Range: 15 ft.

Healing: 3d12

All Creatures of your choice within Range gain the listed Healing. If the Healing Die is increased, it does increase to d20s.

This doesn't work on Constructs or Undead.

Empowered: (+1)

The Range increases by 5 ft. and the Healing increases by 2d12.

Protective Bond

Traits: Edge, Buff, Damage

Lists: Divine, Occult

Abjuration, 2nd Tier

Actions: 5

Components: V, S, M (a pair of Platinum Rings worth at least 10 GP each), F

Range: Touch

Target: One Creature

Duration: 1 Hour

When you or the Target take Damage that reduces Hit Points, the other can choose to take any amount of that, though they cannot reduce Damage they accept from the other, by any means other than Temporary Hit Points.

Empowered: (+1)

You can Target an additional Creature, allowing any number of affected Creatures to share Damage from the same source.

Radiant Mark

Traits: Edge, Advantage, Debuff, Disruptable, Nullify

Lists: Divine

Divination, 2nd Tier

Actions: 5

Components: V, S

Range: 60 ft.

Targets: One Creature

Duration: 1 Minute

For the Duration, all Attack Rolls against the Target have Advantage, and cannot Critically Miss.

Empowered: (+1)

You Target an additional Creature.

Recall Memory

Traits: Utility, Information, Mental

Lists: Arcane, Divine, Occult, Primal

Divination, 2nd Tier

Actions: 5

Components: V, S

Range: Touch

The Target recalls a piece of knowledge they had previously recalled or learned without needing to make an Ability Check, or learn if it never existed.

If the memory was lost or changed through Magical means, you must make an Intelligence Spellcasting Check against the original effect's Save DC to uncover the real memory.

Restoration

Traits: Burn, Nullify

Lists: Divine, Primal

Abjuration, 2nd Tier

Actions: 5

Components: V, S, M (A gemstone worth 10 GP, which the Spell consumes)

Range: Touch

The Target Creature has one Condition that isn't Dying, Flat-Footed, Incapacitated, Prone, or Unconscious reduced by your Spell Healing Modifier, or Removed if it has no value.

If an Affliction on the Target has a DC that is lower than your Spell Save DC, you can remove it with this effect.

Curses cannot be removed in this way.

Empowered: (+1)

The effect repeats an additional time, and the DC of Affliction you can remove increases by 1.

Empowered: (10th)

All applicable Conditions and Afflictions are removed.

See Invisibility

Traits: Edge, Nullify, Visual

Lists: Arcane, Divine, Occult, Primal
Divination, 2nd Tier

Actions: 5

Components: S, M (a glass lens), F

Range: Touch

Target: One Creature

Duration: 1 Hour

For the Duration, Creatures no longer gain the benefit of being Invisible to the Target, and the Target can see any Ethereal Creatures or Objects, as well as speak to them.

Empowered: (+1)

You can Target an additional Creature.

Empowered: (5th)

You can see through illusions, and perceive Scrying Sensors (or the point of view for any Divination Magic).

Empowered: (7th)

You gain Truesight for the Duration.

Silence

Traits: Edge, Immunity, Muffled, Nullify

Lists: Arcane, Divine, Occult, Primal
Enchantment, 2nd Tier

Actions: 5

Components: S, M (a wad of cotton), F

Range: Touch

Target: 10 ft. Radius

Duration: 1 Minute

The Target area around an Object, Creature or Point within Range becomes completely Immune to Thunder Damage which cannot pass through the area.

Verbal or Auditory effects that pass through the area are similarly blocked, and Creatures inside are Muffled.

Empowered: (+1)

The area increases by 10 ft.

Sleep

Traits: Edge, Buff/Debuff, Disruptable, Rest, Saving Throw, Unconscious

Lists: Arcane, Divine, Occult, Primal
Enchantment, 2nd Tier

Actions: 5

Components: V, S, M (a handful of sand or dust), F

Range: 60 ft.

Target: 10 ft. Radius

Duration: 1 Hour

All Creatures within the Target Area must make a Wisdom Saving Throw:

- **Critical Failure:** Same as Failure, but they can't be woken up with an Interact Action.
- **Failure:** They fall Unconscious until they take Damage, or a Creature uses an Interact Action to shake them awake.
- **Success:** No effect.

A Creature that remains in this state for the full Duration automatically benefits from a Short Rest, and has their Exhaustion reduced by 1.

Empowered: (+1)

The area increases by 10 feet, and the Range by 20 feet.

Summon Divine Weapon

Traits: Edge, Attack, Special, Summon

Lists: Divine

Conjuration, 2nd Tier

Actions: 7

Components: V, S, M (A physical version of the desired Weapon's form), C

Range: 30 ft.

Duration: 1 Minute

Damage: 1d8 Radiant

You Summon an indestructible Melee Weapon in an unoccupied space within Range, and immediately make a Melee Spell Attack that deals the listed Damage.

For the Duration, you can repeat this Attack for 2 Action Points once each Turn (counts against the Multi-Attack Limit), or move the Weapon up to 30 feet for 1 Action Point.

Special: Unlike most Summons, this Weapon doesn't act on its own Turn.

Empowered: (+1)

The conjured Weapon deals an additional 1d8 Radiant Damage.

Zone of Truth

Traits: Utility, Disruptable, Information, Saving Throw

Lists: Divine, Occult

Enchantment, 2nd Tier

Minutes: 1

Components: V, S

Range: 30 ft.

Target: 10 ft. Radius

Duration: 1 Hour

All Creatures within the area or that enter it must make a Charisma Saving Throw or willingly accept a Critical Failure:

- **Critical Failure:** Same as Failure, but they are compelled to answer any questions they are asked.
- **Failure:** They cannot tell a lie.
- **Success:** No effect, but you know they Succeeded.
- **Critical Success:** Same as Success, but you don't learn if they do.

A Creature that makes this Saving Throw cannot re-attempt this for 10 Minutes, unless they willingly accept a Critical Failure.

If a lie is told on accident, any Creature that was present at the time immediately knows what the truthful answer was, and can respond accordingly.

Empowered: (+1)

The area increases by 5 ft. and the Duration is doubled.

Empowered: (10th)

The area becomes Permanent or until dispelled.

3rd Tier

Anti-Magic Field

Traits: Edge, Nullify

Lists: Arcane, Divine, Occult, Primal

Abjuration, 3rd Tier

Actions: 6

Components: S, C

Target: 5 ft. Radius

While Concentrating, all Magical effects that are Empowered to 1st Tier or lower, or use less than 2 Spell Slots or Class Resources with the Magical Trait, are suppressed.

Any effect that is sourced from inside the Anti-Magic Field doesn't function, but doesn't cost Action Points, Spell Slots, or Class Resources.

This only ends Suppressed effects if they have no Duration remaining before they leave the area, and are restored once the Anti-Magic Field no longer covers its Target.

Any Concentration lost this way can be ended without losing the effect, as long as it is being suppressed, though Concentration begins immediately once any corresponding effect is no longer suppressed. Durations do degrade while Suppressed.

Reminder: Spells using a higher Tier Spell Slot such as Burning Hands with a 3rd Tier slot don't need to be Empowered to ignore this penalty. You can also expend additional Resources, even if an Action doesn't have an effect that would require or expend additional Resources.

Empowered: (+1)

The Radius increases by 5 ft., and the number of Spell Slots or Class Resources needed both increase by 1, to a maximum of 9 each.

Arcane Passage

Traits: Utility, Exploration

Lists: Arcane, Occult, Primal

Transmutation, 3rd Tier

Actions: 6

Components: V, S, M (a Sesame Seed), F, C

Range: 30 ft.

Target: up to a 15 ft. cube

Duration: 1 Minute

While Concentrating, the Target Area becomes an open space that resembles the surroundings, and can be freely traversed. Any Creature caught inside the area when this Spell Ends is harmlessly pushed to any side the Caster chooses on a per-Creature basis.

The Area can be reduced to reach the nearest opening or any smaller Size, and doesn't block connections such as those formed by power cables, and any systems such as an electronic keypad still function as if the area wasn't affected at all. It also cannot destabilize an area and will not collapse, unless the terrain beneath it does so first.

Empowered: (+1)

The Target area is doubled.

Bestow Curse

Traits: Blast, Curse, Debuff, Special

Lists: Arcane, Divine, Occult, Primal
Enchantment, 3rd Tier

Minutes: 1

Components: V, S, M (a trinket worth a varying amount, which is consumed)

Range: 100 ft.

Target: One Creature

Duration: Up to 1 month

Special: If you include a Hag's Heart when casting this Spell on a Creature, the Curse becomes permanent until removed. Alternatively, If a sentient Creature dies while you cast this Spell on an Item, the Curse also becomes Permanent until removed.

The value of the Material Component be an amount of GP equal to or greater than the Spell's Tier² * 10.

The Target must make a Charisma Saving Throw.

- **Critical Failure:** Same as Failure, but the Duration is extended to 1 Year.
- **Failure:** You apply a Curse of your own design for the Duration.
- **Success:** The Curse only applies for 24 Hours.
- **Critical Success:** No effect.

At any time, you may revoke, end, or pause a Curse bestowed by you as a Free Action, provided you didn't specify otherwise (e.g. "...no power on earth can change it").

Remove Curse, the Wish Spell (doesn't require a component), or a Deity can remove any Curse, regardless of your specifications in the Curse. It also ends early if you are dead for more than 7 days.

The Curse you bestow must follow these restrictions:

You cannot reduce a Creature to 0 Hit Points, inflict Damage, or otherwise cause the Target's Death (effects are suspended when a Saving Throw or Ability Check would have fatal consequences, like when tumbling over a railing). As an extension, no effect of the Curse can automatically kill a Creature.

...

You must have access to any Spell with similar effects to the result of the Curse (such as Polymorph for Lycanthropy), and provide a possible Condition that ends it prematurely. Otherwise the Curse only lasts 24 Hours, even if it should be permanent. Scrolls and other Items have this effect pre-determined upon Creation.

If the Curse applies a benefit, there must be a meaningful penalty, such as only Healing when you become Frightened, forcing you to become Frightened from any source of the Frightened Condition, even if you Critically Succeed, or Healing the Creature that Frightened you.

Any severely beneficial or detrimental effects bestowed by the Curse must be limited in use or have a counter effect, whether through triggers, control, or inconvenience (e.g. Flying could be restricted to an uncontrollable version, and inability to use Magic renders you Immune to it).

If you cast Bestow Curse onto an Item, you can determine whether a Creature that grabs the Item can willingly Unattune. If they can't, the Curse cannot have any constant effects. If they can, the effects can remain as long as the Item is held or possessed.

Empowered: (+1)

You can apply the Curse to another Creature or Object in Range, and the Duration is doubled.

Empowered: (5th)

The Curse can inflict Damage to the Target, but the Damage cannot cause them to become Bloodied, nor can it exceed half the Size of their Hit Die + their Constitution Modifier, in a given Turn.

Empowered: (7th)

The Curse can be spread through any Action of your choice, provided it requires Touch, or the use of Magic on, or from the Target.

Empowered: (9th)

The Curse can reduce the Target to 0 Hit Points, though they remain Stable unless you begin Concentrating. Additionally, an Ability Check or Saving Throw that would prove lethal no longer suspends the Curse.

Empowered: (10th)

You no longer need to Concentrate for a Target to die, but only if they have a chance to avoid it.

Camouflage

Traits: Utility, Advantage

Lists: Arcane, Occult, Primal

Illusion, 3rd Tier

Actions: 6

Components: V, S

Range: Touch

Targets: One Creature or Object.

Duration: 1 Hour

The Target takes on the appearance of their surroundings, gaining Advantage on all Stealth Checks (including against Non-visual senses).

Additionally, the Target cannot be Targeted directly by Divination Magic, as if they were protected.

Commune with Nature

Traits: Utility, Information

Lists: Primal

Enchantment, 3rd Tier

Actions: 10

Components: V, S

Range: 3 Miles

You can ask up to 5 questions of the surrounding wildlife, which can give you a simple, single word answer based on everything observable within Range.

Certain influences such as a corruptive plague spreading through a Forest may be noticeable from beyond the range.

You can make a request of any plants or animals within the area, which can be persuaded to move, protect, or otherwise aid you, provided it is a reasonable task.

Mundane plants cannot uproot themselves, or take Actions, but they may form Cover, Difficult Terrain, thorns, and even withdraw vines, branches and thorns over the course of a Minute.

If the information you seek would be within an area without plants or animals, or that is outside the Range of this Spell, you learn the direction of where you can find the information, but nothing more.

Empowered: (+1)

The Range increases by 1 mile.

Detonate Summon

Traits: Blast, Force, Saving Throw

Lists: Arcane, Occult, Primal

Conjuration, 3rd Tier

Actions: 7

Components: V, S

Range: 60 ft.

Targets: Any Number of Creatures Summoned by You.

Duration: 1 Minute

The Target(s) are reduced to 1 Hit Point, and will now follow suicidal orders if they wouldn't already.

Whenever a Target is reduced to 0 Hit Points by any means or the Duration expires, they explode, forcing all Creatures within 5 feet of them to make a Dexterity Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take Force Damage equal to the Target's Hit Point Maximum, plus modifiers.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

For Summoned PCs, they are returned to where they were Summoned from at 0 Hit Points, but Stable.

Expanded Spell

Traits: Burn, Metamagic

Lists: Arcane, Divine, Occult, Primal

Evocation, 3rd Tier

Actions: Free

Components: None

Targets: Self

Duration: 1 Minute

Before the Duration Ends, one Spell the Target casts has its Area expanded by 5 feet in all dimensions.

If the affected Spell doesn't Target an area, it instead Targets a 5 ft. cube around the original Target.

This Spell stacks on itself, expanding the area further.

Empowered: (+1)

The area expands by an additional 5 feet.

Fabricate

Traits: Utility, Ability Check, Choice, Craft, Item

Lists: Arcane, Occult, Primal

Transmutation, 3rd Tier

Hours: 1

Components: V, S

Range: 30 ft.

Make an Intelligence Check with the corresponding Tool Proficiency, as if you were attempting to Craft an Item or collection of Items you choose, provided an equal weight of the corresponding Material is within Range.

The resulting Items and source Items cannot be Larger than Small, or occupy a larger space, and Magical Items cannot be rarer than Common.

Empowered: (+1)

You increase the maximum possible Size of the resulting Item and source Items by one category.

Empowered: (+2)

The rarity of Magic Item you can Craft this way increases by 1 Rarity, up to Legendary at 11th Tier.

Faerie Fire

Traits: Burn, Advantage, Blinded, Nullify

Lists: Arcane, Divine, Occult, Primal

Evocation, 3rd Tier

Actions: 7

Components: V, S, C

Range: 60 ft.

Target: 20 ft. Cube

Duration: 1 Minute

All Targets within the area must make a Dexterity Saving Throw:

- **Critical Failure:** Same as Failure, but the Target is also Blinded until the End of their next Turn.
- **Failure:** All Attack Rolls against the Target are at Advantage for the Duration, and they can't benefit from being Invisible.
- **Success:** The Target is revealed until the End of your next Turn, even if Invisible.
- **Critical Success:** No effect.

Empowered: (+1)

The Cube's area expands by 10 feet.

Fireball

Traits: Burn, Fire, Saving Throw

Lists: Arcane, Primal

Evocation, 3rd Tier

Actions: 6

Components: V, S, M (Sulfur and Bat Guano), F

Target: 10 ft. Radius

Range: 60 ft.

Damage: 5d6 Fire

All Targets within the Radius must make a Dexterity Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Empowered: (+1)

The Spell's Radius increases by 5 ft. while the Damage increases by 3d6.

Fly

Traits: Edge, Movement

Lists: Arcane, Occult, Primal

Enchantment, 3rd Tier

Actions: 5

Components: V, S, M (a feather), F

Range: 60 feet

Targets: One Creature

Duration: 10 Minutes

The Target gains a Fly (Hover) Speed equal to twice their fastest Movement Speed that isn't Flying. This doesn't affect the Action Limit.

Empowered: (+1)

You can Target an additional Creature.

Haste

Traits: Edge, Buff, Quickened

Lists: Arcane, Divine, Occult, Primal

Enchantment, 3rd Tier

Actions: 6

Components: V, S, M (a drop of quicksilver), F, C

Range: Touch

Targets: One Creature

Duration: 1 Minute

The Target gains Quickened by your Spell Healing Modifier (Minimum of 1).

While Quickened in this way, the Target's Multi-Attack Limit is increased by the same amount (even for Spells).

Empowered: (+1)

You can Target an additional Creature.

Instant Hovel

Traits: Utility, Rest

Lists: Arcane, Primal

Transmutation, 3rd Tier

Hours: 1

Components: V, S

Range: Touch

You create a temporary 10x10 Stronghold Room (pg. 127) using local materials. It is rendered useless after a week of neglect, or when attacked, including any facilities within, but is considered complete during that time.

If you wish, you may also convert the shelter into a proper Stronghold room for half the price. Doing so allows it to ignore the penalties inflicted by this Spell, and you can treat it as being fully completed throughout the process.

Empowered: (+1)

The shelter is one room category larger.

Knock

Traits: Utility, Ability Check, Exploration

Lists: Arcane, Divine, Occult

Evocation, 3rd Tier

Actions: 6

Components: V, S

Range: 30 ft.

Targets: Any Locked Object

Duration: 1 Minute

Make an Intelligence Spellcasting Check.

All Targets in Range that have a Picking DC lower than this Intelligence Check are unlocked for the Duration, and immediately emit a loud clicking sound that reveals the effect to Creatures that can hear it. Any attempts to re-lock a Target fail during this time, as any mechanisms refuse to engage.

You automatically Succeed against Locks created by you regardless of DC, and any Lock Spells placed by you can be opened with an unlimited Range using this Spell, provided you are on the same Plane of Existence.

Finally, you may choose to fail at opening certain Locks you are aware of.

Mirror Image

Traits: Edge, Nullify

Lists: Arcane, Occult

Illusion, 3rd Tier

Actions: 6

Components: S, M (a polished mirror), C

Range: Self

Duration: 1 Minute

You create three illusions within your space. If you would take Damage from an Attack Roll, you can take a Free Action to force the Attack to hit an illusion, treating the Attack as a Miss.

The Spell ends early if you run out of illusions.

Empowered: (+1)

You create an additional illusion.

Remove Curse

Traits: Burn, Ability Check, Nullify

Lists: Arcane, Divine, Primal

Abjuration, 3rd Tier

Hours: 1

Components: V, S, M (A vial of Holy Water)

Range: Touch

Target: One Creature or Object

Duration: 24 Hours

Make a Charisma (Spellcasting) Check against the Curse's DC:

- **Success:** The Curse is suppressed for the Duration, and it can't trigger, even retroactively.
 - If this Spell's Tier is equal to, or greater than the Curse's Tier, the Curse is permanently ended.
- **Failure:** No effect.

At the End of the Duration, the Curse resumes as it was at the time of casting, with the exception of all Durations, which are reduced as if they had been active.

Note: Some Curses cannot be suppressed depending on the phrasing (e.g. "...No Power on Earth can change it"). If this is the case, you can only end the Curse by casting at a sufficiently high Tier.

Revivify

Traits: Blast, Exhaustion, Resurrection

Lists: Divine, Primal

Necromancy, 3rd Tier

Actions: 6

Components: V, S, M (50 GP of diamond, which is consumed)

Range: Touch

Target: One Creature that hasn't been dead for longer than 1 Minute.

You restore the Target to life at 1 Hit Point, but they become Drained equal to their Level.

If this Spell fails for any reason (like the body lacking any vital organs such as a Brain or Heart), the Target cannot be Resurrected by you for 24 Hours.

Sanctuary of Protection

Traits: Edge, Buff, Nullify

Lists: Divine

Abjuration, 3rd Tier

Actions: 3

Components: V, M (a Block of incense)

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

For the Duration, the Target cannot be Targeted directly by any effect with the Attack, Damage, Debuff or Saving Throw Traits.

Additionally, if they are within an Area for any Spell or Action that considers them an unwilling Target (such as Fireball), their Degree of Success is improved by 1.

The Spell ends early if the Target takes any Action with the Attack, Damage or Saving Throw traits.

Scrying

Traits: Utility, Information

Lists: Arcane, Divine, Occult

Divination, 3rd Tier

Minutes: 1

Components: V, S, M (a Mirror, Orb, Window, or similar clear Object worth at least 500 GP), C

Target: One Creature, Object or Location you know on the same Plane of Existence as you.

Duration: 1 Minute

The Target must make a Wisdom Saving Throw if they can:

- **Failure:** You create a Scrying Sensor within 5 feet of the Target, which lasts for the Duration.
- **Success:** No effect.
- **Critical Success:** The Target knows someone tried to scry on them.

The Scrying Sensor can provide sensory information from up to 15 feet away, but no further, other than silhouettes. However, you can move it freely, though the sensor must keep the original Target within its Sensory Range, and it cannot pass through walls or Objects.

Empowered: (+1)

The Sensor can provide information from twice as far away.

Slow

Traits: Edge, Debuff, Disruptable, Slowed

Lists: Arcane, Occult
Enchantment, 3rd Tier

Actions: 6

Components: V, S, M (a drop of honey, or molasses),
F, C

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

The Target must make a Constitution Saving Throw:

- **Failure:** They become Slowed equal to your Spell Damage Modifier for the Duration.
- **Success:** They become Slowed 1 for the Duration.
- **Critical Success:** No effect.

Empowered: (+1)

You can Target an additional Creature.

Speak with Dead

Traits: Utility, Audible, Information

Lists: Divine, Occult
Necromancy, 3rd Tier

Actions: 6

Components: V, S, M (a Skull Mask), F

Range: Touch

Targets: One Corpse with the skull and mouth intact.

The Target animates, and can answer up to 5 questions that any nearby Creature asks, depending on the knowledge possessed by the Creature when they died.

The Target cannot lie, though it can request a passphrase or other information before answering, or even abstain from answering questions, neither of which count against what you can ask, if you don't get your answer.

The Target is capable of recognizing your appearance and voice, and may behave differently depending on its attitude towards you, such as trying to be particularly helpful, or unhelpful.

Empowered: (+1)

You can ask a number of additional questions equal to your Spell Healing Modifier.

Spiritual Protectors

Traits: Edge, Buff, Disadvantage, Radiant, Terrain

Lists: Divine
Evocation, 3rd Tier

Actions: 10

Components: V, S, C

Range: 15 ft.

Targets: Self

Duration: 1 Minute

Damage: 1d6 Radiant

For the Duration, all Creatures of your Choice that are within Range treat the area as Difficult Terrain, and have Disadvantage on all Attack Rolls.

Any affected Creature within Range of the Target takes the listed Damage whenever they take any Action with the Attack, Buff, Damage, Debuff or Saving Throw Traits.

Empowered: (+1)

The Damage increases by 1d6, and the Range increases by 5 feet.

Sunlight

Traits: Edge, Light

Lists: Divine, Primal
Evocation, 3rd Tier

Actions: 6

Components: V, S, M (a chunk of Sunstone worth at least 50 GP), C

Range: Touch

Target: One Object or Point

Duration: 1 Minute

The Target sheds Bright Light for 50 feet, and Dim Light for an additional 50 feet. The Bright Light is considered Sunlight.

Empowered: (+1)

The Bright Light and Dim Light Radii are both doubled.

Teleportation Circle

Traits: Utility, Exploration, Teleport

Lists: Arcane, Divine, Occult

Conjuration, 3rd Tier

Minutes: 10

Components: V, S, M (100 GP of gem infused chalk which the Spell consumes), C

Duration: 1 Minute

You inscribe a circle on a section of sturdy ground, copying the sigil sequence of another Teleportation Circle you know, or have a drawing of.

While you are Concentrating, Any Object or Creature that enters the Teleportation Circle is Teleported to the destination with no error. However, If you go through the circle, it closes at the Start of your next Turn.

Alternatively, you can cast this Spell without expending Spell Slots to leave the Circle inactive until you cast the Spell again, allowing you to use the inactive circle as a destination, or activate it later with 5 Actions and a Spell Slot instead of the full casting time.

If two or more Teleportation Circles are designed in the exact same way, you Teleport to one you choose when initiating the Spell, though the GM might decide you go to a Teleportation Circle that has been forgotten about.

Empowered: (5th)

You can inscribe a Permanent Teleportation Circle (All components and Slots needed), which can only serve as a destination. If it is ever moved more than 10 feet in relation to any Structure within 50 feet that is Large or Larger, it must be given the same number of Spell Slots used to place it before it can be utilized again.

Empowered: (7th)

The Material Component may include an enchanted tuning fork that is made from any metal that was harvested from the destination (not consumed).

If you provide this component, the Teleportation Circle you place can be connected to a matching circle in the Plane of Existence the Tuning Fork takes you to.

Empowered: (10th)

You inscribe a Permanent Teleportation Circle, that also allows you to Teleport to its corresponding Circle without Material Components. Same restrictions as the 5th Tier version.

Tremorsense

Traits: Edge, Buff, Sense

Lists: Arcane, Primal

Divination, 3rd Tier

Actions: 6

Components: S, M (a Spider Molt), F

Range: Touch

Targets: One Creature

Duration: 10 Minutes

The Target gains Tremorsense (Precise) out to 30 feet.

Empowered: (+1)

The Range of the Tremorsense is doubled.

True Speech

Traits: Utility, Buff, Communication

Lists: Arcane, Divine, Occult, Primal

Divination, 3rd Tier

Actions: 6

Components: V, M (a Tower Figurine), F, C

Range: 30 ft.

Targets: One Creature

Duration: 1 Hour

For the Duration, all Creatures that can hear the Target can also understand the words they say, as well as any meanings that would normally be obscured by language barriers. This also includes Creatures that don't speak any Language.

This doesn't provide the Target with the ability to understand a Creature.

Empowered: (+1)

You can Target an additional Creature.

Twinned Spell

Traits: Burn, Metamagic

Lists: Arcane, Divine, Occult, Primal

Evocation, 3rd Tier

Actions: Free

Components: None

Targets: Self

Duration: 1 Minute

Before the Duration Ends, one Spell the Target casts can affect an additional Target, which includes areas.

However, each Target can only be affected once, unless the original Spell says or intends otherwise (e.g. Eldritch Blast).

This Spell stacks with itself, increasing the number of Targets accordingly.

Empowered: (+1)

The number of Targets increases by 1.

Warp Strike

Traits: Burn, Attack, Move, Force, Teleport

Lists: Occult

Conjuration, 3rd Tier

Actions: 5

Components: V, S

Range: Touch

Targets: One Creature

Make a Melee Spell Attack against the Target.

If you Hit, the Target is Teleported to an unoccupied space you can see within 30 feet, and takes 1d6 Force Damage for every 10 feet Teleported.

You can also spend Additional Actions to add the effects of any Melee Weapon Attack you have to this one, as if you had Hit with the Weapon, or Crit if the original Attack Critically Hit.

Empowered: (+1)

The Spell can Teleport the Target an additional 10 feet.

Water Breathing

Traits: Utility, Exploration

Lists: Arcane, Divine, Occult, Primal

Transmutation, 3rd Tier

Actions: 6

Components: S, M (a piece of Kelp), F

Range: 30 ft.

Targets: 1 Creature

Duration: 24 Hours

For the Duration, all Targets can breathe Water, as if it were air, or whatever else they normally breathe.

If this Spell Ends while a Creature is breathing Water, they immediately begin drowning.

Empowered: (+1)

The maximum number of Targets is doubled.

Web

Traits: Burn, Auto-Fail, Prone, Restrained, Saving

Throw, Terrain

Lists: Arcane, Occult, Primal

Conjuration, 3rd Tier

Actions: 10

Components: S, M (a length of thread), F

Range: 60 ft.

Target: 15 ft. radius

Duration: 1 Minute

All Creatures within the area must make a Dexterity Saving Throw:

- **Critical Failure:** Same as Failure, but knocked Prone.
- **Failure:** Targets are Restrained until the Duration ends, or they are freed with a successful Athletics check. Restrained Creatures cannot be moved against their will.
- **Success:** No effect.

Any Creature that is Prone automatically fails.

Creatures treat the area as Difficult Terrain, and must reattempt the Saving Throw using Strength for each Move Action.

Empowered: (+1)

The Radius increases by 5 ft.

4th Tier

Arcane Artillery

Traits: Burn, Force, Saving Throw

Lists: Arcane

Evocation, 4th Tier

Minutes: 1

Components: V, S

Range: 1 Mile

Target: 10 ft. Radius

Damage: 4d10 Force

All Creatures within the area must make a Dexterity Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage, which doubles for each Size Category above Medium, but halves for each Size Category below.
- **Success:** Half Damage, but not scaled.
- **Critical Success:** No effect.

Empowered: (+1)

The affected area doubles.

Conjure Wave

Traits: Burn, Bludgeoning, Push, Water, Saving Throw, Water

Lists: Primal

Conjuration, 4th Tier

Actions: 7

Components: V, S, M (a bottle of sand and shells), F

Range: 30 ft.

Target: 20 ft. Cube

Damage: 5d6 Bludgeoning

Choose a direction. All Creatures in the area must make a Strength Saving Throw.

- **Critical Failure:** Double Damage, and Pushed 40 feet.
- **Failure:** They take the listed Damage, and are Pushed up to 20 feet in the chosen direction.
- **Success:** Half Damage, only Pushed 5 feet.
- **Critical Success:** No effect.

Empowered: (+1)

The Area and Push effect are increased by 10 feet, and the Damage increases by 1d6.

Death Ward

Traits: Edge, Immunity, Nullify

Lists: Divine, Occult

Necromancy, 4th Tier

Actions: 7

Components: V, S, M (a Talisman), F

Range: 15 ft.

Target: One Creature

Duration: 1 Hour

The next time the Target either falls to 0 Hit Points or is affected by the Fatal Trait, they instead drop to 1 Hit Point, even if they would instantly die, and this Spell ends.

Additionally, the Target is Immune to the Drained Condition for the Duration, and automatically Succeeds on all Saving Throws that would inflict the Drained Condition.

Empowered: (+1)

You can Target an additional Creature.

Dream Snare

Traits: Blast, Disruptable, Mental, Psychic, Resistance, Unconscious

Lists: Arcane, Divine, Occult
Enchantment, 4th Tier

Actions: 20

Components: V, S, M (a collection of mementos), F

Range: 60 ft.

Targets: 15 ft. Radius

Duration: 1 Day

For the Duration, all Creatures within the Targeted Area or that enter it for the first time in a Round must make a Wisdom Saving Throw:

- **Failure:** They become Unconscious until the Duration Ends.
- **Success:** No effect.

Creatures that fall unconscious in this way are trapped in a dream world of your design, have Resistance 20 to all Damage that stems from outside the Dream World, don't need to eat or drink, and are Immune to all Conditions that don't stem from inside the Dream World, unless they have either the Emotion or Mental Traits.

The Targets treat all unblocked Damage from the Dream World as Psychic Damage, which can be lethal. You can freely manifest Creatures once, with abilities that you have personally seen, and with no more Total Effective Hit Points than you have.

You are also present within the dream with your dream self and real self sharing knowledge, though you do not need to be Unconscious to do so. If you are killed in the dream, you remain alive in the real world, but the Spell ends.

Empowered: (+1)

The Duration is doubled. Every Day a Creature remains within the Dream World you can manifest Creatures an additional time.

Etherealness

Traits: Burn, Buff/Debuff, Ethereal, Saving Throw

Lists: Arcane, Divine, Occult, Primal
Conjuration, 4th Tier

Actions: 7

Components: V, S, M (a smear of ectoplasm), F, C

Range: Touch

Targets: One Creature or Object

Duration: 1 Minute

The Target must make a Charisma Saving Throw:

- **Failure:** They become Ethereal, or lose the Ethereal Condition for the Duration (your choice).
- **Success:** No effect.

Willing Creatures don't need to make the Saving Throw.

Empowered: (+1)

You can Target an additional Creature within Range.

Freeze

Traits: Burn, Cold, Grappled, Incapacitated, Restrained, Saving Throw, Temporary Healing

Lists: Primal

Evocation, 4th Tier

Actions: 7

Components: V, S, C

Range: 30 ft.

Target: 10 ft. Cube

Duration: 10 Minutes

Damage: 5d6 Cold

All Creatures within the area must make a Constitution Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage, and gain an equal amount of Temporary Hit Points, which causes them to be Incapacitated and Restrained.
- **Success:** Half Damage, but not Incapacitated or Restrained.
- **Critical Success:** No effect.

While Incapacitated in this way, a Creature can attempt to end this Condition with the Overpower Action on their Turn. Once a Creature loses these Temporary Hit Points, they are no longer Incapacitated or Restrained, and vice versa.

Empowered: (+1)

The area expands by 10 feet, and the Damage increases by 4d6.

Halo of Brilliance

Traits: Edge, Buff, Damage, Healing

Lists: Divine

Necromancy, 4th Tier

Actions: 7

Components: V, S, M (a written blessing), F, C

Range: Touch

Target: One Creature

Duration: 1 Minute

Damage/Healing: 1d6 Radiant

A Halo of light appears above the Target's head, shedding 30 ft. of Bright Light, and 30 ft. of Dim Light.

All Creatures of your choice that Start their Turn or enter the Halo's Bright Light Radius receive your choice of the listed Damage or Healing.

Any effects that benefit Cleric Auras also benefit this Spell.

Empowered: (+1)

The Bright Light and Dim Light Radii increase by 10 feet.

Impair

Traits: Burn, Debuff, Impaired, Saving Throw

Lists: Arcane, Divine, Occult, Primal
Necromancy, 4th Tier

Actions: 7

Components: V, S, M (an eyeball), F

Range: 30 ft.

Targets: One Creature

Duration: 1 Hour

The Target must make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but the value is increased to equal your Spell Damage Modifier (Minimum of 1).
- **Failure:** They become Impaired 1 for the Duration, which is applied to an Ability Score of your Choice
- **Success:** No effect.

When applied in this way, the Impaired Condition cannot reduce an Ability Score to less than 1.

Empowered: (+1)

The Impaired Condition increases by 1.

Empowered: (10th)

The Condition lasts until it is removed, or degrades naturally.

Magician's Field Study

Traits: Utility, Ability Check, Information

Lists: Arcane, Occult
Divination, 4th Tier

Actions: 7

Components: S, M (gem infused ink worth at least 50 GP, which is consumed on a Success)

Range: 120 ft.

Targets: One Creature

Make a Society Check against the Target's Charisma Score. If you Succeed, you learn all of the following information:

- Immunities.
- Resistances.
- Abilities.
- Ability Scores.

This Spell cannot reveal Vulnerabilities, nor Weaknesses.

Magnetism

Traits: Burn, Disadvantage, Item, Push, Saving Throw

Lists: Arcane, Occult, Primal
Evocation, 4th Tier

Actions: 7

Components: V, S, M (a copper coil and iron rod), F, C

Range: 30 ft.

Target: 15 ft. Radius

Duration: 10 Minutes

All Metallic Objects within the area are pulled to the center. Creatures wearing or wielding metal Objects must make a Strength Saving Throw at the Start of their Turn, or when they enter the area for the first time:

- **Failure:** They are pulled with the metal Object, unless they let go.
- **Success:** They are pulled 5 feet unless they let go.
- **Critical Success:** No effect.

Any Creatures that are wearing or wielding metal Objects have Disadvantage on all other d20 Tests that use Strength or Dexterity are at Disadvantage.

Empowered: (+1)

The Radius increases by 15 ft.

Mind Spike

Traits: Burn, Disruptible, Mental, Metamagic, Saving Throw

Lists: Arcane, Occult
Illusion, 4th Tier

Actions: Free

Components: None

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

The Target must make an Intelligence Saving Throw, using your Intelligence instead of Charisma for the Spell Save DC:

- **Critical Failure:** Same as Failure, but they Critically Fail.
- **Failure:** Before the Duration Ends, the next Saving Throw they make against an effect of your choice automatically Fails.
- **Success:** No effect.

Polymorph

Traits: Blast, Ability Scores, Buff/Debuff, Choice, Disruptible, Saving Throw, Temporary Healing, Transformation

Lists: Arcane, Primal

Transmutation, 4th Tier

Actions: 11

Components: V, S, M (a molted skin or shell, or a cocoon), F, C

Range: 30 ft.

Duration: 1 Hour

The Target Transforms into a Beast you know of (not a Variant), which cannot have more than 5 Hit Dice, though they gain the Hit Points as Temporary Hit Points and retain their Intelligence, Wisdom and Charisma.

The Target may choose whether equipment merges into their form, is dropped, or wielded by it. However, it is up to the GM and logical arguments to determine if the Target can effectively wield and/or operate a given Item

The Target remains Transformed until the Duration ends, you lose Concentration, or they have no Temporary Hit Points remaining.

Any limited-use Actions and Abilities must recover before they can be used, and the Target doesn't gain the Creature's Damage Threshold, if any.

An Unwilling Creature can attempt a Charisma Saving Throw to avoid being Transformed.

Empowered: (+1)

The maximum number of Hit Dice is increased by your Spell Healing Modifier.

Sanctuary of Rest

Traits: Utility, Rest

Lists: Divine, Primal

Abjuration, 4th Tier

Minutes: 10

Components: V, S, M (a cube of lead), F

Range: 30 ft.

Duration: 24 Hours

Select any area that fits within Range. For the Duration, the area is under the following effects:

- Wandering Monsters will steer clear of the area, unless they already know about it, or are invited inside, preventing Random Encounters.
- Environmental effects such as Weather are ignored, even for Resting.
- Divination Magic fails to Target anything within the area, and cannot be cast within the area. Protected areas appear to be covered in fog to Srying Sensors.
- The edges of the area block Ethereal Creatures.
- Creatures cannot Teleport to a space inside the area, nor can they Teleport out.

You can exclude any number of these effects upon casting the Spell. Overlapping areas must have the same effects.

Empowered: (+1)

The Range increases by 20 feet.

Empowered: (6th)

The Area becomes Permanent, until you end the effect as a Free Action.

Sentinel

Traits: Edge, Saving Throw, Trap

Lists: Arcane, Divine

Transmutation, 4th Tier

Hours: 8

Components: V, S, M (a gemstone worth at least 100 GP which the Spell retains)

Range: Touch

Targets: One Medium or Smaller Object

Damage: 2d6

The Target becomes a Magical Trap which protects up to a 15 ft. Cone, and uses one Damage Type you choose, provided you have another Spell that inflicts that Damage Type.

Whenever triggered by an observable event, or at a regular interval, the Trap activates and any Creatures within the protected Cone must make a Dexterity Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed amount of Damage of the chosen type.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

The Trap can activate a number of times up to your Intelligence Modifier, and regains all activations after being inert for 1 Minute.

Once the Trap runs out of activations, it can be disarmed by Spotting (pg. 78) and then retrieving the Material Component as an Interact Action using Thievery (both using your Spell Save DC), or destroying the Material Component which ends the Spell.

If the Material Component disappears, (as per Conjurer's Basic Conjunction), the Spell also ends.

Empowered: (+1)

The Trap deals an additional 1d6 of the corresponding Damage Type, and the area it can protect is increased by 5 feet.

Empowered: (+2)

The Target can be one Size Larger.

Shadow's Guise

Traits: Utility, Advantage, Buff, Nullify

Lists: Occult, Primal

Illusion, 4th Tier

Actions: 20

Components: V, S, M (a Strip of black leather), F, C

Range: 30 ft.

Targets: Self

Duration: 10 Minutes

All Creatures within Range, or that enter it have Advantage on all Stealth Checks, no longer suffer Stealth Penalties from any source, and leave no trail unless it is Magical. Creatures that leave this area lose any benefits until they re-enter it.

Telekinesis

Traits: Burn, Buff

Lists: Arcane, Occult

Evocation, 4th Tier

Actions: 7

Components: V, S, C

Range: 60 ft.

Duration: 1 Hour

For the Duration, you can Interact with Objects within Range as if you were holding them, and you ignore the Manipulate Trait.

You can use up to 10 individual Items held this way with the same Interact Action, or up to 500 lbs at any given time regardless of Size, using the highest Action Cost.

Any d20 Test with such an Item uses Intelligence instead of Dexterity, and Wisdom instead of Strength.

When you take any Action that would count against the Weapon Multi-Attack Limit, you can take up to 10 of them through Telekinesis, either Targeting unique Creatures or using unique Objects. This uses your Spell Modifiers in place of Weapon Modifiers, and counts against your Multi-Attack Limit for Spells.

Empowered: (+1)

The total Weight Limit is doubled, and you can manipulate 2 additional items (up to 20).

Vampiric Cloak

Traits: Edge, Temporary Healing

Lists: Arcane, Occult

Necromancy, 4th Tier

Actions: 7

Components: V, S, C

Range: Self

Target: 15 ft. Radius

Duration: 1 Minute

For the Duration, any Creature that dies within the area grants their Hit Point Maximum as Temporary Healing to you, which lasts until you finish a Short or Long Rest.

Empowered: (+1)

The Target Radius increases by 15 ft.

Wall of Fire

Traits: Burn, Fire, Saving Throw, Terrain

Lists: Arcane, Divine, Primal

Evocation, 4th Tier

Actions: 10

Components: V, S, M (a Brick of Coal), F

Range: 90 ft.

Duration: 10 Minutes

Damage: 5d8 Fire

Select up to 12 adjacent, 5 ft. spaces within Range.

Each space erupts in flame, forcing Creatures caught in them to make a Dexterity Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

Each wall extends 10 ft. vertically, and obstructs Senses through it. Any Creature that passes through any affected space must attempt the Saving Throw as before, and also treats it as Difficult Terrain.

You may dismiss any number of sections as a Free Action.

Empowered: (+1)

You can place down 3 additional walls.

Warding Circle

Traits: Edge, Saving Throw

Lists: Arcane, Divine, Occult, Primal

Abjuration, 4th Tier

Actions: 10

Components: S, M (diamond dust worth a total of 100 GP, and a vial of holy water, both of which are consumed)

Range: 30 ft.

Target: 15 ft. Radius

Duration: 1 Hour

Select whether the Area is a Cage or a Barrier. If it's a Cage, affected Creatures can't leave. If it's a Barrier, affected Creatures can't enter.

Select a Creature Type. All Creatures of that Type are excluded from passing freely through the barrier without a successful Charisma Saving Throw. Furthermore, the Barrier prevents Attacks and Spells from passing through, unless they're Empowered to a higher Tier than this one.

Empowered: (+1)

You can choose an additional Creature type.

Empowered: (5th)

You can make the area permanent for 1000 GP of diamond dust instead of 100 GP. Additionally, you can merge multiple wards together to form a larger Barrier, with different sections behaving separately.

Empowered: (7th)

Creatures that are excluded take 1d6 Psychic Damage when they end their Turn inside a Barrier, or if they try to leave a Cage.

5th Tier

Acid Rain

Traits: Blast, Persistent Acid, Wind

Lists: Primal

Conjuration, 5th Tier

Actions: 10

Components: V, S, M (a Vial of Acid), F

Range: 120 ft.

Target: 15 ft. Radius

Duration: 1 Hour

Damage: 1d8 Persistent Acid

For the Duration, all Creatures that Start their Turn in the area or enter it for the first time on their Turn, take the listed Damage.

A Creature that is already taking Persistent Acid Damage has that value increased to the amount inflicted, And this Persistent Damage cannot be reduced while a Creature within the area.

Empowered: (+1)

This Spell deals an additional 1d8 Persistent Acid.

Apotheosis

Traits: Burn, Buff

Lists: Divine

Evocation, 5th Tier

Actions: 10

Components: V, S, M (a Gemstone worth at least 100 GP, which is Consumed)

Range: 30 ft.

Targets: One Creature

Duration: 10 Minutes

The Target treats all their Ability Score Modifiers as if they were equal to your Spell Healing Modifier, unless their total Modifier is higher. The total Modifier cannot exceed a Target's Level.

Tip: For increases to Maximum Health due to Constitution, it may be best to record it on a secondary card for better tracking.

Empowered: (+1)

You can Target an additional Creature.

Attribute Shift

Traits: Burn, Metamagic

Lists: Arcane, Divine, Occult, Primal

Transmutation, 5th Tier

Actions: Free

Components: None

Targets: Self

Duration: 1 Minute

Before the Duration Ends, the Target can make one Spell require a different Saving Throw than what it lists. This has no effect on Attack Rolls.

This Spell stacks on itself, affecting additional Spells or Saving Throws.

Empowered: (+1)

This Spell affects one additional Spell or Saving Throw.

Chaotic Storm

Traits: Blast, Chaos, Persistent Damage, Wind

Lists: Arcane, Occult, Primal

Evocation, 5th Tier

Actions: 20

Components: V, S, M (a vial of Blood from an Aberration)

Range: 120 ft.

Target: 15 ft. Radius

Duration: 1 Hour

For the Duration, all Creatures that Start their Turn in the area or enter it for the first time on their Turn, take an amount of Damage equal to your Spell Damage Modifier, of a type based on a d6 you roll at the Start of each Round:

d6	Result
1	Acid
2	Cold
3	Fire
4	Force
5	Lightning
6	Poison

A Creature that is already taking Persistent Damage of the corresponding type has that value increased to the amount inflicted.

Empowered: (+1)

The Radius expands by 5 feet, and the Damage increases by your Spell Damage Modifier.

Compel

Traits: Burn, Actions, Mental, Movement, Saving Throw

Lists: Arcane, Divine, Occult

Enchantment, 5th Tier

Actions: 8

Components: V, S

Range: 60 ft.

Target: 15 ft. Cube

All Creatures in Range must make a Charisma Saving Throw:

- **Critical Failure:** They Dash once and Move three times in a Direction you choose, but can't repeat the Saving Throw. The Dash Penalty remains until the End of their Next Turn.
- **Failure:** They immediately Move once in a direction you choose, repeating the Saving Throw if the destination is hazardous in any way.
- **Success:** No effect.

A Creature doesn't Move or Dash if it has 0 Action Points or Less, but takes the Actions in order until then.

Contingency

Traits: Burn, Metamagic

Lists: Arcane, Divine, Occult, Primal

Divination, 5th Tier

Actions: Free

Components: None

Targets: Self

Duration: 1 Week

One Spell the Target casts within 1 Hour, doesn't take effect until a Condition of their choice occurs, or the Duration ends, which must be observable by either you or the Target.

When the Condition is Observed, the affected Spell takes place as if it had been cast at that instant, though any details such as what the Wish Spell does, must be determined when the Spell is cast.

If the Duration Ends, the affected Spell is lost harmlessly.

Empowered: (+1)

The Duration is doubled.

Control Weather

Traits: Utility, Exploration, Wind

Lists: Divine, Primal

Evocation, 5th Tier

Minutes: 1

Components: V, M (a piece of glass), F

Range: 10 miles

Duration: 1 Hour

You change the Weather within Range to be whatever you want. However, this effect isn't strong enough to change the climate in any meaningful way.

You can use the weather to make a region Difficult Terrain (e.g. wind/rain/snow) or clear terrain (e.g. clear skies, sunshine). You can also step the weather to be more or less intense, which may impact the need for warm or cool clothing.

Empowered: (6th)

The Duration extends to 8 Hours.

Empowered: (7th)

The Duration extends to 24 Hours.

Empowered: (8th)

You can make the change as drastic as you wish, and can also affect the climate for the Duration.

Empowered: (9th)

The Duration extends to 1 month.

Empowered: (10th)

The effect becomes Permanent until dispelled.

Creation

Traits: Utility, Item

Lists: Arcane, Divine, Occult, Primal

Conjuration, 5th Tier

Actions: 10

Components: V, S

Range: Touch

Duration: 1 Hour

You create any Non-Magical Object in an unoccupied space, made from materials worth no more than 50 GP, and weighing no more than 10 lbs.

If the Object is used by a Spell, it is always consumed. If the Component is already consumed, you must make the corresponding Intelligence Check as if they don't have access to the Tier at which they're casting the Spell.

If the Object's creation is obstructed by a Creature or Object of greater weight, the created object is only partially created, unless the lighter Creature or Object can be pushed out of the way.

When the Duration ends, the Object crumbles to dust. Consumed items lose their benefit.

Empowered: (+1)

The maximum Value, Weight, and Duration are all doubled.

Empowered: (10th)

Created Objects are permanent, as long as they don't exceed the limitations of this Spell. These Objects also cannot be Dispelled, and are considered Non-Magical, except for effects like Detect Magic.

Despair

Traits: Burn, Debuff, Disruptible, Emotion, Exhaustion, Saving Throw

Lists: Arcane, Divine, Occult, Primal
Enchantment, 5th Tier

Actions: 8

Components: V, M (a pile of ashes), F

Range: 60 ft.

Targets: One Creature

The Target must make a Charisma Saving Throw:

- **Critical Failure:** The Exhaustion increases to your Spell Damage Modifier.
- **Failure:** They gain Exhaustion 1.
- **Success:** No effect.

The Target can reattempt the Saving Throw with Wisdom at the end of each of their Turns to reduce the Exhaustion by 1 (ignoring Exhaustion), ending this Spell when the value from this Spell reaches 0.

Empowered: (+1)

The Exhaustion is doubled.

Dimensional Binding

Traits: Burn, Buff/Debuff, Nullify

Lists: Arcane, Divine, Occult, Primal
Enchantment, 5th Tier

Actions: 8

Components: V, S, M (a set of Shackles), F

Range: 60 ft.

Targets: One Creature

Duration: 1 Hour

The Target cannot Teleport or be Teleported by any means, or Travel to another Plane. All effects that do so treat the Target as if they don't exist.

However, the Target also doesn't suffer any Penalties of being on the current Plane until the Duration Ends.

Empowered: (+1)

This Spell can Target an additional Creature.

Embrittle

Traits: Burn, Vulnerability, Saving Throw

Lists: Arcane, Occult, Primal
Transmutation, 5th Tier

Actions: 8

Components: V, S, M (a Basilisk Eye), F

Range: 60 ft.

Targets: One Creature

Duration: 1 Minute

The Target must make a Constitution Saving Throw:

- **Critical Failure:** Double Vulnerability.
- **Failure:** They gain Vulnerability to Bludgeoning, Force and Thunder Damage, equal to your Spell Damage Modifier for the Duration.
- **Success:** No effect.

Empowered: (+1)

You can Target an additional Creature.

Fire Storm

Traits: Blast, Fire, Saving Throw, Wind

Lists: Primal
Evocation, 5th Tier

Actions: 15

Components: V, S, M (A ruby), F, C

Range: 120 ft.

Duration: 1 Hour

Damage: 2d12 Fire

All Creatures within Range (except you) must make a Constitution Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No effect.

For the Duration, any Creature that enters the area for the first time on their Turn or starts their Turn there also repeats the Saving Throw.

Empowered: (+1)

The Range increases by 60 ft. and the Damage increases by 2d12.

Frenzy

Traits: Burn, Actions, Debuff, Disruptible, Emotion, Saving Throw

Lists: Divine, Occult
Enchantment, 5th Tier

Actions: 10

Components: V, S, M (a drop of blood), C

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

The Target must make a Charisma Saving Throw:

- **Failure:** For the Duration, the Target must make an Attack against the nearest Creature at the Start of each of its Turns. If no Target is in Reach or Range, they must approach the nearest Creature (choose if equidistant), and Attack whenever possible.
- **Success:** No effect.

The Creature can make a Wisdom Saving Throw after attacking a friendly Creature to end the effect early, but can only attempt the Disrupt Action once per Wisdom Saving Throw.

Empowered: (+1)

You can Target an additional Creature, which can Target each-other.

Geas

Traits: Utility, Audible, Damage, Debuff, Psychic, Saving Throw

Lists: Arcane, Divine, Occult, Primal
Enchantment, 5th Tier

Actions: 30

Components: V, S, M (a Contract)

Range: 15 ft.

Targets: Any Creatures who understand you.

Damage: 5d12 Psychic

The Target must make a Charisma Saving Throw:

- **Failure:** They are subject to a set of Terms and Conditions as set in the Material Component, taking the listed Damage any time they disobey, which is considered Non-lethal unless willingly agreed otherwise.
- **Success:** No effect, unless they wish to be affected.

You inform all Targets of the contents of the Contract, along with any Duration and at least one End Condition which must be possible. If the End Condition becomes impossible or the Caster violates their end of the Contract, the effect ends early with no harm.

If any Target is about to violate a Term or Condition, they become aware of the fact. But if they can justify their actions within the terms of the Contract, the Damage is withheld until the argument no longer stands.

Targets aren't punished if a violation couldn't reasonably be prevented by them, such as reasoning with someone who is unreasonable.

This Spell prevents a Target from being unsummoned or disappearing while under this effect, instead unsummoning them when the Contract ends, or they die.

Empowered: (+1)

The Damage increases by 5d12.

Ghost Ship

Traits: Utility, Exploration, Summon

Lists: Divine, Occult

Conjuration, 5th Tier

Hours: 1

Components: V, S, M (a bottled ship worth at least 1,000 GP), C

Range: 500 ft.

You summon a Large Vehicle that is available to your setting, with no addons or attachments (pg. 361, 372 and 382), which lasts as long as you maintain Concentration.

This Vehicle is always fully manned by Ethereal Ghosts with Proficiency in the corresponding Vehicles, though it doesn't have any usable supplies unless you provide them, including any fuel needed for travel.

You can only lose Concentration on this Spell if you run out of Action Points, are reduced to 0 Hit Points, or willingly drop Concentration.

Empowered: (+1)

The Size of Vehicle increases by one category, up to Gargantuan.

Harm

Traits: Burn, Damage, Necrotic, Saving Throw

Lists: Divine, Occult

Necromancy, 5th Tier

Actions: 8

Components: S, M (a Withered Twig), F

Range: 30 ft.

Target: 15 ft. Sphere

Damage: 50 Necrotic

All Targets within the Area must make a Constitution Saving Throw:

- **Critical Failure:** Same as Failure, but they take additional Damage equal to your Level.
- **Failure:** You distribute the listed Damage to all Targets that Failed.
- **Success:** That Target suffers no effect.

Empowered: (+1)

The total amount of Damage increases by 10.

Heal

Traits: Burn, Healing

Lists: Divine

Necromancy, 5th Tier

Actions: 8

Components: S, M (a Blooming Flower), F

Range: 30 ft.

Target: 15 ft. Sphere

Healing: 50

You divide the listed Healing between all Targets within Range.

Empowered: (+1)

The total amount of Healing increases by 10.

Nondetection

Traits: Edge, Buff, Invisibility

Lists: Arcane, Divine, Occult, Primal

Illusion, 5th Tier

Minutes: 10

Components: V, S, M (a pinch of gemstone dust worth at least 100 GP, which the Spell consumes), C

Range: 30 Feet

Duration: 1 Hour

You and all other Creatures or Objects of your Choice within Range become Invisible to Scrying Sensors, Magical Traps, Glyphs of Warding, and other Magical means of detecting you.

Divination Magic also cannot reveal the location of an affected Creature, nor any Objects they are wearing or carrying.

Empowered: (+1)

The Range increases by 30 feet.

Planar Transportation

Traits: Utility, Exploration, Teleport

Lists: Arcane, Divine, Occult, Primal

Conjuration, 5th Tier

Hours: 1

Components: V, S, M (a Tuning Fork worth at least 5,000 GP, which must be attuned to the destination), C

Range: 30 ft.

Duration: 1 Minute

You create a portal which lasts for the Duration. The Portal can be up to 40 feet on a side, and only goes one way.

The portal can take you any destination that isn't on your current Plane of Existence, but drops you up to 1 mile away.

The Portal can also take you to a Demiplane that you have Created or that you Control without needing a Material Component. If you have merely been there, you still need the Material Component.

Spell Cage

Traits: Burn, Debuff, Disruptible, Grappled, Nullify, Saving Throw

Lists: Arcane

Abjuration, 5th Tier

Actions: 8

Components: V, S, M (a Birdcage), F

Range: 60 ft.

Target: One Creature

Duration: 1 Minute

The Target must make a Dexterity Saving Throw:

- **Failure:** They are considered Grappled by you for the Duration, and cannot take any Action with the Magical Trait.
- **Success:** No effect.

A Creature that is Grappled by this Spell has Disadvantage on Saving Throws against Magical effects, except for this one.

Thunder Storm

Traits: Blast, Lightning, Saving Throw, Wind

Lists: Primal

Conjuration, 5th Tier

Actions: 10

Components: V, S, M (a Lightning Rod), F, C

Range: 120 ft.

Target: 15 ft. Radius

Duration: 1 Hour

Damage: 6d6 Lightning

For the Duration or until you lose Concentration, one Creature of your Choice within the Target area at the Start of your Turn (except for you) must make a Dexterity Saving Throw:

- **Critical Failure:** Double Damage.
- **Failure:** They take the listed Damage.
- **Success:** Half Damage.
- **Critical Success:** No Damage.

Empowered: (+1)

The Radius expands by 5 feet, and the Damage increases by 5d6.

6th Tier

Aegis

Traits: Burn, Special

Lists: Arcane

Abjuration, 6th Tier

Actions: 9

Components: S, M (a Beetle Shell), F

Range: 30 ft.

Targets: One Creature or Object

Duration: 1 Minute

The Target is surrounded by a bubble of Force for the Duration. Nothing can pass through the Aegis other than sound and light, and the Aegis cannot be destroyed, except by a single instance of Damage that exceeds 20 Points. Excess Damage is lost.

The Aegis itself is weightless, and cannot resist any efforts to push it.

Special: The Aegis can be used as a Reaction, when you see a Creature take Damage, Targeting the Triggering Creature.

Empowered: (+1)

The Duration is doubled.

Enthrall

Traits: Burn, Audible, Charmed, Debuff, Saving Throw, Visual

Lists: Arcane, Divine, Occult, Primal

Enchantment, 6th Tier

Actions: 9

Components: V, S, C

Range: 15 ft.

Targets: One Creature

Duration: 1 Hour

The Target must make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but the Duration is Permanent, or until dispelled.
- **Failure:** The Target is Charmed by you for the Duration, without further Concentration.
- **Success:** No effect, but the Target must re-attempt the Saving Throw each Round as long as they are within Range, and you are Concentrating.
- **Critical Success:** The Spell Ends and the Target cannot be Charmed by you for the next 24 Hours.

While Charmed in this way, the Target considers you to be a trustworthy ally. Once this effect ends, the Target knows they were Charmed, and experiences a sense of betrayal.

GM Tip: If you hit a PC with this, you may consider changing your descriptions to make the caster seem friendlier.

Foresight

Traits: Edge, Buff, Nullify

Lists: Arcane, Divine, Occult

Divination, 6th Tier

Actions: 9

Components: V, S, C

Range: Touch

Targets: One Creature

Duration: 1 Minute

For the Duration, the Target cannot have Disadvantage on any d20 Test, and can add their Intelligence Modifier to any d20 Test, in addition to any other bonuses.

Haunting Flask

Traits: Buff, Drained, Ethereal, Incapacitated, Saving Throw

Lists: Arcane, Occult
Necromancy, 6th Tier

Actions: 12

Components: V, M (any Container worth at least 1,000 GP)

Range: 100 ft.

Duration: 1 Hour

For the Duration, you are Incapacitated, and your soul is placed inside the Material Component, which becomes the Flask.

As long as the Flask isn't in an area that is protected from planar travel, you can project an Ethereal version of yourself at any point within Range of the Flask, which allows you to see and hear, but not speak.

You may also attempt to possess a Creature within Range for 10 Actions, forcing them to make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but the effect lasts until the Target falls Unconscious, or you end it as a Free Action.
- **Failure:** For up to 8 Hours, you inhabit their body with all their statistics while retaining your Intelligence, Wisdom and Charisma, though you can only use your Feats.
 - The Target of this sub-ability retains no memory of anything that transpires during this time.
- **Success:** The Target knows you tried to possess them, and is Immune to further attempts for 24 Hours.
- **Critical Success:** Same as Success, but they also have Advantage on all subsequent attempts for 1 Year.

Should a Creature die while you are possessing them, you become Drained X and return to the flask, where X is half your Hit Point Maximum (Rounded up). Same effect if the Flask is destroyed, but you return to your body, or die if your body is killed.

You cannot benefit from any kind of Rest while within your Flask.

Last Stand

Traits: Burn, Actions, Buff, Drained, Exhaustion, Immunity, Nullify, Unconscious

Lists: Divine, Primal
Necromancer, 6th Tier

Actions: 9

Components: V, S, M (an invigorating balm worth 100 GP, which is consumed)

Range: 15 ft.

Targets: One Dying Creature

Duration: 1 Minute

The Target awakens at 0 Hit Points and 10 Action Points unless it already had more, and cannot die while in this state for any reason, nor can they be Incapacitated by any means.

The Target makes Death Saving Throws as usual, but takes Drained 10 instead of a 3rd Failed Death Save, unless their Hit Point Maximum would be reduced to 0 or less.

When the effect ends, the Target falls Unconscious, but is Stable unless they have 3 Death Save Failures.

Empowered: (+1)

The Spell can Target an additional Creature within Range.

Necropolis

Traits: Edge, Buff, Debuff, Frightened, Healing

Lists: Arcane, Occult

Necromancy, 6th Tier

Minutes: 1

Components: V, S, M (a vial of Greater Fiend's Blood, which is consumed)

Range: Self

Target: 100 ft. Radius

Duration: 8 Hours

Any Mindless Undead Creatures that enter the area must make a Charisma Saving Throw:

- **Failure:** They are controlled by you for the Duration.
- **Success:** No effect.

Any Creature that dies within the area returns to life as a Zombie of the same Size, and number of Hit Dice, under your control, until they are slain.

Any other Creature (other than you) that enters the area or Starts their Turn there must also make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but the Frightened Condition equals your Spell Damage Modifier.
- **Failure:** They become Frightened 1 of the area.
- **Success:** No effect.

Creatures that are Frightened in this way cannot reduce their Frightened Condition until they leave the area, or the Spell ends.

Any Undead that Starts their Turn within the area regain 1d6 Hit Points.

Rest of Ages

Traits: Utility, Rest

Lists: Arcane, Divine, Primal

Enchantment, 6th Tier

Actions: 9

Components: S, M (A silken blanket worth at least 250 GP)

Range: Touch

Targets: One Creature

The Target gains the benefits of a Full Rest with a Quality equal to your Spell Healing Modifier. A Rest taken in this way doesn't grant Spell Slots, or Class Resources.

Empowered: (+1)

The Quality of the Rest increases by 1.

Teleport

Traits: Burn, Move, Teleport

Lists: Arcane, Occult

Conjuration, 6th Tier

Actions: 10

Components: V, S

Range: Touch

Targets: One Creature

You and all Targets (who can be touching in a chain) Teleport within 10 miles of a destination you choose (DM rolls 1d12, 11 and 12 causes you to appear exactly where you intended, 1 has you appear in a similar destination).

If you either know the destination well, or have an object from it, you always appear within 100 feet of your intended destination.

If any Target is unwilling, they can make a Charisma Saving Throw to avoid being Teleported.

Empowered: (+1)

You double the number of Targets.

Empowered: (10th)

You arrive exactly at your destination without risk of failure.

Vampiric Spell

Traits: Burn, Healing, Metamagic

Lists: Arcane, Divine, Occult, Primal

Necromancy, 6th Tier

Actions: Free

Components: None

Targets: Self

Duration: 1 Minute

Before the Duration Ends, one Spell the Target Casts also Heals the Caster for an amount of Hit Points equal to the total Damage Taken to Hit Points.

Note: This is blocked by Temporary Hit Points, and Resistances.

This Spell stacks on itself, affecting additional Spells.

Empowered: (+1)

This Spell affects one additional Spell.

7th Tier

Banishment

Traits: Blast, Disruptable, Ethereal, Stunned, Teleport

Lists: Arcane, Divine, Primal

Conjuration, 7th Tier

Actions: 10

Components: V, S, C

Range: 30 ft.

Targets: One Creature

Duration: 1 Minute

The Target must make a Charisma Saving Throw:

- **Critical Failure:** They are instantly Teleported as if the Spell had lasted for the full Duration.
- **Failure:** They become Ethereal and Stunned equal to your Spell Damage Bonus.
- **Success:** They only become Ethereal until the End of their next Turn, at which point the Spell effect is Disrupted.

If the Duration Expires before Concentration is lost or the effect is Disrupted, the Target is Teleported to the Plane of Existence from which they originate.

If they originate from the same Plane of Existence that they're currently on, they instead reappear wherever they spent the most time. If no such place exists, they're Teleported at random.

Empowered: (+1)

You can Target one additional Creature.

Charm of Awakening

Traits: Edge, Nullify

Lists: Arcane, Divine, Occult, Primal

Enchantment, 7th Tier

Minutes: 10

Components: V, S, M (a Gemstone worth 500 GP, which the Spell consumes)

Range: Touch

Target: One Creature

Duration: 1 Day

For the Duration, the Target cannot be knocked Unconscious by any means other than being reduced to 0 Hit Points. They also don't suffer the consequences of failing to take a Long Rest.

If the Target is already Unconscious, they wake up with no penalty, and ending any such effects.

Empowered: (+1)

The Duration is Doubled.

Disintegrate

Traits: Blast, Bleed, Drained, Necrotic

Lists: Arcane, Occult

Necromancy, 7th Tier

Actions: 10

Components: S, M (a pinch of ash)

Range: 60 ft.

Targets: One Creature or Object

Damage: 8d10 Necrotic

The Target must make a Constitution or Dexterity Saving Throw (their choice):

- **Critical Failure:** Same as Failure, but they also gain the Amputee Bleed.
- **Failure:** They take the listed Damage and are Drained by the same amount.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Magical Barriers are instantly destroyed, and Creatures that are killed by this effect are reduced to ashes that no longer count as a corpse, except for Reincarnate.

Empowered: (+1)

The Damage increases by 7d10.

Dominate Creature

Traits: Burn, Charmed, Debuff, Disruptible, Mental, Saving Throw

Lists: Occult

Enchantment, 7th Tier

Actions: 10

Components: V, S, M (an Amethyst worth at least 50 GP which the Spell consumes), C

Range: Touch

Targets: One Creature

Duration: 1 Hour

The Target must make a Charisma Saving Throw:

- **Critical Failure:** Same as Failure, but they cannot re-attempt the Saving Throw.
- **Failure:** They become Charmed for the Duration.
- **Success:** No effect.

While Charmed in this way, the Creature must obey all of your commands, provided they can understand them. If a command appears suicidal to the Target, they can re-attempt the Saving Throw using either Charisma or Intelligence (whichever is higher).

If the Target completes your last command, they can act freely until commanded again.

Empowered: (+1)

The Duration is doubled.

Empowered: (10th)

The Target remains under your control until the effect is dispelled or you die, and doesn't require Concentration.

Eclipse

Traits: Edge, Saving Throw

Lists: Divine, Primal

Enchantment, 7th Tier

Actions: 10

Components: V, S, M (a piece of moonstone worth at least 100 GP)

Range: 100 ft.

Duration: 1 Hour

All Creatures you choose within Range must make a Charisma Saving Throw:

- **Failure:** They become Stunned equal to your Spell Damage Modifier.
- **Success:** No effect.

A Creature that is Stunned in this way can only end the Condition early by using an Action with the Transformation Trait that isn't a Spell at the Start of their Turn, or when they take Damage (they only spend Actions to Transform).

A Creature that ends the Stunned Condition early becomes Immune to this Spell until they end the Transformation effect.

Empowered: (+1)

The Range is doubled.

Elemental Tomb

Traits: Burn, Resistance, Saving Throw, Unconscious

Lists: Arcane, Divine, Primal

Transmutation, 7th Tier

Actions: 10

Components: V, S M (a miniature coffin worth at least 100 GP, which is consumed), C

Range: 30 ft.

Targets: One Creature

Duration: 1 Year

The Target must make a Dexterity Saving Throw, unless they choose to Fail:

- **Failure:** The Target is Unconscious for the Duration.
- **Success:** No effect.

While Unconscious in this way, the Target is surrounded by a Magical coffin you design. The coffin has Physical Resistance 20, Resistance 20 to one other Damage type of your choice, and 100 Hit Points. The coffin can be pushed, but the Spell ends early if the coffin is destroyed.

Any contained Creatures don't need to eat, drink, breathe, or sleep, and any effect that can read the Creature's mind reveals that the Creature is asleep. Creatures inside also cannot willingly drop Concentration, but suffer no penalties for Concentrating on multiple effects.

Empowered: (+1)

You can Target an additional Creature.

Flaming Shroud

Traits: Edge, Attack, Fire, Immunity, Resistance

Lists: Arcane, Primal

Evocation, 7th Tier

Actions: 7

Components: S

Target: Self

Duration: 10 Minutes

Damage: 3d8 Fire

You gain Fire Immunity, and Cold Resistance 10. Any Creature that touches you, or Hits you with a Melee Attack takes the listed Damage.

For the Duration, you have a 3 Action Ranged Spell Attack with a 60 ft. Range that counts as Light, and counts against your Weapon Multi-Attack Limit, dealing the listed Damage.

Empowered: (+1)

The Cold Resistance increases by 5, and the Fire Damage increases by 2d8.

Mind Blank

Traits: Edge, Bleed, Immunity, Nullify

Lists: Arcane, Divine, Occult

Illusion, 7th Tier

Actions: 10

Components: C

Target: Self

Duration: 8 Hours

For the Duration, you become Immune to all effects with the Emotion or Mental Traits, as well as Psychic Damage, and the Charmed and Frightened Conditions.

If this effect is forcefully Dispelled, you gain your choice of the Amnesiac, Hallucinations, Sleepless or Traumatized Bleeds.

Your GM may have you take a different Bleed that is appropriate.

8th Tier

Blanket Spell

Traits: Burn, Metamagic

Lists: Arcane, Divine, Occult, Primal
Transmutation, 8th Tier

Actions: Free

Components: None

Targets: Self

Duration: 1 Minute

Until the Duration Ends, one Spell the Target casts affects all Creatures within 100 feet of their Target, excluding any number of Creatures of your choice which you can see, which can include the original Target.

This Spell stacks on itself, adding the total areas together.

Empowered: (+1)

The area that can be affected increases by 100 feet.

Forbiddance

Traits: Utility

Lists: Divine, Primal
Abjuration, 8th Tier

Hours: 1

Components: V, M (a List of Rules)

Range: 300 ft.

Select any area that fits within Range.

Until Dispelled, no Creature that has one Creature Type of your choice may enter or perceive the Area by any means.

However, the Spell cannot be used if one such Creature occupies the area at the time of casting, the restriction involves multiple criteria, or it involves an overly complex criteria.

You may also designate more specific Creatures based on origin or observable characteristics, such as "Humans from the north", "All Creatures carrying Weapons", "All Elves, except the one with a pink tattoo on their pinky", and so on, so forth.

Only one such form of Forbiddance can exist in a given area, and All Creatures within the area are Immune to all other effects and Damage caused by you, and vice versa.

The Spell ends once you stray further than 30 miles from it, or die.

Empowered: (+1)

The Range is Doubled.

Mage's Mansion

Traits: Utility, Extra-Dimensional, Immunity, Rest

Lists: Arcane

Conjuration, 8th Tier

Hours: 1

Components: V, S, M (A miniature door worth at least 1,000 GP)

Range: Touch

Duration: 12 Hours

You create a doorway to an extradimensional space that is fully staffed and furnished in a design chosen by you. This can also replicate the effects of any Stronghold Facility, though you don't gain Ruler Points while inside.

If the doorway takes 100 points of Damage in a single Round, or the Duration expires, the Spell Ends, forcing all Creatures to the nearest unoccupied spaces near the doorway.

As with the Demiplane Spell, you can fully customize the rules of this extradimensional space, though any rules dictated by this Spell take priority, and you don't spend gemstones to do so.

All Creatures inside this space are Immune to all Damage, can breathe all atmospheres inside, don't make Saving Throws against any Affliction they are under the effects of, and cannot contract any Afflictions while Resting there.

The space can provide any Non-Magical material to Creatures within the space, though such materials cannot leave the space, be used to cast any Spells, or initiate a Magical effect, though the benefits of any consumed Non-Magical food and drink lingers.

Power of Night

Traits: Burn, Healing, Nullify, Resources, Rest

Lists: Arcane, Divine, Occult, Primal

Necromancy, 8th Tier

Actions: 11

Components: S, M (A drop of dew collected during a full moon)

Range: Touch

Targets: One Creature

The Target regains all expended Class Resources, reduces all Conditions of their choice by 1, and regains two Hit Dice worth of health, without expending them.

The Target also can no longer regain Spell Slots through any means other than Resting, until they finish a Short Rest.

Empowered: (+1)

The Condition Reduction and number of Hit Dice rolled are both increased by 1.

Scatter

Traits: Burn, Move, Saving Throw, Teleport

Lists: Arcane, Occult

Conjuration, 8th Tier

Actions: 11

Components: V, S

Range: 60 ft.

Targets: Up to 8 Creatures

All Targets must make a Charisma Saving Throw:

- **Failure:** They are Teleported up to 120 feet away from their position, to a point you can see.
- **Success:** No effect.

The Targets of this Spell don't have to be Teleported to the same location.

Empowered: (+1)

The maximum Teleport distance is Doubled.

Simulacrum

Traits: Edge, Summon

Lists: Arcane, Occult

Conjuration, 8th Tier

Actions: 11

Components: S, M (A Gemstone worth at least 100 GP, which is consumed until the Spell Ends)

Range: Touch

Duration: Until Dispelled

You create a near-perfect Copy of the Target in an empty space within Range.

This Copy shares all the statistics and characteristics of the Target, with the exception of Class Resources, Spell Slots, being considered a Construct, and only having 1 Hit Point and 0 Hit Dice upon Creation.

Other than that, it has its own Initiative (unless a different method is needed in case you make 20 of these Constructs), is controlled by the Target, is Immune to any effect with the Mental or Healing Trait, and consumes Class Resources and Spell Slots from the original Creature (even if they're dead).

Time Warp

Traits: Burn, Exhaustion

Lists: Arcane, Occult

Enchantment, 8th Tier

Actions: 11

Components: S, M (An ornate Hourglass worth at least 1,000 GP)

Targets: Self

The Target's Multi-Attack Limit is reset as if they started a new Round, though all other Creatures can react to you as if their Initiative was higher than yours, unless they have less than 1 Action.

If you somehow cast this on another Creature, it takes effect once their Multi-Attack Limit is met, or the effect is lost at the End of their next Turn.

9th Tier

Clone

Traits: Edge, Buff, Drained, Resurrection

Lists: Arcane, Occult, Primal

Necromancy, 9th Tier

Hours: 1

Components: V, S, M (a Piece of Flesh from the Target, which is consumed)

Range: Touch

Targets: One Creature that isn't an Undead or Construct.

The Target becomes Drained 10.

After 30 days, the Material Component forms a Clone of the Target within a sealed Container, at any age you choose. The Clone dies immediately if the Container is destroyed, or if the Clone is removed without proper care.

When the Target Dies, their soul immediately returns to the Clone, and the Target returns to life at 1 Hit Point with 0 Hit Dice, and no equipment.

A soul can be temporarily captured, or prevented from returning to a Clone by preventing Planar Travel, but the Soul doesn't decay or degrade, nor can it be destroyed (unless an effect states otherwise).

A soul can have multiple Clones attached to it, and can choose which Clone it inhabits. However, a Clone that is possessed by some means (such as a Haunting Flask), cannot resist the attempt, and becomes permanently unavailable to the Target.

If the Target has been changed into a different Creature (such as with the True Polymorph or Lichdom Spells), the change is reverted when Resurrected in this way.

Doom

Traits: Burn, Fatal

Lists: Divine, Occult

Evocation, 9th Tier

Actions: 12

Components: V, S, M (a Fiend's Tongue)

Range: 60 ft.

Targets: One Creature

Duration: 1 Hour

For the Duration, if the Target is reduced to 0 Hit Points, they die instantly.

Empowered: (+1)

You can Target an Additional Creature.

Druid Grove

Traits: Utility, Resources, Terrain

Lists: Primal

Transmutation, 9th Tier

Days: 30

Components: V, S, M (a Groveheart Seed, which the Spell consumes)

You plant the Groveheart Seed, and convert a 250 ft. Radius around it into a Druidic Grove. Any Druid who starts their Turn within this Grove regains 1 Druidry at the Start of each of their Turns.

Plants within the area are perpetually fruitful, and grow rapidly, even when out of season. Additionally, the Plants can move to ensnare, free, Attack, or otherwise Interact with other Creatures, using your Spell Attack Modifiers.

Animals within the area aren't immediately hostile, but will protect the Grove with their lives if it is threatened, and will otherwise do their best to tend to the area if they can.

Natural events that would normally Damage the Grove have no effect on it. This includes events caused by magic, such as the Cataclysm Spell.

The Grove can be expanded by planting any seeds along the border, provided the seeds came from the Druid Grove.

If you create a second Druid Grove, the old one withers and dies.

Mass Polymorph

Traits: Blast, Transformation

Lists: Arcane, Occult, Primal

Transmutation, 9th Tier

Actions: 21

Components: V, S, M (a Cocoon), F, C

Range: 60 ft.

Targets: Up to 5 Creatures

Duration: 1 Hour

You apply the effects of the Polymorph Spell (pg. 483) to all Targets, as if it had been cast at 9th Tier. However, the Hit Dice are divided between Targets, as you see fit.

Empowered: (+1)

You treat the corresponding Polymorph as if it were Empowered by one additional Tier, and it can Target an additional Creature.

Planar Terraformation

Traits: Utility, Terrain

Lists: Arcane, Divine, Occult, Primal

Transmutation, 9th Tier

Days: 7

Components: V, S, M (a vial of Ancient Dragon's Blood, infused with energy from the plane you wish to source the terraformation from)

Range: 10 Miles

The Terrain changes to reflect a biome of your choice that can be found within the Plane you are sourcing the terraformation from, and also gains the properties of the corresponding plane (see pg. 99).

The changes remain until reverted by Wish, Divine Intervention, or further use of Planar Terraformation.

Time Dilation

Traits: Burn, Actions, Buff, Initiative, Time

Lists: Arcane, Occult

Enchantment, 9th Tier

Actions: 12

Components: V, S, M (a pocket watch worth at least 100 GP)

Range: 30 ft.

Targets: Up to 3 Creatures

When your Turn Ends, each Target gains 10 Action Points that ignore the Action Limit, and takes a special Turn (in whichever order you choose) where they ignore all Turn and Round-based limits, such as Recharges, and the Multi-Attack Limit, and don't Trigger Reactions from unaffected Creatures.

Once a Target Ends their Turn, this effect ends for them.

Lastly, a Target can spend 1 of their Action Points to calculate Persistent Damage and Healing, or otherwise Trigger all effects that requires them to Start or End your Turn.

Ultimate Power

Traits: Burn, Metamagic

Lists: Arcane, Divine, Occult, Primal

Evocation, 9th Tier

Actions: Free

Components: None

Targets: Self

Duration: 1 Minute

For the Duration, one Spell the Target casts treats all dice as if they were the highest possible value.

This Spell stacks with itself, affecting additional Spells.

Empowered: (+1)

This Spell affects one Additional Spell.

10th Tier

Cataclysm

Traits: Edge, Terrain

Lists: Arcane, Divine, Occult, Primal

Evocation, 10th Tier

Hours: 1

Components: V, S, M (A large titanium spike worth 1,000 GP which is consumed)

Target: up to 500 miles of land centered on you, disrupted by fault lines, and biomes.

Duration: 1 Week

Over the course of the Duration, you change the biome of the Targeted landmass into another biome that naturally occurs on the corresponding Plane of Existence over the course of the next week. For example, you could change an Ocean to a Mountain, a Ravine to hilly Plains, or a Tundra to a Volcano.

If the Targeted area is under the effects of Planar Terraformation or similar, you instead choose a biome from the corresponding Plane.

You can choose the general topography of the resulting environment, though it may continue to change naturally after the Spell ends, depending on various environmental factors. You cannot create new minerals, plants, or animals, but you can redistribute any minerals within the area, and cause specific plants to grow more easily.

For the Duration, all Structures take 1d10 Bludgeoning Damage every Round, all Land movement is on Difficult Terrain, and natural disasters are almost guaranteed to take place. For example: creating a new section of Ocean would cause floods, warming a Tundra would possibly summon meteors, distributing minerals would cause earthquakes and sinkholes, and changing the air type or temperature would cause tornadoes and hurricanes.

Any Plants or Creatures that cannot adapt to the new environment or escape, are killed in this process. This often makes the replacement of flora and fauna vital for re-balancing the eco-system.

City Barrier

Traits: Utility, Extra-Dimensional, Information, Nullify

Lists: Arcane, Divine, Occult

Abjuration, 10th Tier

Weeks: 1

Components: V, S, M (a sphere of polished diamond worth at least 10,000 GP, which the Spell consumes)

Range: Up to 20 miles

Select an area that fits within Range.

You create a barrier that blocks all forms of attacks, and transportation into or out of the area, including Teleportation, except for one entrance you must select.

You can allow specific Creatures or methods to ignore the barrier, such as registered law enforcement, active rulers, or Teleportation Circles in the City center, which allows them to pass through the barrier unhindered, along with any Creature traveling with them.

You always know when a Creature enters or exits the affected area, unless they are in an extradimensional space, or are protected from Divination Magic. You can only identify what a Creature is (their Ancestry) unless you met them personally, in which case you recognize them.

Lichdom

Traits: Edge, Bleed, Improvement

Lists: Arcane, Divine, Occult, Primal

Necromancy, 10th Tier

Months: 3

Components: M (One Object the Target finds precious)

Target: One Creature

The Target dies and is Resurrected with the Lichdom Bleed (pg. 151), with the Phylactery being created from the main Material Component.

The Phylactery alerts the Target when any Creature is within 30 feet of it, and who they are upon contact, regardless of protection from Divination Magic.

Any Lich you create in this way is under your command until you decide otherwise, though they aren't Mindless, and only obey commands they can hear from you, and understand. However, you cannot command them to do anything suicidal, outside their capabilities, or to prioritize anything over protecting their Phylactery.

GM Tip: In some settings, this Spell is likely to be replicated by Rituals that require various sacrifices to avoid the 3 months of dedication.

Power Word

Traits: Burn, Choice, Saving Throw

Lists: Arcane, Divine, Occult

Evocation, 10th Tier

Actions: 13

Components: V

Range: 60 ft.

Target: One Creature

You speak one word, which must be in a Language understood by the Target. The Target must either be willing, or make a Charisma Saving Throw:

- **Failure:** You subject the Target to the corresponding effect.
- **Success:** No effect.

If you have more Hit Points than the Target, you may reduce your Current Hit Points by theirs to force a Failure, even if they would automatically Succeed.

There are a variety of Power Words that can be spoken, though some may not work as expected. Here are some examples of Power Words:

- **Kill:** The Target is reduced to 0 Hit Points, and begins Dying.
- **Heal:** The Target is restored to Full Health, and removes the Drained Condition.
- **Resurrect:** The Target Corpse is brought back to life at Full Health, regardless of how long they've been dead, even if only a pinch of their ashes are in Range, or they would be unwilling.
- **Ascend:** The Target is moved upwards at a rate of up to 200 feet per Round, which doesn't inflict Fall Damage (on the way up anyways), and lasts for 1 Minute.
- **Rest:** The Target immediately benefits from a Quality 10 Full Rest, but cannot regain Spell Slots in this way.
- **Stun:** The Target becomes Stunned 30.
- **Wish:** The Target names any Spell, Feat or Action. If it's an Edge, it lasts for the Duration. Otherwise, they can use it once for free (X costs use their Level or listed number of Hit Dice).

If a Duration would be required for any reason (such as a Charm effect), it lasts for no more than 24 Hours, or until the word is fulfilled.

True Polymorph

Traits: Edge, Choice, Transformation

Lists: Arcane, Divine, Occult, Primal

Transmutation, 10th Tier

Actions: 13

Components: V, S, M (A golden cocoon worth at least 500 GP), C

Range: Touch

Target: One Creature

Duration: 8 Hours

The Target is subjected to the effects Polymorph Spell at its lowest Tier, though you are not limited to Polymorphing the Target into a Beast, and instead Polymorph the Target relative to their current effective Hit Dice, rather than the Hit Dice for Polymorph.

If this Spell lasts for the Duration, the effect becomes Permanent, and cannot be dispelled until you are reduced to 0 Hit Points, or you are willing, and only ends naturally if you die.

Any effect that would end this effect only reverts a Target to their True Form for 1 Hour or until the effect ends, unless you are reduced to 0 Hit Points, which ends this Spell in this state.

A Permanently Polymorphed Creature must Retrain in order to benefit from their Feats and Actions that are normally unavailable while Polymorphed.

If a Target is subjected to this Spell multiple times, their True Form doesn't change, only their current form.

Wish

Traits: Blast, Choice

Lists: Arcane, Occult

Evocation, 10th Tier

Actions: 10

Components: V, M (A Tarrasque Heart, which the Spell consumes)

You speak your Wish to the GM who determines whether or not the wish is reasonable, would come with consequences, or would be prevented from coming to pass (e.g. by a previous Wish, or a Deity).

If the Wish is reasonable, it happens exactly as intended (as far as the GM understands it), even if not properly phrased. However, unreasonable wishes may have complications arise such as the effects being delayed, allowing interference, or the Spell not taking hold to begin with (refunds the Spell Slot).

The Material Component is not needed if a comet streaks past at the correct moment, an effect explicitly mentions the Wish Spell, you Wish to replicate the effects of any Spell that is 9th Tier or less, or when this Spell is cast under any other conditions that the GM approves of, like granting the wish of a truly innocent child.

You can cast this Spell without a Tarrasque Heart. If you do, it is interpreted in the worst way for you, unless one of the prior conditions is met.

You cannot use the Wish Spell to become completely unstoppable (though you can get close), change the rules of magic (without GM approval at least), or change past events (again, assuming you don't have GM approval).

Monsters

You can't really have a game with lots of combat, if there aren't any Monsters to engage in combat. Well... I guess you could go up against other Player Characters, but that's pretty tedious, and a great way to ruin friendships.

However, there are a few things to know: Creatures that are exceptionally similar instead have their alternatives listed as Variants, such as the Alicanto, Phoenix, or the Thunderbird (different book, sorry!), as they only have minor differences between them.

Also note, there are Monsters with some abilities such as Spellcasting, or even something that would normally consume a Class Resource. These are adjusted to make running them in combat easier. So just be aware that they may be a bit more annoying/deadly than expected. And don't forget: your goal isn't to beat the Players, it's to present an obstacle for them to overcome... or not as the dice may roll.

Also, there is one system that many people will probably be coming from involving shmungeons with cute little shmagrorns, and unfortunately, some of the popular Monsters from that system won't be included in these rulebooks. BUT, you can still use them in your game, by using the Homebrew Aid on pg. 610, which we're sure you can also adapt for other systems, such as Pathfinder or DC20 Rpg.

The following pages contains a basic collection of Monsters and Legendary Monster Feats. However, this collection is intended to be mixed and matched (See pg. 610 for guidance on how to merge stat blocks).

Unfortunately, while we'd love to add more, this book is already really long, so you'll have to come up with your own Loot, Lair Actions, Adult/Mature Variants, and so on, until there's extra content that includes the details you want.

Can't wait to see what kind of Vampiric, Mechanical Tarrasque Wolf you decide to come up with.

Legendary Monster Feats

These are Feats for Legendary and Boss Monsters (pg. 79). They are not available for PCs to take, and is not recommended for the Players to have at their disposal in most situations.

All Legendary Monster Feats cost no Actions unless they state otherwise, and ignore all limitations.

Legendary Assault

Traits: Legendary, Attack

At the End of each Turn, the Monster can make one Attack for free.

Legendary Blow

Traits: Legendary, Attack, Saving Throw

Prerequisite: Bruiser

At the End of its Turn, the Monster makes one Attack against all Creatures within its Reach for free.

This Attack instead requires a Dexterity Saving Throw with a DC equal to the Monster's Strength Score, and Targets all Creatures within Range.

Legendary Casting

Traits: Legendary, Spellcasting

Prerequisite: Caster

The Monster casts one Spell at the End of its Turn, for free.

The Spell's Tier is always less than, or equal to half the Monster's number of Hit Dice (Rounded up).

Legendary Escape

Traits: Legendary, Move

Prerequisite: Skirmisher

The Monster moves up to its full Movement at the End of its Turn. If the Monster cannot Move, it instead attempts any Action it can to free itself.

Legendary Fright

Traits: Legendary, Frightened, Visual

Prerequisite: Debuffer

When the Monster Ends their Turn, all Creatures of the Monster's choice that can see them must make a Charisma Saving Throw against the Monster's Charisma Score:

- **Failure:** The Target becomes Frightened equal to the Monster's Charisma Modifier. While Frightened in this way, a Creature has Disadvantage on Attack Rolls.
- **Success:** No effect.

Legendary Healing

Traits: Legendary, Buff, Healing, Temporary Healing

Prerequisite: Healer

At the End of the Monster's Turn, one Creature within 30 feet regains Hit Points equal to the Monster's Wisdom Score.

All others of the Monster's Choice in Range gain Temporary Hit Points equal to the Monster's Wisdom Modifier.

Legendary Observation

Traits: Legendary, Auto-Hit/Fail, Information, Nullify

Prerequisite: Spotter

At the End of the Monster's Turn, all Creatures of the Monster's choice within 30 feet must make a Deception Check against the Monster's Wisdom Score.

The Monster then chooses one Creature that failed, and gains one of the following benefits:

- Their next Attack against the Target ignores Resistances.
- The next Attack against the Target cannot Miss, unless it's a Saving Throw, in which case the Target cannot Succeed.
- One of the Target's Blasts, Burns or Edges (Monster's Choice) cannot be used until the End of their next Turn.

Legendary Presence

Traits: Legendary, Buff

Prerequisite: Buffer

All Creatures of the Monster's Choice (other than themselves) have their Damage Threshold increased to equal the Monster's Charisma Score.

Legendary Resistance

Traits: Legendary, Nullify, Resistance

Prerequisite: Tank

The first time the Monster's Damage Threshold is exceeded each Round, the Damage is reduced by half, which can cause it to fall below the Damage Threshold.

Alternatively, the Monster can remove one Condition at the End of its Turn, preventing this effect.

Neither of the effects work if the Monster's Weakness is exploited.

Legendary Strategy

Traits: Legendary, Success/Failure

Prerequisite: Trapper

Once per Round when a Creature rolls a d20 Test, the Monster can choose to increase or decrease the Degree of Success for that d20 Test by 1.

Monster Shorthands

Monsters are already big and complex. I mean it's basically a condensed version of Character Sheets. And this document is already huge. So these statblocks use the following shorthands to help fit more information in a smaller space:

- **Atk:** Attack Bonus
- **Dmg:** Damage/Healing Bonus
- **Spell DC:** Spell Save DC
- **Act:** Action Cost
- **Rech X:** Recharge X. Rolled at the Start of a Creature's Turn.
- **DC X <Ability Type> Save:** A Saving Throw with a DX of X.
- **(F):** Finesse (Trait)
- **(L):** Light (Trait)
- **(M):** Magical (Trait)
- **(N):** Natural (Trait)
- **(W):** Weapon
- **(S):** Spell
- **Mod:** Modifier

You may also notice some features have less text than most Features. This is also to condense the information.

Aliens

One of the more difficult parts of a Sci-Fi Campaign is not having any aliens to work with. However, you can absolutely incorporate these into a Fantasy world as

Isakai victims, or even as another Race within the realms. Time travel and crash landings can also be fun.

Dionad

Dionads are a reclusive race of insectoids with very dexterous legs and intricate mandibles, which they use in tandem as easily as most races use hands, and an acidic, yet adhesive spray that forms their structures, and also works well for patching spaceships.

Medium Aberration, Skirmisher

HP: 6 (1d8 + 1), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(R) Acid 2, Physical 2

Damage Threshold: 1

Weaknesses: Isolation

Speed: 30 ft., **Initiative Recovery:** 2/Round

STR: 10 (+0), **DEX:** 12 (+1), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Athletics, Dionidian, Dionidian (Sign)

Senses: Darkvision 60 ft., Bright Light Sensitivity (Sight)

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +0, **(F):** +1)

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 10

- **Bite (3 Act):**

Melee Weapon (N), 3 (1d4) Piercing Damage.

- **Adhesive Spray (4 Act, Rech 6):**

DC 12 Dex Save, 15 ft. Cone:

- **Critical Failure:** Same as Failure, but also Slowed 1 while Restrained.
- **Failure:** Persistent Acid Damage equal to the Dionad's Con Mod and Restrained, until Adhesive wears off.
- **Success:** No Damage, but the Target treats all Movement as Difficult Terrain until the End of their next Turn.
- **Critical Success:** No effect.

- **Adhesive Construction (10 Act):**

The Dionad grants Half-Cover to their space in one direction. This seals Damaged rooms against Vacuums and restores 1d8 + 1 HP to Constructs. Expends Adhesive Spray.

Abilities:

- **Wing Speech:** Dionads cannot Verbally speak any Language that isn't Dionidian.
- **Spiraculous Respiration:** Dionads cannot hold their Breath.

Elite Dionad

Medium Aberration, Skirmisher

HP: 33 (5d8 + 10), **AC:** 12

Vulnerabilities, Resistances & Immunities:

(R) Acid 3, Physical 3

Damage Threshold: 5

Weaknesses: Isolation

Speed: 30 ft., **Initiative Recovery:** 4/Round

Atk (W): +5, **Dmg (W):** +1, **(F: +2)**

Atk (S): +3, **Dmg (S):** +1, **Spell DC:** 12

- **Bite (3 Act):**
Melee Weapon (N), 3 (1d4) Piercing Damage.
- **Adhesive Spray (4 Act, Rech 5-6):**
DC 14 Dexterity Save, 15 ft. Cone:
 - **Critical Failure:** Same as Failure, but also Slowed 1 while Restrained.
 - **Failure:** Persistent Acid Damage equal to the Dionad's Con Mod and Restrained, until Adhesive wears off.
 - **Success:** No Damage, but the Target treats all Movement as Difficult Terrain until the End of their next Turn.
 - **Critical Success:** No effect.
- **Adhesive Construction (10 Act):**
The Dionad grants Half-Cover to their space in one direction. This seals Damaged rooms against Vacuums and restores 1d8 + 1 HP to Constructs. Expends Adhesive Spray.

Abilities:

- **Wing Speech:** Dionads cannot Verbally speak any Language that isn't Dionidian.
- **Spiraculous Respiration:** Dionads cannot hold their Breath.

Naidara

The Naidara are naturally gifted as Spellcasters and Programmers, with exaggerated arms, legs, and necks as well as sunken eyes that are often thought of as creepy.

They are often known to process information just as fast if not faster than most computers, though they have a hard time processing and emotions.

Medium Humanoid, Trapper

HP: 5 (1d8), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(R) Psychic 2

Damage Threshold: 1

Weaknesses: Emotions

Speed: 30 ft., **Initiative Recovery:** 1/Round

Atk (S): +5, **Dmg (S):** +1, **Spell DC:** 14

- **Unarmed Strike (2 Act):**
Melee Weapon (N), 1 Bludgeoning Damage.
- **Pre-Calculate (1 Act, 1/Round):**
The Naidara makes a Flat Intelligence Check. Until the Start of their next Turn, they can replace one d20 Test they make with the result.

Abilities:

- **Quick Thinker:** A Naidara can take Reactions, even if it normally wouldn't be able to do so.
- **Focused:** The Naidara doesn't lose Actions when making Concentration Saving Throws.
- **Poker Face:** Any Creature that attempts a Society Check against a Naidara has Disadvantage, unless they're using an effect with the Mental Trait.

Trelphon

Trelphon are best described as reptilian flying squirrels, with a preference for low-gravity and low-atmosphere environments.

They are very good gliders and can mimic the appearance of a stalactite easily. Furthermore, they tend to be excellent pilots, and are curious and diligent when it comes to exploration.

Medium Humanoid, Skirmisher

HP: 5 (1d8), **AC:** 11

Damage Threshold: 1

Weaknesses: High Gravity

Speed: 30 ft., **Climb:** 15 ft., **Fly:** 50 ft.

Initiative Recovery: 1/Round

STR: 10 (+0), **DEX:** 12 (+1), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 12 (+1), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Stealth, Trelphic

Senses: Imprecise Hearing: 300 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +0, **(F: +1)**

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 10

- **Bite (3 Act):**
Melee Weapon (N), 4 (1d6) Piercing Damage + 1 Persistent Bleed.
- **Claws (2 Act):**
Melee Weapon (N), 3 (1d4) Slashing Damage.
 - **Hit:** The Trelphon attempts to Grapple the Target for free.

Abilities:

- **Altitude Adaptation:** Trelphon aren't affected by thin atmospheres, and only take half Damage (rounded down) from holding their Breath in a Vacuum
- **Glide:** Trelphon can't use their Flying Speed to gain height, or fall slower than 10 feet at the Start of its Turn (assuming standard Gravity). It also cannot Fly if it wears Armor that isn't made for it.
- **Perfect Disguise:** While Hanging and not moving, the Trelphon is indistinguishable from a Stalactite.

Elite Trelphon

Medium Humanoid, Skirmisher

HP: 27 (5d8 + 5), **AC:** 12

Damage Threshold: 5

Weaknesses: High Gravity

Speed: 30 ft., **Climb:** 15 ft., **Fly:** 50 ft.

Initiative Recovery: 3/Round

STR: 12 (+1), **DEX:** 14 (+2), **CON:** 12 (+1)

INT: 12 (+1), **WIS:** 14 (+2), **CHA:** 12 (+1)

Saving Throws: Dexterity

Skills & Languages: Air Vehicles, Stealth, Trelphic

Senses: Imprecise Hearing: 300 ft.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +5, **Dmg (W):** +1, **(F: +2)**

Atk (S): +4, **Dmg (S):** +2, **Spell DC:** 12

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage + 1 Persistent Bleed.

- **Claws (2 Act):**

Melee Weapon (N), 3 (1d4) Slashing Damage

- **Hit:** The Trelphon attempts to Grapple the Target for free.

Abilities:

- **Altitude Adaptation:** Trelphon aren't affected by thin atmospheres, and only take half Damage (rounded down) from holding their Breath in a Vacuum
- **Glide:** Trelphon can't use their Flying Speed to gain height, or fall slower than 10 feet at the Start of its Turn (assuming standard Gravity). It also cannot Fly if it wears Armor that isn't made for it.
- **Perfect Disguise:** While Hanging and not moving, the Trelphon is indistinguishable from a Stalactite.

Unqeth

Unqeth are gleefully described as sentient bipedal hippos with great skincare, and really wrinkly faces.

Fortunately, they aren't nearly as gruff or irritable as their confrontational demeanors may suggest.

They are intimidating warriors and investigators with a good sense for the truth, and the ability to hold their breath for quite some time.

Medium Humanoid, Bruiser

HP: 6 (1d10), **AC:** 10

Damage Threshold: 1

Weaknesses: Deception

Speed: 30 ft., **Initiative Recovery:** 1/Round

INT: 10 (+0), **WIS:** 12 (+1), **CHA:** 10 (+0)

Saving Throws: Wisdom

Skills & Languages: Society, Unquethic

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +1, **(F: +0)**

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 10

- **Unarmed Strike (2 Act):**

Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Hold Breath:** An Unqeth can hold their Breath for a number of Minutes equal to their Con Score, before suffocating.
- **Hunch:** When an Unqeth Fails a Society Check, but doesn't Critically Fail, they learn the general results as if they Succeeded, but no details (eg. that a Creature was lying, but not what they were lying about).
- **Intimidating Presence:** An Unqeth has Advantage on Intimidation Checks.

Elite Unqeth

Medium Humanoid, Bruiser

HP: 33 (5d10 + 5), **AC:** 11

Damage Threshold: 5

Weaknesses: Deception

Speed: 30 ft., **Initiative Recovery:** 3/Round

STR: 14 (+2), **DEX:** 12 (+1), **CON:** 12 (+1)

INT: 12 (+1), **WIS:** 14 (+2), **CHA:** 12 (+1)

Saving Throws: Wisdom

Skills & Languages: Intimidation, Society, Unquethic

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +4, **Dmg (W):** +2, **(F: +1)**

Atk (S): +4, **Dmg (S):** +2, **Spell DC:** 12

- **Unarmed Strike (2 Act):**
Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Hold Breath:** An Unqeth can hold their Breath for a number of Minutes equal to their Con Score, before suffocating.
- **Hunch:** When an Unqeth Fails a Society Check, but doesn't Critically Fail, they learn the general results as if they Succeeded, but no details (eg. that a Creature was lying, but not what they were lying about).
- **Intimidating Presence:** An Unqeth has Advantage on Intimidation Checks.

Voctid

The Voctid are a race of skeletal aliens with fiendish roots. Thanks to this, they are often very antagonistic around communities that try to do the right thing. They also have a tendency to engage in unethical practices. Any members that choose to do the right thing usually do so out of circumstance, or are outcasts.

Medium Fiend, Tank

HP: 7 (1d10 + 1), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(V) Radiant 2

(R) Bleed 1, Physical 2

(I) Fire

Damage Threshold: 1

Weaknesses: Silvered/Holy Weapons or Spells

Speed: 30 ft., **Initiative Recovery:** 2/Round

STR: 10 (+0), **DEX:** 10 (+0), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 12 (+1)

Saving Throws: Constitution

Skills & Languages: Intimidation, Voctin, Infernal

Senses: Darkvision 60 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +0, **(F: +0)**

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 12

- **Tail Whip (3 Act):**
Melee Weapon (N), 4 (1d6) Slashing Damage.
 - **Hit:** The Target is exposed to Infernal Fever with a DC of 12.

Abilities:

- **Shadow Piercer:** Voctids can see through Magical Darkness as if it was regular Darkness.
- **Fiery Rebuke:** When Hit with any Melee Attack, the Attacker takes Fire Damage equal to the Voctid's Proficiency Bonus.

Elite Voctid

Medium Fiend, Tank

HP: 34 (5d10 + 10), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(V) Radiant 3

(R) Bleed 5, Physical 3

(I) Fire

Damage Threshold: 5

Weaknesses: Silvered/Holy Weapons or Spells

Speed: 30 ft., **Initiative Recovery:** 4/Round

STR: 12 (+1), **DEX:** 12 (+1), **CON:** 14 (+2)

INT: 12 (+1), **WIS:** 12 (+1), **CHA:** 14 (+2)

Saving Throws: Constitution

Skills & Languages: Intimidation, Occultism, Voctin, Infernal

Senses: Darkvision 60 ft.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +4, **Dmg (W):** +1, **(F):** +1)

Atk (S): +4, **Dmg (S):** +1, **Spell DC:** 14

- **Tail Whip (3 Act):**

Melee Weapon (N), 4 (1d6) Slashing Damage.

- **Hit:** The Target is exposed to Infernal Fever with a DC of 14.

Abilities:

- **Shadow Piercer:** Voctids can see through Magical Darkness as if it was regular Darkness.
- **Fiery Rebuke:** When Hit with any Melee Attack, the Attacker takes Fire Damage equal to the Voctid's Proficiency Bonus.

Aberrations

Aberrations include strange, and unusual Creatures. Many of them were created through arcane experiments, or are eldritch in origin.

Green Ooze

Sourced from Alchemical mishaps involving acid, Oozes like the Green Ooze are difficult to control, but are excellent roombas for rodents, spiders, and the odd piece of food if commanded through Magical means.

But as with many mindless Creatures, they are fallible yet durable if used as servants.

Small Aberration, Tank

HP: 9 (1d12 + 2), **AC:** 7

(Medium: HP: 5, AC: 9)

Vulnerabilities, Resistances & Immunities:

(R) Bludgeoning 2, Fire 2, Slashing 2

(I) Acid, Charmed, Frightened, Grappled, Incapacitated, Piercing, Prone, Psychic, Restrained, Unconscious

Damage Threshold: 1

Weaknesses: Neutralizing substances, or Water

Speed: 10 ft., **Climb:** 10 ft.

Initiative Recovery: 4/Round

STR: 6 (-2), **DEX:** 5 (-3), **CON:** 15 (+2)

INT: 3 (-4), **WIS:** 3 (-4), **CHA:** 10 (+0)

Saving Throws: Constitution

Skills & Languages: None

Senses: Blind, Precise Tremorsense: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): -1, **Dmg (W):** -2, **(F):** -3)

Atk (S): -2, **Dmg (S):** -4, **Spell DC:** 10

(Medium: Atk (W): +1, Atk (S): +0, Damage: 0.5x)

- **Envelop (5 Act):**

DC 15 Dex Save, Touch:

- **Failure:** The Target is Grappled by the Slime, taking 4 (1d6, Medium: 2) Acid Damage at the Start of their Turn while Grappled, using Con for the Dmg Bonus.
- Success:** No effect.

Abilities:

- **Absorb Acid:** When a Green Ooze takes Acid Damage, it instead heals that amount.
- **Acidic Nature:** When an Ooze is Hit with a Natural Melee Weapon, the Attacker takes Acid Damage equal to the Ooze's Con Mod (already added to Envelop).
- **Mindless:** The Ooze is Immune to all Emotion effects, and automatically Fails any effect with the Mental Trait.

Looming Stalker

Often known as the "Bane of Fates," the Looming Stalker is an enemy unlike any other, as they have no place in the realms of death.

They may not be particularly swift, but they are indeed dangerous. Because even when you kill them, they don't stop. They always come back for more.

Medium Aberration, Debuffer

HP: 5 (1d8), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(I) Bloodied, Charmed, Exhaustion, Frightened, Incapacitated, Necrotic, Poisoned, Stunned, Unconscious

Damage Threshold: 1

Weaknesses: Non-Frightened Creatures

Speed: 10 ft., **Initiative Recovery:** 3/Round

STR: 6 (-2), **DEX:** 10 (+0), **CON:** 11 (+0)

INT: 13 (+1), **WIS:** 12 (+1), **CHA:** 16 (+3)

Saving Throws: Charisma

Skills & Languages: Stealth, Perception, All Languages

Senses: Darkvision: 60 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** -2, **(F: +0)**

Atk (S): +3, **Dmg (S):** +1, **Spell DC:** 16

- **Jaunt (2 Act, Rech 5-6): (M)**
The Looming Stalker Teleports up to 30 feet closer to its Target.
- **Scrape (2 Act):**
Melee Weapon, 3 (1d4) Slashing Damage, 1 Persistent Bleed.
 - **Hit:** The Target is Frightened 1 (Stacking).
- **Terror (10 Act):**
DC 16 Charisma Save, 60 ft. Radius (Non-Frightened Creatures are Immune):
 - **Critical Failure:** Same as Failure, but they are also Stunned X.
 - **Failure:** The Target becomes Drained equal to their Frightened Condition.
 - **Success:** The Target takes Psychic Damage equal to the Drained Condition.
 - **Critical Success:** No effect.

Abilities:

- **Fear Eater:** When a Looming Stalker Attacks, they add their Target's Frightened Condition to its Attack Rolls.
- **Frightful Presence:** When a Looming Stalker enters Combat, all participating Creatures must make a DC 16 Charisma Save. Their Target automatically fails:
 - **Failure:** They become Frightened 1.
 - **Success:** No effect.
- **Immortal Nature:** The Looming Stalker doesn't need to eat, drink, breathe, or sleep.
- **Patient Hunter:** The Looming Stalker avoids entering Combat unless its Target is Bloodied.
- **Relentless Hunter:** The Looming Stalker always has a Target, whom they always know the location of, even if protected from Divination Magic. If their Target dies, another Creature they can see becomes their new Target.
- **Semi-Ethereal:** The Looming Stalker is always Ethereal, though it cannot pass through walls, and can interact with both Ethereal and Non-Ethereal Creatures.
- **Unending Strength:** When the Looming Stalker dies, it is Resurrected 1 Hour later, and gains both an additional Hit Die (affects Proficiency), and a permanent +1 to all Damage it deals.

Baby Mimic

Mimics are common ambush Creatures that pose as Chests, Chairs, Doors, Walls, Beds, and very rarely, entire Buildings. They lie in wait until some prey comes along, at which point it usually grabs anything that is foolish enough to touch it. But, if properly fed and cared for, some Mimics might allow themselves to be used as self-cleaning Weapons or Armor in Combat, or act as portable storage containers.

Tiny Aberration, Trapper

HP: 5 (1d8), **AC:** 10

(Medium: HP: 2, AC: 14)

Vulnerabilities, Resistances & Immunities:

(R) Acid 1

Damage Threshold: 1

Weaknesses: Surprises

Speed: 20 ft., **Climb:** 5 ft.

Initiative Recovery: 1/Round

STR: 8 (-1), **DEX:** 10 (+0), **CON:** 10 (+0)

INT: 12 (+1), **WIS:** 10 (+0), **CHA:** 6 (-2)

Saving Throws: Intelligence

Skills & Languages: Athletics, Stealth (Expertise)

Senses: Precise Tremorsense: 15 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** -1, (F: +0)

Atk (S): +3, **Dmg (S):** +0, **Spell DC:** 6

(Medium: Atk (W): +6, Atk (S): +7, Damage: 0.25x)

- **Bite (3 Act):**

Melee Weapon, 4 (1d6) Piercing + 4 (1d6) Acid Damage. This Attack automatically Hits Grappled Creatures.

- **Hit:** The Target is Grappled.

- **Disguise (10 Act):**

The Mimic takes on the appearance of any inanimate object, gaining a +5 bonus to Stealth Checks until it takes any Action that isn't the Step Action.

Abilities:

- **Ambush:** A Mimic automatically Hits all Attack Rolls on its first Turn if it's Ambushing or Initiating.
- **Living Weaponry:** When using Disguise, the Mimic can act as any Non-Consumable Item of an equal or smaller Size with a Complexity that is less than its Intelligence Score.

Young Mimic

Small Aberration, Trapper

HP: 28 (5d8 + 5), **AC:** 10

(Medium: HP: 14, AC: 12)

Vulnerabilities, Resistances & Immunities:

(R) Acid 5

Damage Threshold: 5

Weaknesses: Surprises

Speed: 30 ft., **Climb:** 10 ft.

Initiative Recovery: 3/Round

STR: 10 (+0), **DEX:** 10 (+0), **CON:** 12 (+1)

INT: 15 (+2), **WIS:** 10 (+0), **CHA:** 8 (-1)

Saving Throws: Intelligence

Skills & Languages: Athletics, Perception, Stealth (Expertise)

Senses: Precise Tremorsense: 30 ft.

Proficiency Bonus: +3

Actions: Max 2

Atk (W): +3, **Dmg (W):** +0, (F: +0)

Atk (S): +5, **Dmg (S):** +0, **Spell DC:** 8

(Medium: Atk (W): +5, Atk (S): +7, Damage: 0.5x)

- **Bite (3 Act):**

Melee Weapon, 4 (1d6) Piercing + 4 (1d6) Acid Damage. This Attack automatically Hits Grappled Creatures.

- **Hit:** The Target is Grappled.

- **Disguise (10 Act):**

The mimic takes on the appearance of any inanimate object, gaining a +5 bonus to Stealth Checks until it takes any Action that isn't the Step Action.

Abilities:

- **Ambush:** A Mimic automatically Hits all Attack Rolls on its first Turn if it's Ambushing or Initiating.
- **Living Weaponry:** When using Disguise, the Mimic can act as any Non-consumable Item of an equal or smaller Size with a Complexity that is less than its Intelligence Score.

Young Nessylith

Often disappearing before people can get a good look at them, Nessyliths hide primarily in freshwater lakes (there are saltwater variants), hunting deep into the night. Not all accounts agree with each-other, and some even say that the Nessylith doesn't even exist. But lakeside towns and loremasters will all tell you that they very much are.

Variants for Nessylith:

Abyssylith:

The Abyssylith is permanently Blinded, has Precise Tremorsense: 30 ft., and double their Cold Resistance.

If they live near a Volcano or other underwater hot spot, they gain Fire Resistance equal to their original Cold Resistance.

...

Medium Aberration, Trapper

HP: 5 (1d6 + 1), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(V) Lightning 2

(R) Acid 2, Cold 2

Damage Threshold: 1

Weaknesses: Truesight

Speed: 10 ft., **Swim:** 30 ft.

Initiative Recovery: 3/Round

STR: 13 (+1), **DEX:** 10 (+0), **CON:** 12 (+1)

INT: 15 (+2), **WIS:** 10 (+0), **CHA:** 8 (-1)

Saving Throws: Intelligence

Skills & Languages: Athletics, Survival, Stealth

Senses: Imprecise Tremorsense: 30 ft.

Proficiency Bonus: +2

Actions: Max +2

Atk (W): +2, **Dmg (W):** +1, **(F):** +0)

Atk (S): +4, **Dmg (S):** +0, **Spell DC:** 8

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage

- **Wave (5 Act, Must be submerged):**

DC 13 Strength Save, 30x5 ft. Line. Vehicles automatically Fail, and doesn't reveal it from being Hidden:

- **Critical Failure:** Same as Failure, but the distance is Doubled.
- **Failure:** The Target is pushed up to 30 feet, and knocked Prone. If a Creature is Pushed into an Object, they take fall Damage based on the distance pushed.
- **Success:** Same as Failure, but half distance, and no Damage.
- **Critical Success:** They are only pushed 5 feet.

- **Illusory Vanish (5 Act, Rech 6): (M)**

The Nessylith becomes Invisible, Masked, Silent, and Hidden until the Hidden Condition ends (DC 15 to Spot).

Abilities:

- **Hold Breath:** The Nessylith can hold its Breath for up to 10 Minutes.
- **Illusory Nature: (M)** The Nessylith cannot be detected by Divination Magic, or other Magical effects, such as a Glyph of Warding.
- **Water Breathing:** The Nessylith breathes water, and has to hold its Breath when not in water.

Elder Tarrasque

The only Kaiju in this book because... well... this book isn't big enough for all of them in the first place.

Thought of by many as an eater of worlds, this monster is rumored to be created by a mad mage seeking an unstoppable tomb guard, or an unknown Deity seeking to use it as a soldier in a planar war. But in either case, something clearly didn't go as planned.

Well, it's a good thing there's only one that exists, right?
...Right?

Colossal Aberration, Beast, Dragon, Tank

HP: 330 (20d12 + 200), **AC:** 12

(Medium: HP: 5,280, AC: 4)

Vulnerabilities, Resistances & Immunities:

(V) Psychic 20

(R) Physical 20

Damage Threshold: 20

Weaknesses: Divine Weapons

Speed: 80 ft., **Initiative Recovery:** 20/Round

STR: 17 (+3), **DEX:** 14 (+2), **CON:** 30 (+10)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 13 (+1)

Saving Throws: Constitution, Charisma

Skills & Languages: Athletics

Proficiency Bonus: +6

Actions: Max 6

Atk (W): +8, **Dmg (W):** +3, **(F: +2)**

Atk (S): +6, **Dmg (S):** +0, **Spell DC:** 13

(Medium: Atk (W): +0, Atk (S): -2, Damage: 16x)

- **Bite (3 Act):**
Melee Weapon (N), 4 (1d6) Piercing Damage.
- **Poison Spit (2 Act):**
240/600 ft., Ranged Weapon (N, F), 3 (1d4) Poison Damage.
- **Terror Gaze (5 Act, 1/Round):**
DC 13 Charisma Save, Range: 1,200 ft., One Creature:
 - **Critical Failure:** Double Damage.
 - **Failure:** The Target takes 14 (4d6) Psychic Damage, and becomes Frightened equal to the Damage Taken before scaling (Minimum of 1).
 - **Success:** Half Damage, and not Frightened.
 - **Critical Success:** No effect.

Abilities:

- **Spell Immunity:** The Tarrasque is unaffected by Spells that are Cast at 9th Tier or lower. Other Actions are unaffected.
- **Regenerate:** The Tarrasque always has 30 Persistent Healing, which restores lost limbs, and is only removed while it is exposed to its Weakness.
- **Immortal:** The Tarrasque cannot be killed by any means short of another Tarrasque consuming it. When reduced to 0 Hit Points, it is instead Incapacitated and cannot benefit from Spell Immunity for 1 Century, or until it is restored to full Health by any other means.

Troll

Trolls are well known pests that dwell in isolated locations, where food comes to them. But as well known as they are, nothing compares to their ability to regenerate from fatal wounds.

Medium Aberration, Tank

HP: 9 (1d12 + 2), **AC:** 8

Vulnerabilities, Resistances & Immunities:

(V) Fire 2

(R), Cold 2, Physical 1

(I) Exhaustion, Force

Damage Threshold: 1

Weaknesses: Acid, Intense Heat

Speed: 25 ft., **Initiative Recovery:** 4/Round

STR: 14 (+2), **DEX:** 6 (-2), **CON:** 14 (+2)

INT: 12 (+1), **WIS:** 10 (+0), **CHA:** 8 (-1)

Saving Throws: Constitution

Skills & Languages: Athletics, Intimidation, Troll

Senses: Sunlight Sensitivity (Sight)

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +0, **Dmg (W):** +2, (F: -2)

Atk (S): +3, **Dmg (S):** +0, **Spell DC:** 8

- **Annoy (3 Act):**

DC 8 Charisma Save Throw, One Creature, 30 ft. Range:

- **Critical Failure:** Same as Failure, but their first Attack next Turn must Target the Troll.
- **Failure:** Until the End of their next Turn, The Target has Disadvantage on all Attack Rolls against Creatures other than the Troll.
- **Success:** No effect.

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage.

- **Slam (2 Act):**

Melee Weapon (N), 3 (1d4) Bludgeoning Damage.

Abilities:

- **Regenerate:** The Troll always has 2 Persistent Healing, which restores lost limbs, and is only removed while it is exposed to its Weakness.
- **Semi-Immortal:** The Troll doesn't die when reduced to 0 Hit Points, unless it ends its Turn at 0 Hit Points, in which case it rolls a single Death Save to avoid Dying.

Twisted Creature (Base)

Twisted Lands are created when magic goes wrong, and Twisted Creatures are the poor victims. The Twisted Essence that invades these Creatures corrupts and assimilates all that it can, until the only thing left is a mindless husk that obeys no master.

Medium Aberration, Tank

HP: 9 (1d12 + 2), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(V) Cold 2

(I) All Damage from Magical Sources

Damage Threshold: 1

Weaknesses: Rain, Water

Speed: 15 ft., **Initiative Recovery:** 4/Round

STR: 12 (+1), **DEX:** 10 (+0), **CON:** 14 (+2)

INT: 6 (-2), **WIS:** 6 (-2), **CHA:** 6 (-2)

Saving Throws: Constitution

Skills & Languages: None

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +1, (F: +0)

Atk (S): +0, **Dmg (S):** -2, **Spell DC:** 6

- **Unarmed Strike (2 Act):**

Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Infected:** Any Weapon Attack from the Twisted Creature that Hits, also exposes the Target to Arcanist's Bane with a DC of 14 on a Hit. Natural Weapon Attacks against the Twisted Creature also count.
- **Magically Animated:** If the Twisted Creature is subjected to an Anti-Magic effect, it is Incapacitated until either the effect Ends, or until the Start of its next Turn.
- **Mindless:** The Monster is unaffected by Emotion effects, and anything requiring a Charisma Check, but automatically fails any Charisma Saving Throws.
- **Spell Absorption:** If the Monster is subjected to any Magical effect that isn't Anti-Magic, it regains 1d12 + 2 Hit Points in place of the original effect.

Beasts

Young Bear

Of course there are many different kinds of bears, from black to brown and even polar. But even if they are inherently different, they are similar enough to warrant sharing the same or similar stat block in most circumstances.

Variants for Black Bear:

Black Bear

The Black Bear has a Climbing Speed equal to half of it's Walking Speed.

Polar Bear

The Polar Bear has Cold Immunity instead of Resistance.

Medium Beast, Bruiser

HP: 7 (1d10 + 1), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(R) Cold 2, Physical 2

Damage Threshold: 1

Weaknesses: Hunger

Speed: 30 ft., **Initiative Recovery:** 3/Round

STR: 14 (+2), **DEX:** 10 (+0), **CON:** 13 (+1)

INT: 10 (+0), **WIS:** 12 (+1), **CHA:** 10 (+0)

Saving Throws: Strength

Skills & Languages: Athletics, Perception

Senses: Precise Smell: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +2, (F: +0)

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 10

- **Claw (2 Act):**

Melee Weapon (N), 3 (1d4) Slashing Damage.

Has Advantage on Grappled Targets.

- **Bite (3 Act):**

Natural Melee Weapon 4 (1d6) Piercing.

- **Hit:** The Bear attempts to Grapple the Target for Free.

Abilities:

- **Primal Endurance:** Any Action or Ability the Bear has with a Recharge, can be used twice instead of once.

Bear

Large Beast, Bruiser

HP: 38 (5d10 + 10), **AC:** 10

(Medium: **HP:** 76, **AC:** 8)

Vulnerabilities, Resistances & Immunities:

(R) Cold 3, Physical 3

Damage Threshold: 5

Weaknesses: Hunger

Speed: 40 ft., **Initiative Recovery:** 5/Round

STR: 16 (+3), **DEX:** 11 (+0), **CON:** 15 (+2)

INT: 12 (+1), **WIS:** 13 (+1), **CHA:** 10 (+0)

Saving Throws: Strength

Skills & Languages: Athletics, Perception, Society

Senses: Precise Smell: 60 ft.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +3, **Dmg (W):** +3, (F: +0)

Atk (S): +4, **Dmg (S):** +1, **Spell DC:** 10

(Medium: **Atk (W):** +1, **Atk (S):** +2, **Damage:** 2x)

- **Claw (2 Act):**

Melee Weapon (N), 3 (1d4) Slashing Damage.

Has Advantage on Grappled Targets.

- **Bite (3 Act):**

Natural Melee Weapon 4 (1d6) Piercing Damage.

- **Hit:** The Bear attempts to Grapple the Target for Free.

Abilities:

- **Primal Endurance:** Any Action or Ability the Bear has with a Recharge, can be used three times instead of once.

Bird

From finches to falcons, ravens and blackbirds, this statblock is perfect for the odd occasion where the Party gets a bunch of pets, only for the owl to fly away like the jerk he secretly is.

Tiny Beast, Spotter

HP: 5 (1d8), **AC:** 12

(Medium: HP: 1, AC: 16)

Damage Threshold: 1

Weaknesses: Cages

Speed: 10 ft., **Fly:** 60 ft.

Initiative Recovery: 3/Round

STR: 12 (+1), **DEX:** 15 (+2), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 16 (+3), **CHA:** 10 (+0)

Saving Throws: Wisdom

Skills & Languages: Acrobatics, Performance

Senses: Precise Sight: 1 mi.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +4, **Dmg (W):** +1, **(F: +2)**

Atk (S): +2, **Dmg (S):** +3, **Spell DC:** 10

(Medium: Atk (W): +6, Atk (S): +4, Damage: 0.25x)

- **Beak (3 Act):**
Melee Weapon (N), 4 (1d6) Piercing Damage.
- **Talon (2 Act, Flying Only):**
Melee Weapon (N), 3 (1d4) Slashing Damage.
 - **Hit:** The Target is Grappled if it is Smaller than the Bird.

Abilities:

- **Variable Summon:** The exact kind of Bird may change statistics, such as Size, Actions, and Abilities. For example: a Goldfinch might be Minuscule, and an Owl would have Silent Flight.

Dire Beast (Base)

Dire Beasts are known to roam the world, residing in places where Primal Magic flows strongly, or in particularly dangerous locations, such as forbidden forests. They are much more difficult to tame than other Beasts, and are often found leading Non-dire Beasts when they are defending their land.

Large Beast, Bruiser

HP: 38 (5d10 + 10), **AC:** 11

(Medium: HP: 76, AC: 9)

Vulnerabilities, Resistances & Immunities:

(R) Physical 3

Damage Threshold: 5

Weaknesses: Primal Spells or Primitive/Beastial Weapons

Speed: 40 ft., **Initiative Recovery:** 6/Round

STR: 18 (+4), **DEX:** 12 (+1), **CON:** 15 (+2)

INT: 10 (+0), **WIS:** 13 (+1), **CHA:** 12 (+1)

Saving Throws: Strength

Skills & Languages: Intimidation, Druidic

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +4, **Dmg (W):** +4, **(F: +1)**

Atk (S): +3, **Dmg (S):** +1, **Spell DC:** 12

(Medium: Atk (W): +2, Atk (S): +1, Damage: 2x)

- **Natural Weapon (3 Act):**
Melee Weapon, 3 (1d6) Bludgeoning Damage.

Abilities:

- **Innate Spellcasting (Recharge 5-6): (M)**
The Dire Beast can cast one of the following Primal Spells at their lowest Tier, using Wisdom for any Spell Attack Roll, and Spell Save DCs: Animate Plant (10 Act), Moonlight (4 Act), Summon Beast (10 Act)
- **Pack Tactics:** The Dire Beast has Advantage on Attack Rolls against Creatures that are within reach of an Ally.

Fish

Most fish are harmless, or of no reasonable threat. However, some like Pacu or the Swordfish have some method of causing harm.

Don't forget: this statblock is to represent the common fish that you might find, but remember that Fish can come in all different shapes and Sizes with more variants than can be reasonably shoved into a book. So homebrew away!

Tiny Beast, Bruiser

HP: 6 (1d10), **AC:** 11

(Medium: *HP:* 1, *AC:* 15)

Damage Threshold: 1

Weaknesses: Piercing Weapons

Speed: 5 ft., **Swim:** 50 ft.

Initiative Recovery: 2/Round

STR: 14 (+2), **DEX:** 12 (+1), **CON:** 10 (+0)

INT: 6 (-2), **WIS:** 10 (+0), **CHA:** 6 (-2)

Saving Throws: Strength

Skills & Languages: Athletics

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +2, **(F: +1)**

Atk (S): +0, **Dmg (S):** +0, **Spell DC:** 6

(Medium: *Atk (W):* +7, *Atk (S):* +4, *Damage:* 0.25x)

- **Tail (2 Act):**

Melee Weapon (N), 3 (1d4) Bludgeoning Damage.

- **Hit:** The Target is pushed 5 feet away, unless it is larger than the Fish.

Abilities:

- **Streamlined:** The Fish ignores Difficult Terrain caused by Water.
- **Variable Summon:** The exact kind of Fish may change statistics, such as Size, Actions, and Abilities. For example: an Octopus would have a Camouflage Action, and a Pacu would have a Bite Attack.
- **Waterbreath:** The Fish can breath water, but it can't breathe air.

Young Horse

Horses are well-known pack animals that not only travel in groups, but are highly prized for their Speed and strength on land, as well as their loyalty and relative ease of care. Just watch out for the biscuits on the road.

Medium Beast, Bruiser

HP: 7 (1d10 + 1), **AC:** 10

Damage Threshold: 1

Weaknesses: Being Restricted

Speed: 40 ft., **Initiative Recovery:** 3/Round

STR: 14 (+2), **DEX:** 10 (+0), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 8 (-1), **CHA:** 10 (+0)

Saving Throws: Strength

Skills & Languages: Athletics, Society

Senses: Precise Hearing: 150 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +2, **(F: +0)**

Atk (S): +2, **Dmg (S):** -1, **Spell DC:** 10

- **Hoof (2 Act):** Melee Weapon (N), 3 (1d4) Bludgeoning Damage. This Damage is doubled against Prone Creatures.

Abilities:

- **Powerful Build:** The Horse's Carrying Capacity is treated as if it were one Size larger.

Horse

Large Beast, Bruiser

HP: 38 (5d10 + 10), **AC:** 10

(*Medium:* HP: 76, AC: 8)

Damage Threshold: 5

Weaknesses: Being Mounted

Speed: 60 ft., **Initiative Recovery:** 5/Round

STR: 16 (+3), **DEX:** 10 (+0), **CON:** 14 (+2)

INT: 10 (+0), **WIS:** 8 (-1), **CHA:** 10 (+0)

Saving Throws: Strength

Skills & Languages: Athletics, Society

Senses: Precise Hearing: 150 ft.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +3, **Dmg (W):** +3, **(F: +0)**

Atk (S): +3, **Dmg (S):** -1, **Spell DC:** 10

(*Medium:* Atk (W): +1, Atk (S): +1, Damage: 2x)

- **Hoof (2 Act):**

Melee Weapon (N), 3 (1d4) Bludgeoning Damage. This Damage is doubled against Prone Creatures.

Abilities:

- **Powerful Build:** The Horse's Carrying Capacity is doubled.
- **Trample:** The Horse can Attack after it Dashes. If it Does, any Creature it Hits must make a DC 15 Strength Save:
 - **Failure:** They are knocked Prone.
 - **Success:** No effect.

Young Lion

Lions and Tigers and Bears, oh my! Okay, maybe not Bears, those have a different Stat Block. However, Lions, Panthers and Tigers (among other big cats) have similar capabilities, and as such, are grouped together for simplicity's sake.

Medium Beast, Skirmisher

HP: 6 (1d10), **AC:** 12

Damage Threshold: 1

Weaknesses: Creatures with a higher Initiative

Speed: 50 ft., **Initiative Recovery:** 2/Round

STR: 16 (+3), **DEX:** 14 (+2), **CON:** 11 (+0)

INT: 10 (+0), **WIS:** 12 (+1), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Acrobatics, Athletics

Senses: Precise Blindsight: 5 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +4, **Dmg (W):** +3, **(F: +2)**

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 10

- **Claw (2 Act):**

Melee Weapon (N), 3 (1d4) Slashing Damage.

- **Hit:** The Target is Grappled.

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage. If the Target is Grappled, they also take 2 Persistent Bleed.

Abilities:

- **Graceful Landing:** The Lion takes half Damage from falling.
- **Pounce:** The first time the Lion Attacks a Creature with a lower Initiative than it each Turn, the Attack becomes Critical.

Lion

Large Beast, Skirmisher

HP: 33 (5d10 + 5), **AC:** 13

(Medium: HP: 66, AC: 11)

Damage Threshold: 5

Weaknesses: Creatures with a higher Initiative

Speed: 60 ft., **Initiative Recovery:** 4/Round

STR: 18 (+4), **DEX:** 16 (+3), **CON:** 13 (+1)

INT: 10 (+0), **WIS:** 14 (+2), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Acrobatics

Senses: Precise Blindsense: 15 ft.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +6, **Dmg (W):** +4, **(F: +3)**

Atk (S): +3, **Dmg (S):** +2, **Spell DC:** 10

(Medium: Atk (W): +4, Atk (S): +1, Damage: 2x)

- **Claw (2 Act):**

Melee Weapon (N), 3 (1d4) Slashing Damage.

- **Hit:** The Target is Grappled.

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage. If the Target is Grappled, they also take 3 Persistent Bleed.

Abilities:

- **Graceful Landing:** The Lion takes half Damage from falling if it isn't Incapacitated or Restrained.
- **Pounce:** The first time the Lion Attacks a Creature with a lower Initiative on its Turn, the Attack becomes Critical.

Roc Hatchling

The Roc is one of the largest birds of prey, towering over the burliest of adventurers, and competing with Dragons for food and territory.

Medium Beast, Bruiser

HP: 6 (1d10), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(R) Lightning 1

Damage Threshold: 1

Weaknesses: Being Grounded

Speed: 20 ft., **Initiative Recovery:** 2/Round

STR: 14 (+2), **DEX:** 12 (+1), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 13 (+1), **CHA:** 10 (+0)

Saving Throws: Strength

Skills & Languages: Perception

Senses: Precise Sight: 1 mi.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +2, **(F: +1)**

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 10

- **Bite (3 Act):** Melee Weapon (N), 4 (1d6) Piercing Damage.

- **Claw (2 Act, Flying Only):**

Melee Weapon (N), 3 (1d4) Slashing Damage.

- **Hit:** The Target is Grappled if they're Smaller than the Roc.

- **Gust (5 Act, Rech 6):**

DC 14 Strength Save, 5x10 ft. Line:

- **Critical Failure:** Same as Failure, but also knocked Prone.
- **Failure:** The Target is Pushed to the end of the area (or outside the last space), and are Flat-Footed until the Start of their next Turn.
- **Success:** Only Pushed 5 feet.
- **Critical Success:** No effect.

Abilities:

- **Flutter:** The Roc doesn't take Fall Damage if it takes the Move Action at least once before the End of its Turn.
- **Lightning Rod:** When the Roc Resists Lightning Damage, its next Melee Attack that Hits deals an equal amount of Lightning Damage.
- **Streamlined:** The Roc ignores Difficult Terrain from Wind, and has Advantage on Saving Throws against Wind effects.

Young Roc

Large Beast, Bruiser

HP: 33 (5d10 + 5), **AC:** 12

(*Medium:* HP: 66, AC: 10)

Vulnerabilities, Resistances & Immunities:

(R) Lightning 5

Damage Threshold: 5

Weaknesses: Being Grounded

Speed: 25 ft., **Fly:** 50 ft.

Initiative Recovery: 4/Round

STR: 17 (+3), **DEX:** 14 (+2), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 14 (+2), **CHA:** 10 (+0)

Saving Throws: Strength

Skills & Languages: Athletics, Perception

Senses: Precise Sight: 5 mi., Precise Hearing: 50 ft.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +5, **Dmg (W):** +3, **(F):** +2)

Atk (S): +3, **Dmg (S):** +2, **Spell DC:** 10

(*Medium:* Atk (W): +3, Atk (S): +1, Damage: 2x)

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage.

- **Claw (2 Act, Flying Only):**

Melee Weapon (N), 3 (1d4) Slashing Damage.

- **Hit:** The Target is Grappled.

- **Gust (5 Act, Rech 5-6):**

DC 17 Strength Save, 10x30 ft. Line

- **Critical Failure:** Same as Failure, but also knocked Prone.
- **Failure:** The Target is Pushed to the end of the area (or outside the last space), and are Flat-Footed until the Start of their Next Turn.
- **Success:** Only Pushed 5 feet.
- **Critical Success:** No effect.

- **Storm Spray (4 Act):**

All Persistent Acid and Fire Damage is reduced by 3. The Roc also triggers Lightning Rod, equal to its Lightning Resistance.

Abilities:

- **Lightning Rod:** When the Roc resists Lightning Damage, the next Melee Attack Roll it Hits deals an equal amount of Lightning Damage (unaffected by Size).
- **Streamlined:** The Roc ignores Difficult Terrain from Wind, and has Advantage on Saving Throws against Wind effects.

Spider

Some people hate spiders, while others like them.

However, some spiders grow to be about the Size of a kitten or puppy, which is definitely a great big nope from most people. Luckily, Oversized Spiders aren't usually a problem in civilized areas. Usually.

Tiny Beast, Trapper

HP: 4 (1d6), **AC:** 11

(*Medium: HP: 1, AC: 15*)

Vulnerabilities, Resistances & Immunities:

(**R**) Physical 2

Damage Threshold: 1

Weaknesses: Fire

Speed: 20 ft., **Climb:** 20 ft.

Initiative Recovery: 2/Round

STR: 12 (+1), **DEX:** 13 (+1), **CON:** 11 (+0)

INT: 14 (+2), **WIS:** 10 (+0), **CHA:** 8 (-1)

Saving Throws: Intelligence

Skills & Languages: Athletics

Senses: Precise Tremorsense: 120 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +1, (**F:** +1)

Atk (S): +4, **Dmg (S):** +0, **Spell DC:** 8

(*Medium: Atk (W): +7, Atk (S): +8, Damage: 0.25x*)

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage.

- **Hit:** The Target must make a DC 11 Constitution Save:

- **Critical Failure:** Double the Poison, and they are Stunned equal to the amount of Poison Damage taken.
- **Failure:** They take 3 (1d4) Persistent Poison Damage.
- **Success:** Half Damage.
- **Critical Success:** No effect.

- **Wrap (5 Act):**

Touch, One Restrained or Incapacitated Target. The Target is Restrained if they weren't already, and cannot take Actions with the Manipulate, Move or Attack Trait. If the Target is Larger than the Spider, the Action Cost is doubled for each Size category above Tiny.

Abilities:

- **Spider Climb:** The Spider can Climb on any surface that isn't slippery, without Falling or making an Ability Check.
- **Spiraculous Respiration:** The Spider cannot hold its Breath.
- **Variable Summon:** The exact kind of Spider may change statistics, such as Size, Actions, and Abilities. For example: a Diving Bell Spider would have the Hold Breath Ability (Underwater only), and a Black Widow would deal 7 (1d12) Persistent Poison with its Bite Attack.
- **Web Crafter:** The Spider can craft any Fabric Item without expending materials, though the only Fabric Item it knows how to Craft is Rope, and a Web.
A Web can occupy no more than a 15 ft. radius. Any Creature smaller than the Spider that enters its Space must make a DC 14 Acrobatics Check or be Grappled by the Web. Prone Creatures are Restrained instead.
- **Web Walker:** The Spider is unaffected when walking on a Web.

Werewolf (Base)

Werewolves are just one of many kinds of Lycanthrope, but by far the most common. They lurk in forests, deserts, tundras, and even tall mountains.

While a Werewolf on its own is rarely something to fear, the true threat is that of betrayal. For when even a mere scratch can spread the curse, there's no knowing who will turn under the moon, and who won't.

Medium Beast, Humanoid, Bruiser

HP: 7 (1d10 + 1), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(R) Physical 2

Damage Threshold: 1

Weaknesses: Silver, Control

Speed: 40 ft., **Initiative Recovery:** 3/Round

STR: 14 (+2), **DEX:** 13 (+1), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 12 (+1), **CHA:** 10 (+0)

Saving Throws: Strength

Skills & Languages: Athletics, Perception

Senses: Precise Hearing: 30 ft., Precise Smell: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +2, **(F: +1)**

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 10

- **Bite (3 Act):**

Melee Weapon (N), 5 (1d8) Piercing Damage.

- **Hit:** The Target is exposed to Lycanthropy as if it were an Affliction, with a DC of 12, increased by 5 if the Target is Bloodied by the Attack, or when the Attack is made.

- **Claw (2 Act):**

Natural Melee Weapon 4 (1d6) Slashing Damage.

- **Hit:** Same as Bite.

Abilities:

- **Shapeshifter:** The Werewolf has a Humanoid Form, a Hybrid Form, and a Beast Form. However, they cannot change their Form at will, and cannot be Summoned as a Beast while in Humanoid Form.

Wolf

Wolves are widely known animals that can be found in just about every environment that supports life. They are territorial pack hunters that are smart enough to learn and be taken in as pets.

Small Beast, Bruiser

HP: 7 (1d10 + 1), **AC:** 11

(Medium: HP: 4, AC: 13)

Vulnerabilities, Resistances & Immunities:

(R) Cold 2

Damage Threshold: 1

Weaknesses: Isolation

Speed: 60 ft., **Initiative Recovery:** 3/Round

STR: 14 (+2), **DEX:** 12 (+1), **CON:** 13 (+1)

INT: 12 (+1), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Strength

Skills & Languages: Athletics, Survival

Senses: Precise Smell: 90 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +2, **(F: +1)**

Atk (S): +3, **Dmg (S):** +0, **Spell DC:** 10

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage.

- **Hit:** If the Attack Roll exceeds the Target's Strength Score, they are knocked Prone.

- **Claw (2 Act):**

Melee Weapon (N), 3 (1d4) Slashing Damage.

Abilities:

- **Natural Hunter:** When the Wolf Hits a Creature that is Prone, the Attack is a Critical Hit.
- **Pack Tactics:** When the Wolf Attacks a Creature that is within Reach of an Ally, the Wolf has Advantage on the Attack Roll.

Celestials

Divine Guardian

Divine Guardians are the watchmen of Celestial army, watching for any signs of danger. Furthermore, they are usually assigned to people that need just a little bit of guidance in their life, often guiding and directing them towards being true and virtuous.

Medium Celestial, Spotter

HP: 6 (1d8 + 1), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(I) Poison, Poisoned, Radiant

Damage Threshold: 1

Weaknesses: Fiends, Unholy Attacks/Spells

Speed: 30 ft., **Fly (Hover):** 60 ft.

Initiative Recovery: 3/Round

STR: 8 (-1), **DEX:** 13 (+1), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 14 (+2), **CHA:** 10 (+0)

Saving Throws: Wisdom

Skills & Languages: Perception, Society, Celestial

Senses: Truesight: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** -1, **(F):** +1

Atk (S): +2, **Dmg (S):** +2, **Spell DC:** 10

- **Smite (3 Act): (M)**
Melee Spell, 4 (1d6) Radiant Damage.
- **Guard (3 Act): (M)**
Touch, grants Resistance to All, equal to Spell Healing Modifier, 1 Minute. This effect Ends at the Start of the Target's following Turn, when they lose Hit Points from taking Damage.

Abilities:

- **Guardian:** At the End of its Turn, the Divine Guardian may choose to impart Disadvantage on the next Attack Roll against one Creature of its choice within 5 feet of it.
- **Innate Spellcasting (Recharge 6): (M)** The Divine Guardian can cast one of the following Divine Spells at their lowest Tier, using Wisdom for the Attack Roll, and Spell Save DC: Bless (4 Act), Dispel Magic (4 Act)
- **Judgment:** The Divine Guardian always knows when a Creature is lying, though the nature of the lie can still be hidden.

Dream Watcher

Dream Watchers are formless Celestial beings that keep watch over the innocent, and guard them from monsters that would otherwise slay them. But this protection comes at a price.

For every monster a Dream Watcher defeats, a Dream is consumed from those they protect, until all that's left is the need to keep moving forward.

Tiny Celestial, Fey, Debuffer

HP: 5 (1d8), **AC:** 12

(Medium: **HP:** 1, **AC:** 16)

Vulnerabilities, Resistances & Immunities:

(R) Psychic 1

(I) Ethereal, Physical, Radiant, Prone

Damage Threshold: 1

Weaknesses: Creatures with a Charisma of 5 or less

Speed: 0 ft., **Fly (Hover):** 60 ft.

Initiative Recovery: 2/Round

STR: 1 (-5), **DEX:** 14 (+2), **CON:** 10 (+0)

INT: 11 (+0), **WIS:** 12 (+1), **CHA:** 15 (+2)

Saving Throws: Charisma

Skills & Languages: Perception, Religion, Celestial, Telepathy (30 ft.)

Senses: Truesight 5 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +4, **Dmg (W):** -5, (F: +2)

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 15

(Medium: **Atk (W):** +8, **Atk (S):** +6, **Damage:** 0.25x)

- **Dream Lash (2 Act, 2 Uses): (M)**
30 ft. Ranged Spell, 3 (1d4) Psychic Damage.
The Damage from this Attack is Scaled to a Creature's Size.
- **Lullaby (5 Act, 2 Uses): (M)**
DC 15 Wisdom Save, 30 ft., one Target:
 - **Critical Failure:** The Target falls Unconscious for 1 Minute, or until either they take Damage, or another Creature wakes them up with the Interact Action. Then, they suffer the effects of a Failure.
 - **Failure:** The Target is Slowed 2 for 1 Minute, or until they Succeed on the Save, which can be repeated at the End of each of its Turns.
 - **Success:** No effect.

Abilities:

- **Dream Eater: (M)** When the Dream Watcher Ends its Turn, it can choose to force one Creature within 15 feet to make a DC 15 Charisma Save:
 - **Failure:** They gain Impaired Charisma 1, and the Dream Eater restores 1 Use to any ability it has.
- **Dream Ward: (M)** All Creatures of the Dream Watcher's choice within 30 feet, benefit from its Psychic Resistance.
- **Ethereal Nature:** The Dream Watcher is always under the benefits of the Ethereal Condition, and can pass through solid objects as if they were Difficult Terrain. However, Creatures exploiting its Weakness are able to deal half Damage to it, even if they aren't Ethereal.

Spirit Animal (Base)

The origins of a Spirit Animal can vary widely from story to story, but the most common threads involve protection, guidance, and reconnecting with family. Mysterious origins aside, they are incredible guides and protectors.

Medium Celestial, Beast, Healer

HP: 5 (1d8), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(I) Poison, Poisoned, Radiant

Damage Threshold: 1

Weaknesses: Necromancy

Speed: 30 ft., **Initiative Recovery:** 3/Round

STR: 7 (-2), **DEX:** 13 (+1), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 16 (+3), **CHA:** 12 (+1)

Saving Throws: Wisdom

Skills & Languages: Medicine, Survival, Celestial, Common, Telepathy (30 ft.)

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** -2, (F: +1)

Atk (S): +2, **Dmg (S):** +3, **Spell DC:** 12

- **Mend (3 Act, Rech 6):**
Spell, Touch, one Bloodied Creature, 4 (1d6) Healing. This cannot restore Hit Points that would end the Bloodied Condition.
- **Share Burden (5 Act, 1/Long Rest): (M)**
Touch, One Creature: The Spirit Animal chooses one Affliction, Condition, or Persistent Damage Type that the Target is suffering. For 24 Hours or until it ends, the effect applies to the Spirit Animal, instead of the Target.

Abilities:

- **Ethereal:** The Spirit Animal is under the Ethereal Condition, which doesn't affect the Mend or Share Burden Actions.
- **Guardian:** At the End of its Turn, the Spirit Animal may choose to impart Disadvantage on the next Attack Roll against one Creature of its choice, that is within 5 feet.

Young Unicorn

Unicorns are somewhat dissimilar to other Celestials. Instead of watching over Humanoid or Sentient Races, they oversee the health and balance of nature, acting almost like druids, as they cultivate sacred groves.

Medium Beast, Celestial, Fey, Healer

HP: 6 (1d8 + 1), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(V) Necrotic 2

(R) Poison 1

(I) Radiant

Damage Threshold: 1

Weaknesses: Being separated from a Druidic Grove

Speed: 40 ft., **Initiative Recovery:** 3/Round

STR: 13 (+1), **DEX:** 10 (+0), **CON:** 13 (+1)

INT: 10 (+0), **WIS:** 15 (+2), **CHA:** 12 (+1)

Saving Throws: Wisdom

Skills & Languages: Perception, Survival, Celestial, Telepathy (60 ft.)

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +1, (F: +0)

Atk (S): +2, **Dmg (S):** +2, **Spell DC:** 12

- **Hoof (2 Act):**
Melee Weapon (N), 3 (1d4) Bludgeoning Damage. Deals Double Damage against Prone Creatures.
- **Horn (3 Act):**
Melee Weapon (N), 4 (1d6) Piercing Damage. Has the Move Trait.

Abilities:

- **Innate Spellcasting (Recharge 6): (M)** The Unicorn can cast any of these Divine and Primal Spells at their lowest Tier, using Wisdom for any Spell Attack Roll, and Spell Save DCs: Cure Wounds (4 Act), Summon Beast (10 Act), Misty Step (2 Act).
- **Nature's Return: (M)** The Unicorn can treat any living Plants within its reach (not Monsters) as adjacent to any space within the last Sacred Grove it visited (or the one it is currently in). This benefit only applies to Movement, and has the Teleport Trait.
- **Powerful Build:** The Unicorn's Carrying Capacity is Doubled.

Unicorn

Large Beast, Celestial, Fey, Healer

HP: 33 (5d8 + 10), **AC:** 10

(Medium: HP: 66, AC: 8)

Vulnerabilities, Resistances & Immunities:

(V) Necrotic 3

(R) Poison 5

(I) Radiant

Damage Threshold: 1

Weaknesses: Being separated from a Druidic Grove

Speed: 40 ft., **Initiative Recovery:** 5/Round

STR: 14 (+2), **DEX:** 10 (+0), **CON:** 15 (+2)

INT: 10 (+0), **WIS:** 17 (+3), **CHA:** 13 (+1)

Saving Throws: Wisdom

Skills & Languages: Perception, Survival, Celestial, Telepathy (60 ft.)

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +3, **Dmg (W):** +2, **(F: +0)**

Atk (S): +3, **Dmg (S):** +3, **Spell DC:** 13

(Medium: Atk (W): +1, Atk (S): +1, Damage: 2x)

- **Hoof (2 Act):**

Melee Weapon (N), 3 (1d4) Bludgeoning Damage. Deals Double Damage against Prone Creatures.

- **Horn (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage. Has the Move Trait.

Abilities:

- **Innate Spellcasting (Recharge 5-6): (M)**

The Unicorn can cast any of these Divine and Primal Spells at their lowest Tier, using Wisdom for any Spell Attack Roll, and Spell Save DCs: Cure Wounds (4 Act), Summon Beast (10 Act), Misty Step (2 Act), Zone of Truth (1 Min).

- **Nature's Return: (M)** The Unicorn can treat any living Plants within its reach (not Monsters) as adjacent to any space within the last Sacred Grove it visited (or the one it is currently in). This benefit only applies to Movement, and has the Teleport Trait.

- **Powerful Build:** The Unicorn's Carrying Capacity is Doubled.

Constructs

Brain in a Jar

The Brain in a Jar is a common, but fundamental defense system that many early necromancers use to deter would-be intruders and bandits from their home.

However, the creation of these jars is often incredibly taxing, and is known to leave their earlier creators highly vulnerable while recovering.

Crafting: 1 Medium Humanoid that has been dead for no more than 24 Hours, 1 jar, 10 GP of Essence, DC 12 Occultism, 1 Hour. Inflicts Drained 5 when Crafted.

Tiny Construct, Spellcaster

HP: 4 (1d6), **AC:** 5

(Medium: **HP:** 1, **AC:** 9)

Vulnerabilities, Resistances & Immunities:

(R) Cold 2, Fire 2, Psychic 2

(I) Acid, Restrained, Prone, Poison, Poisoned

Damage Threshold: 1

Weaknesses: Anti-Magic

Speed: 0 ft., **Initiative Recovery:** 5/Round

STR: 1 (-5), **DEX:** 1 (-5), **CON:** 10 (+0)

INT: 16 (+3), **WIS:** 14 (+2), **CHA:** 11 (+0)

Saving Throws: Intelligence

Skills & Languages: Arcana, Occultism, Society, All Languages known by the Creator, Telepathy (30 ft.)

Senses: Blind, Precise Tremorsense: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): -3, **Dmg (W):** -5, **(F):** -5)

Atk (S): +5, **Dmg (S):** +2, **Spell DC:** 11

(Medium: **Atk (W):** +1, **Atk (S):** +9, **Damage:** 1x)

- **Arcane Shove (3 Act):**

Spell, DC 11 Strength Save:

- **Critical Failure:** Double Distance.
- **Failure:** The Target is Pushed 10 feet.
- **Success:** Half Distance per Size. Category (minimum of 0 ft.)
- **Critical Success:** No effect

- **Command Undead (3 Act): (M)**

30 ft. Range, 1 Minute, control Mindless Undead.

- **Minor Illusion (2 Act): (M)**

30 ft. Range, 5 ft. Cube, cover the area with a Visible, Auditory or Tactile illusion.

- **Psychic Shock (3 Act): (M)**

DC 16 Intelligence Save, 30 ft., One Target:

- **Critical Failure:** Same as Failure, but they become Stunned 3.
- **Failure:** The Target takes 5 (1d8) Psychic Damage, and the Brain in a Jar regains the one Spell Slot.
- **Success:** No effect.

Abilities:

- **Autonomous Nature:** The Brain in a Jar doesn't need to eat, drink, sleep or breathe.
- **Divination Sight:** The Brain in a Jar cannot detect Creatures that are protected from Divination Magic.
- **Fatal Weakness:** When subjected to its Weakness, the Brain in a Jar dies instantly.
- **Powerful Blows:** The Brain in a Jar inflicts Damage as if it were a Medium Creature.
- **Spellcasting (2 Slots/Long Rest): (M)** The Brain in a Jar can cast one of the following Arcane Spells: Alarm (10 min), Dispel Magic (4 Act), Magic Missile (4 Act), Summon Undead (10 Act).
- **Tireless:** The Brain in a Jar regains 5 Action Points, instead of its usual recovery. This value cannot be changed.
- **Versatile Spellcasting:** The Crafter of the Brain in a Jar can replace any of the Prepared Spells or Cantrips upon Creation, provided they have access to the Spell they wish to add, and the Spell is Arcane.

Dancing Blade

While training an army to fight on your behalf is an option, enchanting a hall of Weapons and Armor to do the same thing is sometimes cheaper, and more fun!

Potential nightmares aside, Dancing Blades are often used to ensure a degree of protection, should some cataclysm prevent soldiers from fighting. They also make for great decorations.

Crafting: Any Melee Weapon, 50 GP of Essence, 8 Hours, DC 15 Arcana.

Variants for Dancing Blade

Different Weapon

If the Dancing Blade isn't a Shortsword, use the statistics from that Weapon where applicable. This also applies to enchanted Weapons, which can activate their own Enchantments.

A Weapon with the Unbreakable Enchantment has Persistent Healing equal to its Level, which cannot be reduced, and it cannot die unless subjected to its Weakness.

It can also take the form of other objects, though they may need other means to Act.

Small Construct, Skirmisher

HP: 6 (1d8 + 1), **AC:** 13

(Medium: **HP:** 3, **AC:** 15)

Vulnerabilities, Resistances & Immunities:

(R) Fire 2, Physical 2

(I) Charmed, Cold, Exhaustion, Frightened, Impaired, Lightning, Poison, Poisoned, Prone, Psychic, Slowed, Stunned

Damage Threshold: 1

Weaknesses: Anti-Magic, Adamantine Weapons

Speed: 0 ft., **Fly (Hover):** 20 ft.

Initiative Recovery: 5/Round

STR: 13 (+1), **DEX:** 16 (+3), **CON:** 12 (+1)

INT: 1 (-5), **WIS:** 10 (+0), **CHA:** 1 (-5)

Saving Throws: Dexterity

Skills & Languages: Acrobatics, Understands one Language spoken by its creator, but cannot speak.

Senses: Blind, Precise Hearing: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +5, **Dmg (W):** +1, **(F):** +3)

Atk (S): -3, **Dmg (S):** +0, **Spell DC:** 1

(Medium: **Atk (W):** +7, **Atk (S):** -1, **Damage:** 1x)

- **Slash (3 Act):**

Natural Melee Weapon (F), 4 (1d6) Slashing Damage. This Attack is considered as if it were from a Medium Creature.

Abilities:

- **Autonomous Nature:** The Dancing Blade doesn't need to eat, drink, sleep or breathe.
- **Crippling Weakness:** When subjected to Anti-Magic, the Dancing Blade becomes Incapacitated until either the End of its next Turn, or the effect ends.
- **Divination Sight:** The Dancing Blade cannot detect Creatures that are protected from Divination Magic.
- **Mindless:** The Dancing Blade is Immune to all Emotion effects, and automatically Fails all Saving Throws with the Mental Trait.
- **Powerful Blows:** The Dancing Blade inflicts Damage as if it were a Medium Creature.
- **Tireless:** The Dancing Blade regains 5 Action Points, instead of its usual recovery. This value cannot be changed.

Lesser Arcane Effigy

The Arcane Effigy is often used as a Stand-In for a Creature when trying to perform lengthy Rituals or Spells, and sometimes also to avoid the loss of sentient life. But even with these altruistic applications, they are heavily abused for... less than ethical reasons.

Crafting: 25 GP of Essence * 10 for each Size category above Medium (increases Effigy Size too), 1 Elemental Core, 24 Hours, DC 13 Occultism.

Medium Construct, Tank

HP: 10 (1d12 + 3), **AC:** 7

Vulnerabilities, Resistances & Immunities:

(I) Charmed, Frightened, Necrotic, Poison, Poisoned, Slowed

Damage Threshold: 1

Weaknesses: Anti-Magic

Speed: 15 ft., **Initiative Recovery:** 6/Round

STR: 15 (+2), **DEX:** 5 (-3), **CON:** 16 (+3)

INT: 1 (-5), **WIS:** 8 (-1), **CHA:** 13 (+1)

Saving Throws: Constitution

Skills & Languages: Athletics, All Languages known by the Life Linked Creature

Proficiency Bonus: +2

Actions: Max 2

Atk (W): -1, **Dmg (W):** +2, **(F):** -3)

Atk (S): -3, **Dmg (S):** -1, **Spell DC:** 13

- **Torture (2 Act): (M)**
Self, 4 (1d6) Force Damage. This Damage cannot reduce the Arcane Effigy to less than 1 Hit Point.

Abilities:

- **Autonomous Nature:** The Arcane Effigy doesn't need to eat, drink, sleep or breathe.
- **Blood Bond: (M)** When either the Arcane Effigy or the Life Linked Creature gains or loses Hit Points (including Temporary Hit Points), the other takes an equal amount as Force Damage, which cannot be reduced by any means, but also cannot reduce them to 0 Hit Points. Additionally, both the Arcane Effigy and the Life Linked Creature know the other's location, barring protection from Divination magic.
- **Crippling Weakness:** When subjected to its Weakness, the Arcane Effigy is Incapacitated until either the End of its next Turn, or the effect Ends. While Incapacitated in this way, it cannot benefit from Life Link, Blood Bond, or Scape Goat.
- **Life Link: (M)** After the Arcane Effigy is created, a Creature can apply a Blood Sample from any Creature to the Effigy, forcing the Creature to make a DC 13 Charisma Save (Replaces pre-existing Life Links):
 - **Failure:** The Target becomes Drained 8, and is Life Linked to the Effigy.
 - **Success:** The Target cannot be Life Linked to this Effigy.
 - **Critical Success:** The Creature applying the Blood Sample is Life Linked instead.
- **Mindless:** The Arcane Effigy is Immune to all Emotion effects, and automatically fails all Saving Throws with the Mental Trait.
- **Scape Goat: (M)** Any effect that would require the death of the Life Linked Creature can instead sacrifice the Arcane Effigy for the same effects, inflicting Drained equal to the Life Linked Creature's Hit Point Maximum, though they cannot die to the Drained Condition in this way. *Note: Some more powerful or specific effects may not accept this proxy sacrifice.*
- **Tireless:** The Arcane Effigy cannot have its Action Recovery reduced.

Straw Golem

Straw Golems are the simplest Golems to build, and are usually only designed by early practitioners. However, being swift and inexpensive makes them rather useful, as long as you don't assign it to the cattle.

Crafting: 10 lbs of Straw, 10 GP of Essence, 50 feet of Rope, 4 Hours, DC 10 Arcana.

Medium Construct, Skirmisher

HP: 4 (1d8 - 1), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(V) Fire 2, Lightning 2

(R), Bludgeoning 1, Cold 2, Thunder 1

(I) Charmed, Drained, Exhaustion, Frightened, Impaired, Necrotic, Piercing, Poison, Poisoned, Psychic, Slowed

Damage Threshold: 1

Weaknesses: Anti-Magic, Fire

Speed: 40 ft., **Initiative Recovery:** 5/Round

STR: 8 (-1), **DEX:** 13 (+1), **CON:** 8 (-1)

INT: 4 (-3), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Acrobatics, Understands all Languages spoken by its creator, but cannot speak.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** -1, **(F):** +1)

Atk (S): -1, **Dmg (S):** +0, **Spell DC:** 10

- **Extend (2 Act):**

The Straw Golem provides up to 25 feet of Rope, which it can control like a limb.

Abilities:

- **Autonomous Nature:** The Straw Golem doesn't need to Eat, Drink, Sleep, or Breathe.
- **Crippling Weakness:** When subjected to Anti-Magic, the Straw Golem is Incapacitated until either the End of its next Turn, or the effect Ends.
- **Mindless:** The Straw Golem is Immune to all Emotion effects, and automatically fails all Saving Throws with the Mental Trait.
- **Soft Landing:** Any Creature landing on the Straw Golem only take half Damage from falling.
- **Tireless:** The Straw Golem regains 5 Action Points, instead of its usual Recovery. This value cannot be changed.

Clay Golem

Clay Golems are stronger and tougher than their straw counterparts, but also much trickier to create in the first place. But despite its lack of dexterity, it is much more capable for most purposes.

Crafting: 200 lbs of Clay and Dirt, 100 GP of Essence, 12 Hours, DC 16 Arcana.

Medium Construct, Tank

HP: 48 (5d12 + 15), **AC:** 9

Vulnerabilities, Resistances & Immunities:

(R) Cold 5, Fire 3, Physical 5

(I) Acid, Charmed, Drained, Exhaustion, Frightened, Impaired, Necrotic, Piercing, Poison, Poisoned, Psychic, Slowed

Damage Threshold: 5

Weaknesses: Anti-Magic, Adamantine Weapons

Speed: 30 ft., **Initiative Recovery:** 6/Round

STR: 13 (+1), **DEX:** 8 (-1), **CON:** 16 (+3)

INT: 4 (-3), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Constitution

Skills & Languages: Athletics, Understands all Languages spoken by its creator, but cannot speak.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +2, **Dmg (W):** +1, **(F):** -1)

Atk (S): -1, **Dmg (S):** +0, **Spell DC:** 10

- **Unarmed Strike (2 Act):**

Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Autonomous Nature:** The Clay Golem doesn't need to Eat, Drink, Sleep, or Breathe.
- **Crippling Weakness:** When subjected to Anti-Magic, the Clay Golem is Incapacitated until either the End of its next Turn, or the effect Ends.
- **Mindless:** The Clay Golem is Immune to all Emotion effects, and automatically fails all Saving Throws with the Mental Trait.
- **Tireless:** The Clay Golem cannot have its Action Recovery Reduced.

Dragons

Young Basilisk

The Basilisk is known for its lethal stare to anyone that locks eyes with it, and the statues they leave behind. At least those poor souls won the staring contest.

Small Dragon, Tank

HP: 9 (1d12 + 2), **AC:** 10

(Medium: HP: 5, AC: 12)

Vulnerabilities, Resistances & Immunities:

(R) Force 2, Physical 2

Damage Threshold: 1

Weaknesses: Blindness

Speed: 30 ft., **Initiative Recovery:** 4/Round

STR: 13 (+1), **DEX:** 10 (+0), **CON:** 15 (+2)

INT: 10 (+0), **WIS:** 12 (+1), **CHA:** 10 (+0)

Saving Throws: Constitution

Skills & Languages: Athletics, Perception

Senses: Darkvision: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +1, **(F: +0)**

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 10

(Medium: Atk (W): +4, Atk (S): +4, Damage: 0.5x)

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage.

- **Stare (2 Act, Rech 6): (M)**

DC 15 Constitution Save, 60 ft., One Target that isn't Blind:

- **Critical Failure:** The Target succumbs to the Petrified Affliction.
- **Failure:** The Target is Restrained, and repeats the Save at the End of their next Turn. If they fail again, they succumb to the Petrification Affliction (pg. 338).
- **Success:** No effect. If they were Restrained by a Failure, they remain so until they finish a Long Rest.
- **Critical Success:** Same as Success, but they end the Restrained Condition.

Abilities:

- **Petrification Immunity:** The Basilisk is Immune to the Petrification Affliction.
- **Crippling Weakness:** The Basilisk cannot use its Stare Action while subjected to its Weakness.

Basilisk

Medium Dragon, Tank

HP: 48 (5d12 + 15), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(R) Force 3, Physical 3

Damage Threshold: 5

Weaknesses: Blindness

Speed: 30 ft., **Initiative Recovery:** 6/Round

STR: 14 (+2), **DEX:** 10 (+0), **CON:** 17 (+3)

INT: 10 (+0), **WIS:** 12 (+1), **CHA:** 10 (+0)

Saving Throws: Constitution

Skills & Languages: Athletics, Perception

Senses: Darkvision: 60 ft.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +3, **Dmg (W):** +2, +0 (F)

Atk (S): +3, **Dmg (S):** +1, **Spell DC:** 10

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage.

- **Stare (2 Act, Rech 5-6): (M)**

DC 17 Constitution Save, 60 ft., One Target that isn't Blind:

- **Critical Failure:** The Target succumbs to the Petrified Affliction.
- **Failure:** The Target is Restrained, and repeats the Save at the End of their next Turn. If they fail again, they succumb to the Petrification Affliction (pg. 338).
- **Success:** No effect. If they were Restrained by a Failure, they remain so until they finish a Long Rest.
- **Critical Success:** Same as Success, but they end the Restrained Condition.

Abilities:

- **Petrification Immunity:** The Basilisk is Immune to the Petrification Affliction.
- **Crippling Weakness:** The Basilisk cannot use its Stare Action while subjected to its Weakness.

Red Dragon Wyrmling

You know them, you love them, and in a game all about them, you'd think they'd be the most awesome thing since the Druid found a Shotgun.

They come in three kinds: Chromatic, Metallic, and Vitreous. But for Red Dragons, they make their homes in mountains, and have a fondness for treasures of Precious Metal and Gemstone. They're also the only color in this book (again, this is already a huge book).

Small Dragon, Bruiser

HP: 7 (1d10 + 1), **AC:** 10

(*Medium:* **HP:** 4, **AC:** 12)

Vulnerabilities, Resistances & Immunities:

(I) Fire

Damage Threshold: 1

Weaknesses: Dwarven or Draconic Weapons

Speed: 25 ft., **Burrow:** 10 ft., **Climb:** 15 ft.

Initiative Recovery: 2/Round

STR: 13 (+1), **DEX:** 10 (+0), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 11 (+0)

Saving Throws: Strength

Skills & Languages: Intimidation, Draconic

Senses: Darkvision 30 ft., Precise Scent (Precise): 5 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +1, **(F: +0)**

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 11

(*Medium:* **Atk (W):** +4, **Atk (S):** +4, **Damage:** 0.5x)

- **Claw (2 Act):**
Melee Weapon (N), 3 (1d4) Slashing Damage.
 - **Hit:** The Target is knocked Prone if their Strength is less than 13.
- **Bite (3 Act):**
Natural Melee Weapon 4 (1d6) Piercing + 2 Persistent Fire Damage.
- **Enchant (Free, 1/Long Rest): (M)**
The Dragon applies any Common Enchantment to one Metal Item it touches, or converts a Metal Item to a Magical Version of the same Rarity.
- **Fire Breath (5 Act, Rech 6):**
DC 12 Dexterity Save, 10 ft. Cone:
 - **Critical Failure:** Same as Failure, but they take the Damage as Persistent Fire Damage.
 - **Failure:** They take 7 (2d6) Fire Damage.
 - **Success:** Half Damage.
 - **Critical Success:** No effect.

Abilities:

- **Consume Magic Item: (M)** Over the course of 1 Minute, the Dragon destroys any Magical Item that isn't Consumable, and gains the benefits as if they were Attuned to that Item, until they finish a Long Rest.
- **Flutter:** The Dragon doesn't take Fall Damage if it takes the Move Action at least once before the End of its Turn.
- **Innate Spellcasting (Recharge 6): (M)** The Dragon can cast any of following Arcane Spells at their lowest Tier, using Charisma for the Spell Save DC: Fear (4 Act), Fire Blast (3 Act)
- **Magic Resistance:** The Dragon has Advantage on Saving Throws against Magical effects.
- **Stone Digger:** Over the course of 1 Minute, a Dragon can dig a space of the same Size as them in materials akin to solid stone, as if their Claw Attack was a Pickaxe.

Young Red Dragon

Medium Dragon, Bruiser

HP: 38 (5d10 + 10), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(I) Fire

Damage Threshold: 5

Weaknesses: Dwarven or Draconic Weapons

Speed: 30 ft., **Burrow:** 20 ft., **Fly:** 60 ft., **Climb:** 30 ft.

Initiative Recovery: 4/Round

- **Bite (3 Act):**

Natural Melee Weapon 4 (1d6) Piercing + 3 Persistent Fire Damage.

- **Enchant (Free, 2/Long Rest): (M)**

The Dragon applies any Common Enchantment to one Metal Item it touches, or converts a Metal Item to a Magical Version.

- The Dragon can upgrade a Common Item to an Uncommon for 2 uses.

- **Fire Breath (5 Act, Rech 5-6):**

DC 14 Dexterity Save, 15 ft. Cone:

- **Critical Failure:** Same as Failure, but they take the Damage as Persistent Fire Damage.
- **Failure:** They take 11 (3d6) Fire Damage.
- **Success:** Half Damage.
- **Critical Success:** No effect.

Abilities:

- **Consume Magic Item: (M)** Over the course of 1 Minute, the Dragon destroys any Magical Item that isn't a Magical Item, and gains the benefits as if they were Attuned to that Item, until they finish a Long Rest.
- **Innate Spellcasting (Recharge 5-6): (M)** The Dragon can cast any of following Arcane Spells at their lowest Tier, using Charisma for the Spell Save DC: Command (2 Act) Fear (4 Act), Fire Blast (3 Act).
- **Magic Resistance:** The Dragon has Advantage on Saving Throws against Magical effects.
- **Stone Digger:** Over the course of 1 Minute, a Dragon can dig a space of the same Size as them in materials akin to solid stone, as if their Claw Attack was a Pickaxe.

Young Red Drake

Drakes are the smaller wingless cousins to Dragons, and are often used as guard dogs when hounds just won't do.

Like in a volcano. Some Drakes may manifest a breath Weapon, but all of them have an elemental bite to their attacks.

Small Dragon, Beast, Skirmisher

HP: 5 (1d8), **AC:** 11

(Medium: HP: 3, AC: 13)

Vulnerabilities, Resistances & Immunities:

(I) Fire

Damage Threshold: 1

STR: 13 (+1), **DEX:** 12 (+1), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Athletics

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +1, **(F):** +1)

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 10

(Medium: Atk (W): +5, Atk (S): +4, Damage: 0.5x)

- **Bite (3 Act):**
Melee Weapon (N), 4 (1d6) Piercing Damage, + 2 Persistent Fire Damage.
- **Claw (2 Act):**
Melee Weapon (N), 3 (1d4) Slashing Damage.

Abilities:

- **Loyal:** The Drake cannot be forced to harm its allies by any means. If it willingly reduces an ally to 0 Hit Points, the ally is instantly Stabilized.

Red Drake

Medium Dragon, Beast, Skirmisher

HP: 23 (5d8), **AC:** 12

Vulnerabilities, Resistances & Immunities:

(I) Fire

Damage Threshold: 5

Weaknesses: Draconic Weapons

Speed: 40 ft., **Initiative Recovery:** 2/Round

STR: 14 (+2), **DEX:** 15 (+2), **CON:** 11 (+0)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Athletics, Perception

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +5, **Dmg (W):** +2, **(F):** +2)

Atk (S): +4, **Dmg (S):** +0, **Spell DC:** 10

- **Bite (3 Act):**
Melee Weapon (N), 4 (1d6) Piercing Damage, + 3 Persistent Fire Damage.
- **Claw (2 Act):**
Melee Weapon (N), 3 (1d4) Slashing Damage.

Abilities:

- **Loyal:** The Drake cannot be forced to harm its allies by any means. If it willingly reduces an ally to 0 Hit Points, the ally is instantly Stabilized.

Kobold

Commonly known as the loyal and clever minions of Dragons everywhere, Kobolds (of the Non-fluffy variety) serve as keepers, workers and servants where employed, and use second-hand or improvised measures to keep intruders at bay.

Small Dragon, Humanoid, Trapper

HP: 4 (1d6), **AC:** 11

(Medium: HP: 2, AC: 13)

Vulnerabilities, Resistances & Immunities:

(R) Acid 2, Cold 2, Fire 2, Lightning 2, Poison 2

Damage Threshold: 1

Weaknesses: Gnome Weapons

Speed: 25 ft., **Initiative Recovery:** 3/Round

STR: 9 (-1), **DEX:** 13 (+1), **CON:** 11 (+0)

INT: 16 (+3), **WIS:** 10 (+0), **CHA:** 8 (-1)

Saving Throws: Intelligence

Skills & Languages: Perception, Performance, Survival, Stealth, Thievery, Draconic

Senses: Darkvision: 60 ft., Bright Light Sensitivity (Sight)

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** -1, **(F):** +1)

Atk (S): +5, **Dmg (S):** +0, **Spell DC:** 8

(Medium: Atk (W): +5, Atk (S): +7, Damage: 0.5x)

- **Claw (2 Act):**
Melee Weapon (N), 3 (1d4) Slashing Damage.
- **Bite (3 Act):**
Melee Weapon (N), 4 (1d6) Piercing Damage + 2 Persistent Bleed.
- **Quick Trap (5 Act):**
The Kobold selects any 5 ft. space within Reach. The next Creature to enter the space triggers it, forcing all Creatures within 10 feet of it to make a DC 16 Dexterity Save:
 - **Critical Failure:** Double Damage.
 - **Failure:** They take 1d6 Bludgeoning Damage (ignores Size), or are subjected to the effects of any Item the Kobold has.
 - **Success:** Half Damage.
 - **Critical Success:** No effect.

Abilities:

- **Pack Tactics:** Whenever the Kobold Attacks a Creature that is within Reach of an Ally, the Attack is made at Advantage.
- **Trap Master:** When a Trap Misses the Kobold, it instead Targets a different Creature within Range. Additionally, the Kobold has Advantage on Saving Throws against all Traps.
- **Tunnel Dweller:** The Kobold cannot be reduced to 1 Hit Point by falling Terrain. Additionally, it can use its Claws like a Pickaxe to dig through Stone over the course of 1 Hour.

Young Fire Wyvern

Behold, a Man!

The featherless bipeds known as Wyverns bear barbed tails with a nasty venom, and come in colors that don't correspond to their element at all, seemingly to confuse every arcana-biologist.

Medium Dragon, Skirmisher

HP: 6 (1d8 + 1), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(R) Fire: 2

Damage Threshold: 1

Weaknesses: Draconic Weapons/Spells

Speed: 10 ft, **Initiative Recovery:** 2/Round

STR: 10 (+0), **DEX:** 13 (+1), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 12 (+1), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Perception

Senses: Precise Smell: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +0, **(F: +1)**

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 10

- **Bite (3 Act):**
Melee Weapon (N), 4 (1d6) Piercing Damage.
- **Stinger (2 Act):**
Natural Melee Weapon (F), 3 (1d4) Piercing Damage.
 - **Hit:** The Target must make a DC 12 Constitution Save:
 - **Critical Failure:** Double Damage.
 - **Failure:** They take 3 (1d4) Persistent Poison Damage.
 - **Success:** No effect.

Abilities:

- **Carrion Eater:** The Wyvern has Advantage on Saving Throws against Ingested Poisons, and is immune to Afflictions caused by eating rotten or infected food.
- **Flutter:** The Wyvern doesn't take Fall Damage if it takes the Move Action at least once before the End of its Turn.

Fire Wyvern

Large Dragon, Skirmisher

HP: 28 (5d8 + 5), **AC:** 12

(Medium: HP: 56, AC: 10)

Vulnerabilities, Resistances & Immunities:

(R) Fire: 3

Damage Threshold: 5

Weaknesses: Draconic Weapons/Spells

Speed: 15 ft., **Fly:** 60 ft.

Initiative Recovery: 3/Round

STR: 10 (+0), **DEX:** 15 (+2), **CON:** 13 (+1)

INT: 10 (+0), **WIS:** 12 (+1), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Perception, Draconic (cannot speak)

Senses: Precise Smell: 60 ft.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +5, **Dmg (W):** +0, **(F: +2)**

Atk (S): +3, **Dmg (S):** +1, **Spell DC:** 10

(Medium: Atk (W): +3, Atk (S): +1, Damage: x2)

- **Bite (3 Act):**
Melee Weapon (N), 4 (1d6) Piercing Damage.
- **Stinger (2 Act):**
Natural Melee Weapon (F), 3 (1d4) Piercing Damage.
 - **Hit:** The Target must make a DC 13 Constitution Save:
 - **Critical Failure:** Double Damage.
 - **Failure:** They take 3 (1d4) Persistent Poison Damage.
 - **Success:** No effect.

Abilities:

- **Carrion Eater:** The Wyvern has Advantage on Saving Throws against Ingested Poisons, and Diseases.

Elementals

Lesser Air Elemental

Air Elementals are known to stem from the Elemental Plane of Air, where winds and gales are ever shifting, and she who smelt it, may never have dealt it. But much like the winds of the Air Plane, an Air Elemental is well known for constant change, and will not be stopped.

Variants for Air Elementals

Blended Elemental

Of course you can do this with any other pair of Creatures, but an exceptionally cool idea is to blend the properties of two or more Elementals, as if one was a Base Statblock. Example: Combine Air and Water for a Storm Elemental.

Small Elemental, Bruiser

HP: 6 (1d10), **AC:** 12

(Medium: HP: 3, AC: 14)

Vulnerabilities, Resistances & Immunities:

(I) Acid, Grappled, Physical, Restrained

Damage Threshold: 1

Weaknesses: Airtight Containment, Wind effects, Being Slowed

Speed: 0 ft., **Fly (Hover):** 40 ft.

Initiative Recovery: 2/Round

STR: 15 (+2), **DEX:** 14 (+2), **CON:** 10 (+0)

INT: 8 (-1), **WIS:** 10 (+0), **CHA:** 8 (-1)

Saving Throws: Dexterity

Skills & Languages: Acrobatics, Zephyrus

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +4, **Dmg (W):** +2, **(F: +2)**

Atk (S): +1, **Dmg (S):** +0, **Spell DC:** 8

(Medium: Atk (W): +6, Atk (S): +3, Damage: 0.5x)

- **Wind Blast (3 Act):**

30/60 ft. Ranged Natural Weapon, 4 (1d6) Bludgeoning Damage.

- **Gale (10 Act):**

5 ft. Radius, All Creatures in Radius, DC 15 Strength Save:

- **Critical Failure:** Same as Failure, but also knocked Prone.
- **Failure:** The Target is pushed up to 15 Feet in any direction, and takes 7 (2d6) Bludgeoning Damage.
- **Success:** The Target is pushed up to 5 Feet, and takes no Damage.
- **Critical Success:** The Target can immediately Move to any point in the Radius, or remain still.

Abilities:

- **Wind Form:** When not moving, the Elemental is Invisible, unless a visible gas such as smoke or light debris such as sand passes through it.
- **Fluid Form:** The Elemental can pass through any crack or material that would permit gas to pass through. Additionally, the Elemental can enter and occupy the same space as any other Creature that doesn't have Fluid Form.

Air Elemental

Medium Elemental, Bruiser

HP: 28 (5d10), **AC:** 13

Vulnerabilities, Resistances & Immunities:

(I) Acid, Grappled, Physical, Restrained

Damage Threshold: 5

Weaknesses: Being Contained, Wind effects, Being Slowed

Speed: 0 ft., **Fly (Hover):** 60 ft.

Initiative Recovery: 4/Round

STR: 18 (+4), **DEX:** 17 (+3), **CON:** 10 (+0)

INT: 8 (-1), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Acrobatics, Zephyrus

Proficiency Bonus: +3

Actions: Max 2

Atk (W): +6, **Dmg (W):** +4, **(F: +3)**

Atk (S): +1, **Dmg (S):** +0, **Spell DC:** 10

- **Wind Blast (3 Act):**
60/120 ft. Ranged Natural Weapon, 4 (1d6) Bludgeoning Damage.
- **Gale (10 Act):**
10 ft. Radius, All Creatures in Radius, DC 18
Strength Save:
 - **Critical Failure:** Same as Failure, but also knocked Prone.
 - **Failure:** The Target is pushed up to 30 Feet in any direction, and takes 10 (3d6) Bludgeoning Damage.
 - **Success:** The Target is pushed up to 5 Feet, and takes no Damage.
 - **Critical Success:** The Target can immediately Move to any point in the Radius, or remain still.

Abilities:

- **Wind Form:** When not moving, the Elemental is Invisible, unless a visible gas such as smoke or light debris such as sand passes through it.
- **Fluid Form:** The Elemental can pass through any crack or material that would permit gas to pass through. Additionally, the Elemental can enter and occupy the same space as any other Creature that doesn't have Fluid Form.

Lesser Arcane Elemental

Arcane Elementals hail from the Plane of Chaos, where matter shifts and changes constantly, and rules tend to be whatever you want them to be. Arcane Elementals are known to be surrounded by a shifting aura of magic that they shape and unleash with seemingly no rhyme or reason.

Variants for Arcane Elementals

Blended Elemental

Of course you can do this with any other pair of Creatures, but an exceptionally cool idea is to blend the properties of two or more Elementals, as if one was a Base Statblock. Example: Combine Arcane and Fire for an Inferno Elemental.

Small Elemental, Spellcaster

HP: 5 (1d6 + 1), **AC:** 10

(Medium: **HP:** 3, **AC:** 12)

Vulnerabilities, Resistances & Immunities:

(V) Force 2

(I) Acid, Cold, Fire, Lightning, Necrotic, Poison, Radiant

Damage Threshold: 1

Weaknesses: Anti-Magic

Speed: 20 ft., **Initiative Recovery:** 3/Round

STR: 10 (+0) **DEX:** 10 (+0), **CON:** 13 (+1)

INT: 14 (+2), **WIS:** 12 (+1), **CHA:** 11 (+0)

Saving Throws: Intelligence

Skills & Languages: Arcana, Perception, Society, Primordial

Senses: Truesight: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +0, **(F: +0)**

Atk (S): +4, **Dmg (S):** +1, **Spell DC:** 11

(Medium: **Atk (W):** +4, **Atk (S):** +6, **Damage:** 0.5x)

- **Chaotic Strike (2 Act):**

20/60 ft. Ranged Spell, 4 (1d6) Damage. The Damage Type is determined using an another d6:

d6	Result
1	Acid
2	Cold
3	Fire
4	Force
5	Lightning
6	Poison

- **Primordial Casting (5 Act, Rech 6):** The Elemental picks one of the Spells it has Prepared at random and casts it at its lowest Tier, ignoring Actions and Components.

Abilities:

- **Arcane Channel:** When affected by a Tiered Arcane Spell, the Elemental regains a use of its Primordial Casting.
- **Fatal Weakness:** When subjected to Anti-Magic, the Arcane Elemental dies.
- **Spellcasting:** The Elemental cannot cast Spells normally, but has access to the following Arcane Spells: Apathy, Barrier, Dispel Magic, Guard, Magic Missile.

Arcane Elemental

Medium Elemental, Spellcaster

HP: 28 (5d6 + 10), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(V) Force 3

(I) Acid, Cold, Fire, Lightning, Necrotic, Poison, Radiant

Damage Threshold: 5

Weaknesses: Anti-Magic

Atk (S): +6, **Dmg (S):** +1, **Spell DC:** 12

- **Chaotic Strike (2 Act): (M)**

40/120 ft. Ranged Spell, 4 (1d6) Damage. The Damage Type is determined using another d6:

d6	Result
1	Acid
2	Cold
3	Fire
4	Force
5	Lightning
6	Poison

- **Primordial Casting (5 Act, Rech 5-6): (M)**

The Elemental picks one of the Spells it has Prepared at random and casts it at its lowest Tier, ignoring Actions and Components.

Abilities:

- **Arcane Channel:** When affected by a Tiered Arcane Spell, the Elemental regains a use of its Primordial Casting.
- **Fatal Weakness:** When subjected to Anti-Magic, the Arcane Elemental dies.
- **Spellcasting: (M)** The Elemental cannot cast Spells normally, but has access to the following Arcane Spells: Apathy, Ball of Chaos, Barrier, Dispel Magic, Guard, Haste, Magic Missile.

Lesser Earth Elemental

Earth Elementals are known to stem from the Elemental Plane of Earth, where terrain slips, slides, and changes on a whim. They are tough, and well known for their persistence in the face of opposition. Just don't make them mad, or they'll rock your world.

Variants for Earth Elementals

Variant: Blended Elemental

Of course you can do this with any other pair of Creatures, but an exceptionally cool idea is to blend the properties of two or more Elementals, as if one was a Base Statblock. Example: Combine Earth and Fire for a Coal Elemental.

Small Elemental, Tank

HP: 9 (1d12 + 2), **AC:** 10

(*Medium:* **HP:** 5, **AC:** 12)

Vulnerabilities, Resistances & Immunities:

(**R**) Cold 1, Fire 1, Physical 2

(**I**) Lightning, Necrotic, Poison, Poisoned, Radiant

Damage Threshold: 1

Weaknesses: Adamantine Weapons

Speed: 20 ft., **Burrow:** 20 ft.

Initiative Recovery: 4/Round

STR: 14 (+2), **DEX:** 10 (+0), **CON:** 15 (+2)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 8 (-1)

Saving Throws: Constitution

Skills & Languages: Athletics, Coprolian

Senses: Precise Tremorsense: 30 ft.

Weaknesses: Adamantine Weapons

Speed: 30 ft., **Burrow:** 30 ft.

Initiative Recovery: 8/Round

STR: 15 (+2), **DEX:** 11 (+0), **CON:** 18 (+4)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 8 (-1)

Saving Throws: Constitution

Skills & Languages: Athletics, Coprolian

Senses: Tremorsense: 60 ft.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +3, **Dmg (W):** +2, (F: +0)

Atk (S): +3, **Dmg (S):** +0, **Spell DC:** 8

- **Boulder (3 Act):**
40/120 ft. Ranged Weapon, 4 (1d6) Bludgeoning Damage.
- **Slam (2 Act):**
Melee Weapon (N), 3 (1d4) Bludgeoning Damage.
 - **Hit:** The Target is Pushed up to 5 feet.

Abilities:

- **Earth Glide: (M)** The Elemental can Burrow through any kind of earthen material such as stone or soil without leaving any kind of tunnel, and also ignores Difficult Terrain of the same material.
- **Earth Shaper:** When the Elemental takes the Move Action on any Terrain of Stone or Soil, it can cause the Terrain they took the Action on to be difficult, or regular Terrain.
- **Stone Form:** When not moving, the Elemental appears as a pile of rocks. It also doesn't need air, food or water.

Lesser Fire Elemental

Fire Elementals are known to come from the Elemental Plane of Fire, where everything is always perfectly cooked, but maybe not to your taste. But the Fire Elemental is well known for it's unbearable presence.

Variants for Fire Elementals

Variant: Blended Elemental

Of course you can do this with any other pair of Creatures, but an exceptionally cool idea is to blend the properties of two or more Elementals, as if one was a Base Statblock. Example: Combine Fire and Air for a Smoke Elemental.

Small Elemental, Skirmisher

HP: 5 (1d8), **AC:** 13

(Medium: HP: 3, AC: 15)

Vulnerabilities, Resistances & Immunities:

(V) Cold 2

(R) Physical 1

(I) Fire, Grappled, Lightning, Necrotic, Poison, Poisoned, Radiant, Restrained

Damage Threshold: 1

Weaknesses: Suffocation, Water

Speed: 30 ft., **Climb:** 30 ft.

Initiative Recovery: 3/Round

STR: 6 (-2), **DEX:** 16 (+3), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Acrobatics, Igneous

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +5, **Dmg (W):** -2, **(F: +3)**

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 10

(Medium: Atk (W): +7, Atk (S): +4, Damage: 0.5x)

- **Ignite (2 Act):**

Melee Weapon Attack (F), 3 (1d4) Fire Damage + 2 Persistent Fire.

- **Stoke (5 Act):**

DC 16 Dexterity Save, One Creature that is suffering Persistent Fire Damage:

- **Critical Failure:** The Persistent Fire Damage is Doubled instead of increased.
- **Failure:** The Persistent Fire Damage increases by 1.
- **Success:** No effect.
- **Critical Success:** The Persistent Fire Damage decreases by 1.

Abilities:

- **Fatal Weakness:** The Fire Elemental takes Damage equal to a roll of its Hit Die when it Starts its Turn under the effects of its Weakness.
- **Fire Form:** The Elemental appears as fire, and is indistinguishable from flames, except for the fact that it burns without needing fuel. Also, any Creature that enters the Elemental's Space, or Hits the Elemental with a Natural Weapon or Unarmed Strike for the first time on their Turn, takes Fire Damage equal to the Elemental's Proficiency Bonus.
- **Limited Fluid Form:** The Elemental can pass through 1 inch gaps without considering them Difficult Terrain, and can occupy the same space as any Creature that doesn't have Fluid Form.

Fire Elemental

Medium Elemental, Skirmisher

HP: 28 (5d8 + 5), **AC:** 14

Vulnerabilities, Resistances & Immunities:

(V) Cold 3

(R) Physical 5

(I) Fire, Grappled, Lightning, Necrotic, Poison, Poisoned, Radiant, Restrained

Damage Threshold: 5

Weaknesses: Suffocation, Water

Speed: 60 ft., **Climb:** 60 ft.

Initiative Recovery: 5/Round

STR: 6 (-2), **DEX:** 19 (+4), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Acrobatics, Igneous

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +7, **Dmg (W):** -2, **(F):** +4)

Atk (S): +3, **Dmg (S):** +0, **Spell DC:** 10

- **Ignite (2 Act):**

Melee Weapon Attack (F), 3 (1d4) Fire Damage + 3 Persistent Fire.

- **Stoke (5 Act):**

DC 19 Dexterity Save, One Creature that is suffering Persistent Fire Damage:

- **Critical Failure:** The Persistent Fire Damage is Doubled instead of increased.
- **Failure:** The Persistent Fire Damage increases by 1.
- **Success:** No effect.
- **Critical Success:** The Persistent Fire Damage decreases by 1.

Abilities:

- **Fatal Weakness:** The Fire Elemental takes Damage equal to a roll of its Hit Die when it Starts its Turn under the effects of its Weakness.
- **Fire Form:** The Elemental appears as fire, and is indistinguishable from flames, except for the fact that it burns without needing fuel. Also, any Creature that enters the Elemental's Space, or Hits the Elemental with a Natural Weapon or Unarmed Strike for the first time on their Turn, takes Fire Damage equal to the Elemental's Proficiency Bonus.
- **Limited Fluid Form:** The Elemental can pass through 1 inch gaps without considering them Difficult Terrain, and can occupy the same space as any Creature that doesn't have Fluid Form.

Lesser Water Elemental

Water Elementals hail from the endless oceans and storm-swept ponds of the Water Plane. They are known to be slippery and agile, yet relentlessly persistent, capable of eroding away at even the most stubborn of defenses.

Variants for Water Elementals

Blended Elemental

Of course you can do this with any other pair of Creatures, but an exceptionally cool idea is to blend the properties of two or more Elementals, as if one was a Base Statblock. Example: Combine Water and Earth for a Mud Elemental.

Small Elemental, Bruiser

HP: 7 (1d10 + 1), **AC:** 11

(*Medium:* **HP:** 4, **AC:** 13)

Vulnerabilities, Resistances & Immunities:

(**R**) Acid 1, Fire 2, Physical 1

(**I**) Grappled, Lightning, Poison, Radiant, Restrained

Damage Threshold: 1

Weaknesses: Freezing

Speed: 20 ft., **Climb:** 20 ft., **Swim:** 40 ft.

Initiative Recovery: 3/Round

STR: 15 (+2), **DEX:** 12 (+1), **CON:** 13 (+1)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 12 (+1)

Saving Throws: Strength

Fey

Young Centaur

Centaur, also known as the expected version of a half-human, half-horse combo are often regarded as fierce and skilled warriors, though they are also known to be highly observant, and capable of reading the stars.

Medium Fey, Spotter

HP: 5 (1d8 + 1), **AC:** 10

Damage Threshold: 1

Weaknesses: Iron

Speed: 40 ft., **Initiative Recovery:** 3/Round

STR: 13 (+1), **DEX:** 10 (+0), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 15 (+2), **CHA:** 12 (+1)

Saving Throws: Wisdom

Skills & Languages: Perception, Survival, Sylvan

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +1, **(F: +0)**

Atk (S): +2, **Dmg (S):** +2, **Spell DC:** 12

- **Hoof (2 Act):**

Melee Weapon (N), 3 (1d4) Bludgeoning Damage. Deals Double Damage against Prone Creatures.

Abilities:

- **Loadout:** When using this Monster, it is highly recommended to give it equipment.
- **Powerful Build:** The Horse's Carrying Capacity is doubled.
- **Star Reader (2/Breather): (M)** At the Start of Combat, the Centaur rolls a d20 and records the value. Whenever a Creature the Centaur can see rolls a d20 Test, the Centaur can spend one use of this ability to swap the d20 results.

Centaur

Medium Fey, Spotter

HP: 33 (5d8 + 10), **AC:** 10

(Medium: HP: 66, AC: 8)

Damage Threshold: 5

Weaknesses: Iron

Speed: 60 ft., **Initiative Recovery:** 5/Round

STR: 15 (+2), **DEX:** 10 (+0), **CON:** 14 (+2)

INT: 10 (+0), **WIS:** 17 (+3), **CHA:** 13 (+1)

Saving Throws: Wisdom

Skills & Languages: Perception, Survival, Sylvan

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +3, **Dmg (W):** +2, **(F: +0)**

Atk (S): +3, **Dmg (S):** +3, **Spell DC:** 13

(Medium: Atk (W): +1, Atk (S): +1, Damage: 2x)

- **Hoof (2 Act):**

Melee Weapon (N), 3 (1d4) Bludgeoning Damage. Deals Double Damage against Prone Creatures.

Abilities:

- **Loadout:** When using this Monster, it is highly recommended to give it equipment.
- **Powerful Build:** The Horse's Carrying Capacity is doubled.
- **Spatial Distortion: (M)** When the Centaur takes the Dash Action, they can move up to 30 feet when they take the Move Action until the End of their Turn. This is unaffected by effects that interfere with Teleportation.
- **Star Reader (3/Breather): (M)** At the Start of Combat, the Centaur rolls a d20 and records the value. Whenever a Creature the Centaur can see rolls a d20 Test, the Centaur can spend one use of this ability to swap the d20 results.
- **Trample:** The Centaur can Attack after it Dashes. If it Does, any Creature it Hits must make a DC 15 Strength Save:
 - **Failure:** They are knocked Prone.
 - **Success:** No effect.

Hag Initiate

Hags are the first Creatures to truly master the Bestow Curse Spell, having infused the power of suffering into themselves to create curses that feed their hunger.

However, not all Hags are evil, and some do have good intentions. Such hags aren't usually known as such, and often apply curses that spread joy and happiness, rather than sorrow and misery.

Medium Humanoid, Fey, Debuffer

HP: 5 (1d8), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(R) Psychic 1

(I) Charmed, Frightened

Damage Threshold: 1

Weaknesses: Iron, Unwavering Resolve

Speed: 30 ft., **Initiative Recovery:** 2/Round

STR: 8 (-1), **DEX:** 10 (+0), **CON:** 10 (+0)

INT: 12 (+1), **WIS:** 13 (+1), **CHA:** 14 (+2)

Saving Throws: Charisma

Skills & Languages: Deception, Occultism, Common, Sylvan

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +3, **Dmg (W):** -1, **(F: +0)**

Atk (S): +5, **Dmg (S):** +2, **Spell DC:** 17

- **Wrack (3 Act): (M)**

Intelligence Save, 60 ft. Range:

- **Critical Failure:** Same as Failure, but Double Damage.
- **Failure:** The Target takes 5 (1d8) Psychic Damage, and the base DC for any Triggered Concentration Saving Throw is 14.
- **Success:** No effect.

- **Minor Illusion (2 Act): (M)**

The Hag conjures an illusion within a 5 ft. cube that is within 30 feet.

Abilities:

- **Spellcasting (9 Slots/Long Rest): (M)** The Hag can cast any of the following Occult Spells (or other Occult Spells) at up to 3rd Tier: Fear (4 Act), Arcane Disguise (1 Min), Body Alteration (5 Act), Scrying (1 Min).
- **Curse Giver (1/Long Rest): (M)** The Hag can cast Bestow Curse for free as if it has the Hag Heart, without needing to expend it.

Pixie

Pixies are mischievous and tiny fey, often known to mess with the unfortunate souls that cross paths with them. But depending on the response, a Pixie might choose to help or hinder their victims by whatever means they have at their disposal.

Minuscule Fey, Healer

HP: 5 (1d8), **AC:** 11

(Medium: HP: 1, AC: 17)

Vulnerabilities, Resistances & Immunities:

(I) Charmed

Damage Threshold: 1

Weaknesses: Iron

Speed: 10 ft., **Fly:** 30 ft.

Initiative Recovery: 3/Round

STR: 8 (-1), **DEX:** 13 (+1), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 16 (+3), **CHA:** 12 (+1)

Saving Throws: Wisdom

Skills & Languages: Nuture, Survival, Druidic, Sylvan

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** -1, **(F):** +1

Atk (S): +2, **Dmg (S):** +3, **Spell DC:** 12

(Medium: Atk (W): +9, Atk (S): +8, Damage: 0.125x)

- **Minor Illusion (2 Act): (M)**

The Pixie conjures an illusion within a 5 ft. cube that is within 30 feet.

Abilities:

- **Druidic:** The Pixie can speak to, and understand all Beasts and Plants as if they shared a Language.
- **Polymorpher (1/Long Rest): (M)** The Pixie can cast Polymorph at its lowest Tier, but must Target a Creature other than it.
- **Spellcasting (2 Slots/Long Rest): (M)** The Pixie can cast any of the following Primal Spells at 1st Tier: Regenerate (4 Act).
- **Trickster:** When any Attack Misses a Pixie, it instead Hits a Creature that is within 5 feet of the Pixie, but still within Range of the Triggering Attack.

Satyr

Satyrs are often considered to be the first bards, sometimes as druids, but mostly just fey hippies. These fun loving goats are great negotiators and guides around the feywild, knowing how best to keep themselves and others out of harms way, and even lower tension with the more aggressive Creatures. And this is why Satyrs are “goated”.

Medium Fey, Buffer

HP: 5 (1d8), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(I) Charmed

Damage Threshold: 1

Weaknesses: Iron

Speed: 40 ft., **Initiative Recovery:** 3/Round

STR: 10 (+0), **DEX:** 12 (+1), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 13 (+1), **CHA:** 16 (+3)

Saving Throws: Charisma

Skills & Languages: Performance, Persuasion

Senses: Sylvan

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +0, **(F: +1)**

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 16

- **Hoof (2 Act):**

Melee Weapon (N), 3 (1d4) Bludgeoning Damage.

- **Force Emotion (3 Act): (M)**

DC 16 Charisma Save, 30 ft. Range:

- **Critical Failure:** Same as Failure, but they have Disadvantage on the next Saving Throw they make within 1 Minute.
- **Failure:** They are forced to display an emotion of your choice, such as joy, anger or sadness for 1 Minute, and their next Turn is delayed until Initiative Count 1 on the Round it would be taken on.
- **Success:** No effect.

- **Bardic Inspiration (2 Act, Rech 6):**

60 ft. Range, Target Creature gains a 1d4 Bardic Inspiration Die, which they can add to any d20 Test.

Abilities:

- **Spellcasting (3 Slots/Day): (M)** The Satyr can cast any of the following Non-Attack Occult Spells at 1st Tier: Summon Beast (10 Act)
- **Interpretive Performance:** The Satyr can communicate a vague message to any Creature that knows at least 1 Language. This benefit also extends to Beasts and Plants that don't have a Language.

Fiends

Fell Hound Pup

At first glance, Fell Hounds may seem like blazing wolves. But the bite of a Fell Hound is far worse, coming with the dreaded Infernal Fever, and allowing the Fell Hound to track you no matter where you go.

Small Fiend, Beast, Bruiser

HP: 7 (1d10 + 1), **AC:** 10

(Medium: HP: 4, AC: 12)

Vulnerabilities, Resistances & Immunities:

(V) Radiant 2

(R) Necrotic 2

(I) Fire, Frightened

Damage Threshold: 1

Weaknesses: Silvered Weapons, Holy Attacks

Speed: 40 ft., **Initiative Recovery:** 3/Round

STR: 14 (+2), **DEX:** 11 (+0), **CON:** 13 (+1)

INT: 8 (-1), **WIS:** 8 (-1), **CHA:** 12 (+1)

Saving Throws: Strength

Skills & Languages: Athletics

Senses: Precise Smell: 120 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +2, (F: +0)

Atk (S): +1, **Dmg (S):** -1, **Spell DC:** 12

(Medium: Atk (W): +4, Atk (S): +3, Damage: 0.5x)

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage + 1 Fire Damage.

- **Hit:** The Target is exposed to Infernal Fever with a DC of 13.

- **Soulfire (5 Act): (M)**

Spell, DC 12 Constitution Save, 60 ft.:

- **Critical Failure:** Same as Failure, but they take additional Fire Damage equal to their Drained Condition, bypassing Immunity.
- **Failure:** The Target becomes Drained 1 and takes 4 (1d6) Fire Damage.
- **Success:** No effect.

Abilities:

- **Infernal Mark:** The Fell Hound can track any Creature it has Hit with a Bite Attack for up to 1 week, regardless of distance, Teleportation or obstacles, without an Ability Check.

Fell Hound

Medium, Fiend, Beast, Bruiser

HP: 33 (5d8 + 10), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(V) Radiant 3

(R) Necrotic 3

(I) Fire, Frightened

Damage Threshold: 5

Weaknesses: Holy or Silvered Attacks

Speed: 60 ft., **Initiative Recovery:** 5/Round

INT: 10 (+0), **WIS:** 8 (-1), **CHA:** 13 (+1)

Saving Throws: Strength

Skills & Languages: Athletics, understands Infernal but cannot speak.

Senses: Precise Smell 120 ft.

Proficiency Bonus: +3

Actions: Max 3

Atk (W): +4, **Dmg (W):** +3, (F: +1)

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 13

- **Bite (3 Act):**

Melee Weapon 5 (1d6) Piercing Damage + 1 Fire Damage.

- **Hit:** The Target is exposed to Infernal Fever with a DC of 14.

- **Soulfire (5 Act): (M)**

Spell, DC 13 Constitution Save, 60 ft.:

- **Critical Failure:** Same as Failure, but they take additional Fire Damage equal to their Drained Condition, bypassing Resistance and Immunity.
- **Failure:** The Target becomes Drained 1 and takes 4 (1d6) Fire Damage.
- **Success:** No effect.

Abilities:

- **Infernal Mark:** The Fell Hound can track any Creature it has Hit with a Bite Attack for up to 1 week, regardless of distance, Teleportation or obstacles, without an Ability Check.

Herald of Aftermath

The Heralds of Diablo are the only Fiends that any normal person may be genuinely glad to see. As while some bring war, others such as the Heralds of Aftermath signal an end, bitter though it may be.

More often than not, heralds bring about changes with drastic consequences for those that oppose their ideal.

As such, they are occasionally tolerated by some Celestials as neutral messengers from Diablo, and a necessary evil at times.

Variants for Heralds

Herald of Something

A Herald can bring about many things. Whether that's romance, war, greed, rebellion, invention, comedy, or literally anything that can cause some degree of chaos that disrupts day to day life. Maybe that's why nobody can clear their schedule enough to play.

Medium Fiend, Debuffer

HP: 5 (1d8), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(V) Radiant 2

(R) Necrotic 2

(I) Fire

Damage Threshold: 1

Weaknesses: Silvered Weapons, Holy Attacks, Creatures that aren't under an Emotion effect

Speed: 30 ft., **Fly:** 60 ft.

Initiative Recovery: 2/Round

STR: 10 (+0), **DEX:** 10 (+0), **CON:** 11 (+0)

INT: 12 (+1), **WIS:** 12 (+1), **CHA:** 15 (+2)

Saving Throws: Charisma

Skills & Languages: Society, Common, Infernal

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +0, **(F: +0)**

Atk (S): +3, **Dmg (S):** +1, **Spell DC:** 15

- **Ominous Call (5 Act): (M)**

DC 15 Charisma Save, 30 ft. Range:

- **Critical Failure:** Same as Failure, but the Conditions last until removed, or the Herald dies.
- **Failure:** The Target is Charmed and Frightened 1 until they finish a Long Rest, or the Herald dies.
- **Success:** The Target has Disadvantage on the next d20 Test they make before the End of their next Turn.
- **Critical Success:** No effect.

- **Stoke Regrets (2 Act):**

Spell, 30 ft. One Creature that is Afflicted with Infernal Fever: The Target must immediately Save against Infernal Fever, using Charisma instead of Constitution.

Abilities:

- **Burning Regret:** When a Creature that is Frightened by the Herald loses the Frightened Condition, they are exposed to Infernal Fever with a DC of 12.
- **Loadout:** When using this Monster, it is highly recommended to give it equipment.
- **Manipulation:** While a Creature is Charmed by the Herald, the Herald chooses the first Action they take each Turn.

Imp

Imps are the Devils that people think of being on their shoulder when they face a moral dilemma. They seek to encourage bad decisions, manipulation, lies, and other falsehoods.

But when they aren't trying to push adventurers into making bad choices, they often do whatever they can to make things worse on whoever they're haunting, and even gathering information that might lead their victims to miserable, dark and lonely paths.

Tiny Fiend, Debuffer

HP: 5 (1d8), **AC:** 11

(Medium: HP: 2, AC: 15)

Vulnerabilities, Resistances & Immunities:

(V) Radiant 2

(I) Fire, Poison, Poisoned

Damage Threshold: 1

Weaknesses: Silvered Weapons, Holy Attacks, Selflessness

Speed: 15 ft., **Fly:** 30 ft.

Initiative Recovery: 3/Round

STR: 6 (-2), **DEX:** 13 (+1), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 14 (+2), **CHA:** 16 (+3)

Saving Throws: Charisma

Skills & Languages: Persuasion, Infernal, Telepathy (30 ft.)

Senses: Darkvision: 120 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** -2, **(F: +1)**

Atk (S): +4, **Dmg (S):** +2, **Spell DC:** 16

(Medium: Atk (W): +7, Atk (S): +8, Damage: 0.25x)

- **Doubt (3 Act):**

DC 16 Charisma Save, 30 ft. Range:

- **Critical Failure:** Same as Failure, but the Target also skips their next Turn.
- **Failure:** The Target is Charmed for 1 Hour or until they take Damage from the Imp or its allies.
- **Success:** No effect.

A Creature can use the Interact Action to attempt to end this Condition on another Creature, using Persuasion against the DC.

- **Infernal Stinger (2 Act):**

Melee Weapon (N), (1d4) Piercing Damage + 1 Persistent Poison Damage.

- **Hit:** The Target is exposed to Infernal Fever with a DC of 10.

Abilities:

- **Death Throes:** When the Imp Dies, all Creatures within 5 feet of it must make a DC 10 Dexterity Save:
 - **Critical Failure:** Double Damage.
 - **Failure:** They take 9 (2d8) Fire Damage, and are exposed to Infernal Fever with a DC of 10.
 - **Success:** Half Damage, and not exposed.
 - **Critical Success:** No effect.
- **Shadow Piercer:** The Imp's Darkvision ignores Magical Darkness.

Night Terror

Nightmares are Creatures of fear and darkness that feed and grow off the nightmares they create, while also multiplying in force. And while they are very scary to some, there's little to nothing to be afraid of. It's just a nightmare.

Tiny Fey, Fiend, Debuffer

HP: 5 (1d8), **AC:** 10

(Medium: HP: 2, AC: 14)

Vulnerabilities, Resistances & Immunities:

(V) Radiant 2

(R) Force 1

(I) Grappled, Necrotic, Ethereal, Physical, Prone, Restrained

Damage Threshold: 1

Weaknesses: Bright Light, Comfort, Celestials

Speed: 0 ft., **Fly (Hover):** 60 ft.

Initiative Recovery: 3/Round

STR: 1 (-5), **DEX:** 10 (+0), **CON:** 10 (+0)

INT: 13 (+1), **WIS:** 12 (+1), **CHA:** 17 (+3)

Saving Throws: Charisma

Skills & Languages: Intimidation, Common, Infernal, Telepathy (30 ft.)

Senses: Truesight: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** -5, **(F):** +0)

Atk (S): +3, **Dmg (S):** +1, **Spell DC:** 17

(Medium: Atk (W): +6, Atk (S): +7, Damage: 0.25x)

- **Consume Fear (2 Act): (M)**
30 ft. Ranged Spell, 3 (1d4) Psychic Damage.
This Attack Automatically Hits a Frightened or Unconscious Target, and cannot Target Constructs or Undead.
 - **Hit:** The Night Terror regains Hit Points equal to the Damage dealt.
- **Manifest Nightmare (5 Act): (M)**
DC 17 Charisma Save, Touch:
 - **Critical Failure:** Same as Failure, but the Target takes 7 (2d6) Psychic Damage.
 - **Failure:** The Target becomes Frightened 1 until it Succeeds on a Wisdom Save against this effect, which it makes at the End of each of its Turns.
 - **Success:** No effect.

Abilities:

- **Ethereal Nature:** The Night Terror always benefits from the Ethereal Condition, and can pass through Objects as if they were Difficult Terrain. However, Creatures that exploit the Night Terror's weakness still deal half Damage.
- **Multiplicative:** When the Night Terror inflicts the Bloodied Condition, or reduces a Creature to 0 Hit Points, a new Night Terror is created at full health. If the original was Summoned, the new Night Terror is completely free of the Summoner's control.
- **Nonlethal:** When the Night Terror reduces a Creature to 0 Hit Points, that Creature is Stable. Additionally, the Night Terror cannot inflict the Drained Condition by inflicting Damage to a Creature that is at 0 Hit Points.

Humanoids

Beastfolk (Generic/Base)

Ah yes, stereotypically found in communities that reject humanity, and have become... well, maybe not all monkey, but definitely something. Pretty wild though.

Medium Beast, Humanoid, Spotter

HP: 5 (1d8), **AC:** 10

Damage Threshold: 1

Weaknesses: Subjugation

Speed: 30 ft., **Initiative Recovery:** 1/Round

STR: 12 (+1), **DEX:** 10 (+0), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 12 (+1), **CHA:** 10 (+0)

Saving Throws: Wisdom

Skills & Languages: Perception, Survival

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +1, **(F: +0)**

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 10

- **Natural Weapon (2 Act):**
Melee Weapon (N), 3 (1d4) Damage (Varies between Bludgeoning, Piercing and Slashing).

Abilities:

- **Instinct of Predator and Prey:** When the Beastfolk rolls less than 10 on Initiative (even when surprised), they become Frightened 2 of the nearest enemy until the End of their next Turn, and set their Initiative to 10 + the respective Bonus.
- **Loadout:** When using this Monster, it is highly recommended to give it equipment, or replace Instinct of Predator and Prey with another Ancestry Feat.

Red Dragonborn

Dragonborn are often hired for mercenary work, as they are pretty hardy and really good as warriors. Not to mention, they often have a breath Weapon.

Medium Dragon, Humanoid, Bruiser

HP: 6 (1d10), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(R) Fire 1

Damage Threshold: 1

Weaknesses: Dragon Weapons

Speed: 30 ft., **Initiative Recovery:** 1/Round

STR: 12 (+1), **DEX:** 10 (+0), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 12 (+1)

Saving Throws: Strength

Skills & Languages: Athletics, Common, Draconic

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +1, **(F: +0)**

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 12

- **Claws (2 Act):**
Melee Weapon (N), 3 (1d4) Slashing Damage.
- **Dragon's Breath (5 Act, Rech 6):**
DC 10 Dexterity Save, 15 ft. Cone:
 - **Critical Failure:** Double Damage.
 - **Failure:** They take 2d6 Fire Damage.
 - **Success:** Half Damage.
 - **Critical Success:** No Damage.

Abilities:

- **Loadout:** When using this Monster, it is highly recommended to give it equipment, or replace Dragon's Breath with another Ancestry Feat.

Dwarf

Dwarves are usually found whenever digging or heavy equipment is involved. And if there's no digging to be done, there's probably some crafting they'll get to.

Medium Humanoid, Tank

HP: 8 (1d12 + 1), **AC:** 10

Damage Threshold: 1

Weaknesses: Flight

Speed: 25 ft., **Initiative Recovery:** 2/Round

STR: 12 (+1), **DEX:** 10 (+0), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Constitution

Skills & Languages: Athletics, Common, Dwarvish

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +1, **(F: +0)**

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 10

- **Unarmed Strike (2 Act):**
Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Dwarven Training:** While wearing Medium or Heavy Armor, the Resistance granted is increased by the Dwarf's Proficiency Bonus.
- **Loadout:** When using this Monster, it is highly recommended to give it equipment, or replace Stoic Demeanor with another Ancestry Feat.
- **Stoic Demeanor:** At the End of its Turn, the Dwarf reduces its Frightened Condition by 1.

Elf

Should you find yourself in the forest, you'll probably have these guys to thank. But whether you thank them for showing you the way, or the extra arrows in your pack (or back), that is another question.

Medium Fey, Humanoid, Spellcaster

HP: 4 (1d6), **AC:** 11

Damage Threshold: 1

Weaknesses: Decay

Speed: 40 ft., **Initiative Recovery:** 1/Round

STR: 10 (+0), **DEX:** 12 (+1), **CON:** 10 (+0)

INT: 12 (+1), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Intelligence

Skills & Languages: Arcana, Common, Elvish

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +0, **(F: +1)**

Atk (S): +3, **Dmg (S):** +0, **Spell DC:** 10

- **Guard (3 Act): (M)**
Spell, Touch, 1 Minute, Resistance 2 to All Damage. This Benefit ends once the Target takes Damage that exceeds this Resistance.
- **Unarmed Strike:**
Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Elven Agility:** The Elf can move 20 Feet instead of 10 when it takes the Move Action.
- **Elven Grace:** The Elf ignores all Movement Penalties from Difficult Terrain, when taking an Action with the Move Trait.
- **Loadout:** When using this Monster, it is highly recommended to give it equipment, or replace Elvin Agility with another Ancestry Feat.

Gnome

When people think of crazy, this is about as crazy as it gets. I mean, they're practically begging to be given some tinker's tools, and told to make something, only for it to go horribly wrong, and require a Party of adventurers to execute a "surprise disassembly"

Small Fey, Humanoid, Trapper

HP: 4 (1d6), **AC:** 10

(Medium: HP: 2, AC: 12)

Damage Threshold: 1

Weaknesses: Boredom, Kobold Weapons

Speed: 25 ft., **Initiative Recovery:** 1/Round

STR: 10 (+0), **DEX:** 10 (+0), **CON:** 10 (+0)

INT: 12 (+1), **WIS:** 10 (+0), **CHA:** 12 (+1)

Saving Throws: Intelligence

Skills & Languages: Arcana, Common, Gnomish

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +0, **(F: +0)**

Atk (S): +3, **Dmg (S):** +0, **Spell DC:** 12

(Medium: Atk (W): +4, Atk (S): +5, Damage: 0.5x)

- **Unarmed Strike:**
Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Excitable:** The first Action the Gnome takes each Turn that has an Action Cost of at least 1 is free.
- **Fey Awareness:** The Gnome has Advantage on Intelligence and Wisdom Saving Throws against Magical effects.
- **Loadout:** When using this Monster, it is highly recommended to give it equipment, or replace Fey Awareness with another Ancestry Feat.

Goblin

Oh, right. These guys. The squishy ones that Adventurers slay in droves that have bad loot, and... okay, more than 1 Hit Point. But just you wait until they get merged with some high level NPC stat blocks. Then they'll get the last laugh!

Small Humanoid, Skirmisher

HP: 6 (1d8 + 1), **AC:** 11

(Medium: HP: 3, AC: 13)

Damage Threshold: 1

Weaknesses: Creatures of equal or lesser Size

Speed: 25 ft., **Initiative Recovery:** 2/Round

STR: 10 (+0), **DEX:** 12 (+1), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Dexterity

Skills & Languages: Survival, Goblin

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +0, **(F: +1)**

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 10

(Medium: Atk (W): +5, Atk (S): +4, Damage: 0.5x)

- **Unarmed Strike:**
Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Fury of the Small:** The Goblin has Advantage on Attack Rolls against all Larger Creatures
- **Loadout:** When using this Monster, it is highly recommended to give it equipment, or replace Smelly with another Ancestry Feat.
- **Smelly:** Any Creature that starts their Turn within 5 Feet of the Goblin must make a DC 12 Constitution Save:
 - **Failure:** They are Poisoned until they leave the area.
 - **Success:** They are Immune to this effect for 1 Hour.

Halfling

These short fellas are usually the ones that stay in town and keep the inns running. It might take a wizard and fifty dwarves to get one to come along with you.

Small Humanoid, Skirmisher

HP: 5 (1d8), **AC:** 11

(*Medium:* HP: 3, AC: 13)

Damage Threshold: 1

Weaknesses: Exhaustion

Speed: 25 ft., **Initiative Recovery:** 1/Round

STR: 10 (+0), **DEX:** 12 (+1), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 12 (+1)

Saving Throws: Dexterity

Skills & Languages: Persuasion, Common, Halfling

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +0, **(F: +1)**

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 12

(*Medium:* Atk (W): +5, Atk (S): +4, Damage: 0.5x)

- **Unarmed Strike:**

Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Loadout:** When using this Monster, it is highly recommended to give it equipment, or replace Nimble Footing with another Ancestry Feat.
- **Lucky:** When the Halfling rolls a Natural 1 on any d20 Test, they re-roll the Nat 1.
- **Nimble Footing:** The Halfling has Advantage on Dexterity Checks and Saving Throws to avoid being Grappled, Pushed, or knocked Prone.

Human

They're like the ultimate pests. They multiply quickly, have a tendency to get places they shouldn't be, and they just won't die!

Medium Humanoid, Spotter

HP: 5 (1d8), **AC:** 10

Damage Threshold: 1

Weaknesses: Demoralization

Speed: 30 ft., **Initiative Recovery:** 1/Round

STR: 11 (+0), **DEX:** 11 (+0), **CON:** 10 (+0)

INT: 11 (+0), **WIS:** 12 (+1), **CHA:** 11 (+0)

Saving Throws: Wisdom

Skills & Languages: Common, Humish, Society

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +0, **(F: +0)**

Atk (S): +2, **Dmg (S):** +1, **Spell DC:** 11

- **Unarmed Strike:**

Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Defy Destiny (1/Round):** When the Human rolls a 15 or higher on the d20, it automatically Succeeds.
- **Inspiring Resolve:** When the Human Critically Succeeds on any Saving Throw, all Creatures of the Human's choice that can see it gain Advantage on the same Saving Throw, or the next one they make.
- **Loadout:** When using this Monster, it is highly recommended to give it equipment, or replace Inspiring Resolve with another Ancestry Feat.

Orc

“I’m a tank, I’m a tank, I’m a tank, I’m a tank...” - Some little kid in a playground somewhere.

Medium Humanoid, Tank

HP: 8 (1d12 + 1), **AC:** 10

Damage Threshold: 1

Weaknesses: Mental effects

Speed: 30 ft., **Initiative Recovery:** 2/Round

STR: 12 (+1), **DEX:** 10 (+0), **CON:** 12 (+1)

INT: 10 (+0), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Constitution

Skills & Languages: Intimidation, Orcish

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +1, **(F: +0)**

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 10

- **Unarmed Strike:**
Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Call of War:** When the Orc regains Action Points, it regains 1 additional Action Point for every enemy in its Reach.
- **Heat of Battle:** While Bloodied, the Orc adds its Proficiency Bonus to its Initiative Recovery.
- **Loadout:** When using this Monster, it is highly recommended to give it equipment, or replace Heat of Battle with another Ancestry Feat.

Plants

Awakened Bush

Nothing is scarier than a mimic, until the entire forest comes to life and attacks in the middle of the night.

However, Awakened Plants often serve as sentinels rather than hunters, due to the rather obvious difficulty with movement.

Small Plant, Tank

HP: 9 (1d12 + 2), **AC:** 9

(Medium: HP: 5, AC: 11)

Vulnerabilities, Resistances & Immunities:

(V) Fire 2

(R) Piercing 2, Radiant 2

(I) Bleed, Bloodied, Charmed, Exhaustion, Flat-Footed, Frightened, Prone, Psychic, Unconscious

Damage Threshold: 1

Weaknesses: Decay, Necrotic Attacks

Speed: 10 ft., **Initiative Recovery:** 4/Round

STR: 10 (+0), **DEX:** 8 (-1), **CON:** 15 (+2)

INT: 1 (-5), **WIS:** 13 (+1), **CHA:** 10 (+0)

Saving Throws: Constitution

Skills & Languages: Perception

Senses: Blind, Anosmic, Precise Tremorsense: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +1, **Dmg (W):** +0, **(F):** -1

Atk (S): -3, **Dmg (S):** +1, **Spell DC:** 10

(Medium: Atk (W): +3, Atk (S): -1, Damage: 0.5x)

- **Healing Berries (2 Act, Rech 6):**

Touch, one Creature that needs to Eat, 2 Temporary Healing. This Temporary Healing is converted to Hit Points over any Rest.

- **Poisonous Berries (2 Act, Rech 6):**

Melee Weapon (N), One Grappled Creature, 2 Persistent Poison Damage.

Abilities:

- **Camouflage:** When not moving, the Awakened Bush is indistinguishable from a normal bush.
- **Crippling Weakness:** The Awakened Bush cannot use either of its Berry Actions, while subjected to its Weakness.
- **Flammable:** When the Awakened Bush takes unresisted Fire Damage that isn't Persistent, it takes it as Persistent Damage, up to its Vulnerability.
- **Mindless:** The Awakened Bush is Immune to all Emotion effects, and automatically Fails all Saving Throws with the Mental Trait.

Killer Vine

These nasty plants are notorious for their crushing performance in jungles, and their tendency to get the drop on unsuspecting travelers, and their allies. It might be involved with the invention of a gallows, or some kind of nasty rope.

Tiny Plant, Bruiser

HP: 6 (1d10), **AC:** 11

(Medium: **HP:** 2, **AC:** 15)

Vulnerabilities, Resistances & Immunities:

(V) Slashing 2

(R) Piercing 2

(I) Bleed, Bloodied, Charmed, Exhaustion, Flat-Footed, Frightened, Poisoned, Prone, Psychic, Unconscious

Damage Threshold: 1

Weaknesses: Decay, Necrotic Attacks

Speed: 0 ft., **Initiative Recovery:** 3/Round

(Note: Action Limit is 3)

STR: 16 (+3), **DEX:** 13 (+1), **CON:** 10 (+0)

INT: 1 (-5), **WIS:** 11 (+0), **CHA:** 10 (+0)

Saving Throws: Strength

Skills & Languages: Athletics

Senses: Blind, Precise Hearing: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +3, **(F):** +1)

Atk (S): -3, **Dmg (S):** +0, **Spell DC:** 10

(Medium: **Atk (W):** +7, **Atk (S):** +1, **Damage:** 1x)

- **Bind (3 Act):** Melee Weapon (N), 10 ft. Reach, 4 (1d6) Bludgeoning Damage. This Attack automatically Hits against Creatures that are Grappled by the Killer Vine, though it doesn't lift them any higher.
 - **Hit:** The Target is Grappled and lifted 20 feet into the air.

Abilities:

- **Camouflage:** When not moving, the Killer Vine is indistinguishable from a normal Vine.
- **Mindless:** The Killer Vine is Immune to all Emotion effects, and automatically Fails all Saving Throws with the Mental Trait.
- **Powerful Blows:** The Killer Vine inflicts Damage as if it were a Medium Creature.

Mossling

These cute little guys aren't very dangerous at all, and make for some very cute pets if you can get one to begin with. But when found in the wild, one will note that they often serve as scouts and spies.

Minuscule Plant, Spotter

HP: 5 (1d8), **AC:** 9

(Medium: **HP:** 1, **AC:** 15)

Vulnerabilities, Resistances & Immunities:

(R) Bludgeoning 2, Cold 2, Piercing 2

(I) Bleed, Bloodied, Charmed, Exhaustion, Flat-Footed, Frightened, Poisoned, Prone, Unconscious

Damage Threshold: 1

Weaknesses: Decay, Necrotic Attacks

Speed: 10 ft., **Initiative Recovery:** 2/Round

STR: 6 (-2), **DEX:** 8 (-1), **CON:** 10 (+0)

INT: 10 (+0), **WIS:** 15 (+2), **CHA:** 10 (+0)

Saving Throws: Wisdom

Skills & Languages: Stealth, Perception, Druidic

Senses: Precise Hearing: 15 ft., Precise Tremorsense: 30 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +1, **Dmg (W):** -2, **(F):** -1)

Atk (S): +2, **Dmg (S):** +2, **Spell DC:** 10

(Medium: **Atk (W):** +7, **Atk (S):** +8, **Damage:** 0.125x)

- **Moss Blanket (5 Act, C):** While Concentrating, the Mossling covers a Minuscule Creature or Object in moss, granting the benefits of its Camouflage ability to the Target, and Stabilizes them if they are Dying. If the Target is larger than Minuscule, the benefit is delayed by 1 Round for each Size Category.
- **Unarmed Strike (2 Act):** Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Camouflage:** When not moving, the Mossling is indistinguishable from a ball of moss.

Thorn Bloom

Much like a cactus, these flowery Creatures are covered in sharp thorns that can hurt you. But unlike actual cacti, they can actually reach out to give you a hug. A very painful, and deadly hug.

Medium Plant, Bruiser

HP: 7 (1d10 + 1), **AC:** 11

Vulnerabilities, Resistances & Immunities:

(V) Fire 1, Slashing 2

(R) Piercing 2, Poison 2

(I) Bloodied, Charmed, Exhaustion, Flat-Footed, Frightened, Poisoned, Psychic, Unconscious

Damage Threshold: 1

Weaknesses: Fire

Speed: 5 ft., **Initiative Recovery:** 3/Round

STR: 15 (+2), **DEX:** 12 (+1), **CON:** 13 (+1)

INT: 1 (-5), **WIS:** 10 (+0), **CHA:** 10 (+0)

Saving Throws: Strength

Skills & Languages: Athletics

Senses: Precise Tremorsense: 15 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +3, **Dmg (W):** +2, **(F: +1)**

Atk (S): -3, **Dmg (S):** +0, **Spell DC:** 10

- **Constrict (3 Act):** Melee Weapon (N), 4 (1d6) Bludgeoning Damage.
 - **Hit:** The Target is Grappled. This Attack automatically Hits any Target that is Grappled by the Thorn Bloom.

Abilities:

- **Mindless:** The Thorn Bloom is Immune to all Emotion effects, and automatically Fails all Saving Throws with the Mental Trait.
- **Spikey Trap:** Creatures that are Grappled by the Thorn Bloom take 3 (1d4) Piercing Damage when they take any Action with the Attack, Move or Manipulate Traits, or when the Thorn Bloom Attacks Them. This Damage also applies to Creatures that Hit it with a Natural Melee Weapon.

Undead

Lich (Base)

Okay, so we all know the big scary mage skeletons that eat souls, right? Well, to be honest, a Lich doesn't have to be like that at all. They can look like a living person, fight like a warrior, and be... frankly, not terribly scary once you get to know them.

Medium Undead, Tank

HP: 9 (1d12 + 2), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(I) Bleed, Exhaustion, Necrotic, Poison, Poisoned

Damage Threshold: 1

Weaknesses: Mental effects

Speed: 30 ft., **Initiative Recovery:** 4/Round

STR: 8 (-1), **DEX:** 10 (+0), **CON:** 15 (+2)

INT: 11 (+0), **WIS:** 10 (+0), **CHA:** 13 (+1)

Saving Throws: Constitution

Skills & Languages: Arcana, Occultism, Common

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** -1, +0 (**F:** +0)

Atk (S): +2, **Dmg (S):** +0, **Spell DC:** 13

- **Lichdom Long Rest (Free Act, 10 Souls):**
(M)

The Lich regains all Hit Points, and refreshes all Rest and Recharge Abilities.

- **Lichdom Short Rest (Free Act, 1 Soul):**
(M)

The Lich rolls its Hit Die, and regains that amount of Hit Points, refreshing any Ability with Recharge X.

- **Unarmed Strike (2 Act):**

Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Disease Immunity:** The Lich is Immune to all Non-Magical Afflictions.
- **Loadout:** When using this Monster, it is highly recommended to give it equipment.
- **Phylactery:** The Lich has a Phylactery, which is an Item with a number of Hit Points equal to the Lich's Level. When reduced to 0 Hit Points, the Lich dies instantly, and is Resurrected at its Phylactery in 1 Hour (or instantly if it spends Souls equal to its Level).
- **Soul Eater (No Limit): (M)** When a Creature dies within 15 feet of the Lich or its Phylactery, the Lich either gains 1 soul, or can snare the Target's Soul to be Resurrected without any material costs, or risk of failure.
- **Undead Nature:** The Lich doesn't need to Eat, Drink, Sleep or Breathe. However, it cannot heal through any means except its Lichdom Rests, and any Actions that explicitly heal Undead.

Skeleton

Often used as a setpiece to decorate an abandoned ruin or dead castle, Skeletons are clacking piles of bones that aren't nearly as persistent as their Zombified cousins, but potentially even more annoying with their clicks, clacks, and endless trombone jokes.

Medium Undead, Skirmisher

HP: 5 (1d8), **AC:** 12

Vulnerabilities, Resistances & Immunities:

(V) Bludgeoning 2, Radiant 1

(R) Piercing 2

(I) Bleed, Necrotic, Poison, Poisoned, Psychic

Damage Threshold: 1

Weaknesses: Holy Weapons, Divine Magic

Speed: 20 ft., **Initiative Recovery:** 2/Round

STR: 10 (+0), **DEX:** 15 (+2), **CON:** 10 (+0)

INT: 1 (-5), **WIS:** 10 (+0), **CHA:** 1 (-5)

Saving Throws: Dexterity

Skills & Languages: None

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +4, **Dmg (W):** +0, **(F):** +2)

Atk (S): -3, **Dmg (S):** +0, **Spell DC:** 1

- **Throw Limb (2 Act):**

20/60 ft. Ranged Weapon (N), 1 Persistent Bludgeoning Damage. This Attack adds the Weapon Damage Bonus to the Persistent Bludgeoning, but the Action cannot be used again while a Creature suffers from the Persistent Damage.

- **Unarmed Strike (2 Act):**

Melee Weapon (N), 1 Bludgeoning Damage.

Abilities:

- **Loadout:** When using this Monster, it is highly recommended to give it equipment.
- **Mindless:** The Skeleton is Immune to all Emotion effects, and automatically Fails all Saving Throws with the Mental Trait.

Specter

Specters are lesser spirits that were prevented from fully crossing over, or that have been raised by necromancers.

However, they lack the ability to act on their own, instead relying on fear and terror to claim retribution for their agony.

Medium Undead, Debuffer

HP: 5 (1d8), **AC:** 10

Vulnerabilities, Resistances & Immunities:

(V) Force 2, Radiant 2

(R) Psychic 2

(I) Necrotic, Poison, Poisoned

Damage Threshold: 1

Weaknesses: Silvered/Holy Weapons, Magic

Speed: 0 ft., **Fly (Hover):** 60 ft.

Initiative Recovery: 3/Round

STR: 4 (-3), **DEX:** 10 (+0), **CON:** 10 (+0)

INT: 13 (+1), **WIS:** 11 (+0), **CHA:** 16 (+3)

Saving Throws: Charisma

Skills & Languages: Persuasion, Intimidation

Senses: Truesight: 5 ft.

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** -3, **(F):** +0)

Atk (S): +3, **Dmg (S):** +0, **Spell DC:** 16

- **Possess (5 Act): (C)**

Touch, DC 16 Charisma Save:

- **Failure:** The Specter enters the Target's Space, and can only be directly affected by Mental and Emotion effects, with others being forced to affect the Target primarily. The Specter then ends its Turn. After the Start of its next Turn, the Specter can take the Target's Actions as if the Specter had them, and any Feats to go along with them. This effect Ends when the Specter loses Concentration (made when the Target would be forced to make one), or the Target Succeeds on the Disrupt Action on its Turn.
- **Success:** The Target is immune to this Action from this Specter for 8 Hours.

- **Terrorize (2 Act):**

DC 16 Charisma Save:

- **Critical Failure:** Same as Failure, but the Condition and Damage are both doubled.
- **Failure:** The Target is Frightened 1, and takes 3 (1d4) Psychic Damage.
- **Success:** No effect.

Abilities:

- **Crippling Weakness:** When exposed to its Weakness, the Specter cannot use its Possess Action, though it doesn't automatically lose Concentration on it.
- **Ethereal Nature:** The Specter is always under the benefits of the Ethereal Condition, and can pass through solid objects as if they were Difficult Terrain. However, Creatures exploiting its Weakness are able to deal half Damage to it, even if they aren't Ethereal.

Vampire Fledgeling (Base)

Vampires are famous for their role within edgy plotlines and environments. However, it would seem that some people forget that they come in various forms, and not just minion and master. Besides, it's much more interesting for a vampire to seek out a cure on their own, rather than when their master allows it.

Variants for Vampires:

Vampiric Curse

If the Vampire attacks an Incapacitated Creature with its Bite Attack, the Target must succeed on a DC 11 Constitution Save or gain the Vampire Bleed.

Medium, Humanoid, Undead, Skirmisher

HP: 7 (1d10 + 1), **AC:** 13

Vulnerabilities, Resistances & Immunities:

(V) Radiant 1

(R) Cold 1

(I) Charmed, Necrotic, Poison, Poisoned

Damage Threshold: 1

Weaknesses: Garlic, Running Water, Sunlight

Speed: 40 ft., **Climb:** 40 ft.

Initiative Recovery: 4/Round

STR: 14 (+2), **DEX:** 16 (+3), **CON:** 12 (+1)

INT: 12 (+1), **WIS:** 12 (+1), **CHA:** 13 (+1)

Saving Throws: Dexterity

Skills & Languages: Occultism, Persuasion

Senses: Precise Smell: 30 ft., Darkvision 60 ft., Sunlight Sensitivity (Sight).

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +5, **Dmg (W):** +2, **(F: +3)**

Atk (S): +3, **Dmg (S):** +1, **Spell DC:** 13

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage. This Attack automatically Hits any Target that is Grappled by the Vampire, and restores Hit Points to the Vampire, equal to the total amount of Hit Points it removes, unless the Target is a Construct or Undead.

- **Claw (2 Act):**

Natural Melee Weapon 3 (1d4) Slashing Damage.

- **Hit:** The Vampire can attempt to Grapple the Target as part of the same Attack, spending Actions to do so.

- **Supernatural Charm (5 Act, Rech 6):**

DC 13 Charisma Save, 30 ft., one Creature that isn't Bloodied:

- **Critical Failure:** Same as Failure, but the effect lasts until removed, or the Target is reduced to 0 Hit Points.
- **Failure:** The Target is Charmed by the Vampire for 1 Hour, or they become Bloodied
- **Success:** No effect.

Abilities:

- **Bloodthirsty:** The Vampire has Advantage on Attack Rolls against Bloodied Targets.
- **Fatal Weakness:** When exposed to Garlic, the Vampire is Poisoned, despite its Immunity. When exposed to Running Water, it takes Acid Damage equal to its Level, and when exposed to Sunlight, it takes Radiant Damage equal to its Radiant Vulnerability.
- **Loadout:** When using this Monster, it is highly recommended to give it equipment.
- **Semi-Immortal:** When the Vampire is reduced to 0 Hit Points, it returns to the last place it took a Rest as an ethereal cloud of mist, unless it is exposed to its weakness when killed.

Zombie

Whether they're the centerpiece in a horror campaign, or just a random enemy summoned by a Necromancer (or Necrodancer if you're feeling fancy), Zombies are mostly problematic in large numbers. They can usually be found in haunted graveyards, or any location where death is common.

Variants for Zombies:

Infectious Bite

Infectious Zombies inflict Zombie Infection instead of Infection. Zombie Infection is the same as Infection, except any Creature that dies while under it becomes a Zombie of an equal Size with an equal number of Hit Dice.

Undying

Undying Zombies get the following Ability: Undead Fortitude.

The Zombie cannot be reduced below 1 Hit Point unless the Damage is Fire or Radiant, or from a Critical Hit. However, they become Stunned 1 when they would be reduced to 0 Hit Points or less.

Sprinter

Sprinter Zombies have a Movement Speed of 30 ft.

Medium Undead, Tank

HP: 10 (1d12 + 3), **AC:** 6

Vulnerabilities, Resistances & Immunities:

(V) Fire 1, Radiant 2

(R) Physical 2

(I) Frightened, Necrotic, Poison, Poisoned, Psychic

Damage Threshold: 1

Weaknesses: Burning

Speed: 10 ft., **Initiative Recovery:** 6/Round

STR: 12 (+1), **DEX:** 3 (-4), **CON:** 16 (+3)

INT: 1 (-5), **WIS:** 6 (-2), **CHA:** 1 (-5)

Saving Throws: Constitution

Skills & Languages: None

Proficiency Bonus: +2

Actions: Max 2

Atk (W): -2, **Dmg (W):** +1, **(F):** -4)

Atk (S): -3, **Dmg (S):** -2, **Spell DC:** 1

- **Bite (3 Act):**

Melee Weapon (N), 4 (1d6) Piercing Damage. This Attack automatically Hits any Creature that is Grappled by the Zombie.

- **Hit:** The Target must make a DC 16 Constitution Save against Infection (pg. 337).

- **Swipe (2 Act):**

Melee Weapon (N), 1 Bludgeoning.

- **Hit:** The Target must make a DC 12 Strength Save:

- **Critical Failure:** Same as Failure, but they are also Grappled by the Zombie.
- **Failure:** They are knocked Prone.
- **Success:** No effect.

Abilities:

- **Incompetent:** The Zombie cannot take any Action with the Manipulate Trait.
- **Mindless:** The Zombie is Immune to all Emotion effects, and automatically Fails all Saving Throws with the Mental Trait.
- **Relentless:** The Zombie ignores the Difficult Terrain Penalty of being Prone, though it still cannot Step while Prone.

NPCs

Cultist (Base)

Usually the cause of horrible things, these guys know how to party, provided you like rich colors, Magical deals, and the odd Humanoid sacrifice, depending on the crowd.

Medium Humanoid, Debuffer

HP: 5 (1d8), **AC:** 10

Damage Threshold: 1

Weaknesses: Holy Weapons or Attacks

Speed: 30 ft., **Initiative Recovery:** 2/Round

STR: 10 (+0), **DEX:** 10 (+0), **CON:** 10 (+0)

INT: 13 (+1), **WIS:** 12 (+1), **CHA:** 14 (+2)

Saving Throws: Charisma

Skills & Languages: Arcana, Occultism

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +0, **(F: +0)**

Atk (S): +3, **Dmg (S):** +2, **Spell DC:** 14

- **Hex (2 Act, Rech 6): (M)**
30 ft. Range, 1 Minute, the Target takes 4 (1d6) Necrotic Damage when they are Hit by a Spell, or fail a Saving Throw against a Magical effect.
- **Wrack (3 Act):**
Spell, DC 14 Intelligence Save, 30 ft. Range:
 - **Critical Failure:** Same as Failure, but Doubled Damage.
 - **Failure:** They take 4 (1d6) Psychic Damage, and roll Concentration against the Cultist's Spell Save DC.
 - **Success:** No effect.

Abilities:

- **Higher Power:** The Cultist uses Charisma for its Spell Damage and Healing Modifiers.
- **Loadout:** When using this Monster, it is highly recommended to give it equipment, replace Warlock Feats like Hex, or its Occult Spells.
- **Spellcasting (2/Short Rest): (M)** The Cultist can cast one of the following Occult Spells at 1st Tier, without spending Actions to Empower them: Bane (4 Act, C), Fear (4 Act).

Skilled Cultist (Base)

Medium Humanoid, Debuffer

HP: 23 (5d8), **AC:** 10

Damage Threshold: 5

Weaknesses: Holy Weapons or Attacks

Speed: 30 ft., **Initiative Recovery:** 3/Round

STR: 10 (+0), **DEX:** 10 (+0), **CON:** 10 (+0)

INT: 14 (+2), **WIS:** 13 (+1), **CHA:** 16 (+3)

Saving Throws: Charisma

Skills & Languages: Arcana, Occultism, Religion

...

Druid (Base)

Sometimes you need an old sage in the forest, or maybe a crazy old hermit. Why is it called Druid and not Sage?

Uh... I MUST FLY!!!

Medium Humanoid, Healer

HP: 5 (1d8), **AC:** 10

Damage Threshold: 1

Weaknesses: Breaking Natural Cycles

Speed: 30 ft., **Initiative Recovery:** 2/Round

STR: 10 (+0), **DEX:** 10 (+0), **CON:** 10 (+0)

INT: 12 (+1), **WIS:** 14 (+2), **CHA:** 13 (+1)

Saving Throws: Wisdom

Skills & Languages: Nurture, Survival

Proficiency Bonus: +2

Actions: Max 2

Atk (W): +2, **Dmg (W):** +0, **(F: +0)**

Atk (S): +3, **Dmg (S):** +2, **Spell DC:** 13

- **Druidic Grip (5 Act): (M)**

30 ft. Range, the Druid makes a Wisdom Spellcasting Check against the Target's Acrobatics or Athletics:

- **Success:** The Target is Grappled and Restrained to their spot.
- **Failure:** No effect.

If the Target is already Grappled, the Druid can move them up to 5 feet once a Turn for free.

- **Lightning Blast (3 Act): (M)**

30 ft. Ranged Spell Attack, 5 (1d8) Lightning Damage.

- **Wildshape (10 Act, 1/Long Rest): (M)**

The Druid either takes the statistics of any Medium Beast, or gains 6 (1d8 + 1) Temporary Hit Points, uses its Wisdom in place of Strength, Dexterity or Constitution, and a 2 Action Natural Weapon that deals 3 (1d4) of a Physical Damage Type. The effect Ends if the Temporary Hit Points are lost, or the Druid chooses to end it. This may also grant a new sense or Movement Type.

Abilities:

- **Loadout:** When using this Monster, it is highly recommended to give it equipment, replace Druid Feats like Wildshape, or its Primal Spells.
- **Spellcasting (2 Slots/Long Rest): (M)** The Druid can cast one of the following Primal Spells at 1st Tier or lower: Absorb Elements (3 React), Regenerate (4 Act).

Arcane Foundry

Price: 1,000 lbs (10 GP) of Stone + 1,000 lbs (100 GP) of Metal

Benefit: Over the course of a day, you can convert any number of Non-Artifact Magical Items or Materials into Essence by burning or boiling them in the Foundry, which destroys the Items.

The yield is equal to 1/5th the Item's GP Value in Essence with a corresponding Value.

Arcane Infuser

Price: 2,500 lbs (25 GP) of Stone + 500 lbs (500,000 GP) of Gemstones

Benefit: The GP cost for Enchanting Items with an Enchanting Station is halved, which also has its extra Ruler Point bonus increased to 2.

Additionally, if you have the specialized Materials to make a Magical Item or apply an Enchantment, you can apply that Enchantment to a pre-Enchanted Item, without increasing its Rarity, unless the new Enchantment is rarer than the old one.

Arcane Workshop

Price: 100,000 lbs (1,000 or 5,000 or 10,000 GP) of Wood, Stone, or Metal
(Also requires an exceptional source of Magical energy)

Benefit: When you Craft any Item, you may choose to turn it into a Common Magical Item that uses it as a base, at no additional cost.

You can now Craft Artifacts, provided no other copy exists, and it hasn't been Obliterated according to the conditions listed on the Artifact.

Finally, the Ruler Point Bonus from an Enchanting Station is doubled, after all other Bonuses.

Note: Some Consumable Artifacts such as Spell Scrolls and Potions cannot be Obliterated.

Armory

Price: 500 lbs (25 or 50 GP) of Wood or Metal

Benefit: If you enter Combat in your Stronghold, you can add one Hireling or Guard that has been posted here to the Combat (limited by what the GM can handle).

You also gain 1 Ruler Point for each Weapon or piece of Armor you add to this Facility, provided it is in good repair, or you have the corresponding Crafting Setup.

Finally, you can use Guard-based Actions using Ruler Points outside of your Stronghold, as long as it is in a location that you are raiding.

Blood Altar

Price: 1,000 lbs (or 10 GP) of Stone
(illegal or taboo in some settings)

Benefit: When Crafting a Magical Item using an Enchanting Station in the same Structure, if you deal Slashing or Piercing Damage to a Creature that isn't an Undead or Construct, you can replace 1 GP worth of Essence per effective Hit Point lost in this way, 10 GP during a Full Moon, or 100 GP during a Blood Moon.

The Blood Altar can only hold up to 100 Hit Points worth of Blood while not actively Crafting Items.

If an Item is left unfinished for 1 Minute, it inflicts Drained 1 on all Creatures within the Structure even if they're Immune, unless their Hit Point Maximum is already 0 or less, and removing an Item early wastes all progress.

Note: You can choose exactly how much Damage you wish to inflict to a Willing, Restrained, or Incapacitated Creature.

Crafting Setup: (Pick a Tool Proficiency)

Price: 100 lbs (5 or 1 GP) of Wood or Stone + a set of the corresponding Tools.

Benefit: When you Craft an Item using this Facility, all materials are considered Refined, and you are assumed to have the corresponding Tools for the setup.

For each Hireling posted here, you add a +1 bonus to Craft any Non-Magical (or Magical Consumable) Item, to a maximum of the highest Proficiency Bonus of any Hireling, in the corresponding Tool.

Magical Items can be Crafted if you have the special materials involved, such as Dragon Blood for Elemental Enchantments.

The Crafting Setup provides 1 Ruler Point when provided with a Recipe, or 1 GP worth of the corresponding Material for each Hireling posted at this Facility (material is consumed).

Enchanting Station

Price: 500 (25 or 5 GP) of Wood or Stone + 250 GP of Gemstones.

Benefit: You can Craft Magical Items of up to Common Rarity without using any special or required Items, assuming you provide gemstone dust or Essence equal to half the value of the final Item, and the base Item.

If you attempt to craft Uncommon or rarer Items, the amount of gemstone dust required doubles for each rarity above Common.

You can also strip the Enchantments from any Non-Artifact Item, which preserves them.

While at least 1 Skilled Hireling is posted here, any Ruler Point rewards are treated as if you provided 1 additional Ruler Point to each purchase, provided you spend at least 1.

If the extra Ruler Point(s) would re-purchase an effect, the extra effect doesn't trigger this benefit.

Hospital

Price: 1,000 lbs (200 GP) of Herbs + 100 lbs (GP) of Metal

Benefit: While a Skilled Hireling is posted here, no Hirelings or Guards die from Combat. Also, any Creature that Rests here cannot contract any Affliction.

For each Hireling posted, you can spend 1 Ruler Point to apply one of the following to a Creature within the Structure:

- Regain 1 Hit Die.
- Reduce any Condition that reduces on a Full Rest by 1, even if inhibited by an Affliction.
- Make a Saving Throw that would be Triggered by a Long Rest, such as against an Affliction (the result on this can be ignored by choice).
- Increase the result on any Constitution Saving Throw or Medicine Check by 1.
- Regain Hit Points equal to the maximum value on their Hit Die (the die isn't expended).

Kitchen

Price: 500 lbs (5 and 50 GP) of Stone and Metal + a set of Cook's Utensils
(*This Facility can replace a Crafting Setup that requires Cook's Utensils, gaining an equivalent discount*)

Benefit: This facility confers all benefits of a Crafting Setup configured to Cook's Utensils.

At the Start of Combat in this Stronghold, you can distribute a number of Action Points between participants of your choice, equal to the number of Hirelings posted here, provided at least one of them is a Skilled Hireling.

Furthermore, any food-based effects that are provided through this Facility lasts for 1 week, or until replaced.

Library

Price: 250 lbs (12.5 GP) of Wood

Benefit: When looking for information, you can spend 1 Ruler Point to increase the Degree of Success by 1.

Additionally, you gain 1 Ruler Point per Skilled Hireling Posted here whenever you allow a Student to study at your Stronghold.

Lodgings

Price: 100 lbs (5 and 50 GP) of Wood and Fabric

Benefit: The Structure's Capacity is doubled additively, and all inhabitants of the Structure have the Quality of their rests improved by 1.

You can multiply the cost by 10 to improve the Quality further, to a maximum of 20 (each one is considered an upgrade).

If you have a Crafting Setup, you can spend 1 GP of the corresponding Material per Skilled Hireling posted at that Crafting Setup, to gain an equal number of Ruler Points.

Mine/Garden

Price: 100 lbs (5 or 1 GP) of Wood or Stone

Benefit: You can spend 1 Ruler Point to supply the materials for one Non-Magical Item crafted within your Facility, for each Hireling posted here.

If this Facility is designed to supply Construction Materials, it can also use Ruler Points supply the Gold Cost, at a rate of 1 GP per posted Hireling.

Soul Trap

Price: 10,000 lbs (50,000 GP) of precious metals and 1 lbs (500,000 GP) of high-grade gemstones
(illegal or taboo in some settings)

Benefit: When a Creature dies within the Soul Trap, you can turn a Non-Magical Item into a Magical version, provided they meet the minimum number of Effective Hit Dice required (Summons provide half value):

- **Common:** 1 Hit Die
- **Uncommon:** 5 Hit Dice
- **Rare:** 10 Hit Dice
- **Very Rare:** 20 Hit Dice
- **Legendary:** 40 Hit Dice

You can also choose to gain Ruler Points instead of enchanting an Item.

Special: A Lich can spend Ruler Points equal to their Level to gain a Soul, if an equal or greater number of Skilled Hirelings are posted here.

Stable

Price: 250 lbs (12.5 or 2.5 GP) of Wood or Stone

Benefit: While operated by a Skilled Hireling, you can spend 1 Ruler Point to double the Movement Speed and Carrying Capacity of a single Mount for up to 1 Week, but only while mounted.

This cost is doubled for every Size the Target is above 1.

Each additional Hireling posted here repeats the effect once for free.

Storefront

Price: 250 lbs (2.5 GP) of any Construction Material

Benefit: As long as a Hireling is posted here, you can spend 1 Ruler Point to purchase any Item that would be available in the local market, or spend GP to purchase any Item that is available to your Crafting Setups at market price (minimum price of 25% after discounts).

If a Skilled Hireling is posted here, you can spend 1 Ruler Point to sell one Item immediately for each Skilled Hireling posted.

Homebrew Aids

It's not enough to just tell you what all there is and isn't, then leave you with a random assortment of options that you may or may not use.

As you well know by now, we want anyone and everyone to take this system and do something incredible with it! But in order to do that, many people need help, or at least something to get them kick-started.

Rules of Thumb

First off, it's the GM's game, and what they say goes, with room for Players to recommend ideas and give feedback. If the GM doesn't approve a Player's Homebrew for a particular Campaign, it is Null and Void for that Campaign.

Also, Homebrew is usually subject to change, even if accidental, so ask if something changed, rather than calling out inconsistent rulings immediately.

As for actually making homebrew, there are a few things to consider:

1. Does it already exist in the game? If so, consider using, repurposing or changing the original to fit your needs.
2. Is it unique? If not, you'll again want to consider either basing it off of what already exists.
3. Is there a reason to add it? If not, you may want to refrain from designing it in depth, or save it for a more clear use case.
4. Does it feel cool or useful as you implemented? If not, see what you can do to make it cool. It helps to make your homebrew more flexible.
5. Try not to render a build obsolete if even one of the Players is using it, without at least talking to said Player(s) first.
6. KISS: Keep It Simple, Silly.
7. Don't go overboard. Just because you can add Wish at Level 1, doesn't mean it's a good idea. Especially not in a renewable way.
8. Iterate. As you play with it, you will see ways to make it easier, simpler, and more fun. And don't leave feedback in the trash without sorting it.

Also, here's some general tips that can help you homebrew more easily:

- The Average Value for any die roll is the Size of die plus 1, divided by two. Just remember to multiply by the number of dice, and round up afterward.
- When making Action Costs, remember the following: a Weapon with a d4 usually takes 2 Actions, d6 takes 3, d8 (and versatile d10) takes 4, and d12 takes 5.
- When porting something from other d20 systems with the same bases, remember that you don't have to change everything. In fact, you might even be able to keep most of it. Schmungeons and Schmagrons and Pathfinder are two such systems, though both may require recalculating values such as HP, AC or Attack Bonuses.
- Using a single Damage Die per Resource expended is usually a good rule of thumb to follow.
- Healing should be difficult to perform consistently. If you can heal from an easily renewable source like a Cantrip, you shouldn't be able to get back to full health so easily. Otherwise, taking Damage loses all meaning, until you lose the last Hit Point.
- Refer to provided rules if you need guidance on something, such as which Saving Throw to make something, or whether to do a complicated calculation, versus an Ability Score for the Difficulty Class.
 - You may also find the effects you are looking for in a more practical use. The better you know your rules, the less searching you'll have to do.
- If something you make would remove the agency of a Player (such as Mind Control), be sure to come up with an accessible way to re-enable that agency, or make it fun, such as with the Unpickable Lock on pg. 417!
- Synergy! The easiest way to make something cool, is to allow it to function with other Actions and Feats in a constructive way. In fact, that's what Traits are intended to help with, as it's easy to reference a single Trait, and suddenly have a hundred unique and unexpected use cases.

Afflictions

Afflictions are important, and even come up fairly regularly in Mages & Mansions. But since other systems don't always do diseases justice, or make them so brutal that they can stop an adventurer cold, if not kill them outright, it's often difficult to see them elsewhere.

When designing an Affliction, remember that it's not supposed to be a short-term death sentence, but rather a long-term problem that progresses into a bigger issue if not handled in time. So while you can have an Affliction that renders an Adventurer bedridden, it should take a few days before it starts to threaten a Creature's life.

Infection is a good starting point for most diseases, as it encompasses most illnesses that your average Adventuring Party would encounter, and is both threatening enough to make it worth removing, and mild enough that it can be ignored. It also helps powergamers get XP without overpowering their weaker allies.

<Affliction Name>

Traits: <Traits>

Source: <Causes>

DC: <Reference DC>

effect: <effects of the Affliction>

End Condition: <How to get rid of the Affliction>

Ancestries

When making an Ancestry, first consider what they're known for, such as a Human's sheer spite of fate. Then, it's a good idea to come up with a few Feats that fit the theme, or compliment that power.

Generally speaking, five Feats is a good baseline for any Ancestry, with one as a 5th Level Feat. But it's okay if you can't come up with enough Feats, as long as it's thematic.

A couple other things: Not all Ancestries know Common, and may not have proper hands either. For the former, it's a great opportunity for Roleplay, while the latter provides some unique challenges. Just discuss this with any Players, like the GM.

<Ancestry Name>

<Description>

Ability Score Increase: <+2 to a pre-determined Ability Score>, +2 to one other of your choice.

Base HP: <4, 6, 8, 10 or 12>

Movement Speed: <Any multiple of 5>

Size: <Small, Medium and Large are recommended>

Creature Type: <Type(s)>

Languages: <Any Language whether included or not>

Ancestry Abilities

<Ability Name>

<Ability Description>

Backgrounds

When designing a Background, one thing to remember is that the Background is who you were and the training you had, not necessarily who you are or will be.

But also remember to beware that some Backgrounds come with innate issues, such as a “Chosen One” Background, so consider what kind of behavior such a Background would entail, then include suggestions to avoid the bad behaviors.

For example, if you do make and/or use a “Chosen One,” you could do something like being chosen for a lie, or training to become better than the real “Chosen One.”

Finally, beware of adding a Non-Utility Feat as the bonus for a Background. It may seem like a good idea, and can be fantastic for high-powered or level 0 campaigns, but it can also make one Background feel like an obvious pick.

<Background Name>

<Description>

Ability Scores: <+2 and +1 Increase>

Proficiencies: <2 Proficiencies>

Equipment: <List basic equipment and starting gold>

Feat: <Utility Feat>

Classes

Because of how Mages & Mansions is designed, you may find there's not much reason to design your own Class, unless you have a really novel idea.

If you design your own Class from scratch, it's recommended to have about ten Feats to start with, one of which should be a 5th Level Blast.

Another thing to consider, is what kind of unique abilities your Class focuses on, and how other abilities might compliment them.

Also important are Class Resources (Should be equal to your Level). How do you regain them? How do you spend them? And on this topic, what Ability Score(s) do they focus on for Feats, and Action Recovery?

(Template on next Page)

Homebrew Class

<Description>

Ability Score Increase:

+2 <to primary Ability Score (up to 16), with choice when multiple are involved>

Hit Dice:

<d4, d6, d8, d10 or d12> or <Average Value>
(<Max Value> at 1st level)

Skills:

<At least Two> of the following (+Int Mod, Min: +0):
<Skills, and Tools>

Saving Throws:

<Primary Ability Score> + one of your choice.

Weapon Proficiencies (Pick Three from the following lists):

<Weapon Lists>

Armor Proficiencies:

<Armors>

Class Initiative Modifier:

<Primary Ability Score and/or Secondary Ability Score>

Archetype Requirement:

<Special Conditions>

Signature Abilities

<Ability Name>

<Ability Description>

Feats

Ah, now this is where things get SPICY!

When designing a Feat, you can do just about anything from flight to Spells, to a bomb that can level mountains!

However, some care must always be taken when designing such a Feat, lest you run into problems.

First, you should avoid making arbitrary Restrictions, or adding too many at a time. Because if a Feat is strong enough to require several Restrictions in Mages & Mansions, then maybe it should be broken up into multiple different Feats.

Next, a Feat's purpose or use-case should be clear and obvious with minimal context, or give room for the GM to help you use it more reliably. Because nothing's worse than having ten Feats that only come up when the GM points out something oddly specific to you, or worse: needing to rely on the GM for all use-cases.

When classifying Feats, it's easy to make everything an Edge and call it a day. However, you should ask yourself if its effects are useful outside of Combat (Utility), if it has a long-term benefit that doesn't end easily (Edge), if it is a significant drain on any resources such as Actions (Burn), or if it's exceptionally costly (Blast).

Now for Traits... You don't actually need to worry about Traits other than the main four of the previous paragraph, as that's more to help with organization, and synergy. So instead of worrying about them, add obvious ones like Attack, Saving Throw and any Damage Type, then add Traits as questions are asked.

Lastly for DCs, you usually want to set the DC equal to Spellcasting DC for Magical effects, or an Ability Score to keep things simple, yet dynamic. The same applies to Spells that come from an Ancestry.

<Feature Name>

Traits: <Traits>

Actions: <Action Cost if any>

<Feature Description>

Items

When you design an Item, start by thinking about what it is supposed to be based off of, such as a bowl or helmet, and see if you can come up with a good baseline there.

Next, check to see if it should have any unusual or special properties that come from more than simple creativity, such as being useful for Grappling someone without being adjacent to them, or increasing the amount of Healing available to someone.

As for Price, Weight and so on, this is something you'll have to figure out, though you can base it off of similar Items.

Once you have your base Item, now's when you can come up with whatever Magical properties it has, if any. On this note, it's recommended to either use a Creature's Ability Score, or a flat DC for Saving Throws or Skill Checks.

<Item Name>

<Quote if any>

Traits: <Traits>

Weight: <In lbs (Occupied Space)>

Cost: <Cost>

Complexity: <Usually 5-30>

Material: <What it is mostly made of>

Actions: <Only if needed>

Duration: <Only if needed>

Damage: <Only if needed>

<Item Description>

Vehicles work similarly, except they don't have an Action Cost, or Damage. Instead, they list their Actions and Manned Actions, as well as Hit Points, while Creatures are referenced, along with any needed tweaks or modifications.

It's easiest to modify a pre-existing Vehicle, but just in case you need to make one:

<Vehicle Name>

Traits: <Traits>

Weight: <In lbs (Occupied Space)>

Cost: <Cost>

Complexity: <Usually 5-30>

Material: <Not applicable for Creatures>

HP: <Value>

<Capacity and Carry Weight>

<Actions and Manned Actions>

Subclasses

Sometimes known as Specializations, a Subclass is the way to many abilities that some consider to be... unusual.

When designing a Subclass, you should consider what it is that makes them special above all others of the same Class. Whether it be an unnatural Charm, or tendency for destruction, a Subclass should strive to appeal to one specific idea.

Much like an Ancestry, a Subclass usually prefers to have at least one 5th Level Blast Feat, and two or three other Feats to go along with it. And as for the Subclass itself, remember that it should be worth taking on its own, as it does require a Class Feat, and you can only take 1 Subclass every 10 Levels or so.

<Subclass Name>

<Subclass Description>

Bonus Proficiencies: <Any Two>

Bonus Spells: <If needed, up to 6>

Innate Feats:

<Ability Name>

<Ability Description>

Additional Feat Options:

<Subclass Feats>

Spells

Spells are really cool for Spellcasters to play with, but it's also difficult to make Spells strong, without making them too strong.

Example: It's really easy to make a Spell that does say... 8d6 Damage of the most commonly Resisted Damage Type in a 20 ft. Radius, and expect the Resistances of most Monsters make it settle nicely into 3rd Tier.

Except that's a very poor way to go about it. Relying on how other parts of the system use a lot of one rule usually results in an outliers that are way too strong if handled incorrectly.

Instead, you should consider that most instant Spells usually deal a number of Damage Dice equal to its Tier, while Cantrips only use 1.

Additionally, you don't want a Spell to deal lots of Damage, AND have a very unique or problematic effect, unless it is easy to shrug off and avoid, lest it feel unfair.

Remember: Monsters and Players have access to the same collections of Spells.

Also, you may have noticed that the number of Spells in M&M is very frontloaded. If something seems like it would be cool to have early on, it might be a good idea to make a lesser version for a lower Tier, that Empowers to the intended strength, without needing an entirely new Spell for the weaker version.

<Spell Name>

Traits: <Traits>

Lists: <Arcane, Divine, Occult, Primal>
<School & Tier>

Actions: <Usually about 3 + Spell Tier>

Components: <V, S, M (List), F, C>

Range: <Range>

Targets: <What it can affect>

Duration: <Remove if Instant>

<Spell Description>

Monsters

Ah yes, the can of Wyrms that is Monster building. The one thing that tends to be incredibly difficult for even experienced Game Masters is Monsters, especially when you have to figure out how much they're worth based on "difficulty."

One of the more controversial issues with Mages & Mansions is that there's no Challenge Rating. This makes Monster Design a lot easier, but as mentioned on pg. 94, it also makes Encounter Building much harder.

Another thing that it makes harder, is converting Monsters from other systems, though this can vary depending on the Monster and System.

So when adapting a Monster from another system, you may have to make some adjustments to account for different rulesets, such as Pathfinder Monsters using their Level for Proficiency Bonus, and Schmungeons and Schmagrons using Creature Size for Hit Dice and Damage.

Another thing to know when adapting Monsters, is that Ability Scores may be artificially inflated or deflated in order to scale Damage, Health, or other values, so be wary about monsters with a +10 to their Dexterity or Strength Modifiers, especially if they're Tiny or Smaller (e.g. Will-o-Wisp).

As for Damage Thresholds and Weaknesses, a Threshold equal to the Monster's number of Hit Dice is a good baseline, while at least one Weakness should be consistent to fulfil, even if a Creature needs to go on a long quest, find an Item/McGuffin, or complete a convoluted sequence of events to do so.

If you want a variety of monsters, or you want to tweak one you made really quickly, you can mash together a Generic Statblock and a Monster Statblock in order to get a brand new one. You can take the highest values, the lowest values, or somewhere between for any kind of Monster you come up with!

For Creature Types, there are: Aberrations, Beasts, Celestials, Constructs, Dragons, Elementals, Fey, Fiends, Humanoids, Plants, and Undead (plus any extras you decide to include).

For Monster Types, there are Bruisers (STR), Skirmishers (DEX), Tanks (CON), Trappers (INT), Casters (INT), Spotters (WIS), Healers (WIS), Buffers (CHA) and Debuffers (CHA)

Now Lairs and Loot are both optional, but can make the Monster much more interesting to fight. For Loot, you mostly just need to add any special materials or items the Monster would drop, or any special abilities that could be gained after defeating them.

When it comes to Lair Abilities, think about where the Monster would live, and how they'd build their home. Then think about either a few things that anyone could do while within the Lair, or that would be caused by the Lair itself, or something kept in the Lair.

Sample Adventures

Everyone needs a starting point. These shorter Adventures should be enough to get a solid start to turn into a memorable Campaign with lots of twists, turns, questions, nat 1s, giggles, sorrows, and lessons for any aspiring GM!

Additionally, these Adventures will not tell you every single detail, as you are encouraged to make them your own, as with everything else in this book (should've guessed). Afterall, animals piloting a spaceship could be a fun idea.

But if you want to make a quick adventure to get your feet wet, don't be afraid to use the standard rat exterminator service, goblin camp, or dungeon crawl to start your game. Because good starts are often cliché for a reason.

REMEMBER: If you start in the action, you can break the ice a lot more easily than if you have everyone meeting up "randomly" in a tavern. Plus, that shady figure in the corner won't have to rely on someone going over to talk to them.

Bandits in the Woods

This Adventure focuses on a group of Bandits. Perhaps the Party was hired to get rid of them, or joined these Bandits. A nice and simple start for a brand new group of Adventurers.

This Adventure is well suited for a Fantasy Campaign, but can easily be adapted for a Modern or Sci-Fi setting.

There are no special rules for this Adventure.

The Adventure opens on an Ambush, whether the Party is being Ambushed, or setting up the Ambush.

If the Party is setting up the Ambush, give them the surface details of what they're raiding, such as a Magic Item that isn't as well hidden as it should be, an unusual number of Escorts for a casual shipment, or an open window in a hideout.

If the Party is being Ambushed by Bandits, don't make them the Target, or they will almost certainly be killed due to the Action Economy, unless they're over-Leveled. Instead, focus on having the Bandits taking an Item from the Party, a Vehicle, or some location that the Party may be guarding.

Any Bandits and Escorts use the stat blocks for Guards, Mages and Thieves, while Merchants and Nobles use Hireling as a base, each being combined with a corresponding Humanoid stat block.

As far as Enemy Count, try to keep the number of Enemies to some amount that is less than the number of PCs, and allied NPCs if they Party is defending, and vice versa if attacking.

If the Bandits Succeed, then the Defenders need to give chase, or otherwise recover something that was stolen like a Magical Item, Monster Egg, or even one of the Merchants.

However, the Bandits will be going on the defensive, and just need to survive long enough to open their escape route, and block the only avenue to both track and follow them.

If the Defenders Succeed, then they need to hurry, as the Bandits are most certainly going to set up another Ambush. But this time, they'll bring backup.

In a second Encounter, the Bandits won't get the benefits of Ambushing, but up to 4 of them would be working on setting up the escape route (finishing on Round 5), and getting rid of the 4 would be considered a loss for the Bandits (remaining Bandits Surrender if they can't flee).

Once this little Adventure is over, you could expand on who the Bandits were working for, or what it was that they wanted to steal.

Perhaps they were working for a warlord who wants some exotic Monsters for their army, a noble that wants a Magic Item that didn't get sold to them, or maybe they were just cultists that were looking for sacrifices they need for a Ritual.

Caught in a Warzone

In this Adventure, the Party finds themselves in the Crossfire between two warring parties. Perhaps the war has come to their hometown, or is being waged underground. Maybe even in secret! Who knows?

This Adventure is well suited for a Fantasy Campaign, but can easily be adapted for a Modern or Sci-Fi setting.

During Combat, if a Creature Ends their Turn outside of Cover, or without Dodging, they take 1d10 Piercing Damage.

Alternatively, if this ends up doing nothing to the Party, one Spell or Item (such an Arcane Artillery Spell or a Bomb or Grenade) Targets a space in the area. Once it Hits, that Terrain at the impact point either becomes Difficult Terrain, or ceases to exist.

Also, if the Party decides to stand their ground in any Combat, 1d4 new Enemies show up every Round until no more than 25 Monsters have been added in this way, or you see that the Party needs something to mix it up.

This Adventure opens with the Party in, or on some kind of Structure, or in a battlefield. Whether they are attackers, defenders, or “Milicent Bystander,” they see things going poorly for them, though not necessarily for their side of the battle as a whole.

This Adventure starts in the middle of a Combat with a number of Enemies with NPC stat blocks, equal to the number of Party Members and their Allies (if any). However, more are technically on the battlefield, they just aren’t focused on the Party.

The goal is to get out of the Battlefield alive.

At Round 10, or if the Party manages to hold their ground, something big like a Dragon, War Machine, Tank, Battle Mech, or whatever fits best for your setting makes its presence known, and arrives 30 seconds (5 Rounds) later.

If at this point the Party still doesn’t budge, then plot out cones, lines, and other Area of effects that are clearly telegraphed, and the Party can perform one of two objectives: Survive, or Escape.

If the Party escapes and you have time leftover, then perhaps a friend, commander, collection of refugees, or a barricade forces the Party to talk their way out, come up with a disguise or something to escape to true safety long enough to watch the aftermath.

You could even do something like a cliff or some other Terrain-based obstacle depending on what kind of abilities they have access to.

If the Party decides to Stand their Ground, consider establishing a win condition they can push towards, such as a military base, an explosive, or a commanding officer.

After this adventure, you can expand on the aftermath of the war, or the Party might seek to find a way to stop the Big Creature or whatever it was, get back to a sense of normalcy, or otherwise interfere with the war.

Shapeshifter Catastrophe

In this Adventure, the Party has been transformed into woodland Creatures. Perhaps it was just the Party stumbling onto a Curse, maybe they woke up like this after a night at the inn, or maybe it's just that the world is like this.

This Adventure is well suited for a Fantasy Campaign, but can work for a Modern or Sci-Fi setting, with some effort.

This Adventure uses the "Your Highness, I Shrunk the Party" Variant Rule on pg. 93, and has all the Party Members described as woodland Creatures such as Squirrels, Cats, Birds, Lizards, and so on.

Of course you can use any Location, but to start off this Adventure, the Party starts off in an abandoned cabin (as an example). However, they are all looking for the same thing: an Item, Object, Spell or Person that may be useful to them or whoever they're working with (the McGuffin), whether to return to their normal form, or some other purpose.

Exploration of this Cabin follows City Crawl rules with the following basic components: A locked Container, a Trap, and a loose pile of materials that could be used for all manner of contraptions.

The Secrets are as follows: A Key, a predator, and the McGuffin.

At the End of each Round, the Predator secretly moves to a random space on the map, but no further from the McGuffin.

The goal is to locate and claim the Item, either before the predator shows up, or before anyone else can. Though if the Predator locates the mcguffin first, then they retrieve it without a second thought, or linger close enough that the Party can't retrieve the McGuffin without a distraction or a fight.

The Predator can be any kind of Beast. However, it might also be some NPC that is also trying to get the mcguffin, a Fey looking for something shiny, or maybe even a mini-Elemental that just so happens to be in the area.

The Key is something that either enables access to the McGuffin, something that is required in order to use the mcguffin for the intended purpose, or even unlocking a bonus reward of some sort, such as a Feat or a Magic Item.

As for the Encounter, the Party might fight the Predator, the McGuffin, or even each-other (as long as everyone agrees to this in advance).

When you finish this Adventure, you may decide to establish a greater plot, such as one where the Party needs to become Human again (or whatever their original Ancestry is), return other Beasts to their original forms, discover what happened to their Ancestors, or for a bigger Challenge: prove that even the smallest of heroes can defeat the greatest threats.

Just don't get too squirrely halfway through. You might go nuts.

Escape The Laboratory

In this Adventure, the Party is trapped inside a Laboratory, with no clear way out. Perhaps they were experiments themselves, researchers, or assistants. One way or another, they'll have to take risks on their way out.

This Adventure is designed for a Modern Campaign, but can easily be adapted for a Fantasy or Sci-Fi setting.

During this Adventure, the Party will only have time to take Breathers, which they can benefit from after just 1 Minute during this event.

You may also consider granting extra Feats and Bleeds during Character Creation, or when introducing this Adventure, to reflect the experiments that have been performed.

The Adventure starts in the middle of a lab or testing chamber. Perhaps there is an Encounter with a cross between two monsters, or with the researchers (Guards and Mages possibly?), or a maybe there was a sabotage attempt that has resulted in an evacuation.

On their way out, the Party may have to bust down doors, bypass security, evade rubble, fight mutants (just throw a Humanoid and Aberration or something together, and you might make a cool monster for this).

Along the way, the Party may find a few Homebrew Items that don't last very long, Potions that only last 1 Minute each (pg. 403 for ideas), but also Target an area, and other cool things that the Party can use to either escape, or fix things.

In the end, We'd suggest making this Adventure more of a timed Puzzle, than a Dungeon, where the Party must get out before time runs out, or stop an emergency.

After this Adventure, you may decide to expand on what the Laboratory was trying to accomplish, the methods they used, or who tried to sabotage the facility.

You may even decide to implement some way to give the Party cool, wacky and weird abilities from various Monsters as the game progresses.

School's in Session!

In this Adventure, the Party has discovered something about their school, and need to get to the bottom of it, before the end of the day. Problem is: they're just students, and still have classes to attend.

This Adventure is designed for a Modern Campaign, but can easily be adapted for a Fantasy or Sci-Fi setting.

During this Adventure, the Party must either go to pre-determined locations in order, or avoid being caught by anyone that might snitch on them and send them to detention.

If a Party Member is ever sent to detention, they are unable to act for the rest of the Hour, unless successfully sprung by another Party Member.

The Adventure starts somewhere in a school building as the Party notices something that could mean some very bad things, such as a forbidden ritual underneath the school, the ghost of a fellow student warning them, or even just accidentally walking in on someone that stole the principle's face.

The Party will have to find a way to either warn enough students convincingly enough to save them, reveal tidbits of information until they can solve the mystery, or take out the imposters before its too late and the real teachers get eaten by aliens or something.

Maybe after this Adventure is over, you could have the Party continue to pull apart a larger story that involves monsters, or aliens, or even a secret invasion that the Party must stop, all while funding their education.

You could even have the Party gradually learning new Feats from their teachers as they reveal more and more of a secret and more advanced plot, and spending more gold as they extend their studies so far that they become the top students, even when compared to teachers.

Zombie Survival

In this Adventure, the Party finds themselves in a dangerous location, such as an Abandoned House. Maybe they're there on assignment, setting up a base, hiding from an enemy, or... maybe they're about to find out?

This Adventure is designed for a Modern Campaign, but can easily be adapted for a Fantasy or Sci-Fi setting.

During this Adventure, the Party doesn't gain Experience. Instead, they pre-select up to 10 Class Feats and 5 General Feats, keeping them separate from the Feats they already have.

Once a Wave Ends, they can choose one Class Feat to reveal, then roll and add one Hit Die to their Hit Points and Hit Point Maximum, or choose a General Feat to reveal.

Also, the Party can spend up to 1 Hour preparing between Waves, treating a Breather as 1 Minute, a Short Rest as 10 Minutes, and a Long Rest as 1 Hour (Or they can simply start with fully stocked Healer's Kits for free).

Might I suggest setting up some Cover if you aren't Resting or Exploring?

The Adventure begins with the Party in a small Room with at least one Zombie for each Party Member, and likely even more than that.

After Combat however, they discover that there are more Zombies throughout the structure, or approaching slowly. So they have time to guard their position.

During this Downtime, the Party can continue to explore the building, providing them with tougher Combats, but also giving them more corridors and supplies to fight with if they can survive.

With each wave however, the Zombies become tougher. Some simply have extra Hit Dice, others may have their Size increased, and others still have been combined with other more powerful Creatures, like a Guard, Mage, Dragon, or worse: an Elite Mage Guard Dragon!

After some time, you can have it so that the Party managed to clear the area of enough undead to mitigate further risk of attack, or maybe clear an opening for escape.

Perhaps to continue this Adventure, you might decide to have the Party operating a safe house, running from city to city in an effort to avoid endless hordes, or tracking down a necromancer that seems to be controlling all the Zombies.

Alien Invasion

In this Adventure, the Party must deal with an Alien Invasion. Whether it's just beginning, or in the middle of happening, they must either Survive or Stop the Invasion.

This Adventure is designed for a Sci-Fi Campaign, though with some work, you can probably adapt it for a Fantasy or Modern setting.

There are no special rules to this Adventure.

The Adventure starts in some city environment, or possibly on an alien planet. Who knows? Maybe you're protecting some Aliens from invasion (Votids on pg. 514 with Guard Stats are dangerous, but work great as invaders)!

You may treat this as a City Crawl where on the GM's Turn, Aliens will attempt to destroy/capture one space if left alone. They take 3 Hits to beat, but deal 1d12 Piercing in exchange (if the Party doesn't actually fight in proper Combat).

However, a destroyed space grants no loot, except for Loot from the Aliens, which might be Sci-Fi Items, or important components required to discover how to make Sci-Fi Items.

However, every once in a while (or when the Party engages in Combat), the GM chooses one space to house a Transport Ship, which the Party can hijack in order to sabotage the invasion, potentially ending it by getting onto a mothership or something.

However, the Party also Succeeds if they manage to rescue every space from the alien threat, or if they rescue a certain number of spaces before the aliens retreat.

Lastly, the Party might Fail if at least half of the spaces become destroyed, or if they end up evacuating the area.

But once this Adventure is over, you might continue from it by having the Party learn more about the invaders, and possibly even take the fight back to the Aliens to drive them away. Possibly for good.

Are You "Faster Than Light"?

In this Adventure, the Party has important information, whether it's related to someone they love, a government they support, or someone else, they must travel quickly to avoid capture, and ultimately save the day.

Warning: This Adventure will probably take more preparation than the others.

This Adventure is designed for a Sci-Fi Campaign. However, this will likely require a significant amount of rewriting or justification in order to use this in a Fantasy, or Modern setting.

In this Adventure, the Party can spend no more than 8 Hours in a given sector before they start wasting time.

This Adventure starts with the Party knowing about an emergency such as an impending invasion, dwindling supplies, or perhaps a supernova that will wipe out an entire planet if they don't get to it in time. Either that, or they just work in something like a delivery service that has a 7 days or less guarantee (or something).

One way or another, they must execute a number of FTL jumps based on how much time you've got, and how many encounters you're willing to prepare and/or run.

In these encounters, the Party may have to scavenge for FTL Fuel Canisters, stop to gather food, fix their ship, evade pursuit, or otherwise manage time and resources before the clock runs out.

Perhaps after the Adventure, the Party continues providing service to the deepest darkest reaches of the galaxy, no matter how dangerous it gets! And possibly even defeating cosmic threats along the way.

You could even have a pizza delivery service that gets hired as secret agents to gather information, and bring supplies to prisoners of war, deep dark dungeons, and other secluded locations.

Blackout in the Void

In this Adventure, the Party is out of power in a hostile environment. They must restore power as soon as possible. It may have been cut by a lost or hungry animal, or by someone with sinister intentions.

This Adventure is designed for a Sci-Fi Campaign. However, this can work just as well for a Modern Setting. A Fantasy Setting will require some work to make this work.

There are no special rules for this Adventure.

The Adventure starts with the Party being in an isolated and deadly location, such as a planet with a toxic atmosphere, or in a space station.

They have access to a limited amount of protective gear that may need basic repairs. But, it's just enough for the Party to take up this job. If they refuse, they eventually die as life support fails.

They must perform a City Crawl (adapted for the environment), where they can only explore one space each. After each Round, consider describing what all the Party finds, as you reduce their remaining time.

Upon reaching the problem area, the Party may need to investigate to find what exactly happened, and how to fix it. They may also need to find the tools they need. But someone or something may try to stop them.

Once this Adventure is finished, perhaps the Party could become an Emergency Rescue Team, pursue the person who cut the power (and find out why as well), or begin an undercover career.

Back of the Book

That's it! There are a few things in the back such as an Initiative Tracker and Character Sheets, which you are free to Print copies of.

Perhaps in the future, there will be more content for this system, and there are many cool things to do. However, as time and labor are short, these may take years to come out. Unless you're in the future. If so, hi from the past!

But please, share this book with whoever you like, or "steal" any content for your own games. And until the next book comes out, we wish you luck with your games!
